## ROYAL RED SINGLE COMB RHODE ISLAND REDS

Make the most sensational win at Chicago, 1912, winning four of a possible six first prizes or twice as many as all other exhibitors in the class.

My first prize and champion S. C. Rhode Island Red Pullet was one of the features of the show and was awarded Club Special for best colored female.

My Royal Reds were easy winners of Association \$50.00 Cup for best display with almost as many points as all other competitors together.

Royal Reds won 1, 3, 4 Cock; 2, 3 Hen; 1, 2, 3 Pullet; 1, 2 Old Pen; 1 Young Pen. This winning will prove the greatest triumph of the present show season and proves beyond dispute that Royal Reds are one of America's leading strains.

I have over 1,000 head of superb quality stock for sale. Exceptional bargains in cocks, cockerels, hens and pullets. Winners for any show in America. Catalogue free.

**F. E. Harrison, Box 30, Menominee, Mich.**

## "Just Like Tecktonius!"

but it can't be helped. "Every little added to what you got makes a little bit more"—and

## Tecktonius S. & R. C. Buff Leghorns

are bound to continue at the "head of the procession," as America's distinctive and superlative "best general-purpose fowl." This because these unequalled birds have earned their title, and continue year after year to successfully defeat all contestants. At the big Chicago Poultry Show of December 12th to 17th, 1912, the "Tecktonius Strain" S. & R. C. Buff Leghorns again effected

## Another Big "Clean-Sweep"

taking down the following: 1st, 2nd, 3rd, 4th and 5th Pullet; 1st, 2nd, 3rd and 4th Hen; 1st, 2nd, 4th and 5th Cockerel; 2nd; 4th and 5th Cock; 1st Pen; on Single Combs. 1st Cock; 1st Cockerel; 1st and 2nd Hen; 1st and 2nd Pullet; 1st Pen; on Rose Combs. Also all Cups and Specials, for shape and color. A signal victory for the "Tecktonius Strain"—following upon 252 egg record, at National Poultry Association contest, six previous consecutive clean-ups at the Chicago Shows, and my big winnings at all the big shows of N. Y., Boston, Providence, Baltimore, Pittsburg, Cincinnati, Columbus, Nashville, Little Rock, Dallas, Houston, Galveston, New Orleans, Des Moines, Minneapolis, Spokane, Regina, Sask., etc. At the close of last year's Chicago Show, I challenged the world to produce the equal of my birds. Today

## I Again Challenge The World

and will be happy to meet "all comers." In the meantime—I'm doing business. If you want to

## Get In Right—In The Poultry Business

let me know your requirements, or your plans for the future, and I'll tell you what "Tecktonius" can do for you. Just now I have ready a number of good breeding Trios and Pens, mated for best results—prices \$25 and up. It will pay you to know more about these; ASK ME. Mating list ready for mailing Feb. 15th: file your request now, and get a first copy off the press. There's money for you in the poultry business—if you adopt "Tecktonius" Buffs. Better get your share started your way. I'M READY.

**F. A. Tecktonius, :: Route 7, :: Racine, Wis.**

MILLER'S

## FRESH AIR HEN HOUSES

Built in Sections. Erected by Anybody.

A BETTER house than a carpenter would build. A scientific Fresh Air house 10 by 16 ft. Plenty of fresh air but no drafts. Plenty of light but no leaks. A substantially built Hen House, painted inside and outside with vermin-proof paint. An ornament to any poultry yard.

Is built of No. 1 yellow pine throughout. Sides, back and roof tongue and groove work. Every crack and cranny filled with vermin-proof paint. Open front, and windows covered with galvanized poultry netting.

Comes in ten sections which can be set and bolted to place in an hour or so by a man and a boy. Bolted together they are personal property and can be moved from place to place.

Complete down to bolts. Cost? Just a little more than the cost of lumber if bought in your town.

Don't confuse the MILLER Fresh Air House with the light-weight apologies.

CATALOGUE ON REQUEST. Get it quick and be the first to use Miller Fresh Air Houses. Special inducements to the first buyer in a community.

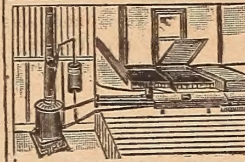

MILLER MANUFACTURING CO.,  
8014 Alabama Ave., St. Louis, Mo.

## World's Foremost White Wyandottes

have won the highest honors at N. Y., Boston and all the prominent shows in U. S. and Canada, including the Alaska-Yukon Exposition. Send for circular and see who has been breeding the best winners for many years. All stock returned at my expense, if not satisfactory.

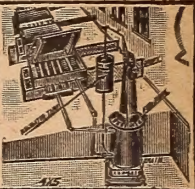

J. H. JACKSON, - Lock Box 88, - HUDSON, MASS.

### RIPPLEY'S

L. A. Glessman, Box A, Conneautville, Penna.

## WHITE ORPINGTONS - WHITE ROCKS

INTERNATIONAL CHAMPIONS

Birds from my yards have won at Dairy and Palace Shows in England, also in New Zealand and at every big show in Canada, New York State Fair 1911 and 1912, ten firsts; Michigan Roundup show, five firsts; Madison Square 1911, 1st, 2d, 3d, 5th and 6th. Birds sold on approval. Duty paid to the United States. Please mention American Poultry Journal when writing.

HIGHWORTH POULTRY YARDS : Fred A. Andrewes, Prop. : LONDON, CANADA

## TOLEDO POULTRY SHOW

January 6th to 12th, 1913

Best list of special premiums ever offered anywhere. Write for list.

F. W. Hoff, Sec'y, Station B, Toledo, Ohio

## PALMER'S WHITE ROCKS

Are grown on free and unlimited range, which gives them wonderful vigor and vitality. Years of careful breeding and selection has made them leaders as exhibition birds and as layers. Write your wants and we guarantee to please you.

"The Glen" Poultry Farm, Box A, Fairport, New York

## America's Best Cochins Bantams

Win Again at the Great Chicago Show

They won more firsts than all their competitors combined and more they won more points than their competitors. Winning as follows: Black Cochins Bantams—3d ck.; 1st, 2d hen; 1st ckl.; 2d, 3d pul.; 1st pen. Partridge Cochins Bantams—1st, 2d, 4th ck.; 1st, 2d, 4th, 5th hen; 1st ckl.; 1st, 3d pul. Buff Cochins Bantams—3d, 4th pul. Just think of this record in America's greatest show, every entry winning a place. We also won the following cash specials: Best 2 Buff Cochins Bantam cks, best 2 Buff Cochins Bantam hens, 2d best 2 Buff Cochins Bantam ckerels, 2d best 2 Buff Cochins Bantam pullets, best two Partridge Cochins Bantam cocks, best two Partridge Cochins Bantam hens, best two White Cochins Bantam pullets, 2d best two White Cochins Bantam hens. If you are interested, write us. Our beautiful illustrated 1913 mating list will be ready Feb'y 15th.

Wahebe Bantam Yards, W. Besuden, Prop., Box 359B, Cincinnati, O.

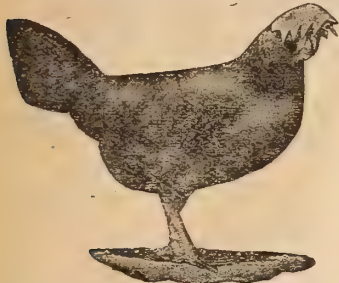

W. J. BRINKLEY

IUKA, MISSISSIPPI

## Brinkley's White Plymouth Rocks

Continue to win wherever shown. At the great Tri-State Fair, 1912, 1st hen, Grand Championship Special for best hen in entire show. At Jackson, Miss., 2d, 4th cocks, 1st, 4th hens, 1st ckl., 1st, 2d pullets, 1st pen, silver trophy cup best display White Rocks, championship special best hen in entire show, also best pullet; special 2d best pen in show. These winnings, combined with those at Nashville, Birmingham, Augusta, Tupelo, Little Rock and Columbus, Ga. prove without a doubt the superior quality of our White Rocks, and concede our claim of the **BEST IN THE SOUTH**. Superior type, quality and vigor are largely responsible for our remarkable success in the show room; combining these qualities with their egg-producing habits make them the very best general purpose fowl in the South. Hundreds of excellent exhibition and breeding birds that will prove a valuable investment for you at prices that are within reach of all. Utility cockerels, \$3 and \$5; pullets, \$2 and \$4 each. Eggs, 10 pens, \$5 and \$10. Mating list for stamp.

You can enjoy the great pleasure of having large white eggs during the cold months of winter and winning gold and silver specials in the show room if you breed

## Pape's Champion Strain S. C. Black Minorcas

Am offering utility and fancy exhibition stock in yearling and 1912 hatched birds at attractive prices. Get one of our utility cockerels to improve your flock. Send for our 1913 free catalogue. It contains list of winnings and describes our matings. One of our customers reports having raised two \$50 and six \$25 value birds from one setting of our eggs for hatching last season. All stock sold on approval. Write requirements.

BABY CHICKS—U. R. Fishel's White Plymouth Rocks the Best in the World

# Hip! Hip! Hooray!!

## Chicago Winners!

At this, the greatest of all Barred Rock shows, in December, 1912, (please note the date) in the fiercest battle of giants ever seen at this show, in competition with the best that New England and the east could produce, birds of

## ARISTOCRAT

BREEDING WON

FIRST PRIZE

This feat was accomplished by one of my customers, and demonstrates again the truly superb quality which those breeders obtain who purchase and breed Aristocrats.

**First Prize** at the great American Royal Show was won by Messrs. Pate & Pate, Kansas City, Mo., on an **Aristocrat male**, in Oct., 1912. On Dec. 12, 1912, (mark the date) one of my customers, M. M. Smith, Abingdon, Va., made a clean sweep at one of the leading early shows of the east with **Aristocrats**, winning **4 1st prizes** in very strong competition. Think this over.

I have over 900 show birds which will be ready to win in January and February shows. Place your order if you want a winner.

W. D. Holterman, Fancier, Box A, Fort Wayne, Indiana

# ALDRICH'S WHITE ORPINGTONS

## Winnings At Chicago

Greatest win ever made in White Orpingtons. Practically swept the deck. Read and be convinced. Remember 342 birds competed. We won champion male; gold special for best display, having 68 points against 66 among all the rest of our 41 competitors combined. Also the presidents cup for best 15 birds; White Orpington medal on first pen, and 10 Association and American White Orpington Club cash specials. Our winnings in detail were 1, 5 cocks; 3, 4 hens; 2, 3, 4 cockerels; 2, 5 pullets; 1, 3, 5 pens and specials mentioned above. We had 20 hens in the money; this is a most remarkable record and proves beyond a doubt that we have

## The Quality White Orpingtons of America

These winnings together with our winnings this season at Allentown, Atlanta, and Augusta of 8 firsts, 5 seconds, 7 thirds, 5 fourths, 5 fifths, including grand champion futurity cockerel and pullet at Allentown and sweepstakes at Atlanta on cockerel for the best bird in the show, and many silver cups and other specials in competition with 50 of the largest breeders from 12 states with birds bred and raised on our Farm is ample proof of the superior quality of our stock. Our birds have also won for our customers whenever shown, in such shows as Hagerstown, Bismark, N. D., Glasgow, Ky., Little Rock, Lancaster, Ohio and in many other shows, in many cases defeating birds imported at big prices. This stock was all bred and raised from our winners at America's six largest shows last season at Chicago, Cleveland, St. Louis, Baltimore, Pittsburgh and **Madison Square Garden** where we won 51 out of the total of a 150 prizes offered—a record never equaled.

Our recent purchase of the complete flocks of White Orpingtons from Sunswick Farm, E. B. Rogers and Dr. C. C. Goodes including all their prizewinners, places our flock at the top as our pens now contain more prizewinners and high quality birds than any other 3 breeders in the world combined. Our increased facilities and immense flock of 2,000 picked birds have enabled us to reduce our prices on highest quality White Orpington stock and eggs to a point never before thought possible, and, this will keep increasing the popularity of the Orpingtons in America as never before, as it will no longer be necessary to pay more for White Orpingtons than any other breed. If you wish to breed the most popular bird in America today, to win at your shows, or lay the most winter eggs thus paying more than other breeds, send for our handsome new catalog and tell us your wants and let us start you right. Remember, we guarantee satisfaction. Eggs \$5, \$10 and \$15 from the 30 best pens of White Orpingtons ever mated.

---

# ALDRICH POULTRY FARM

R. F. D. No. 7 COLUMBUS, OHIO

# CANDEE

## Automatic Safety Custom Hatcher

The Candee shown in this picture does the work of 34 small machines.

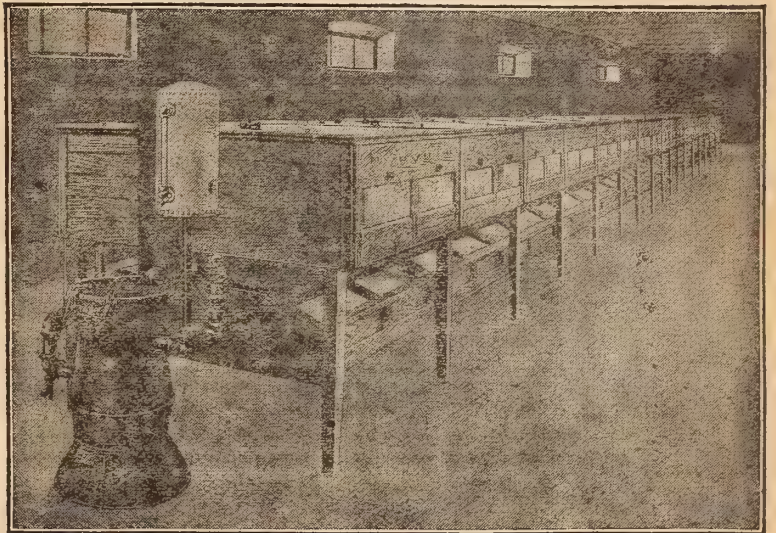

One man or woman can run it without help.

The full machine in three and one-half months at \$2 a tray, earns \$1360.00

Other sizes figure in proportion.

Double the number of Candee hatchers have already been ordered for this spring.

Can you afford to let this opportunity slip away when you can make money from the very start?

This is a 10,200-egg Candee, made up in sections with 34 hatching compartments of 300 eggs each.

### The Candee is the World's Standard Incubator

The 1913 model is approved by the leading poultry authorities of the United States and Canada.

It is easily installed—uncrate and set it up on its legs.

It is completely built at our factory. Don't overlook this feature.

It is automatic—holds a steady even temperature in each compartment.

The egg trays are stationary—not moved up or down by hand after the operator sees that the eggs are being under or over heated.

It is the only so-called mammoth with automatic heat control in the egg chambers—the accepted practice on every small incubator.

In operation, it is simple and practical, not requiring expert attention or knowledge, built for service and results.

### Adjustable Hover Brooding Systems

Let us solve your brooding problems. We originated the hot water brooding system.

Our adjustable hovers give fractional degrees of healthy heat and are so convenient for the varying ages of chicks.

The picture shows the brooder with the removable front out.

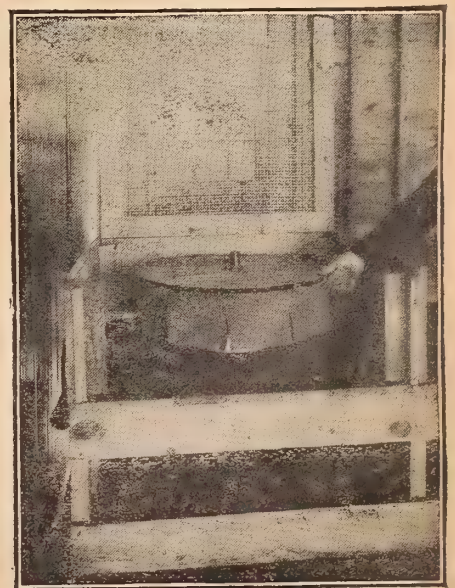

The hover is turned up or down like a piano stool.

### We Reply By Return Mail

Time is precious and we are prepared to save time for you. Our incubators are furnished in 1,200, 1,800, 2,400, 3,000, 3,600, 4,200, 4,800, etc., up to 20,000 eggs. We will send our catalogue by return mail and quote you prices.

Let us know how many chicks you desire to brood at one time and we will send you an estimate on a brooding system.

Custom Hatching booklet also sent free upon request.

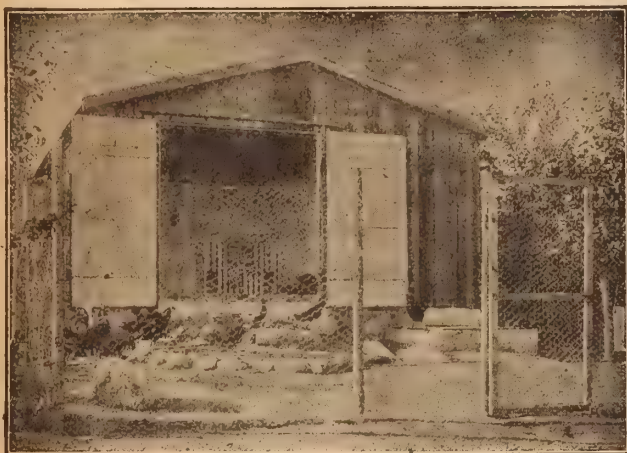

**Candee Incubator & Brooder Co., Dept. 2, Eastwood, N. Y.**

# A Twelve Months' Feast for Poultrymen

RELIABLE POULTRY JOURNAL FOR 1913

**W**ILL be of Greater Help to Poultrymen, both Beginners and Long-time Breeders, Than Ever Before. We have Arranged with Some of the Most Successful Breeders and Writers for Articles on Subjects Covering Every Phase of the Poultry Industry

## Our 1913 Prospectus Sent Free

FOR THE ASKING, GIVES A FULL ACCOUNT OF THE MOST IMPORTANT ARTICLES TO APPEAR DURING 1913. AMONG THEM ARE THE FOLLOWING:

A series of six illustrated articles from the viewpoint of an International Standard, by Artist Sewell, also a series of eight illustrated articles on other subjects, the first to be "Influence of Feathering on Standard Shape."

Rudolph P. Ellis, founder of the Aurora System of Egg Farms, will begin a series of articles in January R. P. J.

"Observations on Orpington Progress" will be the title of an article by Wm. Barry Owen, illustrated by Artist Sewell.

A series of six articles by C. L. Opperman, formerly with Maryland Experiment Sta.—First article, "A Complete Home Acre Plant."

The fearless pen of our Editor, Grant M. Curtis, will continue its effective work for "Better Poultry and More of It."

A valuable series of six articles by Frank L. Platt, Asso. Ed., on the Leading Poultry Markets of America. Also a series of five articles on other practical subjects, in addition to descriptions of farms visited, etc.

A series of nine practical articles, including two on judging, by D. E. Hale, Asso. Ed. First of the series—"The Simple Life for Chicks."

A. F. Hunter, Asso. Ed., will continue to handle the Practical Department, also the department, "Eggs and Poultry for the Family Table," and in addition will furnish a number of stories gathered on his recent trip from the Atlantic to the Pacific.

In addition to writing "Western Notes and Comments," Thos. F. Rigg will furnish three articles, the first entitled "Poultry, Fruit and Bees."

"Eastern Notes and Comments," by D. Lincoln Orr, will be published monthly.

Poultry Show reports will keep our readers in touch with progress being made in standard-bred poultry.

The Pacific Coast Department, handled by Charles McAlister, will take good care of our many subscribers west of the Rockies.

M. F. Reils is to have charge of a Southern Department, doing all in his power to help poultry breeders in the Southland.

Chas. V. Keeler, judge and breeder, will furnish two articles, "Feeding, Breeding and Mating of White Wyandottes," and "The Brood Coop and Its Relation to Proper Rearing."

The first of a series of articles by Myra V. Norys is "How a Woman Can Raise Chicks Successfully Without Much Equipment." The series includes articles on housing and raising ducks.

Mrs. Jane Paull Ray will write a series of nine articles, the first to be "The Wise Use of Money in Poultry Culture."

"Wyandottes as Money Makers for Women," will be the subject of an article by Beatrice Mansfield. Mrs. Geo. E. Smith will write on "A Partner in the Poultry Business."

Mrs. Elgia Gensemer will discuss poultry as "A Side Line for Poultrymen's Wives," and Mrs. M. Truran will tell "How Women Can Succeed as Poultry Breeders."

A series of ten articles on questions of interest to southern poultry breeders will be furnished by Mrs. Benigna G. Kalb, of Texas.

"Building up a Suburban Poultry Plant," and "How to Raise Thrifty, Vigorous Birds on a Suburban Plant," are the titles of two articles by Mrs. E. W. Mahood.

Mrs. Grant M. Curtis will continue to conduct the two departments, "Woman's Work With Poultry," and "For the Table."

Modern Poultry House Construction—A series of articles by poultry experts, will present latest and best models for poultry houses and poultry devices.

Besides our regular correspondents, many contributors, both abroad and in this country, will furnish occasional articles dealing with problems that confront poultrymen and pointing the way to greater success.

# WHITE ORPINGTONS

## SUPERB TYPE AND SUPERIOR QUALITY

MY FIRST SHOW, 1912—TEXAS STATE FAIR

First, second and fourth cock; first, second and fifth hen; first, second and third cockerel; first, second, third and fourth pullet; first and second pen.

My birds are absolutely white, of that deep bodied type, low down on legs, up to weight, and I know that I can please you. At the last and greatest show held at Madison Square Garden, I again control the winning male birds. My winnings include first cock, third hen, fifth pen and the cockerel heading the first pen. The winning cock is, without doubt, the greatest White Orpington in the world, having defeated the Crystal Palace champion and all the great cocks of America. These great birds, together with my other prize winners, place RUSSELL CAVE WHITE ORPINGTONS far in the lead. Both at Allentown and Augusta, two shows I made last year, I won at each the cup to that exhibitor whose ten or more birds of one variety showed the highest degree of excellence and uniformity of type and breeding. This record of winning in two of the most important poultry shows in this country the cup for the ten best birds has never been equaled by any other breeder in America.

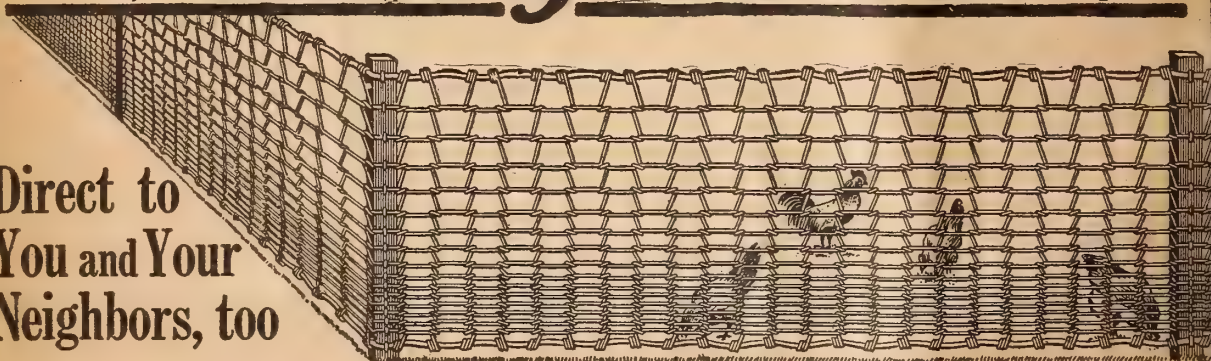

### GREAT STAMINA AND VIGOR

are to be found in my birds, not usually found in White Orpingtons. I attribute this to strong foundation breeding stock, our pure air and the blue grass range, 100 acres in Russell Cave Poultry Yards and 7,000 acres in Elmendorf Farm. The above statement is proven when I tell you that I now have the grandest lot of youngsters, up to weight, and ready to win the blue ribbons for you. Every bird guaranteed as represented and sold with the privilege of returning. Write us today. Duroc-Jersey swine for sale. Mention American Poultry Journal when writing.

**Russell Cave Poultry Yards** Elmendorf Stock Farm R. 3, Box 1025, Lexington, Ky.  
Louis Lee Haggin, Prop.

## Poultry Fence

Direct to  
You and Your  
Neighbors, too

**48 INCHES HIGH 22½¢ A ROD. 60 INCHES HIGH 25½¢ A ROD.**

Not a flimsy netting but a fence requiring fewer posts and no base boards or top rail. Spacing between the line wires graduated from 1½ inches, at bottom to 4½ inches at top. Stay wires 4½ inches apart.

Top Wire \_\_\_\_\_ Bottom Wire \_\_\_\_\_ Line Wire \_\_\_\_\_ Stay Wire \_\_\_\_\_

Positively the greatest poultry fence bargain ever offered—you can't afford to buy any other kind.

**48-INCH COMBINED POULTRY AND STOCK FENCE 27½¢ PER ROD.**

A heavier fence having the same construction as above and while close enough for small chicks yet strong enough to turn stock. Stay or upright wires in this style fence are 6 inches apart and the spacing of the line wires graduated from 1¼ inches at bottom to 6 inches at top. Following shows exact size of wires used.

**Increase Egg Yield  
This Winter,  
Save Money on Feed,  
Make Chicks Grow  
Rapidly, Strong**

by installing an Ideal Grain Sprouter and feed your hens the green food that is absolutely necessary to insure prolific egg production.

Eggs are going higher in price every day, the demand is far exceeding the supply, and it looks like good times and plenty of money for the man who has one of our Sprouters.

## The IDEAL Grain Sprouter

- is the best machine for sprouting grain ever made.
- will produce sprouts over 2 inches long in 24 hours;
- sprouts any kind of grain better, in less time and without fuss or muss;
- produces three to four bushels of feed from one bushel of grain;
- pays for itself in a single month by saving in feed bills, increasing egg yield, supplying food that makes chicks grow strong and vigorous.

The "Ideal" is made in several sizes—for a few hens up to hundreds. Can be used in summer (without lamp) as it has proper arrangements for moisture and ventilation to produce quick results and crisp feed.

**J. W. MILLER COMPANY, Box 600, ROCKFORD, ILLINOIS**

### CONSTRUCTION

Made of best lumber—double walls, insulated with heavy deadening felt—inside lined with galvanized iron—frame of trays heavy galvanized iron—bottom of tray heavy wire netting—front of machine glass, which induces green sprouts. These sprouts require very small amount of artificial heat which is produced by the Ideal Safety Lamp, the fumes of which pass through ventilators.

**Get Special Low Price Freight Prepaid Offer Today**

## A POULTRY BOOK 80 PAGES. EDITED BY HENRY STEINMESCH

It is different in this that it does not tell how to get rich in the Poultry business—On the other hand, it is full of practical information, telling how to make money from Poultry in a conservative way. It tells of Incubators and Brooders, of Chickens and Eggs, of feed, and care and attention. This book will especially appeal to those who will be satisfied with a Poultry business that pays and who may enlarge their business with time and experience.

By mail postpaid 10 cts., coin or stamps. **HENRY STEINMESCH, 251 Market St., St. Louis, Mo.**

## HIGHEST SCORE EVER WON

# Queen

THE  
QUEEN  
POULTRY  
GUIDE

## An Honest, Profit-making Proven Incubator at a Low Price

The Queen has all records beaten—a \$12 Queen outhatched a \$45 machine by 25% last year. We will send you the owner's name if you care to have it.

Once a Queen user, always a Queen user, because the Queen is the biggest chick producer money will buy. Everywhere the Queen is producing hatches as big as machines costing double or treble its price.

I do not build the Queen "cheap" to sell "cheap." I make it substantial and it has every approved hatching principle. It does not dry apart and go to pieces in a year or two. A machine good for 25 years. And the price is as low as such a substantial, up-to-date hatcher can possibly be sold for.

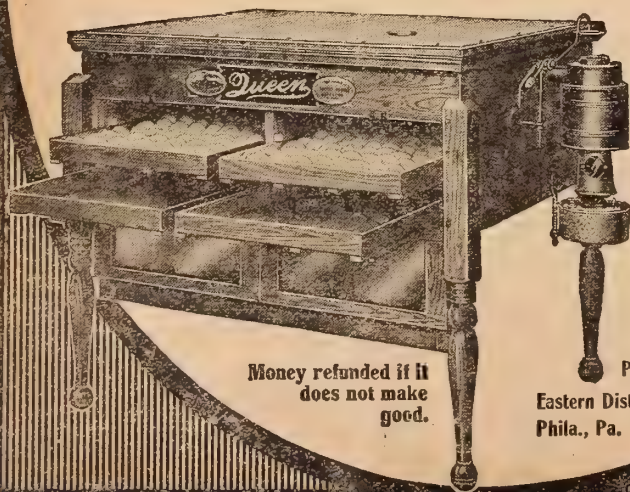

## The 28 Big Features

The Queen for 1913 is the story of 28 great features. The story can't be told here. But point by point in my catalog I show you just what the Queen is and why it has attained its national reputation.

**Don't spend money for "Frills."** The "frills" do not give you more chicks, and chicks are what you want. The Queen, in addition to its hatchability, has convenience, ease of operation, simplicity, neatness. There is nothing more than that that is worth while in any incubator. Don't be influenced by big claims and "talking points." You can pay more for an incubator than the Queen's price, but you will get no more chicks. The extra cost is waste.

Everyone interested in the incubator question should have a copy of my book, the Queen Poultry Guide and Catalog. It tells you what you ought to know about chick-raising before you buy. I have written it myself for those who want honest information about incubators. To read it means actual dollars saved on your purchase and more actual dollars earned in your use of the machine. Don't buy an incubator until you've read this book. Your copy is ready for you. Don't wait. Send for it now, today.

## This Book Tells All About Poultry and Incubators

**Worth \$1.00 But Because It Contains Advertising You Get It Free**

**J. W. MILLER**

If there ever was a book on poultry and poultry-raising that would pave the way to success in the business, this new big book of mine is the one.

Tells everything beginners and old timers should know:

- Suggests what kind of foods to buy;
- Gives valuable information to beginners;
- Discloses the secret of my success—"How We Do It on Millhook Poultry Farm";
- Pictures and describes all kinds standard bred poultry;
- Gives coloring, habits, weight, etc., of different breeds;
- Quotes experiences of those who have "made good";
- Explains what remedies to use in time of need;

—Has Question and Answer Department and lists supplies and appliances that have given satisfaction to experienced, successful poultrymen.

This valuable book is not for curiosity seekers, but for men and women who are interested in poultry for pleasure or profit. The reason why I send it free is because it also tells all about my

# IDEAL

## Incubators and Brooders

There are more chickens, sturdier chickens, greater profits for all in my "Ideal," than there is in any hatcher on the market.

You don't need to be an expert to run it.

It has a heating and ventilating system that *automatically* supplies required moisture;

—A regulator that will not allow temperature to vary a fraction of a degree;

—The best nursery advantages;

—The handiest egg tray;

—The most accurate thermometer;

—The record for successful hatches, etc.

Last year I sold this sure-profit-paying incubator at a price so low that I gained thousands of new customers. This year I'm going to keep up the good work and this is your chance to get my Ideal incubator at lowest figure ever quoted on an efficient, dependable hatcher.

### Here's My 1913 Offer

## I'll Pay the Freight—Give You an Unqualified Guarantee And Include Everything FREE

—best safety lamp—burner, chimney, wicks, lamp bracket—all complete; also egg tester, egg trays, thermometer and thermometer holder, etc. There'll be no extras to buy. You will get the "Ideal" all ready for your eggs—all ready to make big money right from the start.

Before buying an incubator from anybody be sure to look into my IDEAL and learn the really low price I put upon it. Get the FREE book anyway, whether you are ready to buy now or not.

### Send Me a Postal—I'll Do the Rest

When writing, be good enough to mention whether interested in 60, 120, 175, 240 or 360-egg incubator. This will not obligate you in any way, but help me distribute my valuable book among those interested and not curiosity seekers.

This book is worth \$1.00 of anybody's money. You'll be glad you sent for it. Do it now—before you forget it.

## Hall Mammoth Incubator Means Reliability

We originated the idea of the Mammoth Incubator. We saw the need of it, we blazed the way. OTHERS HAVE FOLLOWED US. But we have kept our lead. We have constantly improved our product, we have at all times studied the interest of the Incubator industry, and particularly that of our customers. We manufacture the MOST PRACTICAL and EFFICIENT MAMMOTH INCUBATOR.

### Reliable

Because every phase of Hall Mammoth Incubators has been thoughtfully considered by competent engineers, as a result the elements of VENTILATION, REGULATION, MOISTURE, SIMPLICITY and EFFICIENCY have been brought to the highest point of perfection.

### Construction and Assembly

It is built on the "knock down" principle, all parts are quickly and easily fitted together. The construction is sectional, and can be added to, or taken apart at any time without injury. All wood used in the Hall Mammoth Incubator is first quality chestnut, twice kiln dried. Hardware especially made, with a view to give best service. Best quality filler and varnish used.

### Heating Apparatus and Control

The HALL SELF REGULATING furnace IS reliable. Why? Because it depends on the infallible law of water expansion when heated, and contraction when cooled. THIS SYSTEM IS POSITIVE. We burn hard coal, and the coal consumption is remarkably low, requiring attention only twice a day. Does away with poisonous oil fumes. No danger from fire, NO UNRELIABLE THERMOSTATS.

### Our Ventilation and Moisture System

is correct in theory and fact. Long experience has demonstrated this to be so. The OVERHEAD pipes give uniform warmth where it is most necessary. The SLATTED BOTTOMS permit entrance of fresh moisture laden air, and escape of all unhealthy emanations from developing embryos. Atmospheric conditions ALWAYS CORRECT, NO DRAUGHTS.

### Movable Trays

As the embryo develops, it requires varying conditions, it receives this treatment from the mother hen, note how she leaves the nest more frequently and for longer intervals as the time for hatching approaches. The eggs require less artificial heat, the developing embryo begins to develop its own. Movable egg trays improve on the mother hen because the change is gradual and the varying requirements of the developing embryos are thus met evenly.

Below is shown a partial list of plants which have doubled or trebled their capacities. There are many others. The point is, that these people would not have re-ordered from us, unless they were absolutely satisfied with the results obtained. This proves our equipment does all we claim, and is a profitable investment for our customers.

Customer	Capacity	
	Original	Present
Wayne Poultry Farm, Stony Point, N. Y.	6,000	21,000
Fulton Market Poultry Farm, Youngstown, Ohio	6,000	11,700
R. L. Hutchinson, North Raynham, Mass. (Ducks only)	6,000	12,000

C. M. Woolver, Richfield Springs, N. Y.	15,000	30,000

Hall guarantee is a certificate of excellence and efficiency in every way.

Investigate us, write to our customers, and learn for yourself that the HALL MAMMOTH INCUBATOR IS THE BEST.

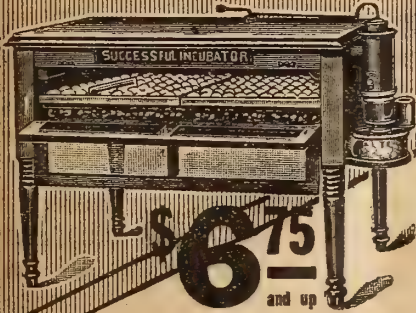

Write for our new catalogue X It contains valuable information. Tell us your trouble, ask for advice, our knowledge and experience is at your disposal, and it will afford us pleasure to help you. We guarantee all our goods.

## The Hall Mammoth Incubator Co., Little Falls, N Y.

# Read this Page—Then You'll Know What Kind of an Incubator to Buy—

**There Are 20 GOOD REASONS Why You Should Buy a "Successful" Incubator In Preference to Any Other Hatching Machine.**

**18 of These Reasons are the Features of Superiority Printed Below. The Other Two Reasons Are Records for Larger Hatches and Our Low Price Offer.**

I WISH everyone interested in the *big profits* to be made from the poultry business, especially those interested in incubators and brooders, could see this page announcement of mine.

Probably it would mean the saving of *many dollars* to them, the saving of *many hatches*, the saving of a lot of *trouble, time and annoyance*—by keeping them from buying a cheaply constructed or poor incubator.

You know there are two kinds of incubators on the market. One built merely to sell for a low price—the other built to hatch the greatest number of chicks from the eggs put into it, do it year after year as long as the incubator is in use, and sell at a price that anyone can well afford to pay.

The latter exactly describes my

## Successful Incubators — Successful Brooders

**Life Producers**

**Life Preservers**

I do not promise you impossible things. But what I do promise is that a "Successful" will hatch *larger and stronger chicks* and a *larger percentage* of them than any other incubator in use anywhere. No other machine is so big a money-maker—none other so big a profit-payer.

This is no idle statement. The special construction of my Successful Incubators, combined with exclusive points of merit, go to make an incubator the equal of which has never been manufactured. You can see this for yourself in the detailed description of the hatcher. Read over the list. You'll find my "Successful" is

- the **ONLY** incubator cabinet made;
- the **ONLY** one scientifically ventilated;
- the **ONLY** one that heats the colder edges first, like a greenhouse or dry kiln.
- the **ONLY** one that has 18 good hatching points, any one of which should make you decide in its favor.

If you are anxious to get into the poultry business, to make a good living out of it and *want to start right*, you will make no mistake buying a Successful Incubator.

With the "Successful" no experiments or trial hatches are necessary—you'll have no failures. With the incubator I send you complete instructions for getting the best results, also

## \$25.00 Poultry Course, FREE

This course contains the most practical advice ever given to beginners. It tells how to produce poultry and eggs at lowest cost, explains how to sell them to best advantage; all about poultry house construction, many different feed formulas, diseases of poultry and their remedies, how to raise ducks, geese, turkeys, etc., etc., in fact, takes you from the beginning to end of the business, revealing everything necessary to insure you more profit from poultry.

If you are thinking about buying an incubator, don't be persuaded to decide on any make until you write for my

## Successful Catalogue—It's FREE

—and learn what I have to offer you. My book tells all about various incubators and brooders. It gives you a good idea of the advantages of each, what size to buy, etc. It is frank and comprehensive—free from all exaggerations—and tells you just what steps need be taken to insure success.

Write for my book if only to get my low price offer and to read page 6 which contains my guarantee—the strongest guarantee ever put behind an incubator. Don't buy an incubator that guarantees less. Don't fail to ask for prices on Successful Brooders—the only brooders made with automatic heat regulator, therefore, the best chick preservers. Address

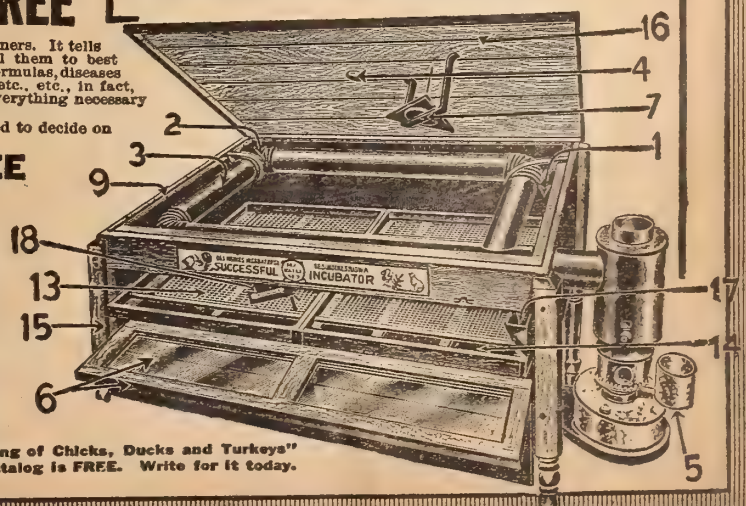

J. S. GILCREST, Pres. and Gen. Mgr.

**DES MOINES INCUBATOR COMPANY**  
1 Second Street, Des Moines, Iowa

NOTE—Our famous little booklet, "Proper Care and Feeding of Chicks, Ducks and Turkeys"—worth its weight in gold—sent for 10 cents. But our big Catalog is FREE. Write for it today.

## Here Are 18 Features—Any One of Which Should Make You Buy a Successful

- 1—The only hatcher that heats the colder edges of the body first.
- 2—Round corners on tank, giving faster current, more even heat, better regulation.
- 3—Heaviest copper tank used on any incubator.
- 4—Only one scientifically ventilated. Admits cold air at center of top. Does not create draft which dries out eggs.
- 5—Safety attachment on lamp burner—provides absolute protection from fire.
- 6—Only incubator with two glass doors—through which thermometer may be seen.
- 7—Combination water thermostat regulator.
- 8—The only machine guaranteed with a guarantee that guarantees and evades no issue.
- 9—Built like a refrigerator.
- 10—Case non-warpage.
- 11—Weights more.
- 12—Cost less per pound.
- 13—Strongest, most durable egg trays.
- 14—Nursery under egg trays. The greatest feature applied to artificial incubation.
- 15—Detachable legs, allowing machine to be stored in very small space.
- 16—The only incubator in the world cabinet made.
- 17—Simple, effective application of moisture when necessary.
- 18—Adjustable thermometer. Never necessary to open doors or pull out the trays to read temperature. Thermometer is stationary; chicks cannot knock it over.

For Sale by Dealers Everywhere

Descriptive Catalogue Sent

**American Steel & Wire Co.**

Chicago New York Cleveland Pittsburg Denver

**BANNER POULTRY FENCE** is an improved square mesh Poultry Fence of great strength, durability and closeness of mesh—a fabric for fencing poultry yards having all the advantages of old style poultry netting with none of its disadvantages—a fabric especially designed to hold all the poultry, from the chick to the grown bird, and shut out small animals. Made of **LARGER** wires, **STRONGER**, more **DURABLE** and **SIGHTLY**; in fact, a **BETTER** article at **NO** increased cost.

**BANNER POULTRY FENCE**, which we have just placed on the market, meets every requirement of a satisfactory fence for poultry. The spacing between the six line wires at bottom of fence is only  $1\frac{1}{2}$  inches and gradually increases to  $3\frac{1}{4}$  inches at top, so the essential feature of a satisfactory poultry fence—closeness of mesh—is well taken care of in this fencing.

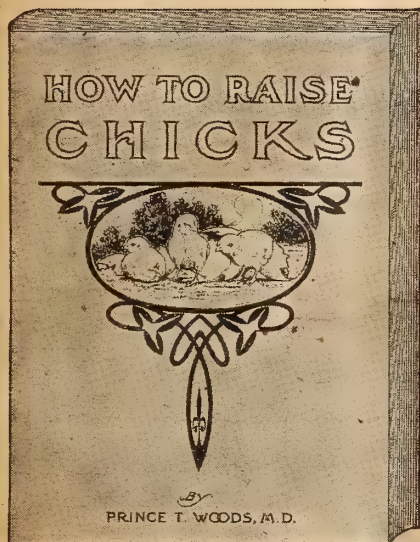

The 4 ft. height, design 2748, has 22 lines or horizontal wires, which are two or three wires more than any other design of poultry fence on the market. The upright wires or stays run continuously across the fence and lock firmly around the intersecting line wires in a loop knot, forming a smooth, solid joint without any sharp, rough edges.

**BANNER POULTRY FENCE** is easily erected, holds taut and trim, standing up without sagging; fewer posts are needed, and no top or bottom rails. Posts may be set a rod apart, and if the fence is well stretched it will be strong and effective. It can safely be used next to pasture, as it is amply strong to stop stock as well as confine all small animals. The wire from which it is made is hard, tough and strong, so the fence retains its shape when properly erected. It stretches up like a field fence over any kind of ground. The user of **BANNER POULTRY FENCE** can make his poultry yard fence just as neat and attractive as any other fence on the place at a saving over the cost of erection of the old style poultry yard fabric.

The many advantages of this new **BANNER POULTRY FENCE** are making it very popular.

DR. PRINCE T. WOODS' NEW BOOK

## HOW TO RAISE CHICKS

*Including Revision of "Facts About  
White Diarrhoea"*

A down-to-date manual on breeding poultry getting hatchable eggs, incubation and brooding both natural and artificial, preparing chick foods, feeding chicks, how to raise chicks and how to avoid and prevent disease and losses. Told in plain language. Illustrated with reproductions from photographs and with pen drawings. Tells how to make your own brooders and chick foods. Written by a man who knows how and how to teach others. 88 pages, 35 illustrations and 5½x8

inches in size. Printed on good paper. Well and durably bound in cloth.

**A Book for Everybody Who Keeps Fowls or Grows Chickens Whether  
Beginner or Old Timer in the Field of Poultry Work**

### IT HAS TEN CHAPTERS:

**Chapter I—Selecting and Mating Breeding Stock.** Constitutional vigor necessary in breeding stock to secure vitality in the chicks. Tells how to get it. Selection and care of male bird. Selection of females. Mating. Number of females to a male. The service. Fecundity vs. sterility.

**Chapter II—Food, Vegetable, Animal and Mineral.** What food is. Chief source of all food. How plant grows. Food elements.

**Chapter III—Fowls and Food.** The living fowl and the Life Principle. The living cells. Chemistry of fowl's body. Disposition of food varies with individuals. Variety of wholesome, palatable food necessary. Balanced ration is desirable. Live food needed. Digestion of food. Maintaining body temperature. Exercise. Give the fowl a chance to balance its own ration.

**Chapter IV—Care and Management of Breeders.** Housing. Foods and feeding. Hoppers and automatic feeders. Importance of comfort. Keep them healthy and happy. Well fed healthy breeders managed for comfort yield hatchable eggs.

**Chapter V—Eggs for Hatching.** Selection of eggs. Sex of eggs. Fertility. Gathering and keeping eggs. Time eggs may be kept. Period of incubation.

**Chapter VI—Incubation, Natural and Artificial.** How to get

good hatches with hens. How to get good hatches with incubators. How to test eggs during incubation. Simple home-made egg tester.

**Chapter VII—Brooding with Hens and with Brooders.** How to brood with hens. Brood coops for hens and chicks. Let chicks range and keep hen confined. How to brood chicks in brooders. Heated brooders. Fireless brooders. How to make your own brooders. How to operate brooders. Comfort a better guide to the right temperature than a thermometer. Patience needed in teaching chicks.

**Chapter VIII—Chick Foods and Feeding Chicks.** Home-made chick food, how prepared. Freshly prepared foods best. Commercial foods. Cooked food. Live food. Other necessities. How to feed.

**Chapter IX—Growing Chicks.** Weaning chicks. Colony coops and range. Changes in rations. Growing for stock birds and layers. Market chicks.

**Chapter X—Facts About White Diarrhoea.** What white diarrhoea is. Symptoms of disease. Causes. Is there more than one form? Has germ of specific disease been found? Infection. Prevention. Treatment. Formula for a simple remedy which has proved effective in many cases in many climates for four years.

## CARVER'S RED FARM

**ROSE AND SINGLE COMB REDS**

Our customers are reporting big winnings from all parts of the country, showing that Queen Quality Reds are all we claim for them. In the East and West, as well as the Middle and Southern States, our customers are winning the blue. We have some magnificent high grade cockerels at bargain prices; also fine breeding cockerels cheap. Our matings are the finest we ever put together for our egg trade and we are not going to raise our prices because our star is in the ascendancy, but give our customers the best there is in us at our same old prices.

## IN ONE YEAR ON A TOWN LOT

is the title of a new book that we have just completed, and is the amount of money actually made in one year by H. Cecil Sheppard of Berea, Ohio, with his chickens, and he tells in a very comprehensive way just how he did it. Anyone can do the same thing if they pursue the same method as Mr. Sheppard did.

This book is printed on high-class enamel paper, is profusely illustrated, contains nearly 100 pages of reading matter; bound in cloth, and divided into nine chapters, as follows:

CHAPTER I—THE ROAD TO SUCCESS.....	11
Practical information—Selecting the breed—Start on small scale—Pigeons—Buy good stock to start with—At the poultry shows—Advertising pays well—Importance of advertising—Doubled my capacity each year—Selecting the variety—My actual experience step by step—Living on a town lot—A little paradise in five years.	
CHAPTER II—INCUBATORS AND BROODERS.....	19
Placing the eggs in the incubator—Importance of cooling the eggs—Running the incubator the right temperature—Keep the brooder clean—Preparing the brooder for the chicks.	
CHAPTER III—CARE OF CHICKS.....	23
Don't chill the young chicks—Right temperature the third and fourth weeks—Feeding the young chicks—Green food necessary for young chicks—Charcoal and grit important—Sprouted oats a great egg producer—Perfect winter quarters—Automatic feeders for growing stock—Don't force the breeders.	
CHAPTER IV—POULTRY HOUSES.....	31
Open air houses most satisfactory—Birds singing in zero weather—The ideal chicken park—The necessity of cleanliness—My first eggs four months—Imported the best stock obtainable—How I commenced advertising—My first order for hatching eggs—Chickens laying all fall and winter—Increasing advertising increases business—Good results at end of year.	
CHAPTER V—PLEASURE AND PROFIT.....	33
Sales \$9,515.00 sixth year—Gives up everything for chickens—A square deal for everybody—Building up a good character—The science of salesmanship—The four stages of salesmanship—Good stationery and catalog important—Found it necessary to move to a farm.	
CHAPTER VI—WHAT TO DO EACH MONTH OF THE YEAR.....	45
Care of young stock—Houses thoroughly cleaned and sprayed—Orders and shipments—How to ship the birds—Birds need extra care in November—Getting the birds ready for the show room.	
CHAPTER VII—MATING STOCK.....	51
The male is half the breeding pen—Catalog and mating list—shipment of eggs and baby chicks—How to ship baby chicks—A colony house from a piano box—June end of hatching season—The pleasant smile.	
CHAPTER VIII—THE AMERICAN QUEEN.....	59
Good time to get interested in poultry—Possibilities of the hen—Poultry business offers grand opportunities.	
CHAPTER IX—ORIGIN OF ANCONAS.....	63
Color of the Ancona—Shape—Habits—The fancier's fowl—As a utility fowl.	

The price of this book is \$1.00, but in order to give our subscribers an opportunity to secure a copy, we make the following offer:

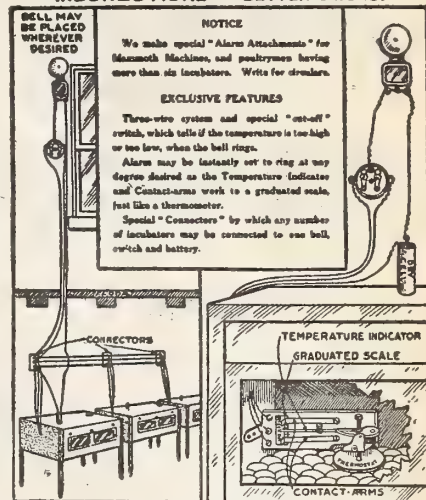

\$4,223.00 In One Year On a Town Lot and one year's subscription to American Poultry Journal for only **\$1.50**

(Canadian subscribers add 25 cents per year and foreign 50 cents per year for postage)

### MARTIN'S ALARM SYSTEM SAVES WORK, WORRY AND MONEY. INSURES MORE AND BETTER CHICKS.

The original and only practical alarm system for incubators—adapted to all makes, shapes and sizes—can be installed in a few minutes by any one—a common dry battery operates it a season for any number of machines—will last a lifetime.

Martin's Alarm System will enable that incubator to call when it needs attention. Think what this service means to you and your chicks—consider the effect it must have on your poultry profits. It is used and recommended by prominent poultrymen and Government Experimental Stations.

#### Here is a Sample Letter:

Keystone Hatchery, Altoona, Pa., Feb. 5, 1912.  
Martin Mfg. Co., Broadway, Va.

The electric alarms secured from you some months ago are sure working fine. Have one on each of my mammoth machines and while our house is over 200 feet from the cellar the bell rings nicely in the house as soon as the temperature goes a degree either hot or cold. Am also using one for a safety device in my building and have it arranged that should the building for any reason get afire it would not burn long until we would know it. I consider your alarm a wonderful invention and have them guarding over 23,000 eggs for me at one time.

J. W. PARKS

Proprietor of hatchery and well known Barred Rock specialist.

#### Why Not Let It Guard Your Eggs—Insure Your Hatches?

Progressive poultrymen everywhere are doing it. Why? Because it was the one thing needed to make artificial incubation pleasant and profitable. The cost is trifling and it is sold on approval. See trial offer below.

#### PRICES AND TRIAL OFFER.

An "Alarm Outfit For One Incubator," complete, with "Alarm Attachment," Special Switch, Bell and "Instruction Sheet," price, \$2.75. Additional "Alarm Attachments," complete, with Connector, \$1.75. Batteries and the insulated wire can be secured at any hardware store. However, when desired, we can furnish wire at 30c. per 100 feet. Tear out this ad, fill out the attached Order Blank and mail to us to-day, and we will send your Alarm Outfit by return mail Postpaid. Use it through two hatches, and if you are not satisfied, return it and we will refund every cent of your money. Don't chill or cook another chick, but order NOW—you run no risk. Address,

**Martin Mfg. Co., Broadway, Va.**

Find enclosed \$..... for which send by return mail an "Alarm Outfit For One Incubator"..... Additional "Alarm Attachments," and ..... feet wire. If this Outfit is not satisfactory, it will be returned and you are to refund my money.

# OWEN FARMS!

## AND AGAIN I SAY

# OWEN FARMS!!

We are the **AUTHORITY** on **WHITE ORPINGTONS**.

We are the **AUTHORITY** on **BUFF ORPINGTONS**.

We are the **AUTHORITY** on **WHITE ROCKS**.

We are the **AUTHORITY** on **WHITE WYANDOTTES**.

We are the **AUTHORITY** on **SINGLE COMB REDS**.

We are the **AUTHORITY** on **ROSE COMB REDS**.

We are the **AUTHORITY** on **BARRED ROCKS**.

We are the **AUTHORITY** on **BLACK ORPINGTONS**.

Mr. Platt of the **RELIABLE POULTRY JOURNAL** was in my office last week and he said: "Mr. Owen, do you not think that your advertising would pay better if you took, say, one-half page on White Orpingtons and Buff Orpingtons alone and had all of your advertising matter concerning these birds by itself, and then in another place in the paper have a half page including your White Rocks and White Wyandottes, and in still another portion of the paper a half page on Rhode Island Reds, Single Comb and Rose Comb, and in still another place in the paper a half page on Barred Rocks and Black Orpingtons?" I replied to him that I had given the matter a very great deal of consideration and that it had been proposed to me very many times by representatives of other poultry papers, but I was inclined to think that they were wrong.

However, the principal proposition is to advertise as well as we know how **OWEN FARMS**. If there is anything the public ought to know about them, to put it before the public in the strongest possible form. This for an illustration: My sister has made up her mind that she will try to raise some turkeys this coming spring. Now, she knows nothing about turkeys and I am sure I know nothing about them. Yet some time between now and spring my sister must secure either stock or eggs of turkeys in order for her to commence her work. I ask the question: "What will influence us in the determination of where we will go for stock and eggs?" As sure as you are born, our decision will be made according to the answering of the following question. "Who is the breeder in the United States of America who has a reputation of being the **AUTHORITY** on turkeys; who has the reputation of having good, healthy, vigorous stock, and lastly, who has the reputation of being a square man?"

Apply this rule to our advertising and I say without question the important thing for Owen Farms to put before you is that they are **THE AUTHORITY** on the varieties they breed and sell. Our winnings at the largest shows in America have proved this point beyond question. We have been larger and more consistent winners in the strongest competition than any other farm in the coun-

try. This means that we know birds, their value, their perfection and their possibilities of winning. It also proves that we know how to breed them, and if we do know how to breed them, we can help you and furnish you the birds to do it.

I take pleasure in submitting to you below **TEN** very good reasons for purchasing your exhibition birds, your foundation stock of breeding birds, or your eggs for hatching from **OWEN FARMS**:

1. Our farm is founded on a "Hobby" to produce the Best Poultry the World knows.
2. Our business organization, managers, men, are the strongest possible.
3. Our "Proof of Quality," meaning our Winning Record, has never been approached.
4. Our liberality in value giving and in general care of our customer stands as an example for all others to follow.
5. Our frank statement that you are under no obligation to **OWEN FARMS** until you have seen and **ACCEPTED** what you buy makes your **SATISFACTION SURE**.
6. Our having the highest **QUALITY** in **QUANTITY** makes your breeding results certain from the start.
7. Our methods, plans and conditions are formed, changed and improved solely that our customer may be better served.
8. Our desire over and beyond everything else is to be known as the one Poultry Farm in the United States as faithful yesterday, today and tomorrow to the trust imposed in them by their customers.
9. Our ideas of value are based upon the broadest knowledge and we make less mistakes than any farm and mean that all mistakes shall be made against ourselves.
10. Our position of being **THE AUTHORITY** on our breeds cannot be seriously questioned. Winning **27 FIRSTS** at New York last show in most prominent classes in show proved it. Who would ask the opinion of a breeder who had never won at New York or produced a New York winner whether a certain bird would win at Madison Square Garden? Who?

## Eggs For Hatching

As you know, we are not showing at Madison Square Garden, New York, this year. We have made a number of showings at the early shows, notably at Nashville, Memphis, Atlanta and Augusta, where we have truly won nearly everything that it was possible to win with the birds entered. We are making a showing this week at Chicago, and I am sure in advance that we shall have no reason to be anything else than proud of our winnings there. This will practically end our show season, and as soon as these birds return, which they will within a few days, we shall be able to make up our matings headed by numerous and wonderful winners in a large number of the largest shows in the country, certainly making them stronger, better and more valuable than ever before in our history.

It is our purpose to make this the most wonderful and successful season in **EGGS FOR HATCHING** that **OWEN FARMS** ever had.

Our prices and conditions for eggs will be exactly the same as last year, namely, \$1.00 per egg, \$40.00 for 50 and \$75.00 for 100. The conditions concerning the guarantee, the fertility, hatch and all details may be had upon application for our mating list.

In one respect, however, we shall change our methods from last year. For several years we have not sold a whole sitting of eggs from a particular pen. This year, in addition to our method of sale during the last few years, we shall permit you, under certain conditions, to select a particular pen and receive a whole sitting from that pen. In some cases, with a very limited sale from that pen in

# OWEN FARMS

this manner, we shall ask \$3.00 an egg. In other cases we shall ask \$2.00 an egg, and I am positive that when you see our mating list, including the description of the birds contained in the pens from which these eggs will come, you will be positively satisfied that they are the ones you want and that they are bound to give you the results you will anticipate.

As we have been saying to you in this journal from time to time this autumn, we never had so many birds as this year and never so good ones, and as we shall have during the breeding season a goodly number of very high-class reserve breeding males to carry over for

the following year and a large number of sale birds of remarkable value, we have decided to mate up pens of these birds in all of our varieties and furnish eggs from them at \$5.00 per sitting of 15 eggs, or \$30.00 per 100. We have very great confidence in the results that will be obtained from these matings. The blood lines in these birds are just the same as in the higher priced pens. Individuals, while not of course as choice as in the higher priced pens, yet are each and every one remarkably good birds and the chance of getting exceptional birds and remarkable value from these matings is assured.

## Foundation Stock

From the time this advertisement appears right through the breeding season we shall be in far better position to furnish you remarkable birds for strengthening a flock which you now have, or for furnishing you an entire new flock for foundation purposes. We will be only too pleased to go into the matter with you fully, telling you exactly the quality and kind of stock it is desirable and necessary for you to have in order to secure certain results, and you may depend upon it that the results you will secure will be in accordance with what we may lead you to expect.

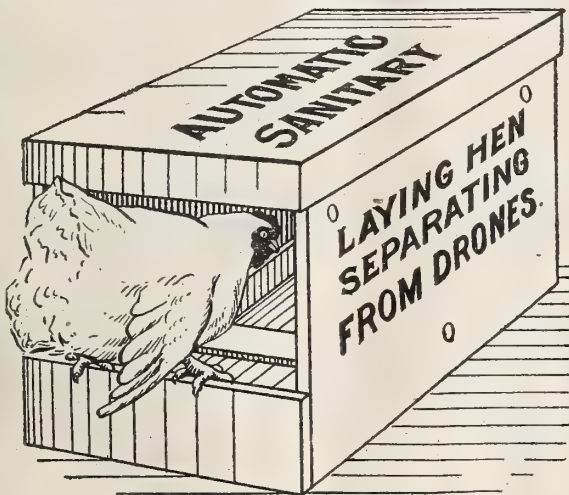

## Our Catalogue

We still have a very large number of our 131-page catalogues on hand, very profusely illustrated, which we are ready to send out upon request. It includes our mating list of last year, so that you can compare and see our pens as put together last year alongside of the pens as mated up this year. It is this study upon the matings year by year that has made the progress and the results of OWEN FARMS possible and wonderful. It is quite an education in itself to compare the matings of one year with the matings of the following year. The catalogue is sent postpaid and entirely free.

### AUTOMATIC SANITARY TRAP NEST

1913

1913

## The Best is the Cheapest

THIS NEST requires none of your time or attention, no waiting for hen to lay or resetting of nest. Operated as well and better by the hens during your absence than if present to disturb them. It saves time, labor and feed by selecting the good layers from the culls and drones. The good layers produce the hatchable eggs and strong, healthy chicks. All leading breeders are using the trap nest. We are sending them everywhere. Made of galvanized sheet metal, are sanitary, vermin-proof and will last a life time. Write for free booklet or agency or both. Address

**Automatic Sanitary Trap Nest Co., Duluth, Minn.**

## ORPINGTONS!

**BUFF, WHITE, BLACK**

Did you see what two of our customers, Jennings and Ballard, did at Memphis? Broke even with Cook and Owen Farms! It is only a repetition of Seattle, Kansas City, Little Rock and scores of other shows.

Our exhibition matings are ready now. We can send you day-old chicks now at \$1 to \$3 each in lots of 12 or more that will surely win for you.

REMEMBER, if you want grand, big, wonderfully colored Orpingtons of superb American type and American combs and backs we can absolutely fix you up in eggs, chicks or breeding stock.

We can and will save you money, and at the same time start you so you can meet the giants of the poultry world on equal terms. Write today for our booklet for 1913. It prices day-old chicks at from 35c to \$3 each, eggs from \$10 per 100 up, but always quality at a sane price. We make prices that leave an honest margin for you.

**CHEVIOT FARMS : ROUTE 2 : CINCINNATI, OHIO**

# Dune Alpin Poultry Farm

## SPECIALTY BREEDERS OF S. C. WHITE LEGHORNS

Make the greatest wins of the season at Grand Central Palace, New York, and Hagerstown, Md. shows. Our complete winnings are as follows:

**Palace, N. Y.:** Cocks, 1, 2, 3, 4, 6, 7; hens, 1, 2, 3, 4, 5, 6; cockerels, 1, 2, 3, 4, 5, 7; pullets, 1, 2, 3, 5, 6, 7; pens, 2, 3, 4. Specials for best shape and color female, best head female, best head and color male. Gold special and silver cup for best display: special for best display, any variety, in show.

**At Hagerstown, Md.:** Cocks, 1, 4; hens, 1; cockerels, 2, 3, 5; pullets, 1, 2, 3; pens, old, 1; pens, young, 1; specials for best Leghorn, any variety, and cup for best bird in the Mediterranean classes.

These two wonderful wins, combined with our victories at Palace, New York, Boston and Philadelphia in 1910 and 1911 of twenty-two firsts, thirteen seconds, seventeen thirds, ten fourths, nine fifths, eighteen silver cups and two championship medals, surely proves that we have the best in our variety.

**We have hundreds of cockerels and females for sale, bred from our very best stock, at very reasonable prices.** We have sold all White Orpington stock to Mr. S. R. Clark, Harmony Park, Scotch Plains, N. J. and hereafter will breed S. C. W. Leghorns exclusively. Send for catalog.

## THE 1912 REVISED EDITION OF THE AMERICAN STANDARD OF PERFECTION

The only American authority on the required characteristics of all breeds and varieties of chickens, ducks, turkeys and geese. You cannot raise, mate, exhibit or sell fowls intelligently without it.

**This Great Book** was revised this year (1912) and gives the correct Standard shape, color and weight of every recognized variety of chickens, ducks, turkeys and geese, as well as the disqualifications of each variety. The book contains 332 pages of descriptive matter and ideal illustrations of the different varieties of fowls, photographed from living models. Also

### Five Full-Page Illustrations of Feathers in Natural Colors

to guide the breeder in getting the correct color of plumage on his birds. No one can breed birds of any variety for exhibition without a copy of the American Standard of Perfection as a guide, and it is the only book of its kind published in this country. It is authorized, copyrighted and published by the American Poultry Association. Price postpaid, cloth, \$2; leather, \$2.50.

### OUR SPECIAL MONEY-SAVING OFFER

The Standard (cloth) and American Poultry Journal one year ..... \$2.50  
If you want leather binding add 50c to this price. Canadian subscribers add 25 cents per year for postage; foreign 50 cents

American Poultry Journal Pub. Co., 542 So. Dearborn St., Chicago, Ill.

# Moe's Useful Poultry Inventions

## MOE'S SANITARY POULTRY DRINKING FOUNTAIN

Dead air space between cover and reservoir keeps water cool in summer and from freezing in winter. The nearest thing to a non-freezing fountain that can be constructed without the use of artificial heat. Easily cleaned as an ordinary pail. Sanitary and humane. Manufactured in three sizes: One, two and four gallon capacity.

REPLACE COVER AND YOU HAVE A CONTINUOUS SUPPLY OF PURE WATER

## MOE'S RAT DESTROYER

REMOVE COVER TO BAIT

Insures the safety of your fowls while poisoning the rats in your poultry yard. A simple and much needed device for administering poison safely. A boon to every poultry raiser. One package of Rat Corn free with each destroyer. Manufactured in one size only; 14 inches in diameter.

NONE BUT RODENTS CAN REACH POISON

## MOE'S SANITARY BROODER FOUNTAIN

TURN OVER AND REMOVE BOTTOM TO FILL

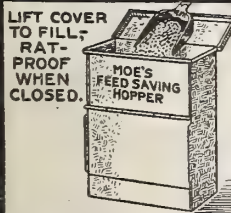

Little chicks can't get wet. Sits in the corner of brooder. Takes up little room. Can't be upset. If desired can be hung up by hook which is on top of each fountain. Manufactured in two sizes: One qt. and one gal. cap.

REPLACE BOTTOM TURN UPRIGHT. READY FOR USE

## MOE'S FEED SAVING HOPPER

LIFT COVER TO FILL. RAT-PROOF WHEN CLOSED.

Cuts down your feed bill; improves the quality of your birds. Hopper feeding with well selected mixture is one of the best known winter egg producers. Feed cannot clog on account of simplicity of construction. Manufactured in one size only, adapted to feeding fifty fowls.

WHEN FILLED, FOWLS CAN NOT HOOK FEED OUT AND WASTE IT.

White Leghorns

Buff Leghorns

Indian Runner Ducks

At eight shows—Rochester, N. Y., Poughkeepsie, N. Y., Brockton, Mass., Augusta, Ga., Yonkers, N. Y., we won

260 Prizes

For the breeding season of 1913 we have mated up 75 pens of grand quality, and in addition colony pens aggregating nearly 1000 splendid breeders. Over 2500 birds were available for selection, a number amply sufficient to insure a very high average of quality.

At LaGrangeville, N. Y. we have our 160-acre Farm which is admirably adapted for a great poultry producing plant. At Bryn Mawr Park, Yonkers, N. Y., is our Metropolitan Branch Plant where we shall have several of our choicest breeding pens of each variety; and shall also have on hand and for sale stock of the finest quality. Bryn Mawr Park station is only 10 miles from New York City.

All our stock has been raised on free range, which in our case means fields, woods and orchards.

Special Prices on Fine Breeding Stock

Cocks, \$5.00 and up; Hens, \$3.50 and up; Cockerels, \$5.00 and up; Pullets, \$3.50 and up.

Prices on exhibition stock quoted on request.

The chick crop of 1912 was much below the average, consequently the demand for baby chicks, eggs and stock is sure to be unusually large the coming season. We therefore recommend early placing of orders. By ordering now and making a small deposit customers may insure for themselves shipment on date selected by them.

All our baby chicks are hatched in Hall Hot Water Incubators and are equal in every respect to hen hatched chicks.

Mating list, with prices of eggs, baby chicks and stock, now ready. Send for a copy.

# AMERICAN POULTRY JOURNAL YEAR BOOK FOR 1913

**Being a Comprehensive and Authenatic Review of the Poultry Industry for the Year 1912—All Thoroughly and Carefully Indexed for Instant Reference. Including a Practical Encyclopaedia on Poultry Culture.**

## PUBLISHERS' ANNOUNCEMENT.

With the event of a billion dollar poultry industry in the United States, the publishers of the American Poultry Journal think it about time that a reliable and authentic Year Book or Annual should be published in this country. Many smaller industries—some of them many times smaller—have one or more Year Books published in their interests and these industries liberally support and encourage their publication and sale, as it has been found that the circulation of such books tends to create new interest and promotes its advancement before the general public.

It is the intention of the publishers to issue a Year Book annually for the great and growing poultry industry of this country, and we feel confident that it will be well received, as it will fill a real need that should have been attended to many years ago, and the entire editorial staff of the American Poultry Journal will devote its best efforts to make it worthy of a place in every poultryman's library. With such an organization of experts behind it—with the equipment in materials, statistics, trained clerical force, books, artists, practical and expert writers—must, in the very nature of things, produce a book that will fully and truthfully represent our great billion dollar industry.

## SOME PROPOSED FEATURES.

**OUR CONTRIBUTING EDITORS.**—The entire editorial staff—conceded to be the best staff of poultry editors connected with any poultry paper—will lend a helping hand in the completion of the Year Book, and it goes without saying that such a brilliant aggregation of poultry experts will produce a Year Book of inestimable value.

**THE POULTRYMAN'S ENCYCLOPEDIA.**—Will be composed of about 300 questions and answers, with complete definitions of all the technical words and terms used in the poultry industry. Edited by Dr. Prince T. Woods, with the assistance of the entire editorial staff. This feature will be a great help to the amateur and professional breeder.

**FEEDING FORMULAS.**—All the new and best feeding formulas that appeared in 1912 will be published. This feature will cover the entire subject of feeding poultry for all purposes including winter egg production, feeding for the show room, for the market, young chicks, crate feeding, cramming, etc., by the best experts in this country and Europe.

**DIRECTORY OF EXPERIMENTAL STATIONS.**—Will contain a complete list of all the poultry experimental stations of this country with names of managers, who supports them and what they accomplished during 1912, and interesting and instructive articles by their managers will be in the great American Poultry Journal Year Book for 1913.

**POULTRYMAN'S CALENDAR.**—What to do each month in the poultry yard, conducted by Mr. Prince T. Woods, managing editor of the American Poultry Journal. This will be a thorough and practical treatise on raising chickens and will tell in plain words just what to do each month of the year. This one feature, compiled and edited by the best practical expert in this country, will be invaluable to both the amateur and old-time breeder.

**SPECIALTY CLUB DIRECTORY.**—Will be a complete directory of all the specialty clubs in America, all arranged under the different breeds and will contain the names and addresses of the officers, number of members, initiation fee and annual dues; special prizes given and where in 1912.

**POULTRY SHOW DIRECTORY.**—Will be one of the most valuable features of the book to the fancier, as all poultry shows held during the season of 1911-1912 having 2,000 or more entries will be reported in full. First, second and third prizes won, with names of winner, judges making the awards, number of entries in class, date and where show was held; name and address of secretary, entry fees for different classes, date of next show, and all arranged and indexed for

ready and instant reference. All shows having 1,000 to 2,000 entries during 1911-1912 will be reported as follows: Winners of first prizes, name of judges making the awards, date of show and place where held, number of entries in each class, date of next show, entry fees for different classes, whether exhibition coops are provided by the show management or must be provided by the exhibitor, name and address of secretary. All shows having less than 1,000 entries will be reported as follows: Total number of entries, date and where held, entry fees, who furnishes the exhibition coops, name and address of secretary, date of next show.

**SPECIAL ARTICLES.**—Many special articles will be published, written by the best experts in this country and Europe, such as the newest ideas on poultry house construction, how to prepare birds for the show room, the double mating system, single mating system, how to line breed, how to operate incubators and brooders, fattening and preparation of fowls for the market, how to operate back yard poultry plants, how to operate large commercial poultry plants, how to advertise fancy and market poultry, how to produce eggs throughout the year, and many others too numerous to mention.

**POULTRY JUDGES' DIRECTORY.**—A complete directory of all licensed and unlicensed poultry judges of this country, with postal address—breeds they are specialists in judging, poultry papers they are associated with, leading shows they have judged, and other information regarding them will be given in full.

**HANDSOMELY ILLUSTRATED.**—The publishers of the Year Book will endeavor to make it the handsomest and most artistically illustrated poultry book ever published. Many full page four-color illustrations and full page one-color plates will be used. It will also be profusely illustrated with smaller cuts showing all kinds of poultry appliances and diagrams of different articles described in the text. No expense or pains will be spared to make this feature the best of any book ever published.

**THOROUGHLY INDEXED.**—One of the most valuable features of the Year Book will be the thorough manner in which it will be indexed under main and sub-titles, and sometimes cross indexed. This feature will make it a ready reference library of all the important events in poultrydom that transpired during the year 1912. This feature will also possess a historical value that cannot be estimated at the present time. Suppose that ten or twenty years from now you wished to find out what were the total number of birds on exhibition at the Madison Square, or any other show, held during 1912, and who were the winners and judges, or what a certain egg laying contest did, or what was the best treatment for any certain poultry disease, or what the experimental stations were doing in 1912, or wanted some statistical information on any subject relating to the poultry industry in 1912, you would just go to your library and get the American Poultry Journal Year Book for 1913, would turn to the index on any of these subjects and the information would be right in your hand. And remember it is the intention of the publishers to issue a similar Year Book each year. It is unnecessary to say that such a historical record of each succeeding year will be worth preserving for the generations yet to come.

**PRINTING AND BINDING.**—The book will be published in the convenient size of 5½x8 inches and will be printed on high grade book paper suitable for printing fine halftone illustrations in the best manner possible. The cover will be an artistic and original design, and the binding will be linen thread sewed to make it flat opening. There will be nothing cheap or trashy about the book, as it is the intention of the publishers to make it a representative of the best present day standard of artistic printing and worthy to be handed down to posterity as an example of what the best printer could produce in the year of 1912-1913.

**The American Poultry Journal Year Book will contain between 400 and 500 pages and the prices will be \$1 for handsome cloth bound de luxe edition, and 50c for paper cover edition.**

## Special Combination Offer

Paper Bound Edition of the "Year Book," and a full year's subscription to American Poultry Journal for only \$1.25, or CLOTH BOUND EDITION and one full year's subscription for only \$1.50. For Canadian subscriptions add 25 cents a year for postage; foreign subscriptions add 50 cents.

**American Poultry Journal, 542 So. Dearborn St., Chicago, Ill.**

## Greider's Fine Catalogue

and calendar of fine, pure-bred poultry for 1913. This book contains many pages of poultry facts. 70 different varieties, some shown in natural colors, all illustrated and described. Tells how to make hens lay, raise and care for them, all about the Famous Greider Incubators and Brooders. Shows photo of the largest poultry farm in Penna. Prices of breeding stock and eggs for hatching, and supplies within reach of all. A perfect guide to all poultry raisers. Send 10c for this noted book on poultry.

**B. H. GREIDER, Box 101, Rheems, Pa.**

### WHAT HENS NEED

Hens need lime and grit to make them lay more and be healthy. **CRY-CO** petrified shell containing 99% PURE CARBONATE OF LIME 1% HARD SHARP SILICATE GRIT, will make your hens lay and increase your egg profits. More eggs, healthier hens, harder shells, finer chicks and quicker results in feeding **CRY-CO**. Ask your dealer. Look for the trade-mark. Valuable booklet free.

**W. A. NEUSITZ & CO., St. Louis, Mo.**

## FREE SEEDS

**FRENCH RADISH**  
Very early, crisp and tender.

**Dwarf Giant Tomato**  
Extra Early

### FOR TESTING

**Dwarf Giant Tomato.** Grows two ft. high produces enormous size Tomatoes. They weigh one or two pounds each; color crimson: a wonderful bearing plant. We will send a trial package of each to any one who writes, also our new 1913 Seed Catalog included (4 colors)—all FREE. Write Today.  
**Smith Bros. Seed Co., Box 22, Auburn, N. Y.**

## HUMPHREYZE YOUR HENS

I keep hens because I enjoy them and because I want fresh eggs.

What is more, I get them. All winter my small flock will average 40 to 50 eggs a day, and I have gathered 58, and I am not a professional poultryman. I usually keep about 70 hens. Around me my neighbors were not getting any. That is, they did not until I told them how. Now they get as many as I do. They say I Humphreyize their hens, and I have adopted that word for my own.

I will tell you how to Humphreyize your hens, so you can get eggs right through the winter months. If you have no more than 10 hens, it will pay you to Humphreyize them. It costs you nothing to find out how, and I will give you a

It makes no difference what breed you have. Some breeds are better winter layers than others, but any breed can be Humphreyized and made to lay in winter. The increased egg crop will, in a short time, more than pay the cost, while the feed bill will actually be about half what it now costs you when, perhaps, you get no eggs.

A piece of fresh bone which you can get at your butcher's for nothing, or a few cents at the most, is a part of Humphreyizing, but if you will

### Send for my book "The Golden Egg"

which is free—you will get the whole thing. I tell you how to care for your flocks month by month, what to do in case of sickness—in fact, my book is an easily understood guide. With it you can make your hens lay, and give vigor and strength to the whole flock. Send for a copy to-day and begin to Humphreyize.

**HUMPHREY**  
**White St. Factory Joliet, Ill.**

**30 Days' Free Trial**

## Double Your Profits

Fill your poultry yards with trees and bush fruits and reap a double harvest. The poultry thrive on the insects and revel in the shade. The fruit produces better and surer crops. \$300 per acre is an average return from fruit. Begin planting this spring.

### "Scarff's Fruit Catalog"

Offers special inducements. A reputation of over 25 years is back of every order. Our list is complete, fully describing the products of our 1100 acre Nursery and Seed Farms. Send for our free orchard tree catalog. Also describes our small fruit and farm seeds. Write today. It's free. Send the names and addresses of 5 Fruit Growers and get a fine current bush free.

**W. N. SCARFF, Box B, New Carlisle, Ohio**

## Natural Hen Incubator

Approved by Over 550,000 Buyers

### 200-Egg Size, Only \$3

**J. F. Siems**  
Patentee

**BIGGER Hatch—Healthier Chicks. Stop—Think!** Why pay a big price for an incubator when Siems **Natural Hen Incubator** will give you a higher percentage of good, strong, healthy chicks at one fourth the cost. Write at once for full facts—don't take any incubator until you learn all about Siems way of using the natural hen—the only thoroughly successful incubator.

### A Very Simple System

The Natural Hen Incubator is no experiment. It has been tested by over half a million people. There are no lamps, no oil, no deadly fumes and no costly mistakes. **No freight to pay.** Eggs stay in healthy, sanitary condition during entire hatch. Different from any other incubator. Has all advantages of old fashioned, setting hen and gives greater percentage of saved, healthy chicks than in artificially heated incubator. **A. A. Linnett, Kan.** writes: "I have just set my N. H. Incubator for the third time. First hatch, 99 chicks from 102 eggs; second, 97 chicks from 104 eggs." Thousands of other voluntary testimonials. More agents wanted. Write today for **FREE Catalog** telling all about it and containing special introductory offer.

**NATURAL HEN INCUBATOR CO., Sta. H., Dept. 4, Los Angeles, Cal.**

## Guaranteed garden tools

You are sure of saved time, lighter work, and bigger crops when you use implements marked

## Planet Jr

Nearly two million soil-tillers all over the world are using them. Fully guaranteed.

**No. 25 Planet Jr Combined Hill and Drill Seeder, Double Wheel Hoe, Cultivator, and Plow,** has automatic feed-stopper, seed index, and complete cultivating attachments. **Indestructible steel frame.**

**No. 16 Planet Jr Single Wheel Hoe, Cultivator, Rake, and Plow** is light, handy, and adapted to almost every garden use. Has leaf guard for close work, and lasting steel frame.

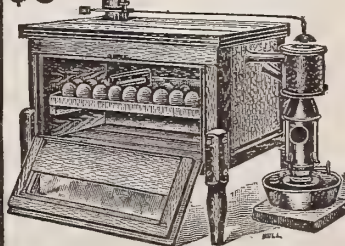

**FREE!** An instructive 64-page illustrated catalogue describes 55 tools for all kinds of horse and hand cultivation. Send postal for it today!

**S L Allen & Co Box 1107T Phila Pa**

## PETALUMA INCUBATORS AND Brooders

**\$8.50** 63 EGGS WE PAY FREIGHT

are used more extensively throughout the world than any others, hatching Hen, Duck, Turkey, Goose, Ostrich, Alligator, and all other kinds of eggs.

**CALIFORNIA REDWOOD**, the best for Incubators, is used. We are close to the great Redwood Forests and get the best. You want the most reliable incubators and brooders. Then learn about the Petaluma before buying.

Persons ordering "Day old Chicks" from the hatcheries are specifying "these chicks must be hatched in Petaluma Incubators." That tells its own story.

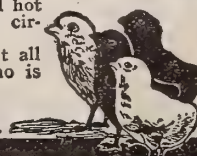

**EGG CITY INCUBATORS** are the best and cheapest hot water incubators in the world. Model 63 eggs for \$8.50 and We

Pay Freight, is the greatest bargain ever offered in a small hot water incubator. Order right now or at least send for a circular, because you ought to know all about it.

Finest Catalogue ever printed, **FREE.** Booklet, "How it all came about," mailed free. It will interest you. Tells who is the oldest maker of Incubators.

**PETALUMA INCUBATOR COMPANY**

Box 362 Indianapolis, Ind. Box 305 Petaluma, Calif.

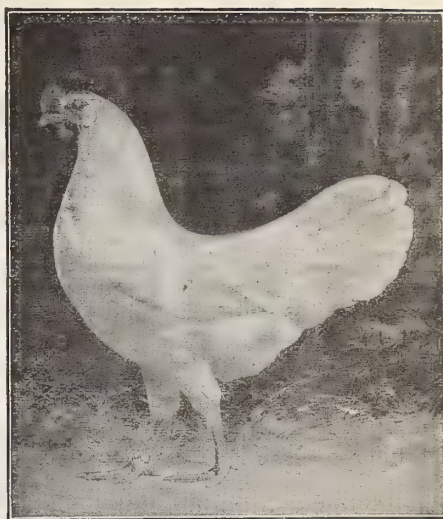

# Laying Instinct Bred in the Bone

Ferris Improved White  
Leghorns will lay two  
dozen Eggs a year more  
than any other fowl

Because they have been

## Bred-to-Lay for Twelve Years

Twelve years ago we became dissatisfied with the best White Leghorns we could find anywhere in the country at that time. They lacked stamina, strength, vigor. No successful effort had ever been made to breed them up to quality.

Our first thought after securing the best stock we could buy was to increase the size and vigor of the birds to give a foundation that would permit greatly increased egg production. Our aim from the beginning has been to build a strain that would lay more eggs than the very best of any other breed or strain and yet win anywhere in strongest competition.

It has taken us years of patient effort to get these good qualities as well developed as we have them today. During that time not a poor layer has been allowed in our breeding pens and every year as our experience increased we were able to select our best layers with more certainty and mate them with greater skill. Every year has seen an increase in our average egg yield, until now it is easy to get an average yield of more than 175 eggs a year from a flock of Ferris Leghorns.

### Ferris Selling Plan

We go farther than it has ever been considered possible to go in satisfying customers, not only in quality of stock we furnish in the first place, but in the responsibility we assume of seeing that the birds you buy remain in good condition until they become accustomed to change of climate and to different methods of feeding and caring for them. You can't buy birds elsewhere and exchange them any time within 30 days if they become sick or don't breed properly, or are unsatisfactory for any reason whatever. No one else will replace without question every bird that dies within thirty days.

### Winners for Any Show

We have been winning for years at the largest shows—Louisville, St. Louis, Toledo, Detroit, Pittsburgh, Grand Rapids, and the Michigan, Indiana, Iowa and Tennessee State Fairs—and can furnish winners for any show no matter how strong the competition.

Tell me where you want to exhibit and let me quote you prices. We have 5,000 fowls this year raised from 20 exhibition matings and the birds in these matings were all the same type as the cockerel and pullet shown in this ad, having the style and typical shape of Ferris White Leghorns; with good combs, and low, well-spread tails, pure white plumage and rich yellow legs and beaks, and bred to lay.

Prices are very reasonable. We have choice foundation and exhibition stock at \$7.50, \$10, \$15, \$20 and \$25 for males and \$4, \$5, \$7.50, \$10 and \$12.50 for pullets and yearling hens.

We take great pains to fill every order with exactly as great care as if our customer was right here to pick out the birds himself. If you explain the good points you are most particular about and the bad points you wish to avoid, it makes no difference how many hundred miles are between us, we can select stock that will exactly suit your requirements, provided you do not expect a better bird than it is possible to furnish for the price you pay. The quality of every grade of stock described in the catalog is the best that can possibly be furnished for the price named. We endeavor to give every customer an absolutely square deal, and if you have had experience with White Leghorns so that you know the value of a bird, you will appreciate the fact that the birds we send are from 50 to 100 per cent better than most other breeders send for the same prices.

### Eggs and Day-Old Chicks

We are now booking orders for eggs and day-old chicks for spring delivery. We have never been in better shape to fill orders of any size. Thousands of fine hens in our utility matings and our 25 exhibition matings of remarkable

quality will make it possible for us to ship promptly and quote prices that are very reasonable. All infertile eggs replaced free; safe arrival of chicks guaranteed any distance.

### Our Guarantee on Eggs

Our guarantee on eggs is as fair as our guarantee on stock. We endeavor to protect our customers and want you to be perfectly satisfied. When you do not get satisfactory results tell us and we will do everything possible to make it right.

**We Replace all Infertile Eggs Free of Charge.** Test the eggs after they have been under incubation a week or ten days, and let us know the result. We know, from the way the eggs are testing in our own incubators, it is well to be careful that you do not get eggs from late hatched stock that is not mature, for eggs from immature Leghorns are as worthless as eggs from an immature bird of any other breed. If you want eggs from yearling hens we can furnish them, for over half the birds in our breeding pens are yearling hens.

### Can Ship Anywhere

We can ship eggs safely anywhere in the United States, Canada or Mexico, and will guarantee fertility. We ship no eggs more than three or four days old, and nearly all eggs are shipped the next day after they are laid, for during the regular hatching season we usually have orders booked a week or more ahead and we make shipments every day.

### Eggs for Hatching

There is a great difference in eggs for hatching and if you want good results you must be particular to get eggs from stock that has been handled properly. It is very easy for a careless breeder to so handle his stock that the eggs will not hatch well nor even produce strong chicks when they do hatch. Lack of exercise, improper feed, overcrowding and neglect of any of several other important details will decidedly affect the results that can be secured from the eggs.

### Breeding Stock Must Be Handled Properly

The breeding stock must be handled properly from the time they are hatched so that they will be strong and vigorous when the breeding season comes. Neglect at any time in their lives will affect their vitality and their breeding and laying qualities. Selected eggs from stock that has always had proper attention are worth considerably more than ordinary eggs, because you can be sure that the stock you raise from them will give entire satisfaction.

### Large Even Shaped Eggs

Eggs from all our pens, utility and exhibition, are carefully selected. They are large,

smooth, even shaped—the kind that are nearly always fertile and sure to hatch strong chicks. Small eggs—those weighing less than 25 ounces to the dozen—are never sold or used for hatching, and the average will be from 26 to 28 ounces. Eggs with rough or uneven shells do not look well and seldom hatch well, so we discard them. We do not sell eggs that are poor in color. A Leghorn egg should have a white shell, and we do not breed from hens that lay any other kind.

### Day Old Chicks

It is usually better and cheaper to start with chicks than with eggs, because chicks cost only twice as much as eggs and the average hatch from eggs is only about 60%, except in the hands of poultrymen who have had considerable experience and know just how to get the best results. The saving in express charges is also worth considering, as the charges on 100 chicks will be only one-third as much as on the number of eggs required to hatch that many chicks. We can generally ship chicks as promptly as eggs, so there is a difference of three weeks in favor of the chicks—three weeks difference in the time the pullets will begin to lay.

### Distance We Can Ship

Chicks can be shipped 1500 miles with safety, and in some instances where there is fast train service as high as 2,000 miles. We guarantee safe arrival at any express office within 1500 miles from Grand Rapids—a radius that includes two-thirds of the United States and Canada.

Our loss in shipping has averaged less than 2% during the past four years, and our customers have had good success raising the chicks, which proves that the stock is hardy and vigorous and that the chicks have not been injured in the least by shipping. In fact, it is much safer to order chicks than eggs because chicks are nearly always handled more carefully than eggs.

### New Catalog Ready for You

Our new catalog of over 60 pages is the finest catalog ever issued by any Leghorn breeder and is sent absolutely free of charge. It gives you the benefit of our 12 years' experience with White Leghorns, and contains information every poultryman should have.

Tells all about the methods that have made Ferris Improved White Leghorns so profitable and describes every grade of stock we have to sell. Fully describes our bred-to-lay matings and our exhibition matings and gives prices of eggs and chicks. Send a post card now while you have the matter in mind and get the copy we have reserved for you. Address

**GEORGE B. FERRIS** The Ferris Leghorn Farm 905 Union Av., Grand Rapids, Mich.

# DON'T KILL THE LAYING HEN

**T**HE HEN that lays is the hen that pays. Hundreds of thousands of hens are killed each year that are in full laying condition, while an equal number are kept in the flock that never have or never will lay an egg, or at best will lay only a very limited number. All this may be avoided if everybody would use the Potter System of telling the layers from the non-layers.

## Cull Out the Drones and Save on Feed

Why should the poultry breeder go on wasting feed by feeding a lot of hens that do not produce enough eggs in an entire year to pay for their feed for one week, when it can be avoided by learning the Potter method of telling to an absolute certainty just which hens are the producers and which are the drones in the flock?

If you know the Potter System you can reduce the size of your flock and save money on your feed bill, and at the same time secure just as many eggs at from one-third to one-half the cost. **Is not this worth considering?**

The Potter System is the only reliable system on this subject, and anyone can learn it in an hour's time, and we guarantee that anyone with a little practice can go among a flock of fowls and pick out the layers as rapidly as the birds can be handled. We have thousands of unsolicited testimonials from people who have purchased our book "Don't Kill the Laying Hen" and learned how to pick the layers and who consider the book worth many times the cost. Read what a few of them have to say:

## TESTIMONIALS

3095 W. 100th, Cleveland, Ohio.

Gentlemen:—Having received one of your books regarding the laying hen, I am pleased to say that it has done a great deal for me and would not part with it for many times what it cost if another could not be had. Yours truly, JOHN VAN SCHOAR.

304 Grand Allee, Quebec, Canada.

Gentlemen:—I received your book "Don't Kill the Laying Hen" some time ago. I am very much pleased with it and think it the best book I have ever read and would not be without it for any amount you would ask for it, and think every person that keeps fowls should have a copy. Yours truly, ED. ARCHER.

Wellsville, N. Y.

Gentlemen:—I received your book on "Don't Kill the Laying Hen." Will say that it is all you claim it to be and that it is no fraud. I went out to the hen house last night and tried the test. It worked to perfection. I predicted that a few hens would lay the next day, and sure enough some of them have laid. Very truly yours, WM. H. LEO.

Jutland, N. J.

Gentlemen:—Yours at hand and am glad that you have notified me of your new book of the system of selecting laying hens. Your old book has saved me many a dollar on feed bill, besides giving me more room for the layers. I would not be without this book for any money and am glad you have added more to it. Yours truly, M. V. TAYLOR.

977 Wilcox Ave., Chicago, Ill.

Gentlemen:—I must say your book "Don't Kill the Laying Hen" is valuable to any poultry keeper; it is worth its weight in gold and your system reliable in every way. I am more than pleased with it. I have told some of my friends about the system and they got the book and are pleased with it. Yours truly, JOHN MOYER.

Box 105, R. R. No. 1, Charlestown, Ind.

Gentlemen:—I am ashamed that I have allowed almost two years to pass without writing you how thoroughly I endorse and value your book "Don't Kill the Laying Hen." The only thing I don't like is I can't tell my poultry friends all it has taught me. I would not be without it for many times its cost. We frequently ship fifty or sixty hens and get as many eggs as before, showing we had not shipped laying hens. It saves me a trip to the poultry house at night to know which are broody hens. At feeding time I examine all hens on the nest and shut up the broody hens. Yours very truly, MRS. B. R. MCCONNELL.

Deer Creek, Okla.

Gentlemen:—Your letter and circulars to hand and contents noted. Yes, the best I can do is to have the new book "Don't Kill Biddie." It has made me one hundred and ninety dollars and still making more, and only a few chickens, from 70 down to 44 now. I'm running two machines and selling enough to support me and living like Queen Victoria. Yours truly, G. W. NORMAC.

Tucson, Ariz.

Gentlemen:—Your book in regard to the laying hen received. It is well worth the price. Anyone owning a small flock of chickens ought to have one. Yours truly, J. A. GORDON.

614 Boos St., Harrisburg, Pa.

Gentlemen:—I received your book on "Don't Kill the Laying Hen" and must say it is all it is claimed to be and more. Yours truly, GEORGE J. GRIFFEE.

Lincoln, Kansas.

Gentlemen:—Your book "Don't Kill the Laying Hen" is just the thing for a poultryman. I don't see how I got along without it. I would not part with the knowledge gained from it. Yours truly, MRS. IDA MEIER.

# THE FOURTEENTH EDITION OF THE GREAT POTTER BOOK

is just off the press. Revised and improved to such an extent that it is now without question the **greatest book** of its kind ever published. This book contains 96 pages, (6½x9 inches) and 38 illustrations; printed on super-calendered paper, bound in two kinds of binding—paper and cloth. Will make a very valuable addition to any poultryman's library. In fact, no one who raises poultry, no matter how many or how few, can afford to be without a copy of this great book. The secret this book contains is worth many dollars to anyone.

More than 100,000 copies of this book have been sold during the past few years, which in itself is conclusive evidence of the value of this book. When ordering a copy of this book you must promise not to reveal the secret to anyone except the immediate members of your family. The secrets it contains cannot be obtained from any other source. Everyone who receives this book is pledged not to reveal them to others. Therefore, it is to your interest to obtain a copy of this book at once and become a member of Potter's great "secret" family, stop killing the laying hen, thereby greatly increasing your poultry profits.

The Potter System of telling the laying hen has stood the test of time. It has been advertised in these columns for the past eight years, and during that time thousands of copies of the book have been sold and thousands of poultrymen all over the country have been enabled to turn loss into profit and thousands more can do the same thing if they will take advantage of the following offer:

## How to Get the Great Potter System

Realizing the great importance of this system to all poultry breeders the American Poultry Journal Publishing Co. has secured the exclusive right to print and sell this great work, and the benefits to be derived from system will be given to American Poultry Journal subscribers only.

## OUR GREAT OFFER

In order to supply every poultry breeder with the great Potter System and the greatest poultry journal on earth, we have put the price within reach of all, as follows:

Don't Kill the Laying Hen (Paper Cover) } BOTH FOR  
American Poultry Journal, one year . . . \$1.30

For the Cloth Bound Edition, \$1.50

## A History of Eight Non-Laying Bob-Tailed Hens and One That Was Not Bobbed

Including valuable scientific facts regarding molting. A supplement to "Don't Kill the Laying Hen." This supplement gives the story of One Hen that was not bobbed; the story of the first four non-laying bobtailed hens; the other four non-laying bobtails; how hens having red combs are deceiving; forced molting bad business; how the laying season may be extended and many more eggs obtained, or why hens having good laying organs stop laying early in the season, and much other valuable information which is worth far more to the average breeder than the small price we are asking.

If after a careful study and trial of the system you find that we have misrepresented this system in any particular, money will be cheerfully refunded. We have given this system a thorough investigation and know whereof we speak. If you are already a subscriber to A. P. J., we will extend your subscription one year from its present expiration. Send all orders to

## "Dandy" Bone Cutter

You needn't pay one penny for this bone cutter until you try it and it satisfies you. Feeding green bone is one of the first steps to gain a big egg yield. But the bone must be cut right. The Dandy Green Bone Cutter cuts across the grain of the bone, enabling the hen to digest the nutritive elements better and convert same into eggs, blood, feathers. Our terms on the Dandy Bone Cutter are

\$5

AND UP

### NO MONEY IN ADVANCE 30 DAYS FREE TRIAL

The Dandy costs less than most bone cutters and it works infinitely better. Also cuts meat, vegetables, roots, etc. To ensure big sales this year we have made special reduction in prices. Write quickly for free booklet. Prices are liable to rise next month, owing to big demand for raw material.

**STRATTON MFG. CO., Box 17, Erie, Pa.**

# Chicks that Live

## Hatch Chicks that Live—Bigger Chicks—Stronger Chicks—Healthy Chicks—and More of Them

Your profits come from the chicks that live, Mr. Poultryman—not from the chicks that die. A big hatch doesn't mean much to you unless the chicks live and thrive—and unless you can hatch chicks **THAT WILL LIVE AND THRIVE**—you can't make money raising poultry. 50 per cent hatches and raising 50 per cent of the chicks you hatch isn't successful poultry raising—yet many breeders are doing no better than that—and think they are successful.

### YOU CAN HATCH EVERY HATCHABLE EGG and HATCH CHICKS THAT WILL LIVE

if you use a Buckeye Incubator. Thousands are doing it—hatching great, strong, healthy chicks that start to grow the minute they leave the shell and keep on growing—without the aid of tonics and medicine to keep them alive. With a Buckeye Incubator you can hatch eggs that other incubators cannot hatch and get larger chicks than can be hatched in any other incubator or under a hen.

You cannot go wrong with a

# BUCKEYE INCUBATOR

because we have an agency right in your home town where you can see one at work—see how it hatches—see the chicks hatching and get personal help in operating the Buckeye you buy. We have made it possible for you to cut out hard-to-understand direction books and all possibility of failure, because our agent will show you how to hatch every hatchable egg and produce bigger chicks and stronger chicks than you ever saw before.

Buckeye simplicity and our agent's help will enable

**Sold as Low as \$8.00**

Over 325,000 Buckeyes are in use today. Over 100,000 sold last year. Has 22 years of successful history. Write today for our new catalog, just the book you will want if you keep chickens. Talks to the point and stops when it gets there. Reading

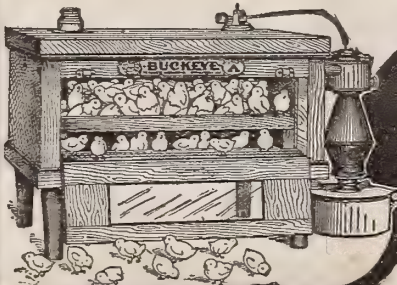

**THE BUCKEYE INCUBATOR CO.,**

you—anybody—to operate a Buckeye Incubator successfully. Don't be a doubter! Seeing is believing, so send us your name and we will direct you to our dealer so you can see a Buckeye hatching.

Buckeye Incubators are made in five sizes, 60 eggs to 350 eggs—and are equipped with every desirable device to hatch chicks that live. (The big 10,000-egg machines use the Buckeye principle of hatching and construction.) They are GUARANTEED to hatch every hatchable egg and are

It is time well spent. Do not delay. With the catalog we will send you information about the dealer who will show you a Buckeye in operation, and testimonials from every state in the Union.

## Ideal-Hover

Pick it up and carry anyplace with lamp lit, comes nearest to natural conditions of anything yet, broods chicks just like the hen, the greatest Colony House Hover ever invented, no lamp box to fasten to outside, no holes to cut, no false floors. HEATER: Our hot air duplex or double drum heater will produce 15 per cent more heat than the single drum heater used in all of the first class Hovers, making it the best Hover for winter use on the market. AUTOMATIC LAMP: Our lamp will never smoke, oil always remains cool as oil fount is on the outside, feeding the oil to the wick just as needed, and only enough to keep it covered, lamp flame always in plain view. Dr. John M. Zook Jr., W. Chester, Pa. says: It beats them all for handiness, safeness and the small amount of oil it consumes. Wilson Jones, Girard, Pa. says: The two Ideal Hovers are proving themselves splendid chick raisers, raising every chick, find check inclosed for 5 more. Gilbert J. Mitchell, Kingfisher, Okla. says: The Hover is perfectly satisfactory, please find check inclosed for 5 more. The Ideal Hover is all metal but the double curtain, the top being double with Asbestos packing, 24 inches in diameter, capacity 100 chicks. GUARANTEE: We guarantee the Ideal Hover to successfully brood 100 chicks as long as they need heat, and to give perfect satisfaction in every way or we will return the money. PRICE: Complete with thermometer \$5.50 freight paid on two or more east of the Rockies. \$6.75 west of Rockies freight paid on three or more. Upon receipt of \$1.00 we will ship by express C. O. D. to be examined and allow freight on two or more. Circular showing five views of the Ideal, also testimonials of pleased customers, and Poultry supplies we Manufacture and sell, FREE if you mention this paper.

**Stover Mfg. Co., 318 Plymouth St., FREEPORT, ILL.**

### Poultry and Berries Are Good Team Mates

Poultry raising alone is profitable when rightly conducted, but a breeder's income can be doubled at little expense by berry growing.

In raising fowls there are bi-products that go to waste; fresh pasture and range that are not supplied, unless something like berry growing is carried on. Then these things are turned into hard cash and lots of it. Little extra expense is required and the small amount of extra labor comes when the poultry work rests.

#### Berries Add to Your Income

To plant and care for an acre of Berries till they bear costs less than \$60. An acre should net a yearly profit of \$400. For \$300 you can plant five acres, which should return a clear profit of over \$2,000 a year.

I know what I am talking about. I have done these things with Berries. I will tell you how to do them. Send for the Berrydale Berry Book. It's full of inspiration and information. Nothing else like it printed. Write today for a copy—free.

## Give Hens Clover

### It Makes Them Lay

Clover or alfalfa is a great winter laying feed. Each is rich in protein—the food element most necessary to make eggs. Write me to-day and I will tell you how to fix enough in a few moments' time forever the largest flocks. The hens eat it up clean—no waste—when cut in a

### Humphrey Rapid Clover Cutter

I will send you a machine on a ten days' trial, taking all risk, to satisfy you that by following my advice and Humphreyizing your flock you will get more and better eggs this winter.

### Get "The Golden Egg"

The helpful book for you. Adapted to any size yards. Tells how to get 150 to 250 eggs a year per hen. The feed, not the breed, is what counts most. This book of mine is as necessary to you as a poultry house. We can convince you. Write for copy to-day. **HUMPHREY, New St. Factory, Joliet, Ill.**

## Egg Profits

A hen never shirks her job to be mean and contrary, so don't blame the hens if your egg profits are not what they ought to be.

The number of eggs a hen lays depends entirely upon her condition.

Most farmers now recognize the fact that proper fertilization of land will greatly increase the yield.

With hens—a tonic, and appetizer, will cause what they eat to properly digest, and they will in turn lay more eggs.

### Dr. LeGear's Poultry Powder

is the greatest of all poultry remedies. It purifies the blood, prevents and cures diseases, and makes hens lay.

Large packages 25c and 50c  
25 pound Pails, \$2.50

If your local druggist or dealer hasn't it, write us, giving his name and we will see that you are supplied.

BEDFORD, OHIO

PARKS' STRAIN OF BRED-TO-LAY

## Barred Plymouth Rocks

Have laid their way into popularity. They represent over twenty years of careful selection, and trapnesting for eggs, in addition to being bred close to the standard requirements, as our recent winnings show. Have no more cocks or pullets to spare, but a very nice selection of hens together with a nice lot of big, husky, healthy, well marked, hen-raised cockerels. Cockerel circular free. Am booking and filling orders for eggs. Selected eggs, \$5-15, \$8-30; \$11-50, \$20-100. Incubator eggs, \$2-15, \$6-50, \$10-100. Day-old chicks after March 1. Chick cir. and large 36-pg. cata. free.

J. W. Parks : Box J : Altoona, Pennsylvania

## How About Your Lamp?

Are you going to worry along with that old lamp and perhaps lose your hatch? It will pay YOU to have a ZERO SAFETY LAMP in your incubator and brooder, because it will give a sure, intense heat, with no danger of fire or explosion. Is constructed so that it cannot overheat. Think what an advantage this is to our thousands of satisfied users. From any of our dealers or \$1.25 postpaid, direct.

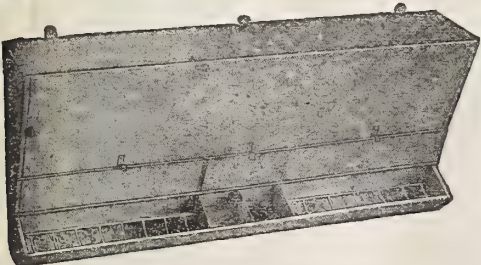

When all the experiments have been thrown away, the Sanitary Poultry Drinking Fountain will still remain the Best and Most Practical Watering Device ever invented. Not injured by Freezing Solid. Easiest to clean and fill. One trial will convince you.

Price—1-gallon size, 50c; 2-gallon, 85c; with heater, 1-gallon size, \$1.00; 2-gallon, \$1.45. Our catalogue for the asking.

Atsatt Bros., 27 Pearl Street, Mattapoisett, Mass.

## THE HOPPER THAT FEEDS WHEN THE CHICKENS ARE HUNGRY

It saves the inconvenience of feeding at a regular time. When the chickens get hungry they go and eat. It is 30 inches long, stands 16 inches high, built with two compartments, one for dry mash and one for oats, holding one peck each. Between are two small compartments for grit, oyster shell or charcoal, holding three quarts together. See illustration.

## IT CANNOT CLOG

The pecking of the chickens in the troughs operates a vibrating tongue in each compartment, allowing the feed to drop.

Write for our catalogue B20, also our new circular, describing and illustrating our new models in hoppers and drinking fountains.

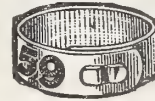

Oakes Manufacturing Co. : Tipton, Indiana  
INCUBATOR AND POULTRY YARD SUPPLIES

## Fruit Trees Thrive in Poultry Yards

Plant fruit trees in your runs and make two profits from your poultry. Chickens furnish fine fertilizer and eat insects from trees. Buy the finest grown trees at wholesale prices.

## Green's Trees 500,000 For Sale

No agents or canvassers. Sold direct and you get the middleman's profit. All clean, healthy, full-bearing trees. True to name and reliable. Apple, peach, pear, plum, quince and cherry trees. Green's 1913 Catalog FREE. Two interesting booklets, "Thirty Years with Fruits and Flowers" and "How I Made the Old Farm Pay," sent free. State which. GREEN'S NURSERY CO., 42 WALL ST., ROCHESTER, N. Y. Established 34 years.

## Get Winter EGGS

Cold weather, close confinement, lack of green stuff and lack of exercise make the egg organs of the hen sluggish and inactive during the winter months. That's bad for you, because the hen, instead of producing eggs when city folks are willing to pay top-notch prices for them, starts putting on flesh and becomes lazy.

What hens need during winter is a tonic to turn the ration into eggs, to keep the egg clusters active, vigorous and constantly working.

## Dr. Hess Poultry Pan-a-ce-a

tones up the dormant egg organs. It cures and prevents gapes, cholera, roup, leg weakness, etc. If your hens can be kept healthy and active, working and scratching for a living, you'll have winter layers. Poultry Pan-a-ce-a is sold on a written guarantee.

1 1/2 lbs. 25c (mail or express 40c); 5 lbs. 60c; 12 lbs. \$1.25; 25-lb. pail \$2.50. Except in Canada and the extreme West. If your dealer cannot supply you, we will. Send 2c for Dr. Hess 48-page Poultry Book, Free.

Dr. Hess & Clark, Ashland, Ohio  
Manufacturers of Dr. Hess Stock Tonic

# FRAZIER'S BUFF ORPINGTONS

Hundreds of properly bred cockerels and pullets for sale that are wonderful in even buff and typical Orpington shape, that will open the eyes of all Orpington breeders the coming season. I hatched from nothing but eggs from my stock that won 34 prizes at Indianapolis (Nat'l Club Meet) Springfield and Louisville, besides seven silver cups and champion banners for color, shape and QUALITY. Every bird I offer for sale is either son or daughter of the above WINNERS. It follows then, that my \$3 birds will have more breeding VALUE than birds offered by other breeders at equal or higher prices. One trial will easily convince you. Yearling breeders \$2 and up; young stock \$3, \$5 and \$8; show stock reasonable, trained FREE and shipped in the pink of condition when wanted for any show.

Special for best shaped female, silver cup for best Barred Plymouth Rocks, Louisville Poultry Show, Dec. 1909. All firsts, Owensboro, Oct. 1909. 1st Cockerel, 3rd Pullet, 3rd Cock, 4th Cockerel, 4th Hen, 4th Pullet, 5th Hen, 5th Pullet. Blue Ribbon for best display. Cash prize for best Barred Plymouth Rocks, Kentucky State Fair, Sept. 1911.

**Breeding Cockerels \$3.50—Pullets \$2.50**  
**Exhibition Males \$12.50—Females \$10**

**Incubator Eggs \$1.50 per 15—\$7.50 per 100**

As splendid as have been our birds in the past, this season they are the height of perfection—in the new type—the correct type—the Pope type, of clear, distinct, black and white barring. No other breeder can give you such quality in color and markings as we can. We are specialists in Barred Rocks, have bred them successfully for twenty-one years, and when you buy Pope strain, you buy birds so good that they are in a class by themselves.

**EXHIBITION BIRDS.** We do a large business; we furnish MORE WINNERS TO OUR CUSTOMERS than perhaps any breeders in America. Our low prices secure for us more orders than we can take care of and our FINE, LARGE, MAGNIFICENT BIRDS, absolutely guaranteed, win the blue for those that buy them. Give us a trial, we can please you, we can please anyone.

**BREEDERS.** Buy your breeders from us. We have on range 1800 early hatched birds raised direct from our PREMIUM AND PEDIGREE PENS, bred to perfection in shape and color, large, healthy, vigorous, and we will send you the kind of stock you need to build up and strengthen your flock. Our unlimited facilities for hatching and raising Barred Plymouth Rocks ENABLES US TO GIVE YOU SELECTION NO SMALL BREEDER CAN POSSIBLY DO. A choice breeding or exhibition pen bought from us will do you more good than DOUBLE OR TRIPLE THE MONEY SPENT ELSEWHERE.

DARLINGTON EGG FARM

— Alfred P. Edge —

Box B : : Darlington, Maryland

## A Suffering Hen

Lice attack the vitality of an infested hen so persistently that there is no "let up" in her misery. There will be a "let up," however, in your profits, for no hen is sufficiently vigorous to support voracious myriads of hungry lice and also lay eggs. Whether you suspect the presence of lice or not, now is the time to begin to use

## Instant Louse Killer

It will kill them if present and prevent their coming if you don't have them. Sprinkle it freely about nests and roosts, dust the hens with it and apply wherever there is the possibility of lice harboring. Instant Louse Killer is the prescription of Dr. Hess (M.D., D.V.S.), and destroys lice on cattle, horses, ticks on sheep, rose slugs, cabbage worms and bugs on cucumber, squash and melon vines. Comes in shaker-top cans and may be used winter and summer alike. Good also as a disinfectant.

### SOLD ON A WRITTEN GUARANTEE

See that the word "Instant" is on the can.

1 lb., 25 cents) Except in Canada and  
8 lbs., 60 cents) extreme West.

If your dealer cannot supply you, we will send one pound by mail or express, prepaid, for 35 cents.

POULTRY FARM  
Caruthersville, Mo.

S. C. White Orpingtons

Our special for this month is our low price on early hatched cockerels. Also choice pullets at a bargain. We have made great winnings at the shows; write us about them. We are mating our pens for early hatched chicks. Eggs, eggs, eggs will be ready to ship Jan. 1st write us. Just a word about our stock; when mating our pens we always look after the laying side. Utility first, then quality. We have more show stuff in our pens this year; every one headed by a ribbon winner. All birds direct descendants from our heavy laying strain. They are the best breeding and prices made to move them.

SPECIAL SALE FOR JANUARY

SPLENDID PULETS \$5 FOR \$10

## Ringlet Barred Rocks

Grand breeding cockerels and pullets, \$3, \$4 and \$5. Mated trios, \$7 to \$10. Pens, \$10 to \$15.

That are Orpingtons in type, color and quality, and those wanting high class birds for either exhibition or breeding can procure them at right prices. Guaranteed to give satisfaction. My 1913 breeding pens are made up. Eggs for hatching, Catalogue with list of winnings, prices, etc., for the asking.

**C. A. KEEFER (AR 5) MUSKEGON, MICHIGAN**

## CANADA'S BEST S. C. & R. C. BLACK MINORCAS

Are the best in the world. The Provincial Show at Guelph is Canada's greatest show. At Guelph Show, December, 1912, in the largest and best class of S. C. Black Minorcas ever shown in America my strain won (principally birds I sold and stock from eggs from my yards) the following prizes: Single Comb—Cock 1-2-3, hen 3-4-7, cockerel 1-2-3-6-7-9-10, pullet 1-2-4-5. There were 18 S. C. cocks, 38 hens, 44 cockerels and 44 pullets on exhibition and in all the years I have been breeding Black Minorcas I never saw as many high class birds in one show. I consider that win of our stock a far greater honor than if I had done the winning. High class exhibition birds at reasonable prices. Good cockerels at \$5.00 and good pullets at \$3.00. Please send for sale cut and testimonials, also complete list of prizes won. Please mention American Poultry Journal when writing.

**T. A. FAULDS : LONDON, ONTARIO, CANADA**  
PRESIDENT OF CANADIAN BLACK MINORCA CLUB

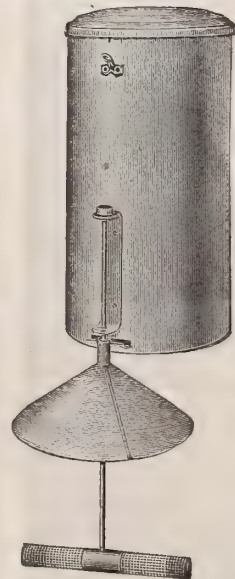

## \$2.50 For Our All Metal 50-Chick Hover

A perfect hot water system that circulates a warm flannel to lay on the chicks' backs. A hover that can be applied to any colony coop or box in ten minutes; they can't crowd or pile up under this hover. Made of galvanized iron No. 26 gauge, and will last for years. Get our Incubator Book before you buy.

**Wendell Incubator Company - 51 Main Street - Holly, Michigan**

## The Gillette Poultry Feeder

THE machine that will make the feeding of your poultry simple and easy. It will feed any kind of grain—whole, cracked or mixed, better than the expert. The poultryman who neglects to get a Gillette Poultry Feeder deprives himself of the only really efficient method of feeding poultry. It saves a large portion of your grain and time, increases the vitality and productiveness of your stock. The only ball bearing machine on the market. Absolutely the only machine in the world that feeds **BABY CHICKS** as well as grown birds. You really get two machines for the price of one when you buy the Gillette.

**ORDER TODAY.** One size, one-half bushel capacity, price \$2.50. Your name and address will bring our circular.

# SILVER WYANDOTTES

EXCLUSIVELY

The Beauty and Utility Breed—The Best Winter Layers

Another great victory at the club show, St. Louis, November 27th to December 2d. Our Silvers won on cocks 2d, 3d, 4th, 5th and 7th; hens 1st, 3d, 4th, 5th and 7th; cockerels 1st and 2d; pullets 1st, 2d, 4th and 7th; pens 1st and 2d; Steinmesch cup for best cock, hen, cockerel and pullet; \$10 special each for four best males and four best females and champion pen; also \$5 each for champion male and female; also thirty other specials. At Arkansas State Show, Little Rock, Arkansas, November 25th to 30th, with another string of birds, we won on cocks 1st and 2d; hens 1st, 2d, 3d and 5th; cockerels 2d, 3d and 4th; pullets 1st, 2d, 3d and 4th; pen 1st; cup for best fifteen birds and three other specials. If you want show birds or breeders, get our prices. A fine lot of utility cockerels from \$2 to \$4 each, birds that will increase your egg yield. No eggs nor baby chicks. Mention A. P. J. when writing.

A. & E. TARBOX : BOX A : YORKVILLE, ILLINOIS

# SILVER AND GOLDEN CAMPINES AND S. C. WHITE LEGHORNS

**STOCK, EGGS AND DAY-OLD CHICKS** From this great laying combination trapped and pedigreed, excel as Winter layers. I have a strain of strong, vigorous, heavy layers. I make no extravagant and unsubstantiated egg record claims, but each year our chicks are bred from birds whose performance is measured by their egg yield. In Campines I will mate a grand lot of females of the Jacobus Improved Strain, also two pens headed by direct descendants of Crystal Palace winners. If you are in need of this quality of stock, write me and I will be pleased to quote you. Satisfaction guaranteed. Catalogue free.

S. D. Hall : Box 78 : Seville, Ohio

# STONE STREET WHITE ORPINGTONS

My birds are up-to-date. Last year I won my share of prizes. This year in four of the largest shows in the South, Nashville, Paducah, Shreveport and Columbus, Georgia, thirty-three ribbons were placed over my exhibits. Also ten cups, some of them valued at \$100 each. Also club specials. Can furnish some grand exhibition birds for all classes. Prices right. Have a few pens first class utility stock at \$25 each. Eggs in season. Order early. Mention American Poultry Journal.

# GERMOZONE

GEO. H. LEE'S STATEMENT

"I invented Germozone 15 years ago because I had to have it. I was losing a third of my chicks and chickens every year. Its results have been phenomenal. Sales rose from \$1.00 or \$2.00 a month in 1897 to \$8000 a month in 1912. It cures Roup, Colds, Canker, Swelled Head, Cholera, Bowel Complaint and Chicken Pox 99 times out of 100. In the odd case we refund money."

Regular price at dealers or postpaid, 50c. Sample by mail, 6c. Be sure to try it this year.

# LEE POULTRY SUPPLIES

including the famous Egg Maker, Lice Killer and White Diarrhoea Remedy are standard everywhere. All good dealers handle them. Ask for them. Lee's line of books on Poultry Supplies and Incubators sent direct, free. Write for them.

PETALUMA : : CALIFORNIA

# S. C. WHITE LEGHORN COCKERELS

SIRED BY 1911 FAMOUS NEW YORK WINNER, "BEAU BRUMMELL"

This bird headed the first pen at the Grand Central Palace Show. In color, size and type he is unsurpassed. His sire was William Penn, first prize bird at Philadelphia in 1910. Beau Brummell comes from an unbroken line of blue blooded prize winners. In my yards he was mated to twelve pullets and hens of his own line breeding including four hens that are full half-sisters. The off-spring are the last words in whiteness, size and type. They have been raised in colony houses on free range. The fields were sowed with dwarf rape among rows of rhubarb and sunflowers. Sour milk has been part of their daily feed. In consequence the birds are surprisingly vigorous. Many of the cockerels will equal their sire in size—and Beau Brummell weighed six and a half pounds when six months old. You will see my birds competing for the highest honors at the Chicago show and other big mid-west shows. I have about 100 cockerels to sell from the mating described above. I invite correspondence or a visit of personal inspection. I have no pullets for sale. I intend mating eight pens for the egg trade and I am booking orders now. All communications will receive immediate and courteous consideration.

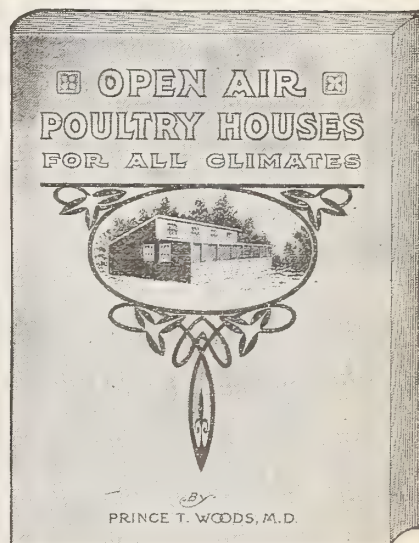

SOLOMON HERING : THE WILLOWS : BOX 135, R. R. 3, SOUTH BEND, INDIANA

## OPEN-AIR POULTRY HOUSES FOR ALL CLIMATES

*By Dr. Prince T. Woods*

America's Leading Authority on Practical Poultry Keeping

The best house book ever published. Now ready for delivery. Be sure to read it before you build or make alterations in your poultry houses. Just out. 88 pages, 46 illustrations and 5½x8 inches in size.

A WELL WRITTEN, WELL PRINTED, WELL BOUND (in cloth)—a REAL BOOK, not a pamphlet or catalog. Just what you are looking for if you want to be successful with poultry. All NEW. Special illustrations from pen drawings and from actual photographs of construction work. Plainly worded. Easily understood. Tells plainly how to build and what to build so that anyone at all used to handling tools can build a good practical open-front poultry house.

### The Three Best "Fresh-Air" Poultry Houses

Tells how to build the kind of houses that the most successful breeders all over the country are building and recommending. Government workers favor these open-air houses. The "Fresh-air House" has come to stay and you will want to build one. It means Better Fowls, Freedom from Disease in the Flocks, Better Egg Yield, Better Fertility, Better Chicks.

### No Matter Where You Live, If You Keep Poultry You Need This Book

There are nine chapters and every one of them full of live interest and helpful information. Just look over the table of contents:

Chapter I—Sunlight and Fresh Air. Importance of pure open air both day and night for all domestic poultry. Relation of sunlight and fresh air to health and vitality. Nature's best aid in the prevention of disease.

Chapter II—Why Use Open-Front Houses. A few more reasons why you should use open-front open-air houses for the comfort and well being of your fowls as well as the betterment of your profits.

Chapter III—Hints and Helps on Building. Tools and amount of experience required. Materials. Suggestions for saving cost, floors, frame, eaves; shingles or roofing. Portable or permanent buildings. Foundations.

Chapter IV—Location of Poultry Houses. Land. How to face the building. Relation to surrounding country. Prevailing winds and wind breaks. Continuous or colony buildings. Yards.

Chapter V—Dr. P. T. Woods' Improved Open-Air Poultry House. New descriptive photographic illustrations showing how to build and actual construction of house built to illustrate this

book and now being successfully used to winter 100 valuable White Plymouth Rock breeders. Dimensions of buildings. Suggestions for building on colony or continuous plan. Building instructions and list of material required for house to be boarded in, up and down.

Chapter VI—Another Plan for Dr. Woods' House. Line drawings showing plans and detail of frame. House to be boarded horizontally. How to build. List of material required. Complete building PLANS.

Chapter VII—The Gillette Open-Air House. The house used in the International Laying Competition. Description, plans and list of material required.

Chapter VIII—H. H. Stoddard's Open-Air Cage Roost. A protected outdoor roost for fowls in warm or hot, dry climates where no houses are needed. Diagrams showing two types of cage roosts. Night quarters which help solve the stickfast flea problem and afford greater comfort for fowls in tropical and semi-tropical climates. Rain tight roof may be provided where frequent heavy rains prevail.

Chapter IX—The Tolman House. Brief description and some views of this pioneer among modern "fresh-air" houses.

### Does This Mean Anything to You? Greater Comfort for Your Fowls, Better Fowls, Better Returns, Bigger Profits

If it does appeal to you, then you want this book on Open-Air Houses. If it does not appeal to you, better read it and find out what others are winning success with. Fresh-air methods have helped others to become successful and make bigger profits. WHY NOT YOU?

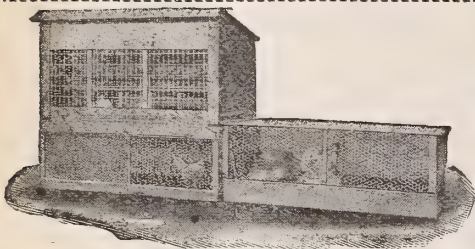

Price of "Open-Air Poultry Houses for All Climates," 75c Postpaid. With American Poultry Journal, One Year, \$1.40. Remember Cloth Bound, 9 Chapters, Profusely Illustrated, on High Grade Paper, Only 75c. Canadian Subscription and Book, \$1.65; Foreign, \$1.90

## THE BEST RESULTS FOR YOU IN POULTRY RAISING

Whether you are a professional or an amateur you want the maximum result from the investment of your time and money.

### "WRIGHT'S NEW BOOK OF POULTRY"

*Is the Key that Unlocks the Door of Poultry Success.*

It is the foremost practical book on Poultry and Poultry-raising that has yet been published, in the opinion of all the leading Poultry Editors and Poultrymen. The Poultry papers quote from it constantly as the **Authority**. Hundreds of purchasers have written to us, unsolicited, commending it without stint.

#### Will You Examine it at No Expense to You?

We want your permission to place this volume in your hands for **Five Days Free Examination, All Expenses to be Paid by Us.** Fill out the application form below and mail it to us with 50 cents, and we will send you this book on approval express prepaid.

#### Who Is Lewis Wright?

Lewis Wright wrote his first Poultry book thirty-five years ago. It was called "The Illustrated Book of Poultry." The present work, new throughout, thoroughly modern and up-to-date, is the natural fruit of his long experience in raising and writing about Poultry. He visited hundreds of model plants and interviewed the most successful poultrymen in all parts of the World to secure his data; and his book, first and foremost, is based upon Actual Experience. Mr. Wright was the one Poultry expert selected to write all the Poultry articles for the new 11th edition of the Encyclopaedia Britannica, perhaps the greatest honor that could be conferred upon him.

What safer guide than Mr. Wright can you follow to success? Why not take advantage of Mr. Wright's experiences, his mistakes and successes?

The book has chapters on the following subjects and others: Poultry Houses and Runs—The Science of Feeding Poultry—Practical Management and Feeding of Fowls—The Egg and Sitting Hen—Artificial Incubation—Rearing and Care of Chickens—Poultry for the Table—Poultry Farming—Exhibition Poultry and Utility—Pedigree or Line Breeding—Practical Breeding and Rearing of Prize Poultry—Exhibiting—Judging—A chapter on each breed of chicken of all countries, besides chapters on Turkeys—Guinea Fowl—Pea Fowl—Ducks and Ornamental Water Fowl—Geese and Swans—Poultry Diseases and Vices—Vermin.

#### Let Us Make Our Offer Plain To You.

The 50c you remit with the Application Form is simply an evidence of good faith; it is placed to your credit. The signing of the Form does not obligate you in any way to purchase the book. If you decide to keep it,

you need not remit until the next monthly payment of \$1.00 is due. If unsatisfactory, the book need simply be held awaiting our instructions, and we will at once refund the 50 cents.

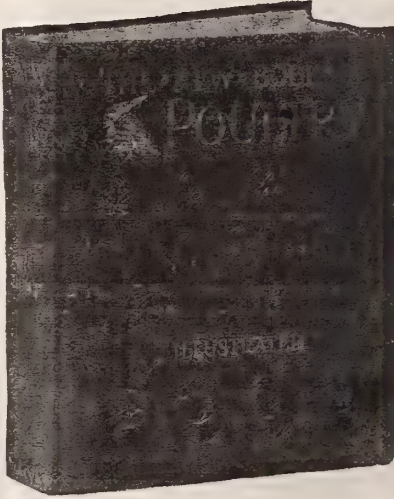

#### We Could Not Make It Easier For You To Inspect This Book

before buying; and the present plan of sale is based upon our unbounded confidence in the very great practical value and usefulness of this work to you. An examination, moreover, will enable you to judge its merits far better than any description from us. But let us add a few details.

#### Special Offer To Responsible Readers:

Let us send you this great work on approval. We want you to examine it thoroughly before deciding. We want you to judge for yourself its great, practical, money-making value to you. The price is only \$8.50. Just send us 50c with the coupon opposite and you will receive the book, carriage prepaid. If after five days you don't want it, simply notify us and hold subject to our order. We will then refund your money. If you keep it pay us the balance \$1 a month until settled in full. [If you wish to pay us cash deduct 5c.]

The present stock of the work is limited, and it takes a period of time to reprint. May we ask, therefore, that you mail the Application Form at the **earliest possible moment**, so that you may avoid the necessary delay should we be out of stock later? The books will be shipped out on approval in the order of the receipt of the Application Forms.

#### Beautifully Printed and Illustrated and Strongly Bound

Forty-five full page plates in colors and black-and-white of this splendid work, all by J. W. Ludlow; and there are innumerable pictures throughout the text. Finely printed in a large, clear, readable type and bound in stout, durable cloth binding with lettering in gold; gilt edges on three sides. Size of volume 9 1/2 x 11 x 2. Weight, seven pounds.

**AMERICAN POULTRY JOURNAL,**  
542 So. Dearborn St., Chicago

Gentlemen:—I send you herewith 50c, for which kindly send me, carriage prepaid, one copy of Lewis Wright's "New Book of Poultry." It is understood I may examine this work five days, and if I do not wish to keep it I agree to notify you and hold subject to your order, and you are to refund my money. If I decide to keep it I agree to pay the balance of \$8 in monthly installments of \$1 each until settled in full.

Good ones for sale.

O. A. Browne VanWie and Logan Sts. Rockford, Ill.

## Why Don't You Buy a Guaranteed Incubator?

That means a Fairfield. The tried and tested incubator acknowledged by all to be the World's Best Hatcher. Don't experiment. Don't gamble with your chicken profits. Make money on every hatch with a Fairfield, the only incubator in the world guaranteed to hatch 90% or better. No experience necessary to operate a Fairfield. Hatches equally well in cold or warm climates. Costs no more than ordinary uncertain hatches, but pays for itself every hatch and earns a profit besides.

## FAIRFIELD Incubators

The Only Guaranteed Hatcher in the World. Write for Trial Offer. I know the Fairfield is the best machine made. That's why I guarantee it in the strongest way. The thousands of machines in use back my claims. To convince yourself write for my trial offer. Get full particulars of my guarantee. Get my free catalog before you buy, then you will be able to settle the incubator problem right.

SAM THOMPSON, Pres.,

White African Guineas, White Japanese Silksis and Wissahickon White Wyandottes—Great birds, great layers, great hatches. Great bargains in non-related stock. Choice Pekin Ducks. Write for prices. Also fine Strawberry plants, "The Clovernook Beauty." Mention American Poultry Journal.

Miss Frances E. Wheeler : : Chazy, New York

## BLACK LANGSHANS & INDIAN RUNNER DUCKS

Brookfield Farm birds are Maryland's beauty and quality strain. They have been winning regularly at Baltimore, Allentown, Hanover, Hagerstown, etc., and have proven their worth as well for practical purposes.

Black Langshans—Have won first cockerel at Hagerstown two years. My 1912 champion was pronounced one of the best ever shown. Shape, size and sound color are features. For all purposes there is no better bird bred. They are hardy and great layers.

Indian Runner Ducks—Have made a sweeping record with these in the best of classes. My drake "Edward" has an unbeaten record at six great shows. Let me know your wants in either of above for exhibition or choice breeding quality. Pairs, trios and pens properly mated. Selected breeding cockerels a specialty. Satisfaction assured. Prices right. Mention American Poultry Journal when writing. Address

# "M. M. JOHNSON Engineer At The Mill Makes Incubators"

## This Was Johnson's First Ad

It is all told about in this free book, along with many other experiences and facts that will show you how to make the most money in the poultry business.

The Old Trusty Book for 1913 is ready. Folks who have read previous Old Trusty Books don't need to know more—they will send at once for the new edition. Every chapter is worth real money to every poultry raiser. The "Ups and Downs of an Inventor" is the most interesting, most entertaining and most cherished bit of history ever written about incubators and poultry. The whole book is home written, home made and home printed. It is plain and practical—contains the facts learned in 17 years of experience during which time Johnson has made and sold over 400,000 incubators and received more than a million letters from his customers.

## It's a Book that Will Help You—Tells Real Facts—Contains No Theories

Johnson landed in Clay Center with 65c in his pocket. Went to work in a mill for \$1.50 per day. Made incubators in spare time in boiler room. Old Trusty was a big success from the beginning. Neighbors all wanted it. Johnson smashed a lot of old ideas by practical, sensible demonstrations. Soon made artificial hatching popular and easy for everybody. Kept quality up and price down always. The facts are all told in the book. It is written in a simple way—easy to read and easy to understand. It tells how the Old Trusty is made and why it is made that way. It shows you a lot of ways to save money, and prevent trouble. It tells how to make a success right from the start without experimenting. It is plain and honest throughout. Shows hundreds of actual photographs sent in by owners of Old Trusty incubators—gives their

names and addresses so you can write to them. Contains no guesses or theories. Every page is a sane, sensible sermon that will make you a better poultry raiser. You ought to read the Old Trusty Book. It is sent free to all who write for it. If you don't order an Old Trusty it won't make me feel bad. But nine out of twelve people who ask for my book buy the Old Trusty. That's because they are convinced of Old Trusty supremacy and I let them prove it at my risk. On next page you will find some reasons why the Old Trusty is such a good incubator and why it costs you less than \$10. But write me that postal now or send the coupon on next page. When you get the book—if you read it and say it didn't help you—return it and I will pay you the postage and for your time. Address

**Johnson—Incubator Man, Clay Center, Neb.**

# OLD TRUSTY

**The Incubator  
That Gives You  
The Most For  
Your Money**

You can pay any price you like for an incubator. The Old Trusty is made of the best materials by my big family of factory employes. It is made for folks who want the best and are willing to pay a reasonable price to get the best. I could cut my price down to \$6.99—sell twice as many incubators and make more profit on each—if I wanted to skimp on materials and workmanship. The Old Trusty is built to hatch eggs successfully for as long as you will want it. Read this brief description. The whole story is in the Old Trusty Book—free.

**1913  
PRICE  
LESS  
THAN \$10**

**Freight  
Prepaid  
East of  
Rockies—  
That Far If You  
Live Beyond**

## How It Is Made

Case—clear California redwood—powder-dry, without check, warp or knot in a thousand feet of it—no odor—heat and moisture do not affect it. Covered with first grade genuine asbestos, then covered with handsome galvanized sheet metal—making it the strongest, most substantial and most practical incubator case ever constructed. Made the same all over, top, bottom, sides and all—not skimmed on the bottom.

Johnson's patented heating system is so simple that folks are surprised it wasn't thought of sooner. Heated water is discharged into main pipes at end opposite lamp—pipes made just the right size so that every part of the egg tray gets the same even degree of heat. Tank made of pure, heavy copper with crimped joints that don't leak—tested 30 pounds to square inch to keep defective tanks from leaving factory.

Regulator that makes all others look complicated and unreliable. Double wafer—out of the way when moving trays. Single adjusting nut sets it. When once right it stays right. No levers, or other "do-dads" to bind and get out of order or spoil the hatch. Top of incubator is clear—can use it to rest trays on when turning eggs.

I use the Edward Miller Sun-Hinge Burner because I have never made a better one and no one else has. Don't let any "special" burner influence you. I also use absolutely the most accurate thermometer made. It is guaranteed by the manufacturers and by me. I have seen cheaper thermometers that were wrong as much as seven degrees. That's why I make sure of accuracy by using the best. A good lamp and good thermometer cost more but they mean success and success is worth the slight extra cost.

Every part of the Old Trusty is made in the most careful way, of the best materials. Honest all through—just as Abraham Lincoln would make it if he were my partner in business. We make good machines and tell the truth about them even if we don't know how to use flowery language. Don't you want the Old Trusty Book? Mail the coupon or postal now.

## Over 400,000 People Are Making Money With The Incubators Johnson Built

Johnson's incubator has been on trial over 400,000 times. And it has made good. Think of it. 400,000 people, in every climate, in all parts of the country and under all sorts of conditions—have each made a success with the Old Trusty. Even boys and girls do it. Don't you think you can do it? Don't you think the Old Trusty is the incubator you want—the incubator that will make the most money for you? You take no risk in proving it. I give you

## 30 to 90 Days Free Trial 10 Year Guarantee

That is the basis on which all Old Trusty incubators are sold. If you can't make a success with it I would much rather send your money back to you than have you disappointed. No one can say that Johnson ever gave anything except a fair, square deal. Send in the coupon or just a postal for 1913 Old Trusty book, and read the whole story. Write now.

## And Again Fairview White Rocks Win...

At the great Chicago Coliseum Show, in a class conceded by judges, breeders and critics to be the keenest competition ever brought together in White Rocks, either East or West, they won

### 1st and 3d Pen, 1st and Championship Hen, 5th Ckl.

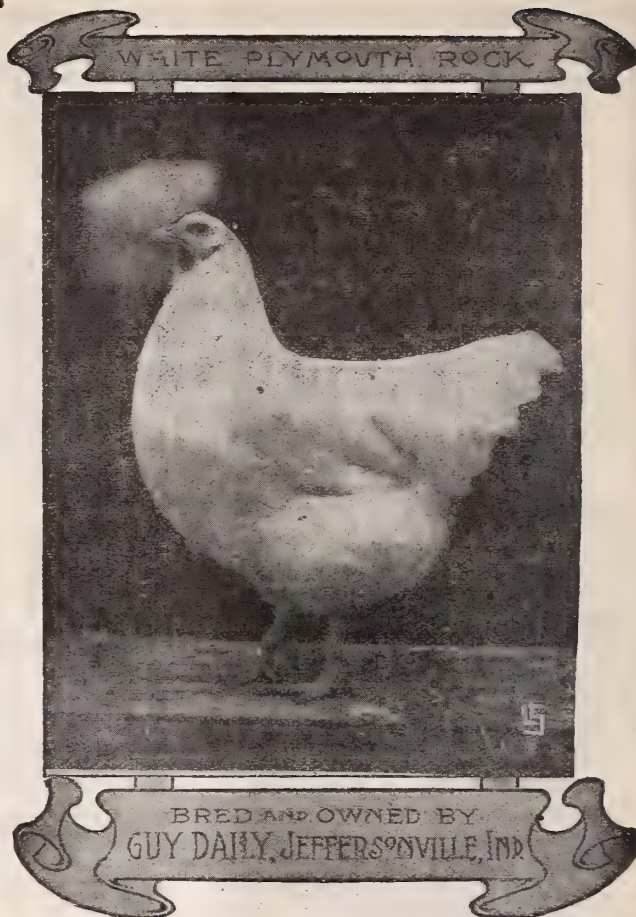

For years the White Rock class at this show has been conceded to be the largest and best ever brought together. This year the competition was keener than ever before; Owen Farms and many other noted breeders being there. In fact the very best in the country was there—

### AND STILL

Fairview White Rocks were awarded grand championship on hen and 1st and 3d pen, the most coveted prizes in the show.

You can't get better stock, no matter what you pay. My prices are reasonable and I will treat you right. All stock sold on an absolute guarantee. Booking egg orders now. Ten cents will bring beautiful catalogue. Write today.

## LAMBERT'S DEATH TO LICE

**INSURES CLEAN FOWLS  
AND LARGER PROFITS**

**WHEN** hens are lousy you can't expect them to pay for their keep—the profit goes to the louse. Look over the situation and see just how you stand on this proposition. Do not deceive yourself by thinking that your birds have no lice, for these torments are ever on the alert and are no respectors of fowls or places. Know the truth and let us put you wise as regards the efficacy of

## THE OLD RELIABLE LAMBERT'S DEATH TO LICE

This Powder has been used by Professional and Amateur Poultry keepers for 30 years because they have found it not only the best Remedy for body lice on laying hens and exhibition stock, but because it is just the thing for sitters, to make them sit contentedly so that they will bring off a healthy brood. It is **Sure Death to Lice** and does not injure eggs, hens or chicks nor soil the plumage. It is also an excellent Disinfectant and Deodorizer. No hens can be profitable and neither can the youngsters thrive when infested with these pests. Use Lambert's Death to Lice Powder on the hens and Ointment for the head lice on the little chicks and they will save you many dollars. A 10c box from your Dealer or Druggist will quickly convince you. 15 ozs., 25c; 48 ozs., 50c; 100 ozs., \$1.00. Or send direct and include a 2c stamp for copy of Pocketbook of Pointers, containing the article on "The Relationship Between Fancy and Utility Poultry Keeping" by D. J. Lambert. Address

**O. K. STOCK FOOD CO., Mfrs.,**  
**500 TRADERS BLDG. CHICAGO, ILLINOIS**

After having perfected the "Great Darlington Strain" of Single Comb White Leghorns, I naturally looked around for "new worlds to conquer."

I thought if I could only make the Sphinx speak I would leave this world my debtor. As I have hardly time to attend my own funeral, I had to act through agents. Let us pause a moment (in fact, "two paws" is more proper). There this "Great Mystery" has stood ever since 2800 B. C. and never uttered one word (what qualities in a wife). He saw the first peach basket; he noted well its size; he also saw the last. "What a falling off was there, my countrymen." (Another pause is proper.)

He was placed there by Chephren; many of you never met him. I have just received the following message by wireless: "The mystery is solved; the Sphinx has spoken; weigh well his words." The message, of course, was not in good "United States," from the fact that when the Sphinx learned his A B C's our language was in rather a crude state. The message was at once forwarded to the "Department of Biblical Research."

It was an easy matter to decipher the words "Don't Be a Clam," but there were four other signs; what could they mean? One professor (he always gets his birds at Darlington), wiser than the others—or dumber—suggested that "the darn thing stuttered." Now, every schoolboy knows that stuttering was not invented until the reign of Peter the Great; it came in with the Russian proper names. The mysery was finally solved by a little child running through the room crying, "I want my Mummy!"

What an illustration of the beautiful words, "A little child shall lead them." (Another pause, possibly two.)

There was the whole message: "Don't be a clam; I want my mummy!" The rest of my life shall be devoted to carrying out the last wishes of my dear departed friend, around whose knees I have so often played, an innocent (?) little boy.

I will search every museum until I find his "Mummy;" failing in that, his "Mummy-in-law." I will place her between his paws with this inscription, "Hic Jacet."

Centuries later some one will dig this out and wonder "what in the name of Caesar's ghost that fool meant." Does that mean me? There is food for thought.

## Darlington Egg Farm

# Rhode Island Reds

## Chicago, 1912

In what was conceded to be the best show of **Rose Comb Rhode Island Reds** ever held in America, we won the leading prizes, the total winning being 70 points; our nearest competitor winning only 28 points. The total winning of our next three competitors combined being only 68 points. We won as follows:

**1, 2, 3 Cock    1, 2 Old Pens    3 Cockerel  
                   2 Hen    3 Young Pen  
 \$50.00 Silver Cup for the Best Display  
 Championship Male, 83 Males Competing**

On the last day of the show we purchased the entire flock of Owen Farms. Bill of Sale below:

### TO WHOM IT MAY CONCERN:

This is to certify that we have this day sold to the Buschmann-Pierce Red Farms our entire flock of R. C. Rhode Island Reds, including all our winners and selected breeders, among the winners being 1st cock, 2d hen and 1st pen at Madison Square Garden, Dec. 1911, the cock that won 3d at New York, 1911, also 1st Nashville and Memphis, 1912, and the 1st Memphis cockerel, 1912. This flock is one of the finest in America, and added to their already great flock will make them unbeatable.

(Signed) OWEN FARMS  
 Maurice F. Delano, Mgr.

We have our pens now mated for the egg trade. Book your orders for eggs from the greatest matings ever put together for this breed.

**Our Beautiful Catalog** of 64 pages and cover contains many articles on raising and caring for poultry in large and small flocks. It will also tell you why the Rhode Island Red is the best breed in the world. This catalog has cost us a great deal to prepare and is too costly to send out promiscuously. We will send this postpaid for 20c in cash or stamps. Address all mail to

# USE LESS FEED

Get more eggs explained in free booklet, "What and How to Feed." Simplex Supply House, Pontiac Building, Chicago, Illinois

## PAGEL'S NON-FREEZING DRINKING FOUNTAINS

The only non-freezing fountain on the market without the use of lamps or valves. Simply fill with warm water once every 24 hours. So constructed the water will remain warm.

### Pagel's Non-Clog Economy Dry Feed Hopper

**Saves the Feed : Increases Egg Production**

Two of the simplest, handiest and most useful poultry appliances made. Warm water in Winter. Feed when nature demands. Use our poultry and louse powder for best results. Inquire at your local dealer, or write to us for prices and descriptive literature. We guarantee every article in our line to be absolutely as represented.

Pagel Poultry Supply Co., Manufacturers, Lock Box 211, Rockford, Illinois

## 300 RANGE RAISED COCKERELS

Authorities say the male is three-fourths of your flock. Then our strong-vigorous line bred cockerels will increase the egg laying tendency of your 1913 crop of pullets at least 33 1/3 per cent where your present hens are laying less than 10 per cent. Use laying bred males for laying females from now on and get eggs when the day is done. Many of these will win to fast company. Prices right. We need the room.

**LUCAS FARM : ROBT. S. LUCAS, PROP. : DOWNERS GROVE, ILL.**  
JOHN L. WADDELL, MGR.

## Norwich Automatic Exercisers and Feeders

Installed in all of your breeding pens this Winter, will keep your breeders hustling from morning till night, and will compel them to lay more eggs, and stronger eggs, eggs that will hatch more livable chicks than ever before. They will cut your feed bills at least 25 per cent, and reduce your labor bills to merely filling the hoppers once a week. "The chickens will do the rest." They are all sold on thirty days' free trial, by responsible dealers everywhere, or shipped direct from Toledo, Ohio. Write today for free booklet describing them, and the name of your nearest dealer. **Notice to Poultry Supply Dealers**—We still have some choice territory open, and would like to hear from wide-awake dealers. Exclusive sale given to the right parties. Address

**River Home Poultry Yards : 820 Monroe Street : Toledo, Ohio**  
**BREEDERS OF EXHIBITION QUALITY "LIGHT BRAHMAS" EXCLUSIVELY**

## BARRED ROCK HEADQUARTERS

**HOME OF THE FAMOUS "HOOSIER STRAIN"**

The strain that is making current history. Note these WONDERFUL RECORDS: Great Mid-West Show, Chicago, December, 1911, first prize cock. National Fanciers' Club Show, Indianapolis, January, 1912, first and second cock, first and second hen, first and second pullet, second cockerel and first pen. Every bird entered winning either first or second except one. Indiana Fanciers' Association Show, February, 1912, first and fourth pullet with two entries; silver cup for best colored female.

At the great Fort Wayne Show, where some of the best are bred, birds of our breeding have won three times as many first prizes as the combined winnings of all competitors during the last five years.

1,000 COCKS, HENS, COCKERELS and PULLETS FOR SALE—the best lot of stock our twenty years breeding this variety has yet produced. We are conditioning and rounding into shape a fine lot of SHOW BIRDS and will sell you GUARANTEED WINNERS for any show, large or small, at reasonable prices. Also high-class breeders to produce winners, mated by an expert. Utility birds bred from heavy layers. No matter what your requirements may be, write to HEADQUARTERS, we have it. Our prices are no more than others ask for birds of inferior quality and all stock is shipped **subject to approval**.

All stock is grown on unlimited range and possesses GREAT STAMINA and VIGOR found only in the "HOOSIER STRAIN."

**G. EARL HOOVER, ROUTE 24, MATTHEWS, INDIANA**

# My X-Ray Incubator Uses Only 1 Gallon of Oil for a Hatch

and Requires only 1 Filling of the Lamp

Greatest incubator ever put on the market. Built totally different from other old-style machines. Has large oil lamp (4-to-8 quart capacity) *underneath*—square in the center—*not* on the side. This is only right *principle* of construction. Why? Gives an absolutely even heat in egg-chamber *all the time*. No cold sides—no draughts. Always proper hatching temperature. Fill lamps just once—then forget it till *next* hatch.

You  
Can  
Save!  
75c to  
\$1.25 on  
Every  
Hatch

Other Incubators Use 5 Gallons of  
Oil (too costly!) and Lamp Has to be  
Filled Every Single Day

My patented automatic trip—an exclusive X-Ray feature—cuts down flame *at burner*, so there's no *excess* heat—no smoke, no smell—*absolutely no waste!* My X-Ray Regulator is purely *automatic*—takes care of itself—relieves

you of all responsibility. You never have to touch the regulator of my X-Ray; it's automatic; it's the most perfect heat regulating device ever invented.

My heater being centrally located (underneath) conveys equally a direct heat from the lamp into every part of the egg-chamber. Door of my X-Ray is on top—where there are two double-glass panels through which you can see the thermometer at any time, without raising lid and chilling eggs. To ventilate or turn eggs, simply raise lid. Eggs are never taken out of X-Ray.

**Shipped Direct from X-Ray Factory  
To You—No Agents—No Dealers—  
Guaranteed to Please—Freight Prepaid**

To use my X-Ray means less egg-handling, less oil, less heat generated, absolutely no waste, no filling of lamp during hatch, no fumes, no danger of "cooking" eggs—but an even heat always over the **WHOLE** egg-chamber. My X-Ray weighs  $\frac{1}{4}$  to  $\frac{1}{2}$  less than the old-style machines of same egg capacity. I, personally, guarantee it to please you—to give you the biggest and best hatches you ever had. Anyone can be successful with my X-Ray—it is so simple. It is neatest, cleanest, most beautiful incubator made. Women everywhere prefer it—often placing it in their houses, it is so attractive.

My new free book No. 10 tells all about the X-Ray Incubator and Brooder. Shows why X-Ray Brooder is best home for little chicks. It has same perfect heating system as X-Ray incubator, with big lamp that requires only *one* filling. Safer than the old hen herself to raise chicks.

**Write Today for Free Book No. 10 on X-Ray  
Incubators and Brooders—Get Factory-to-You Price**

Mail me a personal letter (or postal). Let me send you my Free Book No. 10. I can save you money—and *make* money for you. Let me *prove* it to *YOU!*

**Oscar Holtzapple, Box 48, Elida, Ohio**

# Stahl Invented THE FIRST INCUBATOR 36 Years Ago—And Now Here Is His GREATEST

Way back in 1877 Geo. H. Stahl invented the original artificial hatching machine. Since then, he has secured over 50 patents from the U. S. Government for improvements made on that first Incubator. Stahl has had a longer practical incubator experience than any other manufacturer in America. He has learned more—he knows more, and he has put all his knowledge into his Excelsior Incubator. That means a lot to you. It means simplicity. It means a heating system that is the result of trying and experimenting with hundreds of models. It means a ventilating system—regulating system, lamp, burner, egg trays and other parts that have been perfected by many years' practical experience! Stahl's

## Excelsior

incubator has so many advantages that only a few of them can be mentioned here.

Stahl's Catalog tells about them all—explains every feature thoroughly. Send for it. Read about the only heating system that heats all portions of the egg chamber evenly. New and improved thermostat or heat regulator. Automatic egg turner—eggs turned without touching them or moving tray. Fire-proof heater—fire simply cannot get out of the heater. Fireproof lamp—cannot be filled while lighted. Smaller consumption of oil—patented heater uses every particle of heat. Visible thermometer—at top of machine—always in plain view. Superior frame construction, patented egg tray. Double glass doors. Large, roomy, comfortable nursery. Exterior finish—the very best—all combined to put Stahl's Excelsior where it is today—the only incubator preferred by poultry raisers who know the weakness of the other machines.

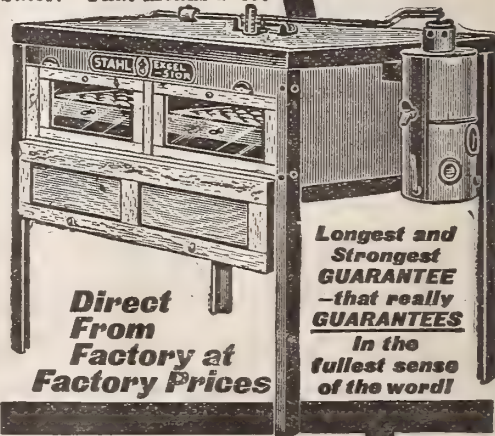

### Write a Postal For Book—FREE

If you wish to save a lot of money, don't pass this page! Get your pencil and make a memorandum RIGHT NOW to write TODAY for Stahl's free book, "Poultry Raising for Pleasure and Profit." It cuts out all expensive experimenting and gives you the advantage of Stahl's experience, without costing you a cent. Whether you wish to buy an incubator or not, it will pay you big to get the information about poultry raising which this book contains. Address

## INCUBATORS-OF-QUALITY

### Robert Essex Incubator Company

### New 1913 Free Poultry Book and Catalogue Is Now Ready For You

**THIS NEW BOOK** is named "**MAKING THE MOST FROM POULTRY.**" It is written personally by **ROBERT ESSEX** who in several chapters tells of things he has learned during his *Quarter Century With Poultry*, such as—*How to Start Right—How to Make Money with Standard-breds and Show-birds—How to Get More Profit from Farm Hens, etc.* He has collected in this book 27 different styles of Poultry Houses in use at Experiment Stations all over the country—Illustrations of houses suited for winter and summer in every climate. He tells what they cost to build, and how they are liked. This book contains information that **cannot be bought**, yet it is free to you for the asking. The advice it contains is invaluable. You can always rely upon Mr. Essex's advice. **He tells only what he knows** personally. It has always been his aim to give poultry-keepers more than they expect to get, and this catalogue is good evidence of his custom. In it of course he describes and illustrates our manufactures:

### America's Largest Line of Incubators and Brooders Your Choice of 19 Styles and Sizes—\$2.25 to \$48

**This Free Book** tells the most surprising tale of how the customers of Robert Essex Incubator Company have written a multitude of unasked-for letters telling of their satisfaction with Essex-Model Incubators and Brooders in competition with other makes. You should surely get this book before you buy an incubator or brooder. It tells what is required in incubators and brooders to make them good hatchers and chick mothers. This company has agents in every state. Probably there is one near you who has these High Quality Machines in his store. You can get his address by writing us.

Please remember that our customers are our friends, and remain so. Once you become a customer of "Bob" Essex you stay right with him. It is to his interest that you shall succeed. Everyday he is working earnestly in behalf of Poultry-Keepers.

## Make Your Hens Lay

**A FREE BOOK FOR YOU ON MAKING HENS LAY**

### When Eggs Are Worth Most

**H**ENS relish juicy bugs and worms because these supply the protein feed they require to make eggs. The craving for meat and bone food—protein feed—is simply nature working out the egg-laying proclivity. Hens **must** have food rich in protein or egg-making elements, or it will be impossible for them to lay.

Our little book tells you all about the how and why of this. It makes you master of egg-getting. It's a book that opens up to you the real possibilities with poultry.

It's simply a matter of knowing what food to supply and how to prepare it. It is now established beyond all doubt that raw, green bone, with adhering meat and gristle, cut fine, is the ideal egg-producing food. Its cost is a mere trifle and its preparation is easy with a

## Mann's Latest Model Bone Cutter

**Sold On 10 Days' Free Trial—No Money Down**

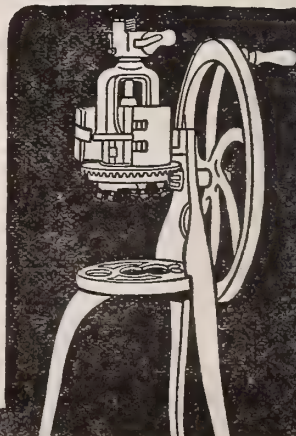

It turns easily and rapidly, cutting green bone, with adhering meat and gristle, wasting nothing.

Its self-governing feed automatically adapts the cutting to your strength, so that anyone can use it.

Its open, hinged cylinder is easily cleaned, and it takes in large bones. It is strong, durable, and requires few repairs. We want you to try one.

We will send you a Mann's Latest Model Bone Cutter on **10 Days' Free Trial**—no money down. If satisfied **after the trial**, buy it. If not, return it **at our expense**.

You want our good books, at any rate, send for them. We'll forward by return mail.

**F. W. Mann Co., Box 56, Milford, Mass.**

**CRETACEOUS WHITE WYANDOTTES**

Have a fine bunch of males and females, both young and old, now ready for the show room. They will win anywhere. All farm raised stock. Write your wants. :: **W. E. Shepard, Box A, Wellington, Ohio**

**OldHonestyHatchery**

OUR TENTH SEASON—Day-old chicks for sale. Sixteen leading market and egg laying varieties, also strictly utility and show birds. Catalogue free. Prompt replies. Prompt shipment. Please mention American Poultry Journal when writing.

**O**UR POULTRY BUILDINGS are the best that modern knowledge and experience can produce. Nothing has been omitted from their equipment which could add to their convenience or promote the health and comfort of the birds. Spring water is running constantly in every building, and only the best procurable foods are used, which are bought in quantities sufficiently small to ensure their always being constantly fresh.

We have combined the Young and Wyckoff strains to produce a vigorous and heavy-laying line of White Leghorns. Our Barred Rocks are of the Bradley strain—the Barred Rock standard. Our White Orpingtons we have bred from stock which we brought from England, and they are splendid in size, color and vigor. From 7,000 of these birds we have selected 1,300 of the finest yearlings for the production of day-old chicks and eggs for hatching, which we offer at the above prices, and we challenge the poultry world to produce better at any price.

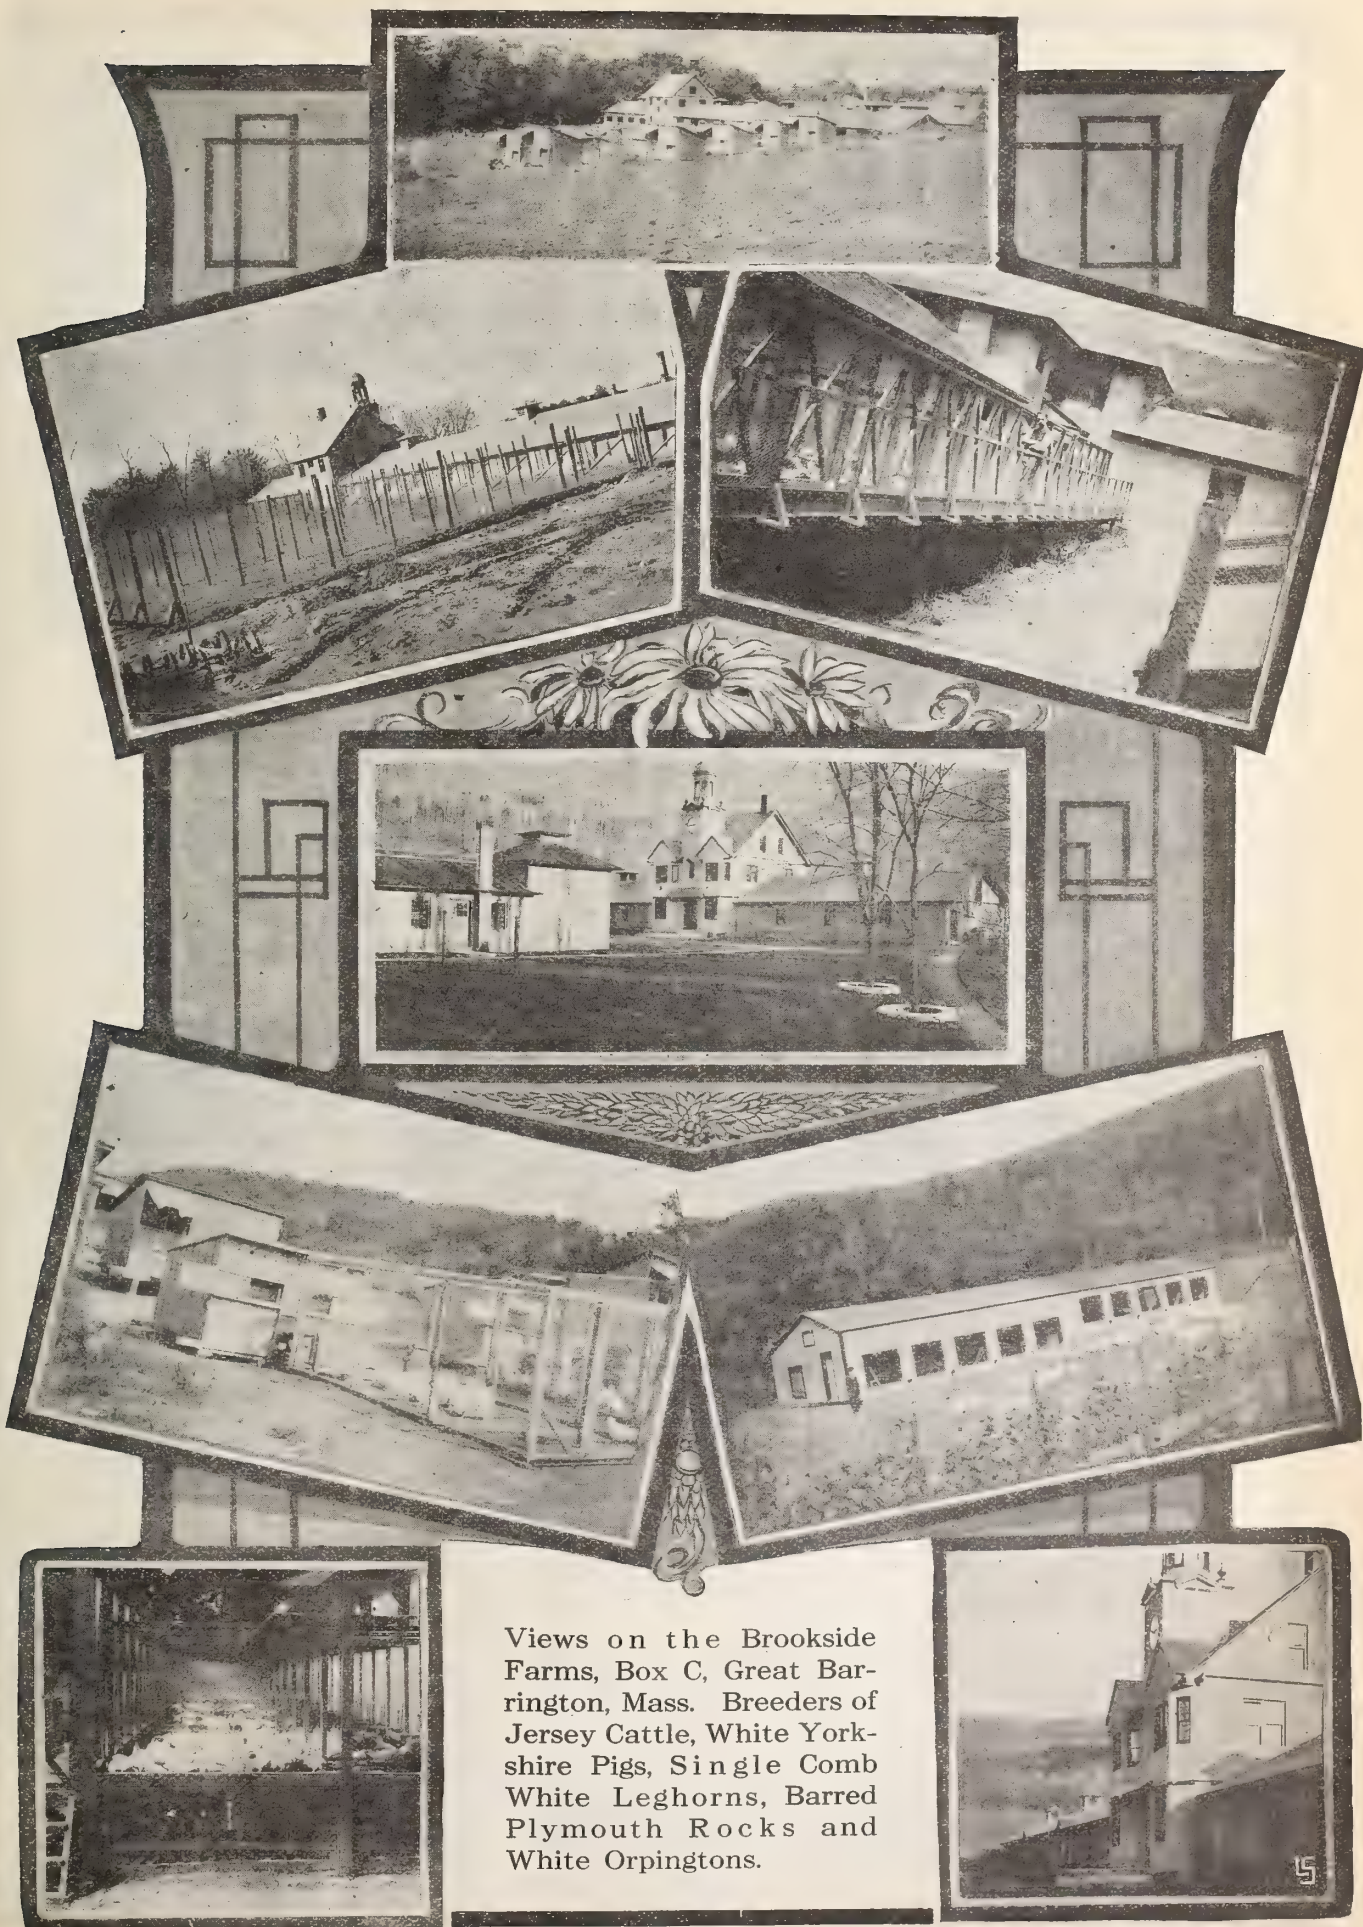

We have shipped chicks 1,500 miles with entire success. Eggs shipped by us across the continent have yielded 88 per cent hatches.

# Get This Feeder

**Because—** It will save you money; make your hens lay; give your birds lots of exercise; keep them healthy; increase fertility and develop your young stock quicker than you can possibly do it by hand feeding.

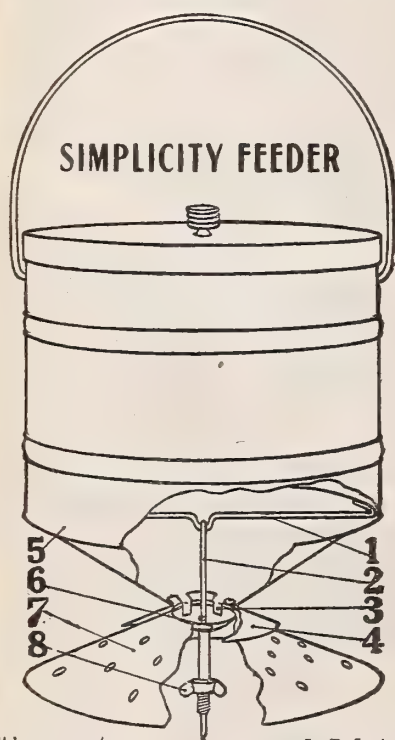

These are proven facts and can't be disputed. Besides, it is on the job all the time, feeding your birds while you are attending to other work.

**We Guarantee** that the Simplicity Feeder will pay for itself many times during the year by saving in grain. It will increase egg production and fertility. That it will work perfectly at all times, scatter the feed farther, give more exercise than any other way. That it will operate from any direction, will not choke up and will feed all grains, mixed or separate. If not satisfied after 30 days to refund your money.

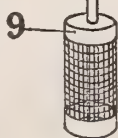

**What and How to Feed** We send you this valuable book without cost to you. It gives the best formulas for feeding chicks, growing stock, fattening for market and for egg production. Also Spring, Summer, Fall and Winter feeds, as well as a variety of grain mixtures, and it tells you what these feeds will do and why they do it. These feeds can be fed by hand or in our feeder. This book is worth many dollars to you; we want you to have it and we send it free.

"Simply Perfect;  
Perfectly Simple"

1. Bait bar support, upon which the bait bar oscillates.  
2. Bait bar, which moves within grain when in operation.  
3. Fingers which throw out the grain when cup and deflector move.  
4. Sparrow shield, which protects feed.  
5. Hopper, which holds the feed.  
6. Cup, which measures off quantity to be fed at one time.

7. Deflector, which scatters grain under and around feeder. (Note holes through which grain falls).  
8. Wing nut, by which the quantity to be poured into cup can be regulated.  
9. Detachable cap on bait holder for filling the holder with grain.  
10. Wing nut, by which the bait bar is either lengthened or shortened.

Saves work

# Poultry Books

## AT A CUT PRICE

A complete list of poultry books that everybody interested in poultry should have. This list is made up with the idea of supplying the wants of all poultrymen, and covers about every phase of the industry; in fact, this list of books make almost a complete poultry library, and by taking them all at a cut price you will be well equipped to make a success of this business. The books in this list tell you how to line breed, how to feed for egg production, how to reduce your feed bill, how to mate to produce exhibition birds, how to prevent and cure diseases, how to mix a balanced ration, how to build poultry houses, poultry appliances, etc. Following is the list:

### DR. PRINCE T. WOODS' NEW BOOK HOW TO RAISE CHICKS

128 PAGES—35 ILLUSTRATIONS

A down-to-date manual on breeding poultry. Tells in plain language how to select and mate breeding stock, what to feed and how to feed it, how to care for and manage breeding stock, how to select eggs for hatching and how to care for them before and during incubation, how to get good hatches with incubators, how to raise chicks with hens and brooders, how to prepare home-made chick foods, how to build brood and colony coops. It also gives facts about White Diarrhoea, including prevention and treatment, and much other valuable information that cannot be obtained elsewhere. Price 75 cents.

### OPEN-AIR POULTRY HOUSES FOR ALL CLIMATES

By Prince T. Woods, America's Leading Authority on Practical Poultry Keeping

The best house book ever published. Be sure to read it before you build or make alterations in your poultry houses. 88 pages and 46 illustrations. Tells how to build the kind of houses that the most successful breeders all over the country are building and recommending. The "Fresh-Air House" has come to stay and you will want to build one. It means better fowls, freedom from disease in the flocks, better egg yield, better fertility, better chicks. No matter where you live, if you keep poultry you need this book. This book gives full plans and specifications. Price 75 cents.

### Origin and History of All Breeds of Poultry

This book gives a complete history and the origin of all the recognized varieties of chickens, ducks, geese and turkeys, and is illustrated with 198 colored pictures of fowls painted from life, something never before attempted by any publisher. This is, without question, the greatest book ever published on poultry. The artist's work alone on this book took almost one year's time to complete, but it shows the fowls in their natural colors and correct shape, and these colored pictures, together with the history of each variety, gives the fancier all the information to produce fowls for either exhibition or breeding.

**How to Mate**—This book also tells how to properly mate the different varieties of fowls to produce birds that will conform to Standard requirements. This is something that even the Standard of Perfection does not do. It tells you at a glance what it will take years of practical experience to learn. It is a book that no breeder or fancier can afford to be without, as it is just as suitable for the needs of the experienced fancier as for the amateur. Price \$1.00.

### Successful Poultry Culture

Contains 128 pages and is a practical treatise on everything you want to know about the poultry business. It tells you his method of saving three-fourths the feed bill, and many other valuable pointers which will save you many times the price of the book.

Space will not permit a detailed description of the entire book, but the following will give you an excellent idea as to its great value. Besides 30 illustrations of standard bred poultry and poultry houses, it contains chapters on the following subjects: The Way to Succeed; Some Interesting Poultry Statistics; The Pleasure of Poultry Culture; Advice to Beginners; Poultry and Pin-Money for Women; Boys and Poultry Culture; Poultry on the Farm; How to Succeed on a Small City Lot; How to Succeed with a Large Market Plant; How to Get Eggs in Winter; How to Feed Young Chickens; Success with Incubators; Success with Brooders; How to Cure Diseases; How to Build Poultry Houses; Plans for Model

Poultry Houses; Profits in Poultry Culture; Scientific Feeding. Regular price \$1.00.

### Diseases of Poultry

By D. E. Salmon, D. V. M., Chief of the United States Bureau of Animal Industry. Every poultryman should have this book in their poultry library. It contains 250 pages, and every disease to which fowls are subject is treated in a most thorough manner. The cause, symptoms and cure of each disease is put before the reader in such a manner as to be understood at a glance. With this book in hand you can be your own poultry doctor. Better order one now and not wait until your fowls become ill. Regular price 50 cents.

### "Why Poultry Pays and How to Make It Pay"

A book for the beginner in poultry raising and for those engaged in it who are interested in deriving from the business the greatest profit. The book tells you how to start right, how to succeed with poultry, how to line breed, how to win at the shows, how to breed and prepare fowls for market, how to feed for the production of eggs, contains a chapter on poultry diseases and simple remedies for same. Gives instructions on incubators and brooders, much other valuable information and is profusely illustrated with ideal drawings of standard fowls. Price 50c.

### "How to Build Poultry Houses"

A book devoted to the construction of poultry houses and fixtures gives plans and specifications for building all kinds of poultry houses, brood coops, nest boxes, dust boxes, shipping coops, etc. It will save money by telling just the kind of house desired for the different localities and the size best suited for the various sized flocks. Regular price 50c.

### American Poultry Journal Hand Book

Contains valuable recipes and trade secrets, feed, care and management in health and disease. Pocket size, 15 cents.

## Total \$5.15---Cut Price for the Eight Books, Prepaid, \$3.40

This is a saving to you of one-third from the regular price. Better order now before the price is advanced. If you want only a few of these books send in full price, as no reduction is allowed from the list price unless all eight books are ordered. You need all of them. You can also get any 50-cent book and a full year's subscription to American Poultry Journal for \$1.25, a 75-cent book and a full year's subscription to American Poultry Journal for \$1.40 or a \$1.00 book and a full year's subscription to American Poultry Journal for \$1.50.

**AMERICAN POULTRY JOURNAL PUB. CO.**  
**542 SOUTH DEARBORN STREET, CHICAGO, ILLINOIS**

# WM. COOK & SONS

## ORIGINATORS

OF ALL THE  
ORPINGTON FOWLS AND DUCKS

ESTABLISHED  
1873

BOX A, SCOTCH PLAINS, NEW JERSEY

Eventually if after the best Orpingtons, all varieties, you will send to their originators. Why not now? and avoid loss and disappointment; we guarantee safe delivery and satisfaction which is backed by a reputation of thirty-nine years' standing, this means

much to you; we are not here today and gone tomorrow as some breeders have been and are doing. Then **experience** counts. Surely we should understand **Orpingtons better** than a man who has had them just a year or two. We made the Orpingtons, all of them, including the Blue Orpington, our latest production, and are **recognized headquarters** for the best. A **visit** to our plant, where you are **cordially** welcome, will prove this, as well as our **thirteen thousand** first prizes, and our winning 103 firsts and 72 seconds at Madison Square in six showings, **more** than 8 times as many firsts as any other Orpington breeder. We can supply on the same day as order is received. The **finest** line of **exhibition** birds that we have ever had. **Imported** birds from our **English** plant, personally selected by our **Mr. P. A. Cook** for the **American** requirements, which English breeders do not know. Or **American** bred birds from our **many American winners**, sons of our first prize Madison Square White, Buff, Black and Jubilee Orpington cockerels.

Now is the time to enquire and order your show birds. We supplied twenty times more first prize winners than any other breeder last season. Don't forget the **\$50 cups** we give which only our customers can compete for. It pays to own **Cook's Orpingtons**. **Ask the people who own them**. If you can advertise **Cook Strain Orpingtons**, it will add money to your bank account and prestige to your stock.

**SEND 10C FOR ILLUSTRATED CATALOG** containing history of the origination of all the Orpingtons and hints on poultry keeping.

**EGGS** from our winners and the finest Orpingtons in the world \$20 a setting, why pay more? From fine stock \$10 a setting. Eggs and birds for sale of our latest production. **The Blue Orpington.**

Advice free. Inspection invited. Trains met. Cook's Roup and Worm Powder. Also laying and condition for sale. The best that exists. Ornamental land and water fowls for sale.

## Starting a Practical Poultry Plant

The Story of Wozelma Farms' First Year and the American Poultry Journal Experiment Station.

By Prince T. Woods, M. D.

ON MANY OCCASIONS we have been called upon to tell others what to do about starting a poultry plant, and the advice from time to time has been duly recorded in various poultry journals. The time, the place, and the man, all have an important bearing on what should be done in making a start. When we finally came to starting a new farm of our own we did things differently from the way we had planned them, and just like "Topsy" of the old "Uncle Tom" days, our plans "weren't borned" but "just grew."

Although for many years closely associated with poultry work it was not until we became identified with American Poultry Journal that we felt we could safely anchor in a permanent home. Up to that time, two years ago, business had kept our home pretty much on the move. When we took up A. P. J. work it was decided that it would be desirable to have the managing editor of A. P. J. located on an Eastern Massachusetts farm in touch with several other farms which could be made use of for experimental work and investigation.

With this plan in view we began a search for a farm within our means that would be suitable for poultry, not too far distant from our friends who were doing some experimental work for us, and that might also be used for sanitarium purposes if desired. After three months' search and careful consideration of many places we finally bought The Anchorage Farm, an attractive but run down old farm of about 70 acres, at Silver Lake, Mass., within half a mile of the Plympton Station. It was attractive and homey, had a water frontage of about 1,850 feet and we were so pleased with it that we bought it at first sight, taking only sufficient time to make a search of the title. All other places had been ransacked from cellar to garret and discussed until given up, but The Anchorage was first seen on the 10th of March, 1911, and a payment made that day to bind the bargain, the sale completed on St. Patrick's Day, and by the first of April we had moved in and begun to feel as if we had always lived here.

The first few months on the farm taught us a lot of things about Plymouth County and the inhabitants of our new home town, Kingston, that we had never known or experienced before. Among other things we found that in Massachusetts when a man makes improvements, repairs buildings and builds others to the extent of "changing the appearance of the premises," he technically commits "waste and strip" of the premises if an unscrupulous mortgagee chooses to make a fuss, and in our case building a new barn, a new poultry house, cutting down some sick trees that were damaging others, and making some repairs was made a ground for an attempt to foreclose the mortgage on complaint of "waste and strip." Result, we had to hustle about and pay off the mortgage and the inroad into our capital was such that it revolutionized all our plans. We decided that nothing but a clear title would do for us and that we would have no more of mortgages, in this county at any rate. This experience is mentioned because it taught us something we had not believed possible and it may help

some one not so fortunately situated as ourselves to avoid like complications. Never make any change of any kind on premises which are mortgaged without first getting permission in writing from the mortgagee, is a good rule to follow in this state, and perhaps in others as well.

Moving on to a practically abandoned farm in April brings one into a big bunch of many kinds of work all at once. There was no poultry house, no poultry equipment; the old barn was not available for use and of the new barn there was only an abandoned frame and roof. We had arranged to have 200 day-old chicks of a laying strain, well known to us, delivered the latter part of April. When they came they had to go into three fireless brooders made of corrugated paper-board which were run in a packing box. The day the chicks arrived we had a cold snow storm and the little White Plymouth Rocks reached us cold and wet, with the shipping box cover broken in. The first few days they were brooded in the kitchen, then they and their brood boxes were banished to out of doors to grow up as open-air chicks should.

Fig. 1 shows this little flock of White Rocks and their three paper-board brooders enclosed in a board run in front of the unfinished barn and a little of packing crates, just as they were when placed out of doors the last of April, 1911. This was the nucleus from which the Wozelma Farms' White Plymouth Rocks have been developed. These brooders were placed in an old piano box and kept there, with a fenced in run provided, until the chicks no longer needed brooders. Then the chicks had the piano box for a home until they outgrew it and had to have another box alongside. The greater part of the front of the boxes were closed only by cellar window netting—they were fresh-air chicks from the start and we raised practically all of them but five or six. After eating a number as broilers and small roasters, we rounded up 175 matured chickens when ready to house them in a 20x20 ft. Woods' open-front house early in the fall of 1911.

In addition to the White Rocks we were interested in some Buff Wyandottes of a strain which we had bred for a number of years, and in some exceptionally productive Rhode Island Reds. These fowls were on an Essex County farm where they had been bred, housed and fed according to our plan. During our first summer at The Anchorage we hatched a number of eggs from these Buff Wyandottes, but were unfortunate enough to have some of the most promising birds stolen. However, we saved enough good cockerels and pullets to keep the strain going. In the fall of 1911 the round up totalled us some 40 Buff Wyandotte pullets and 100 prime White Rock pullets. The Reds we did not bring home because we had no accommodations ready, though later in the winter we found room for a male and 20 females.

The farm became more attractive the more we knew it. Even the old run down land did not disappoint us, though we attempted very little farming, and yielded us some good truck and some exceptionally fine Country Gentleman sweet corn (from Burpee's seed). Fig. 2 shows nine ears of this corn taken at random from the field. This corn was grown on freshly turned sod on a worn out field at The Anchorage Farm, season of 1911, without any fertilizer or manure.

The labor problem bothered us a lot that first summer. We had little time to spare, good labor was almost impos-

sible to get. We tried one man after another without finding what we wanted, and had just about made up our minds to put off all plans for development until another spring. Then we had a visit from Prof. Stoneburn, then of Connecticut Agricultural College, Storrs, and he suggested that we try two of his students who would work for board and practical experience. We assented, with many misgivings, for we did not have any illusions about the value of student labor.

The young men came to The Anchorage early in the fall, liked the place and wanted to stay. They were willing and

48 acres of The Anchorage Farm on which to develop its poultry plant. Needing additional buildings, the opportunity being favorable, it also leased a 21-acre farm directly across the Forge Pond, on which The Anchorage Farm fronts. The company land was surveyed and a chart made of it, then plans were made for new breeding and laying houses arranged to admit of free range as soon as the land can be fenced in, and at the same time have the different varieties far enough apart to avoid all possible chance of crossing. The plan meant that at first there would be some incon-

Fig. 1. Two hundred White Plymouth Rock chicks, brooded in paper brooders in front of unfinished barn on The Anchorage Farm, Silver Lake, Mass. Dr. Woods had just moved on farm a short time before photo was taken, and packing crates are seen in background. These paper brooders were housed in a piano box. From this flock were raised 100 fine pullets and some exceptional males, which formed the nucleus of the present Wozelma Farms' flocks. Miss Dorothy Woods is tending the chicks. See "Starting a Practical Poultry Plant."

eager to learn. Both were enthusiastic about poultry and both were young men who were "able to take their medicine" when they made mistakes. By December they had made up their minds that they wanted to go into the poultry business and made us a proposition which resulted in the incorporation of the Wozelma Farms Producing Company, under Massachusetts laws, December 21, 1911. Dr. Prince

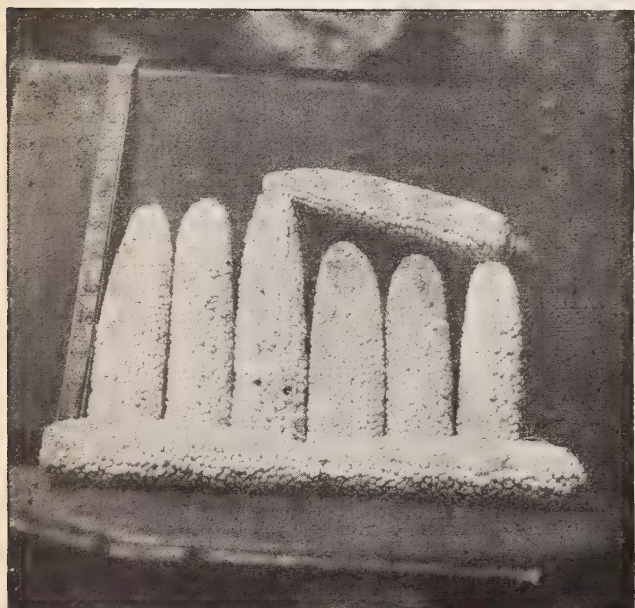

Fig. 2. Country Gentleman sweet corn, grown the first season at A. P. J. Experiment Station without use of fertilizer or manure. See article "Starting a Practical Poultry Plant."

T. Woods was made president and general manager; Ralph L. Mason, vice-president; John E. Zeller, treasurer; and H. T. Woods, secretary. Messrs. Woods, Zeller and Mason were elected directors of the new enterprise and a sufficiently broad charter was obtained to permit a wide range of business. The new company obtained its name from the first syllable of the name of each of the founders—WO-ZEL-MA. Wozelma Farms Producing Company purchased the west

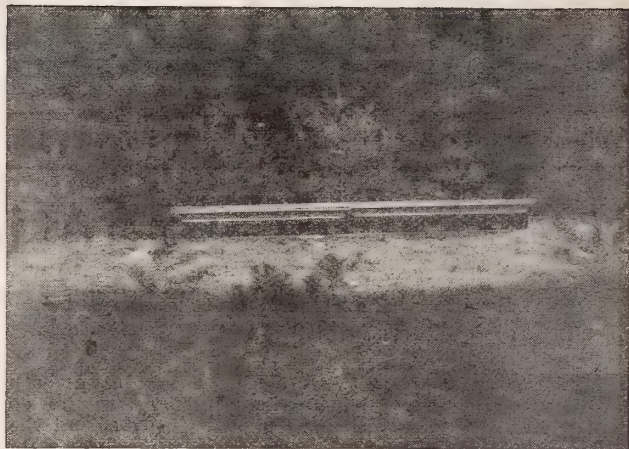

Fig. 3. A ten-hen capacity outdoor incubator used during spring of 1912 by Wozelma Farms Producing Company, Silver Lake, Mass. Three of these hatchers were used with great success. They were described in American Poultry Journal for June, 1912, pages 1077-78.

venience in handling the flocks, but as capacity increases and new houses go up, with the improvements that are projected, it is expected to have a very conveniently workable practical plant. It seemed worth while to sacrifice a little present convenience for future benefit; how the plan works we will be able to tell better when it is more fully worked out.

The company land is mostly woodland and was covered with oaks, pines and maples that had been undisturbed for 35 years or more. A good deal of the timber was sold, but there still remain many large trees and an abundance of small ones. It will take a long time to clear this land and park it as planned and in the meanwhile the poultry is thriving and paying the bills. During the summer of 1912

Fig. 4. John E. Zeller tending Wigwam Brooders in the snow at Wozelma Farms, Silver Lake, Mass., March, 1912. See "Starting a Practical Poultry Plant."

eight 20x20 ft. Woods' open-front houses were built on this Wozelma Farm at a cost of about \$115 each, including lumber, labor and filling in with gravel. At first a carpenter was engaged, day labor, to build the first house, but this proved so unsatisfactory that Messrs. Zeller and Mason undertook to direct the house building on alternate days and we hired two young men at \$50 per month, working a nine hour day six days a week, to complete our building operations. This plan worked out well.

Not having any incubator cellar or brooder house we built a small building over an old cellar on The Anchorage, used the cellar for incubators and the house for cold

brooders. Needing other brooding equipment we purchased 20 Wigwam Outdoor Brooders and placed these on a somewhat windy southerly slope.

We added to our 100 White Rock pullets a few purchased birds of known quality. Bought some 500 day-old chicks and some partly grown. These purchased chicks were for the most part marketed as broilers and roasters.

From the Essex County farm, previously mentioned, we secured eggs and chicks from the best stock of S. C. Rhode Island Reds on the place and that we had known for years as producers of fine large eggs. From our own incubators we hatched all the chicks our brooders would take care of and held overflow parties in fireless brooders and improvised brooding boxes. The chicks had abundant range and thrived well. The mortality, except in a few experimental

home breeding stock. Less than a ton of chick food was bought. All the rest of the chick food for the entire season was mixed and ground on the farm. We found fresh ground chick food made better and bigger chicks faster than we could get them in any other way. We bought the whole grains, the best we could get, mixed them by hand and ground them in a hand mill at first. Then when folks saw our chicks they wanted to know what we fed and we began to experience a demand for our home foods. If you want to know what it is like to grind a hundred pounds of chick food by hand in an Enterprise mill and then screen it, ask our Mr. Zeller. His graphic descriptions of the process convinced us of the immediate need of a power grinder and a gasoline engine. Now we have fitted up a 7 h.p. Root and Vandervoort gasoline engine, a No. 40 Stover grinder and an

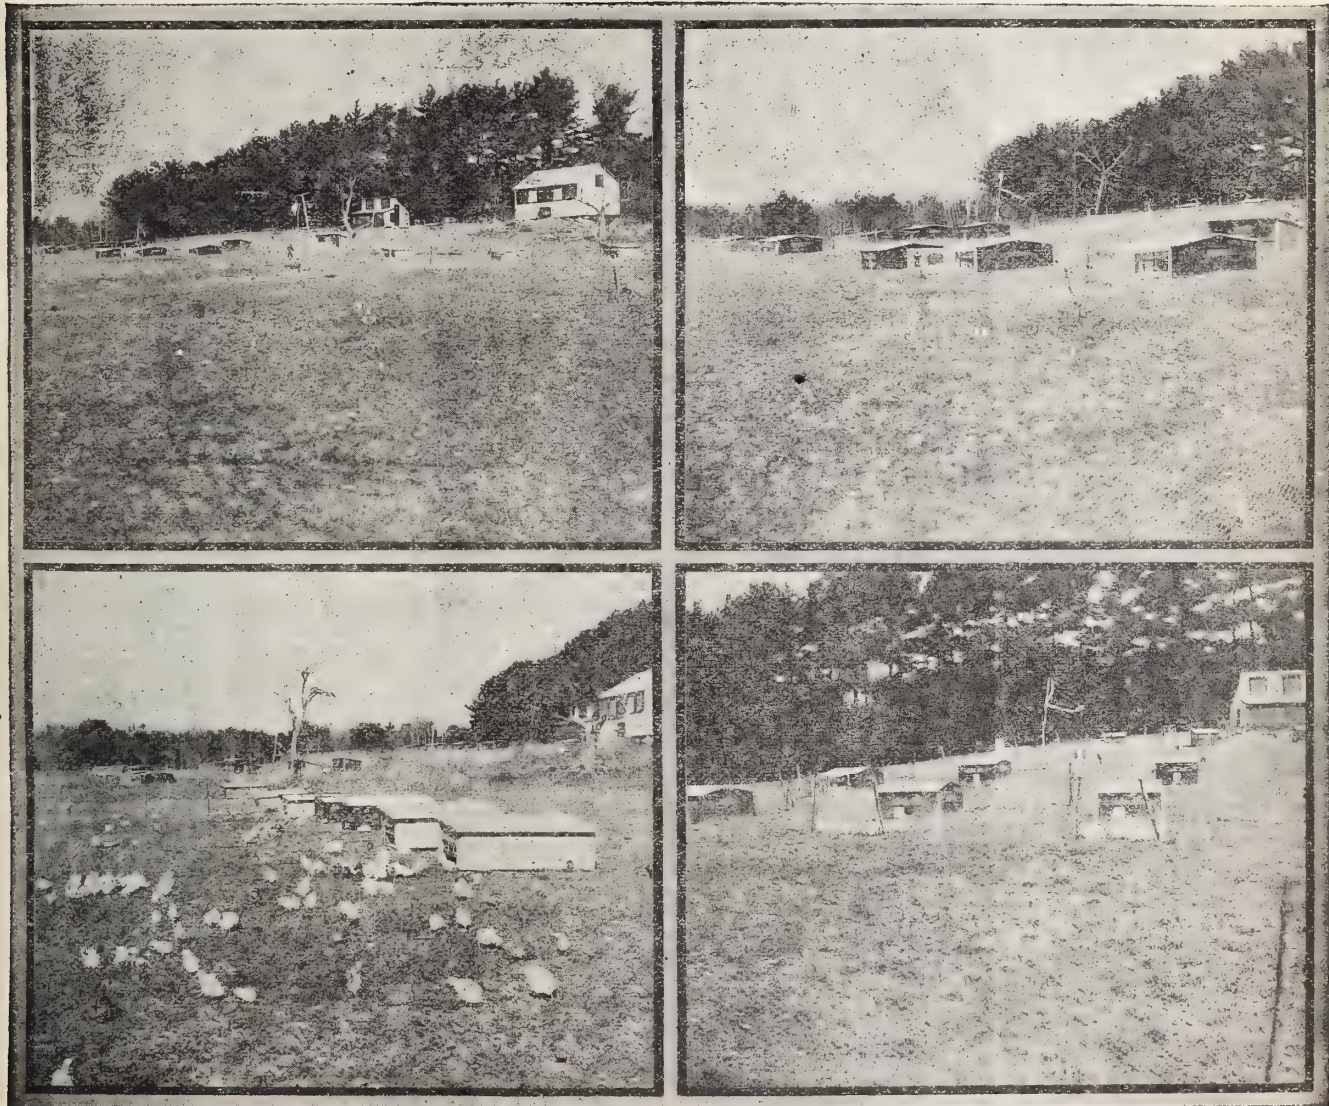

Fig. 5. Four views of 1912 chick field of Wozelma Farms Producing Co., Silver Lake, Mass. Upper left view shows outdoor brooders and chicks with pines in background, a 10x16 Woods' house and the temporary brood house and incubator cellar. Upper right view shows part of 20 outdoor brooders in use. Lower left view shows some growing chicks and cold brooders. Lower right view is a front view of the "battery" of Wigwam Brooders with chicks in temporary yards. See "Starting a Practical Poultry Plant."

flocks, amounted to almost nothing. A good many broods were carried through to colony coop size without the loss of a chick.

As our fields began to fill with chickens demands came for day-old chicks and we sold 500 at good prices. All told we raised this first season for Wozelma Farms some 4,500 chickens. These were culled repeatedly and we finally went into winter quarters with about 60 Buff Wyandottes, 600 White Rock pullets, 100 White Rock yearlings, and 500 S. C. Rhode Island Reds and some surplus stock birds. Over 3,000 chickens were marketed. Besides the home raised stock a good many fowl and chicks were bought, dressed and sold to market and to private trade.

The success in chick rearing was in a large measure due to the food and care, as well as to the fine condition of the

Afton Farms power mixer, and next season's mixing and grinding will come easier. From now on we intend to grind all our own mash mixtures, crack all corn and make all chick food and scratch food we use.

As soon as we began to count our grain in tons instead of bags, it opened our eyes wide to the fact that we were losing good money buying grain and supplies at retail. That soon pushed us into doing a local grain business in a small way and that is beginning to develop. The first carlot order has been followed by others and had we more capital to work with we should soon build up a good grain business that would demand one man's entire attention. As it is it keeps one of us busy most of the time and when custom grinding starts we'll need help.

Besides the poultry and grain business being developed

by Wozelma Farms Producing Company, it is also building up a wholesale and retail trade in farm and poultry supplies of all kinds, including general merchandise. The charter of this company permits taking practical working students in poultry husbandry and the issuing of certificates of efficiency to such students after a course of practical work. Accommodations are available for a few male students of good character and earnest purpose. In November, 1912, Mr. Mason decided to get married and, as that made it necessary for him to receive a larger salary than the company was then prepared to pay, he was found a position as manager of poultry at Wellesley College, with a good salary including house rent. He is much pleased with his new position and still retains his office as vice-president and director in Wozelma Farms Producing Company.

Our 1911 White Rocks proved wonderful producers during the winter of 1911-12. The egg yield was so heavy we feared for the fertility and were much gratified when the first test of February eggs showed 97 per cent fertile. The hatches were fine and the chicks big, sturdy fellows. This looked to us like a triumph for the open-front house and healthy fowls. We had these birds housed in a Woods' house in the bleakest location on the place. The house was built for experimental purposes to test a cold open house and also to help illustrate the book "Open-Air Poultry Houses for all Climates."

When spring was well advanced those Rocks had worked so hard that they looked pretty ragged. We thought them due to slow down on eggs and determined to try another stunt with them. With some other fowls they were all turned loose in the pine woods and about an acre fenced in with poultry wire for their accommodation. They had to sleep where they could find a convenient pine limb.

They had no roof overhead. Nests were provided, also food boxes for mash, shell, charcoal and gravel, and automatic feeders for scratch grain. Water was supplied in galvanized pails. We had a good many hard storms, heavy showers, long, cold wet rains and high winds, but the fowls stayed out in the woods. We did not look for many eggs and left the egg gathering from this outdoor flock to Mrs. Woods. When she began to report 80 to 100 eggs a day from 150 fowls we began to sit up and take notice. Those fowls laid well all summer, phenomenally well. They molted early and evenly and many of them came through the molt looking as fresh and bright as the pullets. They were out doors from May until late October, when they went into winter quarters in one of the new buildings in Wozelma Farms' woods and they are still rendering a good account of themselves.

The Wozelma Farms Producing Company has as yet only made a beginning. The first year has been very satisfactory, in fact has made good its issued capital stock at par, and if 1913 only does as well proportionately we hope to become firmly established. This company for the present has three farms under its control, "The Anchorage Farm," the "Thomas Farm" and "Wozelma Farm," making a total of about 90 acres. These farms are also made use of by American Poultry Journal as an experiment station and in this connection are two other farms also used for A. P. J. poultry experiment work, one in Texas and one in Essex County, Mass. This gives to American Poultry Journal exceptional opportunities for poultry investigations and some interesting experimental work is under way. Of this more will be told later. With this article are a number of interesting illustrations showing views on the combined Wozelma Farms.

## Comments on Artificial Incubation

Seasonable Suggestions in Hatching With Incubators—How to Run the Incubator—A Few Pointers.

By T. F. McGrew, Scranton, Pa.

**THAT OUR FUTURE NEEDS** are thoughtfully considered in advance is exemplified in the excellent equipments that are always at hand, waiting for the hour of their need. No wish of the farmer, the poultryman or the merchant is left unnoticed for any length of time, and no sooner is the possible scarcity of meat foretold than out come new appliances for hatching more chicks. This is quite fortunate, for beyond all question "Poultry and Eggs" must to a very great extent fill the place so long held by beef as the most popular of all animal food supply.

Already we read of the purchase of large tracts of land in South America where the future meat supply must be grown. We of this country must learn how to grow more and better poultry, and we must also learn how to make hens lay more eggs during the cold days of winter, when more of them are needed than during any other season of the year. What others can do all can do if they will, and this is doubly true of winter egg production. And while we know that but few flocks of hens lay well in winter compared with the large number kept, at the same time the supply of fresh laid eggs in winter is increasing each year.

A large per cent of the eggs that are laid during the cold winter days are laid by pullets that were hatched early in the spring and were well grown and ready to lay in November. To have such pullets the chicks must be hatched and reared largely by artificial methods and they should be hatched in April. In some localities there are public hatcheries, or those who make a practice of selling day-old chicks. Some contract ahead for hatching chicks for customers, who place their orders in advance for the kind they want. Others advertise in advance that they will have several kinds ready for delivery on certain days.

The most advanced step has been taken by those who offer for sale eggs for hatching or day-old chicks from registered hens that have records for large egg production. Some offer day-old chicks from hens that have laid two hundred (200) eggs or more per year, these chicks to be toe-marked for identification, to be guaranteed as coming from certain hens, the price of these chicks at one-day old being fifty cents each. This indicates to some extent the value placed on egg production, and those who have a strain of heavy layers can

sell eggs for hatching or day-old chicks all they can produce. In order to meet the demand for all these several branches of trade artificial hatching must be practiced.

### Running the Incubator.

At one time all the incubators made were difficult to handle. Now they are so perfect of construction and so easy to manage as to make their use quite possible in every household. Those who are content to follow to the letter the directions sent with each machine are sure to succeed, while those who attempt to run them contrary to the directions are almost certain to fail.

The features of vital importance in artificial incubation are: (1) Fertile eggs that have been laid by mature hens mated to vigorous males, all the fowls to possess remarkable vigor and the best of health. (2) An even temperature where the incubator is kept and operated. (3) An even temperature inside the egg chamber. (4) The proper amount of heat, moisture and ventilation during the entire hatch. While all of these are necessary for success, the most essential of them all are fertile eggs that are fresh and full of vitality. Without these qualifications poor results will come even from the most careful handling. When the eggs are fresh, fertile and full of vitality they are apt to hatch fairly well, even though some mistakes are made in handling the incubator.

To have an even temperature where the incubator is run is almost a necessity, and this temperature will be best when it ranges from 60 degrees to 70 degrees F. When such a temperature is maintained it will assist materially in keeping the lamp to heat the egg chamber at the proper degree without taxing the lamp beyond what it can do without overheating the burner. A flame of medium size is always best, and such a flame should heat the egg chamber of an incubator kept in an even temperature of 60 degrees. Incubators will hatch when kept in a temperature that ranges from 40 to 50 degrees, but they will not do so well as will the same incubator when kept in a warmer place.

The proper amount of heat as recorded by the thermometer should be told in the directions that come with the machine. The thermometer used should be of the kind recommended in the directions and it should always be kept just where the directions say it should be. It is always safe to have more than one thermometer in the egg tray, and it will not be a bad notion to have a regular kind of thermometer in the tray in order to see whether the heat goes beyond or above the highest point marked on the incubator ther-

mometer. If the temperature goes higher than the incubator thermometer will register, then the heat will spoil the incubator thermometer for further use.

To regulate the ventilation and moisture best suited to the hatch is an art that must be learned by experience. A safe plan for the amateur or beginner is to keep a watchful eye on the glass in the door of the incubator. If just a few drops of moisture show on the inside of the glass in the door, that will answer; if none at all, the egg should be examined to find out whether the contents have evaporated too fast. This can be done with an egg tester to tell whether or not the air cell in the large end of the egg is growing too fast. If the air cell is larger than directions call for, moisture is needed; if smaller than normal, less moisture is needed. Moisture can best be supplied as told in the directions for running the machine. It can be safely done by sprinkling the floor beneath the machine or by blowing spray from warm water into the egg chamber. The amount of moisture to use can only be decided by the operator.

Chicks are apt to die in the shell about the eighteenth or nineteenth day. This results from one or more causes. The heat may go so high as to force heart action and burst the blood vessels, or for lack of moisture inside the shell the chick may stick fast and not be able to push through the air cell, or too much moisture may drown them inside the shell. Much trouble will be avoided by keeping the heat a little below 103 degrees. A full degree less will be better than to have the heat  $\frac{1}{2}$  degree above 103. Regularity in turning the eggs and cooling them will help a lot. When cooling the eggs let the bulb of the thermometer rest against an egg that contains a live germ or embryo. As soon as this ther-

mometer shows 90 degrees or a little less the eggs are cool enough and they should go back into the machine.

#### A Few Pointers.

There are a few simple rules for artificial incubation that should be followed and while all of them can not be followed to the letter, it should be done as near as can be.

The eggs selected for incubation should all of them be fresh or nearly so, all of one size and of the same color. When all of one size they will be more evenly heated than if of two or more sizes. Brown shells are usually thicker or heavier than white shells and for this reason all of one color should be hatched together. Beginning with the fourth day the eggs should be turned and cooled. If moved about in the tray with the hands while cooling it will both turn and cool them. The eggs should be tested for fertility either the fifth or seventh day. An expert can test them well on the fifth day, an amateur can do best on the seventh day. Do not turn or cool the eggs after the first peep is heard in the eggs. Eggs for hatching should be kept in a temperature that ranges from 40 to 60 degrees F. Either warmer or cooler will injure them. Dirt or filth on eggs should be scraped off the shell with the dull blade of a pocket knife. Dipping in alcohol and letting them dry without rubbing will do but little harm and will kill germs on the shell if any are present.

When the eggs are tested all clear eggs, and eggs in which the germs are dead, should be removed from the egg trays. Avoid jarring. Never close the door of the incubator with a slam as this will jar the eggs. Do not allow the sun to shine on the eggs either before or while in the incubator. The less sun heat that eggs get the better.

## Comment on Knights of the Scissors

Short Paragraphs Where Most Nonsense About Poultry Flourishes—  
Some Strange Information Given.

By H. H. Stoddard, Riviera, Texas

MEAN not professional hair clippers, but those who run the poultry columns in the farm papers. Sometimes it appears on reading same as though when the man of all work was through sweeping the floors, emptying the waste baskets and cleaning the spittoons, he was asked if he knew how to read, and the reply being in the affirmative, he was given shears, paste pot and brush and told to clip out every blessed thing about chickens and "make up" a poultry column. Among other stuff, clip out a lot of the brief, pretty little items and paste 'em on in a nice row.

The favorite little brevities concerning the "gentle art" of poultry keeping to my certain knowledge have some of them been used over and over again for thirty years or more. It seems to have been assumed that they were good and true or they wouldn't have been printed and therefore it is safe to print them again. Samples following:

"Every now and then a poultry man has trouble with hens that have fallen into the habit of eating eggs. If you are unfortunate enough to have any of this, try feeding the hens all the crushed egg shells they can possibly eat. The reason a hen eats eggs is to get some mineral matter. If this is supplied them they will not eat eggs."

You may have buckets full of "crushed egg shells," oyster shells, slacked lime and everything else belonging to the universal kingdom you think of accessible to hens from year's end to year's end, and yet eggs broken by chance will taste so good that the habit of egg eating may be formed.

"Something queer about hens and even chicks turning cannibals and eating each other up alive. The best explanation so far is that birds that do this need more meat to eat. A bit of a scratch comes on some hen, and the rest see the red spot or the drop of blood, and out of curiosity pick it off. That gives them a taste of the blood, and at it they go to devour the poor creature. If plenty of meat scraps is given the chances are that you never will have any trouble of this kind."

Here it is again, and you may have all the meat in the butcher's shop on tap, and still good fresh, warm blood or flesh will taste good. You cannot keep a child from liking cake by giving it pie.

"Fowls should have empty crops in the morning

and the crops should never be quite full until it is time to go to roost in the evening. Feed grain should be scattered in the litter in the morning. This induces them to exercise. In the middle of the day a warm moistened mash should be given. Feed what they will eat up and chew. At night before they go to roost a liberal feed of grain should be scattered in the litter. The fowls should be kept busy."

When you see that they bite off more than they can "chew," stop feeding, for heaven's sake!

"Overfeeding is one evil that is practiced by many poultry raisers. Fowls are lacking in that instinct which tells them when they have eaten sufficient food, hence the necessity for the keeper using his own brains in deciding just how much is good for them."

False as the above doctrine is, it goes down with lots of people as readily as the bird shot rolled down the throat of the "jumping frog" in Mark Twain's story. The birds have nothing to tell them when they have eaten enough! Pity about that! I should like to know if the party who wrote that slush can tell when they have eaten enough.

"When chicks are droopy from any cause whatever, at feathering up time, which, by the way, is a great strain upon the young fowls, a tonic in the drinking water once a day is a great help."

If you keep your stock strong, by proper breeding and proper management, and find a bird that can't feather without becoming "droopy," call around and let me know.

"One of the hardest things to control in poultry raising is lice. Every chick hatched by a hen is "stocked up" with them from the start. Incubators will, in the long run, hatch as many and as strong chicks as the average good sitter and does not stock them with lice. As incubators can be bought at very reasonable prices, it is policy to keep Biddy at her best job, supplying the eggs, and let the "wooden hen" do the rest. Then a good brooder, if properly looked after, will care for the young brood better, and the lice will not trouble, provide you do not let older fowls run with them."

Every chick hatched by a hen is stocked up! "Every" is a pretty broad term. Where is the fool killer? You can keep poultry twenty consecutive years, or forty for that matter, and hatch only by hens, without having young chicks stocked up with lice in a solitary instance, by having all your adult birds healthy and vigorous, so that they will put lots of muscular strength into the dusting process, you having

provided a great abundance of first-class dusting material, accessible every day in the year, and located so that all can dust themselves without waiting for others to get through. If you do this they will work a great deal at it. Then use one thing, and one thing is enough, in the nest of every sitter, to wit., a big handful of sulphur. The weak birds are the ones that do not dust energetically enough. Another thing—the soil should be so fine and easily pulverized as to be a constant temptation to wallowing.

"When the market demand for eggs is light, the Connell hens are on a light ration, so that they do not overproduce. If the market is clamoring for eggs the hens are crowded with protein feeds that

trick. It's a sure thing and will save hundreds of chicks."

Now, sulphur is anyhow only a very mild germicide, or insecticide, when given internally, and mites live on wood-work, so that sulphur in the body of a bird is a far fetched proposition. But often "anything goes" in the poultry column of a farm paper.

"The incubator is not advisable unless one wishes to hatch large numbers of chickens. A sitting hen and nest should be well dusted. Make nest eighteen inches square, and of sod if desired. Hens do not rest on eggs, but on shanks. Hens do not turn eggs with their bills. If they do not leave nest every day they should be helped off."

If there are "large numbers" of chickens to be hatched, the more reason there is for hatching by hens, or if any incubator is used at all it should preferably be the mammoth one-room incubator, run by an expert, for a whole township of commercial poultrymen. No, "bills" are never used, of course, in turning eggs. The hen rolls over on her back and kicks up her heels just as a horse does when it rolls. In this way the eggs are "squiggled around."

"As a rough estimate, to the American breeds, give four quarts of whole grain in eight inches of litter early every morning to 100 hens. Let them pick at the hopper feed during the remainder of the day till about an hour before going to roost. At this time give four quarts more of whole grain in the litter. Care should be taken to examine the crops at night to see if they seem full. If so, then examine the litter to see if all the grain is cleaned up. If food remains in the litter, give less whole grain till the birds get just as much as they will clean up and go on the roost with full crops."

"Examine the crops!" How long would it take and what would it do? How are you going to catch the wild ones every night and what profit could you make on fowl keeping

increase the yield. Connell is absolute master of his hennery and the hens are virtually egg machines. The master's hand is on the lever—the feedbox—and he gives them according to the needs of the egg market."

Whew! Any time you want eggs, "crowd" with protein. When eggs are cheap, without protein. There you have it! "The master's hand is on the lid of the feed bin that contains cottonseed meal, and "sich" just as the engineer's grasp is on the throttle. How simple! How plain the way to wealth beyond the dreams of avarice!

"Poultry as a side line to general farming will always offer the greatest returns with the least investment."

"Always?" Why, bless us all, sometimes it is such a nuisance that it is of no profit at all, for the hens scratch the garden and flower beds and roost on wagons and plows. Whether farm poultry is profitable or not depends.

"To kill mites feed your fowls sulphur in chops or bran once a day for six days, then skip two weeks, then repeat the dose.

"A successful poultry raiser has given this remedy a fair trial and it worked like a charm. He says:

"I have always dreaded mites during sitting time until this year. During last winter I fed my flock sulphur and I have set forty-one hens up to date. Thirty of them have already hatched, and I have not yet found a mite or louse on their chicks. I fed a handful of sulphur once a day for six weeks, then skipped two weeks, and then repeated the

if you had to do such things? Perhaps the author meant that the birds need not be caught, but that the keeper can tell while they are running around whether their crops are distended sufficiently. But that is nonsense, too. As well undertake to tell in the same way whether children have eaten enough.

"Poultry in an orchard will rid the trees of many injurious insects. Roosting in the trees is not a good thing, but if a comfortable roosting place is made the chickens won't try to use the trees. As a whole the orchard and the poultry plant are a supplement to each other, and valuable to a high degree if intelligently managed."

If the branches are near enough to the ground so that the birds can fly and reach them, they will as surely take to

them as ducks take to the water, no matter how "comfortable" their artificial roost is made.

"Every time a hen cackles when coming out of the laying room is no criterion that she has laid. I believe it was Collingswood who once said, 'A cackling hen is either a layer or a liar,' and in using trap nests I have found quite a number of these cacklers to be 'liars.'"

Hens are not liars, as accused. Many persons besides Collingswood believe that cackling refers to laying and nothing else; but the truth is there is anxiety in regard to the flock to which the cackling bird belongs. She is homesick after even a short separation and cackles forth the question, "Where are you?" and they cackle forth the answer, "Here we are, come on." Laying has nothing to do directly and primarily with cackling. Indirectly and incidentally it occasions cackling because it causes separation of the hen from her flock mates. You can try catching a hen in the day time and carry her a little way off and put her in a pen and she will cackle the same way because separated, and her flock

and winter. All these directions I follow personally, strictly, and if you try it you will feel so well that you will be inclined to treat your domestic animals well, and well they will be, years on years, as a matter of course.

"Many dealers object to eggs with pale yolks.

When you find yours are getting that way, put a little more corn in the ration."

Better "put" a little more sense in your head, Mr. Paragraph Writer. In a flock fed chiefly or entirely on corn, some hens will yield pale yolks and others highly colored yolks regularly. I do not deny, however, that the yellow variety of corn has some influence on the color of yolks and on the plumage of white fowls also; but do not change your feeding practice on account of a thing like that. From year's end to year's end give young and old poultry all the corn they want. One sort must always be on hand to balance the other sort. Then notions of putting in or taking out a "little more corn" will not be in order at all because they would interfere with the whole plan of allowing the birds to balance their sorts of feed by their own instinct.

"Chickens that have gapes sneeze them up and they, or the eggs of the worm, are swallowed by other chicks, and in this way the disease spreads and the infection continues."

No, the gapeworm goes through one stage of its life history in the body of an earthworm. The gapeworms (both sexes) breed when fixed on the birds, and the ova reaching the soil are then transferred to the interior of the common "fish worm," which is devoured by chickens and the vicious circle is complete.

"The rich may some day make trusts of all other things on earth, but they can never make a trust of the poultry industries. This will always be one line of business in which the individual can get in and stay in without competition or opposition."

At present there are so few commercial poultry farms, comparatively speaking, that a trust would, of course, be hard to establish. But the time is coming when there will be a hundred such farms where there is one now, and trusts will be as easily set up and maintained in poultry as in steel, tobacco or any other article which is used extensively. It does not seem to get through the heads of people yet to any great extent that train loads on train loads of eggs and poultry, either alive or dressed, will in the future be raised not on ordinary farms alone, but on immense ranches so numerous and extensive that they will substantially fill whole counties in some districts, notably in the great Southwest.

"Both adult fowls and growing chicks require abundant shade, plenty of good fresh water and vermin-free roosting places. When these are supplied the chickens will prove profitable to you."

"A tablespoonful of cayenne pepper in the bran or mash will serve to keep the fowls in good health."

"Keep the dropping boards clean and free from filth. They should be frequently scrubbed."

"During the first two weeks of a chick's life it is almost sure to overeat; care should be exercised so that this will not occur. After the chicks are over two weeks old they seldom overeat."

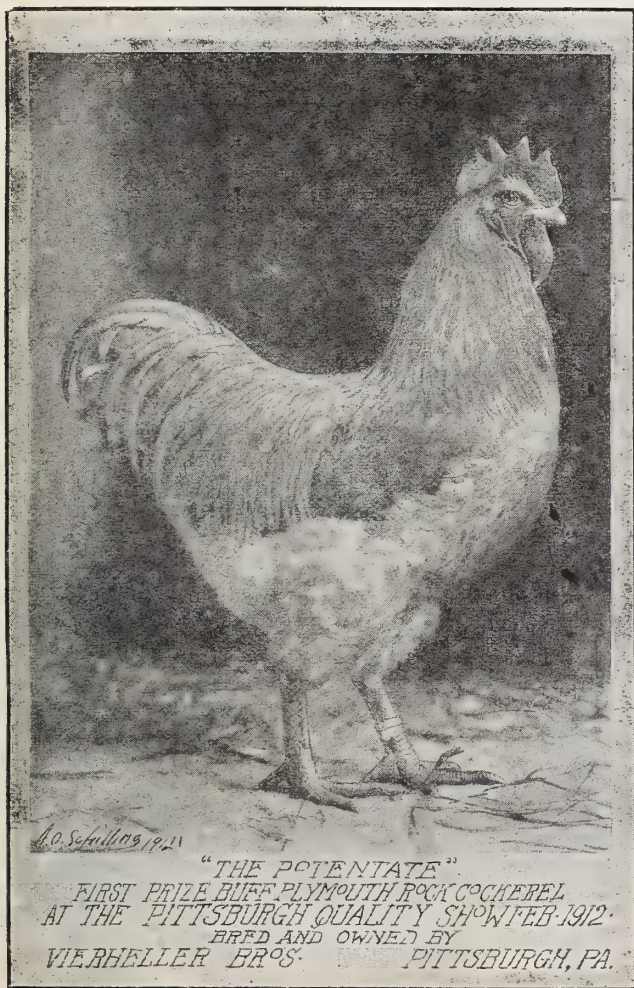

"In our eagerness to get our pullets to start to lay we sometimes are guilty of overfeeding them. Too much fat on the pullet is a great setback to laying."

Above are six samples in a row. (1) You can furnish proper shade, water, and so on, and still the birds may be unprofitable. (2) How much mash to the tablespoonful of cayenne, a quart or a pailful or a barrelful? (3) Have no dropping boards. The filthy things are the invention of Satan. "Scrub them," will you? Pretty business! (4) Chicks never overeat, nor can be made to, if always given access to all they will take of the proper kinds of feed, whether at the age of two weeks or any old time. (5) You can't get too much fat on a pullet.

The column of short paragraphs is where nonsense most flourishes. The scissors have been used, as we said above, for thirty years on some of the "terse, spicy" items. They are as venerable as the jokes salted down in barrels and afterwards inflicted on the innocent public by circus clowns.

Following is something on taking medicine beforehand to keep from getting sick. It is a favorite idea. Why in the eighteenth century, and running well into the nineteenth, the unfortunate children of those benighted times were made to line up so as, to make sure that none were omitted, the families being large, and each had to down a spoonful of sulphur and molasses to "keep off" diseases. This when every individual in the row was well and hearty.

"Making the drinking water slightly red with

will reply. The rooster especially, as the representative of the family or clan, will give out the clan cry. On any occasion of alarm all the flock will cackle this rallying cry, and the rooster will prepare for battle if advisable, or for flight if discretion seems the better part of valor.

"A little granulated charcoal mixed in the soft food will generally check bowel trouble in chicks."

Why so much talk about "bowel trouble?" In the poultry columns it is "bowel trouble," "bowel trouble" over and over again. Ever notice it? Well, I kept chickens over thirty years in an Eastern state, then nearly thirty years more in a Western state, and never had a case of bowel complaint among them that I remember. If there was one, I did not notice it, for I always kill a sick chick and "have an end on't, unless keeping it for study," and seldom notice or care what is the matter because I have so few cases. Keep your stock strong and always under good sanitary conditions, drink no intoxicating liquor, use no tobacco, cheat nobody in a chicken trade or any other sort of trade, sleep with two sides and two ends of your apartment entirely open summer

permanganate of potash has often been found to prevent the spreading of roup."

No medication of drinking water whatever by using any drug, in any quantity whatever, will stop the "spreading" of genuine roup if sick birds and well are left together. Much damage is often done by such advice when reliance should be placed on the hatchet. The best thing of all is to come here and keep your fowls houseless and roupless in southwest Texas by outdoor life, like quails and wild turkeys.

"Changing the runs from year to year will prevent any plot of ground from becoming inoculated with parasites that kill off the flock. If there is room enough near the poultry house to shift the yard around, the change need not greatly disturb the routine of taking care of the poultry."

The writer of the above paragraph seems to take for granted that the enemy that kills the flock is harbored in the soil, as the gapeworm and the hookworm are at certain stages of their life history. But there are other destructive pests that live elsewhere and that will "kill off the flock" sometimes on ground where no poultry has ever been before. For instance, the bug of the fungus that causes poultry conjunctivitis, a deadly disease sometimes in the Southwest, attacks a flock on new ground cleared of trees, where no fowls have been for the last ten thousand years or ten million years. Some diseases may lurk in the fungus growths on musty grain fed or musty straw used as scratch-litter and not harbor in the soil at all, and some are unquestionably brought to the poultry yard by wild birds or possibly quadrupeds.

The whole matter of conjunctivitis should be studied at the experiment stations. The germ, whether of the animal or vegetable realm, should be discovered, isolated, cultivated, and its life history investigated. The same should be done in the case of every germ disease of poultry. Then the best way to combat or avoid such disease can be learned. The Arkansas station says conjunctivitis is "introduced to poultry premises from outside," which is doubtless true, for all "bug" diseases must come from somewhere outside at the start, but through what medium or mediums is what we all want to know. A great field remains to be explored by investigators before it will be ascertained what poultry diseases can be disseminated by wild birds and vice versa.

The bodies of various species of wild birds and quadrupeds found diseased should be dissected and microscopically studied to find out how many of their one-celled depredators are communicable to humans and to domestic animals. In some cases it may be found that a closely allied, though not the same species is communicable; a differentiation having probably arisen in the course of ages. Sometimes a species of wild birds suddenly becomes very scarce, though previously abundant. Birds might die off in great numbers because blinded to starvation point by conjunctivitis, for instance, and sick or dead victims might not be noticed by naturalists or hunters because four-footed undertakers and scavengers such as skunks might devour them nightly. In this county quails, very abundant for a series of years, suddenly became scarce and then for a few years gradually increased to their old time numbers. As they are not migratory or only slightly so, a germ disease most likely is the explanation.

It could not be laid to the door of storms and heavy snow, as in some northern localities.

"If every farmer in the United States would buy of some reliable breeder a good cock each year—say one that would cost about \$10—the advancement made in the farm poultry would be worth more than all the scrub stock in existence. If he would gradually replace all of his scrubs with pure bred stock the advancement would be worth several millions of dollars."

The ten-dollar bird if a fancy bird might be one of the very sort that the farmer shouldn't buy. For two or three dollars a male of pure breed but lacking in Standard points can be bought.

But "I want a Standard-bred breed," says the objector. Well, such a moderate priced bird as just described belongs to a "Standard-bred" strain if from a fancier's yard, only the Standard points happened to be partly lacking. The rooster is just as good for the farmer as the one which perchance the fancier sold for \$100.00.

The terms "Standard breed" and "Standard bred" are often misleading. Any Cochins, or Hamburgs, or whatever, that is pure, namely, having an ancestry with blood unmixed with that of any other breed, is of a "Standard breed" if its breed has been admitted to the Standard, and this is true irrespective of whether it scores high or low. When we come to speak of the term "Standard bred," it is often used

to mean that the owner and the parties he procured the stock from have customarily selected breeding stock with reference to high scoring, but that is all that it means. Nobody ever has "bred to the Standard because the Standard is perfection itself." Even if some breeder should succeed in getting one bird that scores 100 he never will in a thousand years establish a strain of such birds.

The claim "My birds are bred to the Standard," taken literally, is nonsense, though the claim "I am guided by the Standard in selecting breeding birds" is true in thousands of cases all over the land.

An amusing instance of this is a current effusion over the name of L. M. Davis. Really I do not believe that is his real name. He seems to be a penny-a-liner and is devoting his sapience to the "Feeding and care of young chicks," and in the course of his dissertation says:

"Nature always arranges to take care of the young chick for a day or more after he breaks through the shell. On his breast you will find a splash of the egg yolk left by nature. Instinct or hunger may be causes the new hatched chick to twist his soft beak down to this waiting tidbit left there for him. Anyway, his stomach is so constructed that the pangs of hunger will not bother

him greatly during the first hours of his stay on the earth. He will spend most of his time picking up tiny pebbles for a day or two."

The above is the limit! Having seen many attempts to be smart, this beats all others. Did the one that penned that ever see a young chick in his life—one that had become thoroughly nest dried and ready to run around? A spotless marvel it is. One of the most perfect and immaculate objects in nature; not a speck on it from tip of beak to tip of tiny toe. It is as free from any "splotch" as a new coin fresh from the mint. Then that "twist of his soft beak."

Ye gods! The chick ought to be careful lest after "twisting" that soft substance it should suddenly harden and leave him gimlet-billed all his life. What necessity for any "twisting" at all? Ah, I see. The bird must not bend its head over to get at its breast because he wants to stand head up and tail up and see what is going on in the new world. So rather than bend its neck it twists its soft beak. I have always been told that nature's ways are wonderful and now I believe it. That "day or two when most of his time" is spent picking up tiny pebbles is worth earnest and prayerful consideration. I suppose plump little seeds and lively little insects and thin enticing larvae are disdained by the mother hen and her brood for a "day or two" till "pebbles" enough have been collected.

# The Great Chicago Show

DECEMBER

12 to 18, 1912

The fourth annual exhibition of the Mid-West Poultry and Pet Stock Association, held December 12-18, 1912, was the most successful exhibition ever held in Chicago and without doubt the largest and best quality show ever held in this country, that is to say, there were more birds of quality in this show than were ever before cooped in any one show in the United States, not alone in one or two varieties or classes, but in all varieties and classes, and to attempt to single out any one class that showed superiority over the other classes would be folly on our part.

All sections of the country were represented, from the Atlantic to the Pacific. All classes of breeders, from the amateur of one to two years' experience to the old-timer who bears the scars of scores of battles and who does not know what defeat means.

The show management deserves the thanks of every poultry breeder in the country for their efforts in putting on such a magnificent exhibition of thoroughbred poultry and for the able manner in which the show was conducted, as exhibitions of the character of this cannot help but increase the interest in thoroughbred poultry and make it more remunerative for those who are about to engage in the business as well as those who have made a life's work of it.

The show was cooped with Keiper coops, which gave it a most attractive and pleasing appearance and showed the birds off to good advantage.

Many good sales were reported to have been made during the week of the show, among which was the sale by Owen Farms, Vineyard Haven, Mass., of their entire flock of Rose Comb Rhode Island Reds, to the Buschman-Pierce Red Farms of Indianapolis, Ind., and their entire exhibit of Single Comb Rhode Island Reds at Chicago to F. E. Harrison, Menominee, Mich. Owen Farms captured many of the special prizes, among which was silver cup for best collection of S. C. Buff Orpingtons, silver cup for champion male, shape and color specials on male. In White Wyandottes they won silver cup for best display and champion female. In White Rocks they won special three best cocks, special three best hens, special three best cockerels, special three best pullets. It was also reported that R. A. Hewes, of Crete, Ill., the man who always wins on his Black Langshans at Chicago, made some remarkably good sales of high quality stock, as did also S. A. Noftzger, North Manchester, Ind., originator of Partridge Plymouth Rocks.

Twin Oakes Farm, H. W. Bissell, proprietor, Livermore, Cal., sent a pen of White Wyandottes, and even after their long

journey landed fifth place. This is a commendable winning, all things considered.

## Barred Rock Class.

The Barred Rock class was said to be the largest Barred Rock class ever gotten together. It contained, in all, 393 birds. Kings and queens of the poultry world from all sections of the country, East, West, North and South, were shown in the pink of condition and those who know say better quality was never seen in any show-room. All old-time exhibitors at the Chicago show were here, together with several new ones, and the prizes were, naturally, divided among several of them. A. C. Hawkins, Lancaster, Mass., won the most points for best display, and carried home the handsome silver cup offered for this prize. This cup was the largest and by far the most valuable offered in the entire show, and was the most hotly contested prize in the show. We understand Mr. Hawkins refused several offers ranging around \$500 for some of his prize winning males, and did a nice business during the show.

In the cock class, which consisted of twenty-nine birds, D. M. Covert, Willoughby, O., won the highest honors by winning first on a cock bird that was the star in his class. This bird was shown in the pink of condition and was admittedly one of the most perfect specimens of this grand variety seen in many years. Mr. Covert was also fortunate in winning first and fifth hens in this class of seventy-nine birds. We understand these are the same birds that won as pullets at Philadelphia last year. He also won second cockerel-bred hen in another hot class. Mr. Covert is an old-time breeder and exhibitor, who always produces the quality necessary to get inside the money.

Mr. W. W. Henderson, Bridgeton, Mo., made a grand winning, getting second on a grand cock bird. His first and second prize cockerels are also worthy of special mention, being remarkable in both color and type. Mr. Henderson has been a fancier of Barred Rocks for a number of years. His winnings at Chicago prove that he has become a "master of art" in producing this beautiful variety.

Mr. G. Earl Hoover, Mathews, Ind., showed some fine specimens in the Barred Rock class. His second and third pullet-bred cocks were particularly fine specimens and worthy of special mention, as was also his fifth prize pullet-bred breeding pen.

Truckenbrod Brothers, Mendota, Ill., who are well known as quality breeders of Barred Rocks throughout this section,

won third on a very fine hen, also fourth cockerel-bred breeding pen and fourth pullet-bred breeding pen.

#### White Rock Class.

The White Rock class was filled with quality specimens of the highest quality and was one of the most hotly contested classes in the show. Owen Farms captured second, third and fifth on cocks not yet quite fully through the moult. There was some question among breeders that their third and fourth hens should have been placed higher up.

well in this class, considering that their birds were somewhat green and not shown in the pink of condition. This was especially true of their second prize hen.

#### Partridge Plymouth Class.

The Partridge Plymouth Rock class was one of the best and largest classes of this variety ever gotten together, in which most of the honors were divided between F. N. Perkins, Freeport, Ill., and S. A. Noftzger, North Manchester, Ind.

Their first prize cockerel was the admiration of breeders, being grand in type, pure white, well furnished, having fine head points. The same is true of their first, second and third pullets. In pens they won second and fourth places.

Guy Daily, Jeffersonville, Ind., made a grand winning in this class. His first prize and champion hen was a remarkably fine specimen and his first and third prize breeding pens were marvels of beauty, being exceptionally well matched and shown in the pink of condition.

Maple Farms of Midlothian, Tinley Park, Ill., won very

#### Golden Wyandotte Class.

The Golden Wyandottes were a good class, in which the coveted prizes were divided among J. S. Pennington, Plainfield, Ill., J. H. McDanell, Warsaw, Ky., and Simmons Bros., Stockton, Ill.

#### Buff Wyandotte Class.

The Buff Wyandotte exhibition was a large one, containing seventy-four birds in all, in which class Besuden Bros., Cincinnati, Ohio, captured three first and several other prizes.

**Partridge Wyandotte Class.**

The Partridge Wyandotte was a good class, containing fifty-eight birds in which all first prizes went to Sheffield Farm, Glendale, Ohio. Wm. Erfurth, 9235 Commercial avenue, South Chicago, Ill., also exhibited in this class, and captured several prizes.

**Silver Wyandottes.**

The Silver Wyandottes, some grand quality specimens and 84 birds in all. We believe this was one of the best classes of this variety ever gotten together.

In this class the cream of the prizes went to Clare E. Hoffman, Allegan, Mich., who won first on a hen that was ideal in type and beautifully laced. His first prize cockerel was also a grand bird. His second pullet is a comer, not yet being fully developed. The first and second pen prizes also fell to Mr. Hoffman.

**S. C. Rhode Island Red Class.**

The Single Comb Rhode Island Red class contained 232 birds in all, being one of the largest classes in the show. The interest, as usual, was keyed up to the highest notch, and F. E. Harrison, Menominee, Mich., wore a smile that did not come off, after the ribbons were hung up. He had a number of remarkably fine specimens of this popular variety, and worthy of particular mention were his first, second and third prize pullets. Red breeders conceded these were three as fine pullets as it is possible to produce. His first young pen and his first and second old pens also contained specimens of rare quality.

Another competitor in this class was Ira M. Crowther, Willoughby, Ohio, who showed two particularly nice hens, winning first and fifth. Mr. Crowther also won third old and fifth young pens.

Wm. Etzensperger, Willoughby, Ohio, also exhibited some fine Reds, winning a number of prizes. Worthy of mention was his second prize cock, which is a remarkably fine specimen and has a long list of prizes in other shows to his credit.

**R. C. Rhode Island Reds Class.**

The Rose Comb Rhode Island Red class contained 223 birds and here again were found many specimens with type and color that was close enough to standard requirements to satisfy the most exacting.

Worthy of special mention in this class is the first, second and third prize cocks shown by Buschman-Pierce Red Farm, Carmel, Ind. These cocks were exceptionally fine in both type and color, being descendants of their long line of prize-winning male birds. During the show Mr. W. C. Pierce closed a deal with Owen Farms for the purchase of all of their R. C. Rhode Island Reds. This purchase includes all of the New York and Boston winners, and added to the already large stock of quality birds owned by the Buschman-Pierce Red Farm, will give them the strongest blood lines of this breed in the country today. Mr. Pierce reported numerous sales and prospects very good.

Another exhibitor in this class worthy of special mention is the Longfield Poultry Farm, Bluffton, Ind., who captured among other prizes first on a hen which was a particularly fine specimen.

**S. C. Rhode Island Whites Class.**

The Single Comb Rhode Island Whites contained a commendable exhibit of this new variety, in which class Carl D. McCarthy, Kempton, Ind., was the important winner, capturing four first prizes and a silver cup for best display and cup for best shaped male in the show.

In looking over this class, we were pleased at the improvement that is being made in this variety and for a new breed they are making progress in both type and color.

**White Wyandottes**

Were a grand class, many breeders having beautifully conditioned birds competing for the prizes.

Owen Farms won well on a grand string, their first, second and third hens being models for breeders to strive for, as were also their first and third cockerels. Their first hen also won the championship in this class.

**Single Comb Buff Orpington Class.**

The Single Comb Buff Orpington class was another one of the largest classes in the show, teeming with quality of the highest order. Bird after bird with color and type close to standard requirements and fit to win the blue in most any exhibition. In this class the Owen Farms, Vineyard Haven, Mass., were prominent winners, capturing first cock, first cockerel, first old and young pen. Their first prize cock was champion male, winning both shape and color specials.

Sunswick Poultry Farm, South Plainfield, N. J., showed a grand string of Buff Orpingtons, winning second on cock, a particularly fine bird, being grand in both shape and color.

Their first prize hen was the champion female, winning both shape and color specials. Their second prize old breeding pen contained birds of rare quality and worthy of special mention.

Roseland Poultry Farm, South Euclid, Ohio, Chas. Switzer, owner, also exhibited many grand specimens of this variety and won a goodly share of the coveted prizes. His third and fifth prize cocks were beauties, being large, massive birds with fine color and grand in head points.

Another exhibitor and winner in this class was Frank C. Cleveland, Morgan Park, Ill., who showed some very fine Buffs, and his third prize cock being a grand bird in type and color with good head points. His third pullet and fourth prize pen are also worthy of mention.

**White Orpington Class.**

The White Orpington class was the second largest in the show, containing 340 birds, and a finer lot of White Orpingtons was never brought together. With very few exceptions most every bird in the show was deserving of a prize, and those fortunate enough to win any place at all in this class were to be congratulated.

The Aldrich Poultry Farm, Columbus, Ohio, distinguished themselves, winning first and fifth cocks on two as fine specimens as one could wish to see, as were also second, third and fourth cockerels and first and third pens.

Iowana Farms, Poultry Department, Davenport, Iowa, made a commendable exhibit in this class, all things considered; their fifth prize breeding pen contained birds of rare quality close up to standard requirements.

Twin Oaks Farm, W. H. Bissell, proprietor, Livermore, Cal., sent a pen of White Orpingtons 3,000 miles to compete at Chicago. These birds were handicapped because of their long journey. Had it not been for this they would surely have landed well up in the money, as they were very fine specimens.

**Black Orpington Class.**

The Black Orpington class was another containing great quality, and prominent among the winners was the Blue Ribbon Poultry Farm, Columbus, Ind., who made a winning in each of the five classes. Their second prize cock was an exceptionally fine specimen, being somewhat out of condition, otherwise he would have been placed higher.

Another winner who showed birds worthy of especial mention in this class was Herrick Poultry Yards, Durand, Mich.

**Silver Campines.**

The exhibition of Silver Campines was very large, containing fifty-four birds in all. The important winner in this class was Frank E. Hering, South Bend, Ind., who on three entries won first cock, first pullet and second hen. His first prize cock was a typical specimen of this variety, being pronounced by Campine men who know the requirements of this breed to be "ideal," and his first prize pullet was also considered to be one of the best specimens of this variety ever shown in this country.

J. T. Rountree, Nora, Ill., also showed some fine specimens in this variety and was one of the prominent winners.

**Single Comb White Leghorns.**

The Single Comb White Leghorns were out in all their glory, 355 specimens, practically every one of which was worthy of a prize, contested here for the honors. Many fine specimens well worthy of a blue ribbon were left out of the money. In this class E. W. Grove, Jr., Clayton, Mo., won three first prizes, while Robert D. Parmenter, Knoxville, Ill., captured one of the other first prizes, also won most points in the class and prize for three best cockerels, and N. P. Eastling, of Parkside Poultry Farm, Pekin, Ill., took home the other blue. The birds shown by these exhibitors were truly remarkable specimens of this beautiful egg laying machine and much credit is due these breeders for their skill in producing specimens of such rare quality as were seen here.

Another exhibitor who showed birds of particular merit in this class was Frank E. Hering, South Bend, Ind., who won fourth on pen. This pen would have been no doubt placed higher, but was somewhat out of condition.

**Single Comb Brown Leghorns.**

Single Comb Brown Leghorns were a good class of rare quality. W. G. Warnock, Geneseo, Ill., captured three of the first prizes on commendable specimens of this beautiful variety.

**Single Comb Buff Leghorns.**

Single Comb Buff Leghorns were out in numbers and a good class throughout, in which F. A. Tectonius, Racine, Wis., captured five of the six first prizes, making a truly remarkable winning.

In the Rose Comb Buff Leghorns F. A. Tectonius also captured four first prizes.

#### Anconas.

The Ancona classes were well represented and prominent among the winners of this class was Dr. Guy Blencoe, Alma Center, Wis., who showed a good string, having quality throughout.

#### Black Minorcas.

Single Comb Minorcas were a good class, containing many good specimens of this popular variety. W. O. Chase, Hillsboro, Ill., was a prominent winner in this class, as he was also in the Rose Comb Black Minorcas.

#### Black Langshans.

Black Langshans, this lordly fowl of poultrydom, were out in goodly numbers. There were many typical specimens of this variety, which, by the interest shown, is destined to become very popular in the near future. R. A. Hewes, Crete, Ill., showed a number of very fine specimens and again carried off a goodly share of the prizes. His first prize cock and first prize cockerel were both exceptionally fine specimens, as were many of the females shown by him.

#### Bantams.

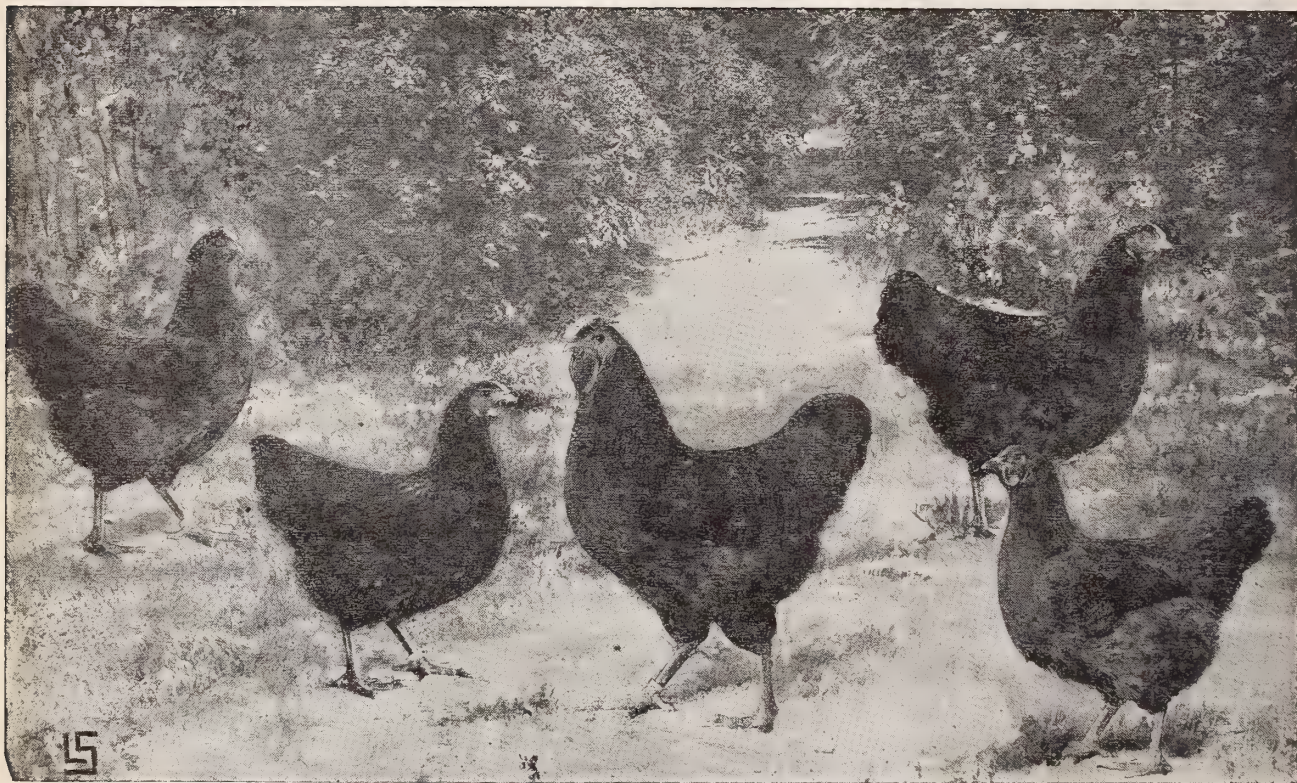

The Bantam classes were well represented, particularly the Cochins. The Wahebe Bantam Yards, Cin-

#### Booths at Show.

Among those having exhibitions in booth space at show was Chas. V. Keeler, owner of Keerlerville, Winamac, Ind., whose exhibit was in charge of Russell Palmer. Here were exhibited fourteen cocks and nine hens, ten of the cocks being full brothers to the grand cock Chief Winamac, Jr., 3d, who won first cockerel at Tokepa, Kan., being the gold band prize winner, 1911-12.

In a central cage was one of the sons of Chief Winamac, Jr., a grand specimen, weighing eleven pounds. This bird was an extremely large specimen and is one of the few large White Wyandottes which retain the typical Wyandotte type when they attain large size.

Geo. Rudy, Mattoon, Ill., had a beautiful exhibition of White Wyandottes containing forty males, prominent among which was Perfection, Jr., who will attain the age of six years the last of next month. He was shown in the pink of condition and looked like a two-year-old, having as much vigor as most cockerels today. Another remarkable feature of Mr. Rudy's exhibition was a pullet exhibited in a cage with seven of her own chicks hatched out of nine eggs, and Mr. Rudy informed us that she hatched these chicks four days before she was five months old. Before she reaches the age of one year her chicks will be laying. This certainly is "going some" and speaks well for the early maturity of

First prize young pen R. C. R. I. Reds, Chicago, Dec., 1911. Bred and owned by Longfield Poultry Farm, Bluffton, Ind.

cinnati, O., showed Buff, Black, White and Partridge Cochins and won extremely well in every class.

#### Display Pens.

Among the exhibitors who had display pens worthy of particular mention was A. E. Martz, Arcadia, Ind., breeder of Single Comb Buff Orpingtons. Mr. Martz exhibited a particularly fine cock bird which could well be used as a "Fashion Plate" by the breeders of this beautiful and popular variety. He was a large, massive specimen with grand head points, a typical Orpington shaped body, well balanced on a pair of short, stout legs and in color he was one of those rare specimens of golden buff of exactly the right shade and which have to be seen to be fully appreciated.

J. M. Williams, North Adams, Mass., also had an exhibition cage of Single Comb Buff Orpingtons which attracted much admiration.

A. & E. Tarbox, Yorkville, Ill., breeders of Silver Laced Wyandottes, had an exhibition cage of this beautiful variety which was conceded by all who saw them to be as near perfect as it is possible to be produced. It is hard to imagine a more beautiful bird than the Silver Laced Wyandotte with its white and black when clean cut as if laid on by an artist's brush, such as these specimens looked to be.

White Wyandottes. Mr. Rudy reported business good and looks forward to a very prosperous season.

Midlothian Farms, Tinley Park, Ill., had an exhibition which attracted the attention of every one. The central attraction of this exhibition was the White Rock Hen "Lady Show You," winner of the Missouri egg laying contest. This hen laid 231 eggs in twelve months, being the highest official record ever made by any bird of any variety. Her royal highness took matters very quietly. It could not be said that she was a beauty at the present time, as she is about one-half through her moult and therefore does not do herself justice at this time. This enterprising farm has also secured all of the other champions at the Missouri contest, including the champion pen of Rose Comb Rhode Island Reds, five females of which laid 1,042 eggs during the year, also the White Orpington hen with a record of 232 eggs, the Single Comb Rhode Island Red hen, with a record of 236 eggs, the champion Rose Comb Rhode Island Red hen with a record of 255 eggs, the champion Barred Plymouth Rock hen with a record of 267 hens. The Midlothian Farms are going in for egg laying qualities, all stock being trap-nested and only birds having good records are used. Mr. Thomas and Mr. Poorman were in charge of the exhibition, and were always kept busy answering questions from inter-

ested spectators. Several good sales were made and many orders booked for baby chicks. One of the largest individual orders was for 1,200 chicks.

Among the other enterprising firms who had booths at the show was Albert Dickinson, Chicago, Ill., who illustrated their Globe Scratch Feeder by having a large revolving globe representing the globe of the world and the maps of the various continents being represented by different colored grains glued to the globe. Among the other firms were the Cyphers Incubator Co., Newtown Incubator Co., W. W. Barnard, agents for the Essex Model Incubator Co., Vaughn's Seed Store, agents for the Prairie State Incubator Co., Inter-

national Correspondence School, Seranton, Pa., Potter Co., Downers Grove, Ill., Poultry Houses and Appliances; Ideal Feeder, manufactured by the Miller Anchor Co., Norwalk, Ohio, Simplicity Feeder, manufactured by the Simplex Supply House, Pontiac building, Chicago, Ill.

The Sibil Egg Compound Co. had a booth that attracted considerable attention. They had on exhibition eggs that had been preserved for years and when broken were as fresh and good as ever. At last we seem to have a perfect egg preservative. The compound is manufactured by the Sibil Egg Compound Co., 167 West Washington street, Chicago, Ill. (For list of awards and exhibitors see page 86.)

## Laws Governing the Fertility of Eggs

Selection and Mating of the Breeders Most Important—Free Range vs. "Coop" Systems—Properly Balanced Rations Very Important in Making Fertile Eggs Hatchable. *By Charles A. Simmonds, Camp Point, Illinois*

**T**HE first essential in any branch of the poultry business is the obtaining of fertile eggs that will hatch strong, vigorous chicks.

Contrary to the beliefs of most poultrymen, the selection of strong, vigorous breeders is only a small item compared with others in the production of hatchable eggs, but as it is first I will discuss it first. In order to intelligently select his breeders the poultryman must watch the development of his chicks from which his future breeding birds are to be selected, as the appearance of a bird when caught and examined is not a sure and safe index to its constitutional

vigor. The birds that are first to reach bodily maturity generally have the greatest amount of vitality (I say bodily maturity because some birds reach sexual maturity before their bodies are fully developed; this class make undesirable breeders). The birds that scratch the hardest, range the farthest and go out in the snow when the others are too cold to leave the house are the birds that have a large surplus of constitutional vigor. The birds with the strongest constitutions are generally of medium size, neither extra large nor exceptionally small, but are very heavy for their size compared with those having weak constitutions. If the breeding birds have weak constitutions their progeny will be sure to have no matter how well raised, though a weak constitution in one sex is sometimes offset by a strong constitution in the other, so that the progeny is apparently strong and healthy.

The mating of the breeding birds is the most important essential in the production of fertile eggs. Fowls have likes and dislikes for each other the same as all other animals and humans. Where only one male is allowed in the pen the birds must be very carefully mated and watched to make sure that the male gives proper attention to all females in the pen. Nearly always it will be noted that the male has his favorites and frequently there will be a female or two in the flock that he so dislikes as to chase and cuff her around as he would a male bird. Where the male copulates with the female against her will, it is generally useless and, if the eggs should prove fertile, the chicks will be very poor quality, so the desires of the females must also be considered when mating the pen.

Where a number of males are allowed to run with a large flock of females on free range they will select their own mates in their own way, and if other conditions are at all favorable the fertility and vitality of the eggs is always high. Where more than one male is kept in the flock the more males the better, for there is always a "boss" that will not permit any flirtation on the part of the other males when in his presence if he can prevent it, but if there are a large number he cannot "boss" them all at once. Of course, the proper proportion of males and females must always be maintained in the flock, as where the number of males is too large for the number of females the females will be so tormented they will not produce as many or as fertile eggs

In the nineties, what was known as the Burdick system of mating was largely used, especially by fanciers of Buff varieties. By this system four males were allowed to every three pens, alternating every three days and giving each male three days' rest out of every twelve. It was claimed that mating thus by natural selection (using males and females of different shades of color) would produce the most

brilliant colored Buff birds. Mating for Buff color has been reduced to a more scientific basis in later years, and this system is not used to my knowledge as all fanciers are careful to know the sires (and generally the dams as well) of all their breeding birds. However, breeders that have used this system all testify that it gave high fertility and strong chicks not obtained where only one male was used in each pen. If one is careful in mating his birds, being careful to place in the pen a male that is congenial to the females and vice versa, good fertility is obtained, but otherwise it will often run very low when all other conditions are favorable.

The number of females that should be allotted to each male varies according to the constitutional and sexual vigor of the male and the prolificacy of the females. A safe rule is to mate fifteen hens to each cockerel and ten to each cock on free range, and ten to each cockerel and seven to each cock in confinement.

There is quite a difference in fertile eggs and hatchable eggs. To hatch strong chicks the eggs must contain strong germs and the proper food elements to produce the chicks. The first twenty eggs a pullet lays generally do not produce very strong chicks. Likewise the first three or four eggs a hen lays after moulting, setting or resting from laying a very long time. Hens and pullets intended for breeding should never be forced for eggs during the fall and winter by the use of condition powders, hot mashes, large quantities of meat and other stimulating feed. It not only weakens their constitutions but is very apt to cause the egg-producing organs to become deranged, making them forever incapable of producing hatchable eggs. Feed the intended breeders on hard grains (principally whole corn and oats), dry mash, live cell green food, and animal food in small quantities only, and select for breeding the birds that lay best in cold weather with this ordinary treatment, and you will get strong, vigorous chicks. A wet (but not hot) mash fed lightly on a cold morning in early spring is a good appetizer to induce old hens to begin laying earlier than they otherwise would and to secure a large number of eggs for early hatching, but should always be used judiciously.

Of late years we have been hearing much of the advantages of intensive poultry culture, the advocates of various "coop" systems claiming that higher fertility and stronger chicks are obtained from breeding birds housed by their plan than those given more liberal range. Undoubtedly it is better to keep the breeders confined to the houses than to use yards so small that they are kept bare of vegetation and the soil becomes foul and contaminated by the droppings. But the ideal way to keep breeding birds is on free range every day in the year that they care to leave the house. All females, whether fowls, swine or horses, show greater fecundity when given free range than when confined. Breeders of Percheron horses find that after their pastures have been heavily stocked with horses for several years only a few of their mares will bear colts, and these will be poor quality, but turn on fresh pastures and nearly every mare raises a colt. Fowls stand confinement and ill-treatment better than other animals only because they are naturally vigorous and strong constituted.

Of course it is possible to confine the fowls to parks or yards so large and well arranged as to practically equal free range, but when I speak of confinement I mean keeping the birds confined to small coops or yards so small that the vegetation is killed after the first year. The yards to give the best range must be large enough to grow a luxuriant sod without reseeding every few years and should contain low

trees or bushes for shade. The ground should slope (preferably to the south or southeast) so as to let the surplus water quickly drain off after a rain. On free range the birds can find green grass almost the entire year; in the winter on the south side of hills and thick clump of trees, and in summer on hillsides sloping to the north and lowlands fed by streams of running water.

Of course green food as well as all other necessary foods may be supplied in confinement, but green food is the most expensive food one can feed in winter considering the labor required to produce and prepare it for feeding.

Improper food is often the cause of infertile eggs. While the food for breeding birds must not be of a stimulating nature it must contain an abundance of the elements necessary to produce the best grade of eggs and keep the birds in the best possible condition. Whole corn is a great body builder, keeps the gizzard exercising (which is very necessary for the best digestion) and never causes bowel trouble when freely fed as many other grains will.

Oats will balance the fattening tendency of the corn and furnish egg-making material in the most available form of any grain food. I have never been able to get the best results without feeding both of these grains. A variety of grains as necessary for best results and other grains should be added to the ration when a good quality is obtainable at

a fair price. Coarse, bulky food is necessary for the best digestion and infertile eggs are often due to a lack of it. Oat hulls, short cut alfalfa, bran, buckwheat hulls, etc., furnish bulk which when mixed with the more concentrated foods allows the digestive juices to easily penetrate the mass of food and render it easily assimilated. The oat hulls, etc., will also keep the digestive tract swept clean of bacteria, thus preventing white diarrhea, etc. In mild weather, where the breeders have free grass range, they will take care of the bulky food question by eating large quantities of weeds and grass, but when confined they are often forced to eat large quantities of the straw that is used for litter to supply their requirements along this line, this is dangerous as the straw is liable to become knotted in the crop, thus preventing the food passing out and causing crop bound.

When animal and green food is not available on the range they must be supplied or infertile eggs will result. Pumpkins and potatoes ground in a bone-cutter or root-cutter make cheap, easily prepared green food and are greatly relished by the fowls. For animal food fresh meat and bone in winter and buttermilk in hot weather is better than the dried beef scraps, but the latter is much better than no animal food at all. It certainly pays to be particular about the care of the breeders, as the success of the entire year depends upon the obtaining of strong, vigorous chicks.

## Woman's Success With Poultry

The Charitable Side of Poultry Keeping—Keep Only Such Stock That Can Be Fed and Cared for Properly.

By Anna W. Sawyer

HERE IS A STORY of two Highland farmers which reminds me of the kind of business that many of us are doing with poultry. They met on their way to church one fine winter morning.

"Mon," said Donald, "I was wonderin' what you will be askin' for your bit of sheep over by your steadin'?"

"Mon," replied Dougal, "I was thinkin' I wad be wantin' fifty shullins for that sheep."

"I will take it at that," said Donald; "but och mon, Dougal, I'm awful surprised at you a doin' business on the Sawbath."

"Business!" exclaimed Dougal; "Mon, sellin' a sheep like that for fifty shullins is not business at all—it's just charity."

And very frequently "charity" is the word. When the bird gets where the profit should put in an appearance, many of us have become discouraged and we sell out at less than cost. Season after season I have slaved, hatching and rearing downy chicks until they were about matured, and then as the grain bills increase or the first pullet eggs are delayed longer than I had anticipated, the birds were exchanged for good jingling coin—some less than I had put into them usually, but I theorized that as I was losing, then why wait a month or six weeks longer and perhaps lose more?

Eventually there came a time when the folly of such unbusinesslike methods struck me most forcibly, and I began at the first of the season with the determination to get the full profit from every chick reared, when to market an undesirable bird at the right time was a matter on which I felt the making or losing of a dollar rested, consequently throughout their growing period I was very liberal with the food supply, meanwhile giving all growing chicks every opportunity to develop properly. Really all they need is a chance; nature will do the rest. Sometimes when we see a market fairly glutted with serawny, poorly grown, poorly dressed poultry, we wonder if it really could have developed into real "chicken meat" had it been given a chance. Most of such stuff was never fed enough to make growth possible, and after such a bird has been starved into being a runt there is no use to attempt fattening it.

A most important point in raising poultry is to keep only such stock on hand as can be fed and cared for properly. A neighbor of mine this summer hatched and attempted to raise at least three times as many chickens as she could afford to feed, with the result that fully one-half of them had to be sold as serawny broilers, netting her really less than they had cost her in food and labor. The rest of the flock are poorly developed, there being not a really first-class bird in the flock. She tells me she is wintering a goodly number of pullets, but they have not begun laying yet. There is some-

thing wrong with the system where early hatched pullets do not lay by the first or middle of December. In this case it is lack of food of one kind and another. The old man who stopped feeding his hens in the fall because he knew he would not get any eggs until spring was not disappointed. The poultry keeper who does not want to waste grain on birds that are not laying had better sell the birds before they get too thin to market.

A thing which has lately come forcibly to my attention is the amount of printed advice which is brought to the attention of poultry keepers; and if you will take note of the matter you will find that it is rarely given as personal experience. Sometimes that little word "I" gets rather obnoxious, but in poultry articles I must admit I like it. When a breeder tells just what he has done or is doing, it does not seem so vague and far away as is the case with the writers who can so fluently tell just what ought to be done with poultry but who could not do it. What we need more and more in the poultry press is team work. If you have been successful in raising birds, in getting good egg yields, in reducing labor, in marketing your product, in making your business grow as it ought to grow if you like it, and are putting your best thought into it, men will rise up and call you blessed if you can successfully infuse these ideas into the heads of other poultry keepers. Let one breeder who has found it out publish the fact that Dwarf Essex Rape is the quickest growing and the very best green food that he can grow for his growing chicks through the summer. Let another tell of his success in housing birds in open-front buildings through intense cold, of the good effect such housing has on the egg yield and health of the birds; another may set poultry keepers right on the subject of hatching and brooding by hens, and so on, but let it be personal experience, or at least something that has come under the personal observance of the writer. Suppositions in the matter of poultry keeping may be all right for your personal threshing out, but do not make the mistake of giving out such as reliable information without at first making a few trials, after which it becomes your personal experience, when the little word "I" will not be objectionable.

### AMERICAN POULTRY JOURNAL YEAR BOOK FOR 1913

Your attention is called to page 27 of this issue, which fully explains the scope and magnitude of the forthcoming great "American Poultry Journal Year Book for 1913. This Year Book is rapidly nearing completion and the interest manifested in it by the large poultry breeders insures a large sale for this book. We are receiving letters every day commending us for undertaking such a gigantic task and everybody says it will fill a "long felt want" to the poultry industry of this country. Be sure to read the ad on page 27.

Notary Public.

## OUR GUARANTEE.

We guarantee our subscribers against  
loss due to fraudulent misrepresentation  
in any display advertisement appearing in  
the American Poultry Journal, providing  
the subscriber when ordering the fowls  
or merchandise states that the advertise-  
ment was seen in the American Poultry  
Journal, and places the order during the  
month or months in which the ad is in-  
serted in our columns and notifies us of  
the fraudulent misrepresentation of the  
advertiser, giving full particulars, as soon  
as it occurs.

## Happy New Year

Wish each and every one of our Readers  
a most happy and prosperous New Year  
for 1913.

1912, while we have no reason to com-  
plain, has for many proved a poor year,  
a year of business depression, and one of  
not a few difficulties, especially for poul-  
trymen.

There is good reason to believe that the  
few disappointments which December  
brought were only the dying hurries of  
the poor Old Year. The depression of  
1912 has not been confined to the United  
States. Poultrymen in England and on  
the Continent have reported similar con-  
ditions. Fortunately, the period of de-  
pression appears to have settled into the  
trough of the wave and we are once more  
able to see business looking up and climb-  
ing toward the crest of better times.  
There is always reaction after a period of  
depression in business. The reaction has  
begun.

The New Year, 1913, promises well for  
improvement in business, for better times  
for the fancier and for the market poul-  
tryman. The outlook is good. It remains  
for all of us to do our best to make good  
the promise of better times and to do our  
best to make 1913 a year of Prosperity  
and Success.

Now that we have bid goodby to the  
Old Year, let's face front and look for-  
ward to good times coming. Sunshine  
always follows after rain. Good times  
always come after bad times. Make up  
your mind that you are going to work hard  
to secure your full share of the good things  
that are bound to come your way during

AMERICAN POULTRY JOURNAL is  
the oldest poultry paper in America. It  
has a national and world-wide reputation.  
The best writers on poultry matters con-  
tribute to its columns. It receives the  
patronage and endorsement of the fore-  
most representative breeders of standard  
poultry and manufacturers of poultry ap-  
pliances in the country.

the next 365 days. 1913 owes you every-  
thing that is good, if you work for it.  
See that you collect what is due you.

## The Price of Market Eggs.

Early in November, with the weather  
crisp and every indication of some snap-  
ping cold weather, egg prices climbing  
steadily, and the demand good, we were  
led, with other forecasters, to venture opti-  
mistic predictions on the good times com-  
ing and the outlook for higher prices of  
fancy hennery eggs. We did not predict  
eggs at a dollar a dozen as some did, but  
we really believed that eggs would hold  
up at good prices until Christmas time.  
We were not disappointed on November  
prices, these held firm, and in some sec-  
tions rising until after Thanksgiving.

December, however, proved a disappoint-  
ment. Early in the month there was a  
drop in the price of nearby fresh eggs in  
practically all of the large markets. By  
December 10th the egg market had broken  
badly. Eggs dropped from ten to fifteen  
cents a dozen, in prices of higher grades,  
in some markets. December 14th the same  
quality of eggs which had been selling at  
55 cents a dozen, wholesale, in November,  
were bringing only 40 cents a dozen.

Hennery egg receipts were reported  
heavier with prices decidedly lower and  
small eggs, though fresh, were selling at  
an appreciable discount from these prices.  
The break in prices was attributed to var-  
ious sources: 1. The very mild and  
spring-like weather of the first two weeks  
of December, which is said to have in-  
creased the yield. 2. Heavier receipts of  
fresh eggs in the market, with reports of  
increased yield. 3. Weaker demand owing  
to high prices causing shrinkage in con-  
sumption.

Undoubtedly these three factors had an  
influence on the market. However, noth-  
ing is said about gambling in eggs, that  
never were laid, for future delivery, and  
the influence this may have had on prices;

or of similar procedure with eggs that  
were in storage. Little is said about the  
anxiety to get rid of storage eggs and the  
possible demoralization of the market by  
efforts to dispose of these while the owners  
were becoming panicky over market condi-  
tions. Newspaper talk about high cost  
eggs and the excessively high cost of liv-  
ing, much of which is greatly exag-  
gerated, also had its damaging effect both  
on consumption and on the market price.

Statistics don't show an alarming in-  
crease in the receipts of eggs for Decem-  
ber in our city markets, and it is stated  
that there was no large increase, but it  
took very little to overstock the market.

December weather has not been so very  
different from what it was a year ago.  
We doubt if the actual production of eggs  
in relation to the number of fowls kept  
was so very much different for December,  
1912, from that of December, 1911. We  
are told that severe winter weather will  
help matters and that with the advent of  
cold weather prices will climb again. We  
hope so, but we wonder just how much the  
weather really has to do with it. Eggs are  
not alone in the price drop, quite a few  
other commodities have taken a tumble  
and we can't see how the weather could  
have influenced some of these.

Another factor which has not been with-  
out influence is the so-called "food  
fraud" reform movement under the aus-  
pices of a number of women's leagues  
and in collaboration with some misguided  
"food specialists." Like most reform  
movements the work is conducted along  
spectacular rather than practical helpful  
lines and as often happens the cart is  
placed before the horse; that is, the at-  
tempt at reform is a backward rather than  
a forward movement. We don't question  
that there is need of reform in the  
methods of handling and selling food-  
stuffs; also, that there is need of reform of  
some foodstuffs in order to secure a whole-  
some supply. But, the mistaken idea of  
"breaking the corner in eggs" in Decem-  
ber, when normally fresh eggs should be  
high because of actual scarcity and higher

cost of production, has elements of the spectacular and the absurd in it. It is stated that in several of our large cities the reformers bought up supplies of fresh eggs in surrounding country at close to normal market prices, they secured considerable supplies and then dumped them into the city markets at 24 cents a dozen, about half price, in an attempt "to break the corner" and force the price of eggs down. It is said that in Philadelphia one million dozen eggs were sold at 24 cents per dozen, breaking the market. In Chicago a campaign was started to break egg prices by selling quantities of eggs at 24 cents a dozen. In New York and Boston the same movement was pushed. The statement was published in New York that: "Unless the retail dealers of New York lower the price of eggs and keep it down to a normal figure, the housewives of the five boroughs will go out in the streets with carts and wagons and undersell them."

Reader, think a moment. Eggs, so far, for the winter of 1912-13 have not been so very different in price from past years. There has been more talk about it and more printed about it, however. Think what the quality of the eggs used in this movement must be, if the "reform crusade" is to last more than a few days. It is not going to do any good to buy eggs from the producers at 40 cents a dozen and sell them to consumers at 24 cents a dozen. It can't last long. The actual supply of really new laid eggs isn't going to accommodate itself to the requirements of this crusade. There are going to be a lot of eggs of doubtful character sold if the crusade keeps up. It does not look like "reform" to us; it is more like monumental folly.

Fifty cents a dozen or even 60 cents a dozen is not an exorbitant price for strictly new laid, properly-fed eggs in winter. It costs money to make winter eggs, more than it does to make eggs in the spring. Egg production in the fall and winter season is normally less than in the spring. To enable the egg farmer to get a fair return for his labor the top price has got to go high enough, and be maintained long enough, to bring the average price for the year where it will show a fair profit. If eggs are to drop to 20 cents in spring and summer they ought to go to 50 or 60 cents for the few brief weeks of extreme scarcity in winter.

During 1912 when eggs were at the lowest prices, grain and supplies were unusually high in price. Chicken meat for the whole year did not reach the price that it should have reached in proportion to the other meats and to the actual cost of production. Now grain and supplies are easier and the man who has weathered the period of high cost of production ought to have an opportunity to balance his shrinkage from a hard season and high cost of supplies.

Any reform movement which will react as a hardship on the producer will never do any permanent good. We don't believe that this "reform" crusade is going to amount to more than the proverbial "hill of beans" anyway.

When the reformers really and sincerely want to reform things, they won't adopt present spectacular methods and gallery play. There is room for reform in investigating dishonest commission dealers, traders who gamble with egg and produce prices, and dealers who rob the producer and the consumer alike. Any reform movement that will help to abolish these tricksters will get hearty support from the many honest dealers who sell honest goods

at honest prices and make honest returns to the producers.

There is money in poultry and eggs, good honest fair profits to pay for honest labor, but there is not an extravagant or extraordinary profit, such as have been widely advertised, perhaps to the extent of making some folks believe that it is robbery to charge 60 cents for a dozen eggs. The little flurry and excitement in eggs is going to quiet down and things are going to settle down to normal supply and demand, with a good fair price for good goods.

Unless there should be exceptional and unprecedented production of eggs we need not look for abnormally low prices for the balance of the winter. Snapping cold weather is certain to stiffen prices though it may shorten production for some flocks. In the meantime, while prices still hold at winter figures, let every poultryman who can bestir himself to get a private trade in eggs, contracting to deliver so many dozen weekly at a stated flat price the year around. In spite of market flurries the private trade in eggs has not paid much attention to the fluctuation in prices. We know quite a number of egg farmers who contract their entire output to special private trade at from 35 cents to 45 cents per dozen the year around. Hotels, clubs, spas, drug stores and some families are making contracts of this sort now. Why not get busy, secure your share of the trade and then let the market behave just as cussed as it wants to?

#### Damage to Eggs During Transportation

Farm-Poultry clips an article from the New York Produce Review on "Damage to Eggs in Transit" and comments on same editorially in the December issue. Mr. Robinson suggests that here is an opportunity for inventors to perfect an egg case that should make a fortune for the originator; "that is, if the best solution of the problem is a package that will stand no end of jarring and rough handling," he says.

Mr. Robinson further comments: "It seems to us that such a package will cost more, and that it is at least open to question whether it would not be better for the railroads to adopt methods less destructive to fragile goods than for shippers to undertake to pack such goods to withstand unnecessarily rough handling. There is also a question whether the breakage is not largely due to careless handling and to weak shelled eggs."

We add a hearty "Amen" to that. We have been handling a good many shipments of eggs, covering a considerable period of time in several different localities. During the past season we have shipped a good many eggs from our home plant and in various sorts of packages. We have also commuted to a considerable extent on suburban roads and travelled in combination smokers and baggage cars, where we could see the actual handling of eggs and other goods during transit. Our American railroads don't seem to care much how they handle human freight, much less merchandise, and it is getting so in New England that a man should say a little prayer of thanksgiving every time he travels a few miles by rail and reaches his destination in safety.

To return to express and freight handling, the complaint of destructive handling is an old one and a just one. We have repeatedly seen boxes or cases of fragile goods thrown from the car door to land cornerwise on the rails or platform and many times we have seen rail-

road and express company employees raise boxes above their heads and throw them forcibly down on other packages when less rough handling would have taken less strength and effort. The term "baggage smashers" was certainly earned by the rank and file. When one sees goods in transit carefully handled, it is the exception and not the rule.

Our special fancy eggs for table use of private trade are wrapped in tissue paper like fancy fruit and packed in cartons, but these cartons have to be carefully packed to stand transportation without damage. Wholesale trade does not care for eggs packed in this manner and prefers them in the regular cases as the eggs are liable to handling many times before reaching the consumer.

There are a good many kinds of cases and more kinds of fillers. The brown, lock joint, strawboard fillers are the best we have used. We use some heavy returnable cases, but as a rule they are more or less of a nuisance. For one thing it takes a lot of the returnable cases to do any sort of business. The cases are heavy and rather expensive when service is considered. It is often difficult to get them returned and a good many are lost.

Because a returnable case looks strong and substantial it gets much rougher handling during transportation than the lighter non-returnable case. For this reason a good many eggs are cracked and broken in returnable cases.

For market eggs we like best the inexpensive light weight non-returnable case to hold 30 dozen. There should be sufficient space at top and bottom to permit a 3/4-inch layer of excelsior for additional protection from jar. The case looks flimsy and as if it would easily smash case, contents and all, if roughly handled, —and, by the same token, the express and freight huskies handle it gently for fear of a large and visible messy omelet where they can't avoid getting "caught with the goods." While the trade continues to prefer eggs loose in easily handled fillers, we are not likely to find a much better package than the light weight wooden cases.

We haven't yet found a case that just suits us, but at the present time the light weight western cases bought second hand at stores prove the cheapest and best egg packages we can get, and ones that carry the eggs with the least loss. Hatching eggs go well in the same kind of cases, when sawdust is filled in around them and the outer rows of eggs are omitted and the cells filled with sawdust. For small shipments of hatching eggs, one of the many good special packages are best.

No matter how fine an egg package you have, rough handling during transit will smash the eggs unless the packing is resilient and the egg is firmly held in place. Even then the handlers during transportation will find a way to smash some for you. If every shipper and receiver of eggs would promptly present a bill and claim to cover the loss of damage during transit, the transportation companies would perhaps give more attention to securing reasonably careful handling.

Of course a good many damage claims are now presented, and among the larger shippers and the transportation companies there is almost endless controversy about damage claims. The carriers assert that some 80 per cent of freight charges on eggs are now reclaimed as damage for breakage. At the same time if all damage was paid for, it would considerably exceed the freight charges, in all probability. Conditions in transportation of fragile goods appear to be growing steadily worse

instead of better, and there are undoubtedly a great many small lot shippers who don't make damage claims and have to pocket their losses.

We don't believe that the solution of the damage problem is a more perfect package, the present system of handling would smash a steel case and contents, even if the fillers were resilient and snug fitting. What we need is less rough handling and less carelessness in transportation.

Weak shells may cause some losses, but not where eggs are graded properly before packing. Careless handling by receiving clerks where eggs are repacked breaks and checks many more, but the wholesale damage is done while the railroads have the goods in charge. After seeing mail bags stamped and trampled upon and kicked about in baggage cars we are wondering how many eggs are going to live through a parcels post journey. Let's hope for the best.

### E. B. Thompson a Candidate for President of the American Poultry Association

It has recently come to our attention that after careful consideration and on solicitation of his friends, Mr. E. B. Thompson of Amenia, N. Y., has decided to become a candidate for nomination for president of the American Poultry Association at the coming election. We know of no one more fitted or better qualified to fill this important office than Mr. Thompson. Mr. Thompson has had many years' experience in breeding thoroughbred poultry, has a perfect knowledge of the needs of the poultry business, has had a long experience in mercantile lines, is a man well versed in parliamentary laws, and is well known and universally admired from one end of the country to the other. He has never sought office before, and is not doing so now, but his friends have urged him to become a candidate, and he has finally consented.

Lewis G. Heller, poultry judge, Bridgeton, N. J., announces himself as a candidate for a member of the Executive Board of the American Poultry Association, subject to the approval of the members of the same. Mr. Heller is a well-known judge in the eastern states, and is a man who believes in a square deal for everybody.

### DR. WOOD'S NOTES AND COMMENT.

Happy New Year friends and readers,  
Loud the greeting's sounding true,  
Hear the New Year's welcome ringing,  
Happiness and good times bringing  
To the world, good friends, and you.

1913, we salute you! May you prove a prosperous new year to all of our friends and may all who strive for it win success. We wish all readers of American Poultry Journal long life, happiness and prosperity. When Opportunity knocks at your door we hope you will be on hand and seize her, and that through plenty of push and pluck you will win all the blessings that health and wealth can bring.

This issue begins the forty-fourth volume of American Poultry Journal, the "oldest and best poultry magazine in the world." With the excellent team work of our staff of good workers we hope to make the 1913 Journal still better than our best effort to date. Suggestions from readers have been most valuable and helpful throughout our growth and development; we hope to hold your interest and welcome co-operation through the years to come.

With the preparation of copy for this January, 1913, magazine we close our second year as managing editor of American Poultry Journal. We take this opportunity to express our appreciation of the efficiency, fine team work, good fellowship and friendship of each and every member of the A. P. J. staff of workers from the printer's devil to the editor-in-chief. It seldom falls to the lot of man to work in such good company, where loyalty and whole-hearted co-operation are everywhere and where petty meanness is unknown. We have enjoyed our first two years at the helm of A. P. J. and our "hat is off" to the commander who sets our course; may Editor Bell live long and continue to prosper. It is with great pleasure and satisfaction that we look forward to the work of the new year, 1913.

The new year brings an opportunity that lovers of good poultry should not miss. The great New York Show has dates at the garden December 31, 1912, to January 4, 1913. The great Boston

Show dates are January 7 to 11. Only two days between the close of New York Show and the opening of the Boston Show. Boston is only five hours from New York. The hotel service is good and there are plenty of good things to fill in two days in either city. New York Show has been termed the "business show," and Boston the "fanciers' show." As a matter of fact both are fine, big shows; there will be plenty of business and plenty of good birds at both. Boston is offering special attractions this year and promises to outdo previous efforts. Better plan to see both shows.

"Bathing is the only real exercise a duck can take, for, unlike the hen, she cannot scratch," says Uncle Mike Boyer in the New York Produce Review.

Well, well, WELL! Now we know what it means when it is said that some folks never take any "real exercise." But who would have thought it of the ducks or Uncle Mike? We have always been rather interested in ducks. We've watched them parade single file and in company formation all over the fields by day and by moonlight. In our benighted condition we supposed they were exercising, but now we learn that it wasn't "real." Likewise the muscular contortions in which ducks indulge when eating and conversing, and their delightful diving and swimming stunts, are, we suppose, not the "real" thing. Well, Well, and they "cannot scratch." We wonder if Uncle Mike ever picked up a full grown Muscovy duck by the neck. We know one judge of water fowls who did, and he says they can and do scratch, and that they have very long sharp toenails. Wonder who is "kiddin' us." Ever see a duck fly, Uncle? Quite a lot shot on the wing at Silver Lake this season.

"Bob" Essex, with his characteristic thoroughness, is digging deep for valuable information for the American Poultry Association's Market Poultry and Egg Standard. He is interesting the trade associations in the work and is evidently conducting his investigations in the right direction. With the able assistance of the other members of his committee and the sub-committees we should finally get results that are interesting and worth while. The Market Standard committee has undertaken a work that will call for careful investigation, thoroughness, and good team work with the chairman and associates on the part of everyone connected with the work, and it will be some time before the standard can be completed. In the meantime the work is in good hands and we shall await results with interest. Success to your efforts, gentlemen.

John H. Robinson visited the government poultry farm at Beltsville, Md., about three weeks after we had been there and, in the last issue of his paper, he comments on two matters in which his opinion differs from ours. Good, our friend John seems to be in his normal frame of mind and we need no longer suffer from his lack of attention. It is, however, gratifying to have John admit that this time we got there first. Three weeks is quite a long time, and, fortunately, everybody does not see things from the same point of view. We certainly wouldn't want our friend the "pioneer" to like everything we like just as well as we like it. Happy

## WHITE ORPINGTONS

### An Established Strain with an Established Record

Write for catalogue giving list of winnings at Madison Square Garden, Chicago, Buffalo International, Cleveland, Allentown, Hagerstown and Pittsburgh. We have supplied hundreds of guaranteed winners and have started thousands of people in the chicken business with breeding stock at moderate prices, quality considered. We are now booking orders for winners for the fall and winter shows, in Single Comb as well as the new Rose Comb White Orpingtons, on payment of a small deposit.

### We have improved the White Orpingtons and we can improve your flock

A few bargains left in yearling breeders. "Poultry for Profit" gives the essentials of the poultry business. Price 25 cents. It contains no advertising. Our advertising is free for the asking.

**LAWRENCE JACKSON FARM**  
BOX A, HAYSVILLE, ALLEGHENY CO., PENNA.

New Year, John! Glad we're not forgotten.

\* \* \*

W. T. Pittman, of the Allentown (Pa.) Fair Poultry Show, is reported in the daily papers as predicting, during the second week in December, that eggs would in a few weeks cost \$1 per dozen. This statement inspired "Hank" to the following outburst in the Boston American that is good enough to pass along. Here it is:

"I saw a thousand frantic men go running up the street,  
I saw a justice hurry by, a copper leave his beat;  
I followed in the rushing crowd, the hordes of hustling legs,  
And in a window saw displayed a dozen new-laid eggs.

"I saw a million cheering men along the sidewalk stand;  
I saw them lowly bow before a man with bearing grand;  
A guard of soldiers marched along to keep from him all harm,  
And then I learned the reason why, he owned a chicken farm!"

\* \* \*

We are now inclined to be a bit skeptical about some of the predictions concerning the prices of eggs this winter. In some exceptional cases eggs have reached the top price of 75 cents per dozen at retail to special fancy trade in some localities, but the sales at this figure have not been large. The highest prices we have received this season to date are 55 cents a dozen wholesale, and 60 cents a dozen retail. These prices were held between November 10 and December 5, 1912. Then the price dropped to 52 cents wholesale. Then we received 50 cents per dozen, and on December 10 the wholesale price was 48 cents per dozen. As our pullets are producing remarkably well we can't find fault with conditions. It is quite probable that the very mild early December weather had a good deal to do with this unusually early drop in egg prices. Severe cold weather a little later may boost egg prices again, but we now do not look for them to go much above November's top prices. Had the first promise of cold weather held, instead of shifting to mild almost summerlike weather, the prediction of very high prices by Christmas time might have been realized. A

good, cold holiday season and a cold January would help a lot toward higher prices.

\* \* \*

It is odd how far from the truth newspaper reports of great demand and high prices of eggs often are. In our large cities the demand for nearby eggs is generally very good and the prices fairly steady. In the small towns you can't always rely on the reports even when direct from the market. When eggs were selling at 55 cents by the case, dealers in two nearby towns told us that their trade was fairly begging for strictly new-laid eggs and wouldn't we please send them a case or any part of a case. We were shipping to the city and did not like to hold back any shipments, although we disliked to disappoint nearby dealers. The request was made so urgent that we sent each dealer a case and agreed to supply each a case a week. One case "stalled" the first dealer, and the second took two cases a week until he had ten cases and then stopped ordering because he was "overstocked." The city trade never gets overstocked and always wants more than we can supply, so, although we continue to see in print that there is an egg famine in the nearby town, we don't consider it worth developing as a market.

\* \* \*

Barnum, the great showman, said that "The people like to be humbugged." Certainly they appear to like to be humbugged in the matter of poor foodstuffs, and particularly eggs. Recently a new poultry farm where everything was new and clean, the fowls in fine condition and well fed, attempted to get a house to house trade on selected fresh-laid eggs at the regular market prices. The man in charge of distribution even went so far as to offer sample packages, neatly packed, not to be paid for until used and found satisfactory. It didn't work, and after wasting several long trips with very few sales the eggs were turned into the regular market channels. Now comes the amusing part of the story. About two weeks after, a man on foot called at the farm and wanted to engage 100 dozen eggs a week to supply private trade. He said he peddled the eggs out from his basket as eggs from his own farm. He further stated that he was buying a good many of his eggs

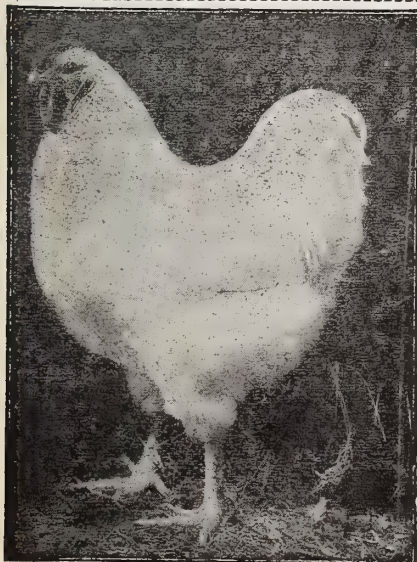

from Mr. B's store, but wanted more than B would let him have. Now the poultryman knew that B had been buying storage eggs and that he had just bought some 50 cases of cold storage eggs at a low price, also that B said he wouldn't buy new-laid eggs as they were too high and he had no market for them. Therefore our friend, the poultryman, declined to sell to the egg peddler, feeling certain that if he did so the eggs would be mixed with the storage goods and then might be reported as from his farm. He was much amused to find that the people would eagerly buy eggs from so doubtful a source, but could not be induced to try his new-laid guaranteed product.

\* \* \*

In a small city store this winter, while eggs were selling at 60 cents, we noted a basket of eggs marked "Strictly Fresh Eggs, 45 Cents a Dozen." Right above the counter, on which the eggs were displayed, was a sign which read, "Cold Storage Goods Sold Here." This last sign was required by state law, but we doubt if many noticed it. The eggs were out of storage and were anything but fresh, yet because the price was "cheap" and the sign said "strictly fresh," the eggs sold readily to customers who would have declined them had they known the real character and quality.

\* \* \*

It is stated on good authority that the prices of provisions forty years ago averaged higher than they do today. Some things are higher in price now than they were then, but many are much lower in price, while other goods are about the same. The same authority says that we are not suffering so much from the high cost of living as we are from the cost of high living. This may be true, but one thing is certain: we are suffering a lot from impure and adulterated foods in spite of the pure food laws. It is fast getting so that we can well question everything we contemplate putting in our stomachs, unless we know where and how it was produced. Positively poisonous adulterants are now used in foods to an alarming extent, and some modern methods of manufacture take all, or nearly all, the life sustaining mineral elements out of foodstuffs. The result is various forms of intestinal irritation, auto-intoxication, faulty cell metabolism.

Crusader III, a Boston Winner

## Regal White Wyandotte Book

This is without doubt the most complete book ever published dealing wholly with the White Wyandotte. It is full of illustrations from life and its pages deal with a variety of subjects, including chapters on origin, description, feeding, care of breeding stock, fertility, color characteristics, raising young chicks, washing and fitting for exhibition, poultry diseases, etc.

My object in issuing this book is to bring to the attention of every White Wyandotte breeder the Regal Strain, America's finest White Wyandottes. The magnificent winnings of the strain have never been equalled. New York State Fair, seven years, 36 blue ribbons out of a possible 42.

Until the present edition is exhausted I will send a free copy of the Regal White Wyandotte book to anyone sending 4c in stamps to pay postage.

2,000 cocks, hens, cockerels and pullets for sale. 300 exhibition cockerels and pullets ready for the show room now. 100 big, vigorous, snow-white cockerels from my heavy laying Dorcas line, \$10, \$15, \$20, \$25. Pullets of same breeding, \$5, \$8 and \$10 each. Utility cockerels, \$3 and \$5 each. Catalogue and mating list free.

John S. Martin, Box 51, Port Dover, Ont., Can.

ism, or obscure ailments which make chronic invalids or business for the undertakers. Isn't it about time to wake up and do something about it? The pure food movement has developed into pretty much of a farce so far as any real protection of the people goes. What we want to know is, Do the people care a "continental cuss" about it, anyway? It looks as if they really liked it. Still, even if the adults find pleasure in being poisoned slowly but surely, it really is a shame to inflict it on helpless children and babies.

\* \* \*

Frank C. Hare, of the Standard and Poultry World, has become much interested in open-front poultry houses. We predict that if he uses the right kind, in the right way, he will be an earnest fresh-air advocate. He writes us that he found that he either had to keep his hens confined in the house or let them out all the time, for if kept in and then let out occasionally they were discontented and tried to get out all the time. He found sprouted oats "worth their weight in gold" as a producer of contentment and when he fed them liberally on sprouted oats the hens forgot all about wanting to get outside. There you have it! We keep food before our fowls all the time; we feed greens liberally; we let them stay in or go out when they please, and only close the hen-door slides at night and during prolonged wet, sloppy weather in winter, and we don't find any discontent. Ours are mostly a very happy bunch and the most talkative bunch of gossips one ever saw. They sing the "craking song" or mating chant from dawn until dark, except when changing the tune to a cackle.

\* \* \*

We note that Harold A. Nourse is now proprietor as well as editor of the Poultry Herald. We congratulate him on the ownership of a very interesting and attractive journal and wish Mr. Nourse prosperity and happiness for the New Year.

\* \* \*

Reese V. Hicks states that he will not run again for the office of president of the A. P. A. The Buffalo Poultry and Pigeon Club has endorsed Robert H. Essex as a candidate for the A. P. A.

presidency. "Bob" would make a good one. Pretty soon the woods will be full of candidates and there will be plenty of talk on the subject at the big shows.

\* \* \*

Clifton W. Whitney now has his name at the masthead of Profitable Poultry, of Boston, as editor, and he has located on a farm in Southboro, Mass. We extend congratulations and best wishes.

We have every reason to believe that Editor Whitney will "make good."

Maryland Agricultural College, College Park, Md., is offering an excellent "short course" in poultry husbandry January 20 to 25. The lecture and demonstration programme promises a great deal of interest and practical value. Particulars can be obtained of W. T. L. Taliaferro, College Park, Md.

## Keeler's White Wyandottes

The Aristocrats of the White Wyandotte World

They combine size, shape, style, head points and, above all, the power of reproduction, having been line and pedigree bred for the last nineteen years. They possess the best blood lines in existence.

### The World's Greatest Strain

Of the world's best breed. This strain has established more successful breeders than any other strain. This strain produces a larger percent of high-class birds than any other. Have produced the winners at America's leading shows for the past nineteen years, i. e., Chicago, Kansas City, Indianapolis, Cleveland, St. Louis World's Fair, New Orleans, Denver, Los Angeles, etc. The strain that you must have to be successful. Better buy them first at last. Start right by starting with KEELER BIRDS. 3,000—COCKS, HENS, COCKERELS AND PULLETS FOR SALE—3,000. In selected breeders at \$25.00, \$35.00, \$50.00, \$100.00 and \$150.00 a pen.

Choice show birds of better quality than ever before. My new 16 by 100 foot two-story conditioning house allows me to always have 100 choice males and 200 classy females in the pink of show condition ready to ship at a moment's notice. Egg pens for 1913 mated Dec. 1st, 1912. 56-page finely illustrated Art Catalogue of America's finest White Wyandottes, the classiest White Wyandotte catalogue ever published, free for the asking. (Stamps appreciated).

Eggs \$5 per 15, \$9 per 30, \$14 per 50, \$25 in hundred lots. Eggs from special matings, \$10, \$15 and \$20 per 15. Mention American Poultry Journal when writing.

1500  
Chicks  
Successfully  
Brooded around one Stove

## BROODER STOVE

### Saves <sup>Nine</sup>/<sub>Tenths</sub> The Work

Just  $\frac{1}{10}$  the work if you use the Simplex Brooder Stove.  
 $\frac{1}{4}$  the operating expense.  $\frac{1}{10}$  the investment.  $\frac{1}{10}$  the worry.

### Nearly Doubles What You Raise

Bring through to maturity hundreds of chicks that you would other-wise bury. Get more money and do less work.

Why break your back when you can save 90% of the work with a Simplex Brooder Stove. You are spending many laborious hours caring for a few hundred chicks in small old-style hovers and brooders. Save that energy. No more daily cleaning of small brooders. No more smothered chicks. No more dirty, smoky, unreliable lamps. No more costly, cumbersome heaters and pipes.

The Simplex Brooder Stove is simple, safe, reliable, inexpensive and best of all it increases your profits by decreasing mortality. It solves the brooding problem. You will have happy, contented, healthy chicks going to roost young and without loss or bother.

Burns cheap, low-grade kerosene in direct contact burner. Temperature automatically held at 90 degrees by wonderful regulator. Illustration shows 1100 chicks sleeping around stove with backs to heat and heads away. They instinctively get just right distance and back up to heat

when cold and move away when weather moderates. You can go to bed early and sleep all night certain that the Simplex and nature are working together to make profit for you. The Simplex is the stove that has proven so successful in California. It is the only one with a direct contact burner and is fully covered by patents.

Write today for illustrated descriptive catalogue giving full information about the Simplex Brooder Stove system of raising strong, healthy chicks with one-tenth the work and one-fourth the expense, and for our money-back guarantee.

Our catalog is free and gives the experiences of users under most severe conditions.

# Don't Throw Money Away!!

You Do Just That When You Allow Fowls to Scatter and Waste Their Food by Day and Allow Rats to Carry Off the Grain in Large Quantities at Night.

Hopper Ready For Use. Holds One-half Bushel. Made of GALVANIZED IRON with Swinging Grid (Mesh).

of other sizes, see page 159 of our Complete Catalogue and Poultryman's Guide for 1913, "Profitable Poultry and Egg Production"—244 large pages, 500 instructive illustrations—mailed Free to any address, or send a postal card request for our 54-page booklet, "Poultry Foods and Feeding," the most valuable condensed treatise on this subject ever published—both books Free for the asking.

THE BOSTON FOOD HOPPER hooks against the wall or can be placed on the floor or ground. The Swinging Grid or metal guard prevents the fowls from wasting the food. The Hopper can readily be "locked" at night (or in the daytime) by simply hooking the grid to the front section at the lower end, thus making the device rat-proof.

Buy a sample Boston Hopper from the dealer of whom you get your poultry supplies or order one from our nearest place of business—see addresses below. Price of half-bushel size, \$1.00. Will last a lifetime. Write today for 54-page FREE booklet. Tells about Dry-Feeding Method. Satisfaction guaranteed or your money back.

## The Boston Hopper — The Rat-Proof Hopper

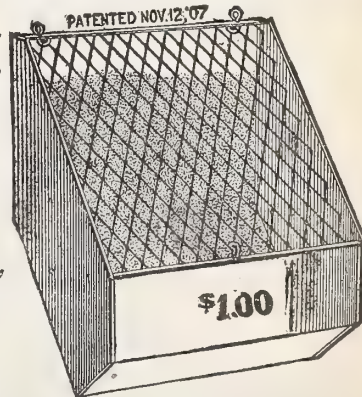

THIS HOPPER is the ingenious, money-saving, *Automatic* food receptacle that has made the *Dry Feeding Method* a country-wide success. This line of Hoppers was placed on the market in the fall of 1907 and has met with a phenomenal sale throughout the United States and Canada. *It is Waste-Proof in daytime and Rat-Proof at night.* The saving in feed will pay for the Hopper in one to four weeks' time, depending on the number of fowls that use it.

BOSTON FOOD HOPPERS are made in four sizes—two sizes for adult fowls and two for chicks. Illustrations herewith show popular size for adult fowls. For pictures

# Let Me Save You \$5 On the Finest Incubator Made

My price speaks for itself. Let me send it to you. Right here I want to tell you a few facts about quality so you will want to read all the facts in my book. Nineteen years ago I made my first incubator. Since then I have improved it every year. Thousands of my machines are making money for owners—they were always years ahead of all others. But this year I have made my masterpiece—my 1913 Triumph.

It's the greatest piece of artificial hatching machinery ever sent out of a factory. It is more simple, more sure, stronger and more dependable than anyone ever thought an incubator could be. You will be glad my incubator is so good. It simplifies chicken hatching—makes it easy to make more money.

After 19 Years Experience  
I Have Perfected My

# TRIUMPH

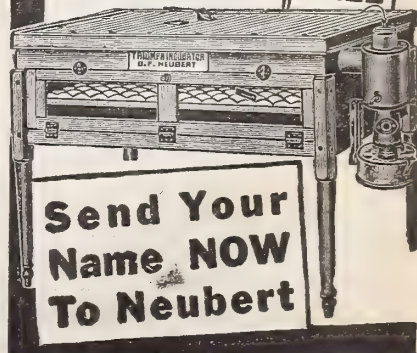

The case is made of Redwood, lined with Bass wood, dead air space between and lined again with genuine asbestos and two layers of special 3-ply building felt. Heating system is a combination of Hot Water and Hot Air—pure copper water tank and galvanized air tube. Double acting self-regulator, self-ventilator, famous sun-hinge burner and lamp, high nursery, strong frame, accurate thermometer. Comes all complete, set up, ready to run and my factory-to-you prices save you at least \$5.00.

#### Write Me Now

Send me your name on a postal for my new book. It tells all the facts—explains every point of advantage about my Triumph. Reading my book is interesting and profitable if you want to make the best money raising chickens.

# BANTA

## Complete Line 50-egg to 800-egg

The Banta Incubator has been on the market 20 years. Always a leader, it is better this season than ever. The incubator that hatches big, healthy, sure-to-grow chicks.

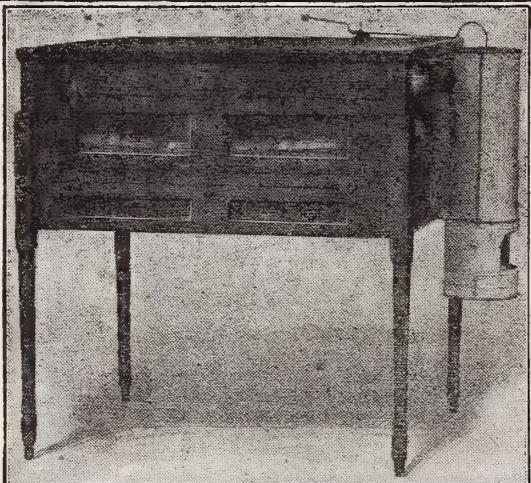

## Send for Catalogue

This book puts you on the right track to judge and buy incubators, Brooders and Poultry Houses. Get it and you will read it from cover to cover with interest.

Banta Incubators are sold by dealers most everywhere. We will tell you the one near you, where you can inspect a Banta at your convenience. Do this, and you will not be misled by low prices and poor quality.

**The Banta  
never disappoints**

**THE BANTA & BENDER CO.  
600 Third St., Ligonier, Ind.**

## Barred Rocks OF THE BETTER QUALITY

Wherever our birds are shown they win. Some of our recent winnings have been the great Allentown show, the Trenton Inter-State Fair and Philadelphia. Our eggs for hatching for the coming season will be of the highest standard and fertility. Our

mating list is now ready. Eggs \$2 to \$5 for our best matings. Orders now being taken.

Some of the choicest high class breeding stock in the Barred Rock line can be obtained from us. Cockerels \$5 up. Pullets \$3 up; perfect in shape, color and bred from show winners.

Write to us for your Barred Rocks and improve your stock.

## WHITE WYANDOTTES

Winners and Breeders. Grand lot of young stock sired by my champion male. I have the quality you are looking for and my birds are free range vigorous farm raised birds. Can supply winners or breeders; prices very reasonable.

Harry Cass, Buffalo Hart, Illinois

## GRIMM'S CONVERTABLE BROODERS

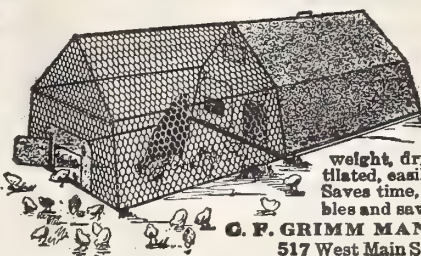

The roomiest steel brooder made. The wood bottoms are chemically treated which makes them immune from lice, mites, and rats will not gnaw them. Vermin proof. Write for our circulars and read what many satisfied users say.

\$1.85 without yard, \$2.50

with yard, Hovers 60 cents.

Heaters \$1.50 complete

(top heat) Makes a safe place for the setting hen.

10 square feet of floor space in brooder and yard. Size of brooder 2 1/2 feet long, 1 1/2 feet wide and 18 inches high. Yard same size. They are built for continuous service, are light weight, dry, strong, large, well ventilated, easily cleaned and kept clean. Saves time, saves money, saves troubles and saves the chicks.

G. F. GRIMM MANUFACTURING CO.  
517 West Main Street Atchison, Kansas

Farm Lands Average Less Than \$17 Per Acre. Undeveloped tracts sell from \$6 up. Beef, pork, dairying, poultry, sheep and horses make big profits. Large returns from alfalfa, corn, truck, cotton, apples, fruits and nuts. Growers command good local and Northern Markets.

The Southern Railway Mobile & Ohio Railroad or Georgia So. & Florida Ry.

territory offers the finest conditions for farms and homes. Plenty of rain, mild winters, enjoyable summers. Promising industrial openings everywhere. The Southern Railway has nothing to sell; we want YOU in the Southeast. The "Southern Field," state booklets and all facts free. M. V. RICHARDS, Land & Industrial Agent, Room 9 Washington, D. C.

# FISHEL'S WHITE WYANDOTTES

Have won the coveted prizes at Atlanta, Buffalo, Cleveland, Cincinnati, Chicago, Indianapolis, St. Louis, Portland, New Orleans, and in fact at all the principal shows of this country. These winnings, in connection with the winnings of our hundreds of satisfied customers throughout this country, are what entitles our strain of fowls to their trade name of

## The World's Best

They are acknowledged and known by their trade name throughout the civilized world. In connection with their exhibition qualities they have utility qualities that have few equals. Our birds are bred for meat and eggs as well as for fancy points. Nowhere can you find the utility and exhibition requirements bred to such high degree of perfection as in our strain of birds.

#### A PLEA FOR THE CAMPINE.

By Dr. J. H. Prudhomme

HAVING attended some of the Fall Fairs, and being a breeder of Campines, my attention was attracted to the Poultry Display. Upon looking over the Campine entries I was much surprised and chagrined to find the Belgian type of birds in the Goldens especially being awarded prizes, when on account of the flowing red feathers in their backs and saddles they should have been disqualified.

I, with another gentleman of prominence in Campine circles, called the attention of the Judge to these birds and remonstrated with him for placing these Belgian type birds within the money. The Judge contended that the Campines were not in the Standard, that the Silvers were judged according to the English Standard, that the Goldens, he was sure, did not come under any standard, consequently he judged them according to the Belgian Standard. Now, all licensed Judges should know that the standard for judging Silvers and Goldens are identically alike, only in the Goldens gold is substituted for silver in the barring.

As there were about 6,500 fowls entered in the above mentioned show one can readily appreciate the impor-

tance of awards, and of the indescribable harm done by placing the stamp of indorsement, 1st prize, upon birds that should have been disqualified.

Think for a moment of the innocent, gullible public who will buy eggs and stock from such 1st prize birds! Probably the owner, not knowing of the true standard, the English Standard, under which the birds should have been judged, and being awarded such prizes on his birds, believing he has true type and correct marked birds, heralds his winnings far and wide to the world. Thus he sows the seed of the wind to harvest in future the whirlwind.

Now, with all that has been written in the poultry press about Campines, it would seem unpardonable that a licensed Judge of the A. P. A. should be so shy on knowledge and should make so glaring a mistake. At another fair where three or four thousand fowls were entered, another Judge doped out the same medicine to the Goldens.

It seems to me any poultryman, much less a Judge, who reads and who has his ear to the ground knows that the Belgian type of Campine is no go here in America now, and never will be. The males with their white backs, and the females with their gray, moss colored feathers, will never appeal to the American fancier; the birds in themselves are too small, and while they lay a goodly number of eggs it must be acknowledged their eggs are too small to be of value, of much profit to the American utility man, or egg farmer.

At this writing, November 15th, fancy, new laid, white market eggs are selling at 72 cents in New York wholesale; the small egg of the Belgian female would not be in the class. New York market calls for 25-ounce eggs to the dozen; eggs from pure Belgian birds average 22 to 23 ounces to the dozen, while eggs from the Improved Campines average from 25 to 27 ounces and above average 30 ounces to the dozen. I have bred both types, I know whereof I speak.

The Improved Campine is a thing of

beauty, a joy forever, and while things appertaining to color, or beauty, or taste, are not to be disputed, no one can deny that the Improved Campine is not beautiful. As to the color and size of their egg, we all know that for two successive years at elite Boston eggs from the Silvers have won first prize for the best dozen white eggs and also first prize for the whitest dozen eggs at the show. At Allentown this year eggs from my Campines won 1st prize in a class of 22 dozen, Anconas, Houdans, Blue Andalusians, R. I. Reds, Langshans, etc., competing. Later at Frederick eggs from my Campines won

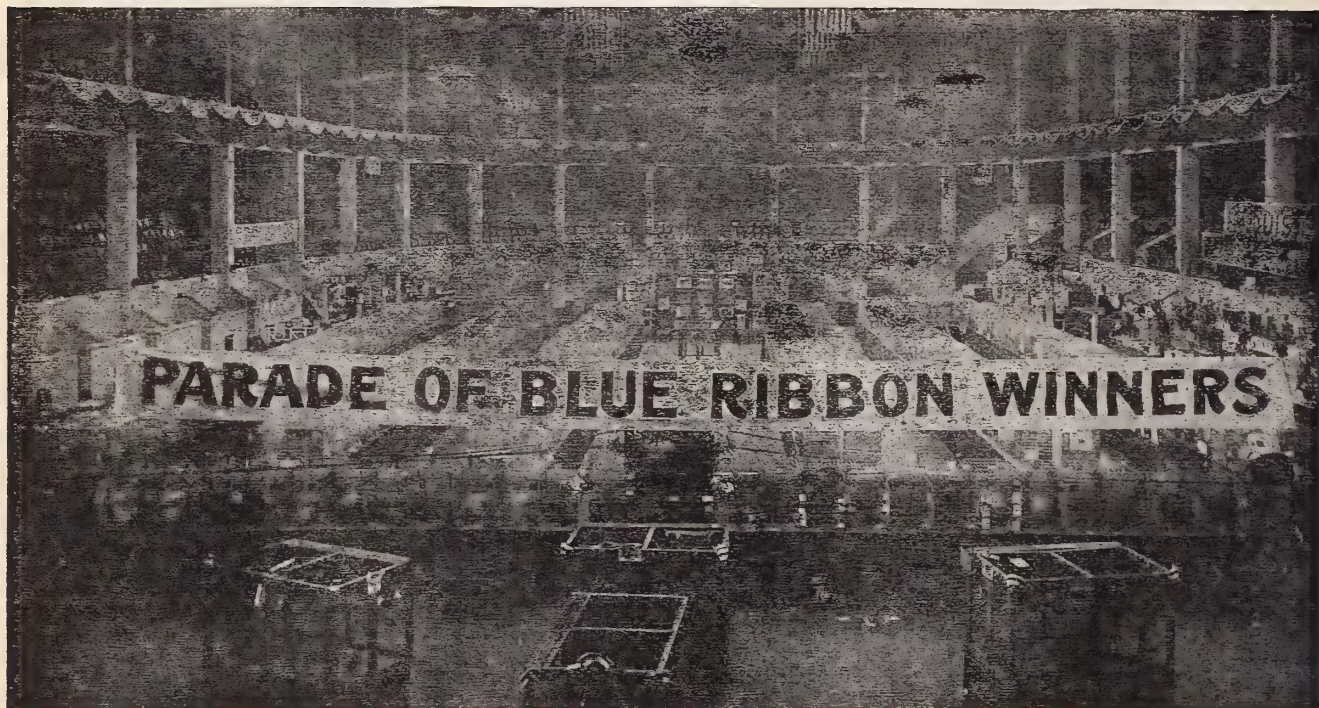

accidentally on purpose unload upon them disqualified birds.

A word of advice will I give to those contemplating buying imported birds. It is this: ask any breeder who knows, it requires several years for Imported Campines to get acclimated in America to do their best. If you read you must know that the birds being imported these days are of low grade. Be careful when you buy abroad for you will find your experience to be a sad, sad teacher.

As to Judges, with apologies, I can do no better than quote from a noted English breeder and say: "The judg-

breed, then there is no occasion to worry—and secure a copy of the year book with the standard for judging the breed, which includes scale of points and serious defects for which birds should be passed. For the Campine Standard address Mr. M. R. Jacobus, Sec'y Campine Club, Box 3, Ridgefield, N. J.

In conclusion, as a member of the Campine Club, as a fancier and breeder and with deep admiration for the genuine Campine, I have one more point to make in my stand upholding the, what I will call, "American Campine"—the breed that will in time be separate and

General view of the late St. Louis, Mo., Poultry Show.

the sweepstake over eggs from all other breeds competing. In the above facts we have it; the proof of the pudding is in the eating, the Improved Campines have proved themselves, they have come to stay.

It is to the fancier and to the breeder of these latter who know the merits of the breed and the standard under which the bird should be judged we should look to protect the breed as well as the public, the people who want to invest their hard earned cash in a breed with a future—the Improved Campines. We must see to it that the public gets what it wants and endeavor to prevent breeders to innocently or

ing on the whole is good. I have great admiration and respect for Judges in the main. . . . Campines do suffer occasionally because Judges don't know our standard, and sometimes because they think they know what Campines should be better than we breeders. I wish there were some power to bring ignorant and self-willed Judges to book."

Now, I can offer the solution; knowledge is the power required and I humbly suggest that when in doubt before judging any new breed not in the Standard, let the Judge write to the Secretary of the Club backing the breed—if there is no club back of the

distinct from the English and Belgian type Campine, that will be better suited to the wants of the American poultryman. Here I want to go on record as opposing membership in the American Campine Club any and all breeders who are known to sell eggs from and breeders from the Belgian type of Campines advertising such and calling such Improved Campines. I have been stung in the past; in future I am going to look out for the novice and the amateur, and in this I am looking forward to the co-operation of the Judges. They hold great power in their hands—the correct judging of Improved Campines.

## STILL INVINCIBLE HEWES FARM BLACK LANGSHANS

Win at the great Chicago show, Dec., 1912, 1st, 2d and 4th cock; 1st and 3d cockerels; 2d and 3d hen; 2d and 3d pullet; 1st pen and silver cup for best display, offered by the National Black Langshan Club of America. Every 1st on males for 5 years at Chicago. Black Langshans stood 2d as the greatest average year layers at the Missouri Egg Laying Contest. Send 10 cents for catalogue.

## SOME ADVANTAGES OF LIMITED RUNS.

By Joseph Shakespeare

**W**HEN egg production is the sole object in view, fowls undoubtedly do better in limited runs than when allowed the use of a free range, and especially does this apply to birds kept for the production of winter eggs. During the winter time it is a well known fact that the man who keeps his pedigree-bred egg-producing stock on the colony system often searches the nests in vain for eggs whilst the man on the city lot with his few nondescripts manages to keep the egg cups occupied. The birds that make such wonderful egg producing records in the laying competitions are confined to limited runs. Wherein lies the secret of the success achieved with laying stock kept under confined conditions? So far the writer has solved the problem thus: The birds are under better control. They can be exercised sufficiently among scratching litter during periods of wet and cold weather to keep up bodily heat and to prevent internal fatness. The food becomes more evenly distributed among the flock, the latter generally being smaller than that kept on free range. The conditions under which the birds are kept render work among them more comfortable for the attendant than in the case when one has to trudge over rough land in stormy weather, and so less negligence in any part of the management is likely to occur.

Fowls kept on limited runs are under control, as they can be fed on properly balanced rations, or rations sufficiently balanced to insure physical stamina and a profitable output of eggs. The birds waste no energy in digesting a lot of unconcentrated foods such as the bird at liberty devours. Fowls running on free range undoubtedly fill their crops with a lot of useless bulk at times when drought toughens the pasture and renders the existence of insect life impossible. During hot weather the attendant, if he studies his fowls' comfort, supplies the birds with fresh, cool water several times during the day, and when frost abounds the vessels are not allowed to become frozen, and the chill is taken off the water before it is served to the fowls. Kept on the colony system the fowls stray far afield, and rather than return to the drinking vessel when thirsty they prefer to imbibe the contents of a rut or puddle hole to the endangerment of their health. In frosty weather, should the water vessels become frozen—a thing likely to often happen—the birds take to picking at the snow, which chills their systems at a time when more warmth is needed. Fowls kept on limited runs are generally on better terms with the attendant than are those kept on free range. A quiet and contented disposition in a fowl plays an important part in the production of a creditable number of eggs. The good layer may be the liveliest bird imaginable when working among litter, but if she has been rightly reared she will allow herself to be handled, and will run to, rather than away from, her owner when called.

Every poultry keeper who knows anything at all about winter egg production is aware that if a fowl is to lay during periods of cold weather bodily warmth must be generated by

plenty of physical exercise. Carbonaceous foods may be fed to create bodily warmth and to supply the oil necessary for the formation of eggs, but such foods will fail to promote warmth and egg production unless they are properly digested by organs rendered strong and healthy with physical exercise. It is a fowl's natural instinct to scratch and so exercise her muscular system. On the limited run provided with a roomy scratching shed the fowls can follow their natural instinct so long as there is anything to scratch for. On free range the birds saunter about picking here and picking there till their crops are full, and then they rest under the hedgerow or in the roosting house till their appetites return again, when they forage at leisure again. During the milder months of the year, and when the range is rich with succulent herbage, seeds and insect life, the birds will lay well, but, unfortunately, their produce will be at a low market value for edible use. When prices for "hen fruit" begin to rise there will be a serious decrease in the output of eggs laid on free range owing to climatic change, dearth of vegetable and insect

foods, and lack of exercise on the part of the fowls.

Fowls belonging to the broody class are less frequently overcome by the sitting fever on limited runs than are those with free range. On limited runs the eggs can be removed from the nests at shorter intervals, and so the accumulation of eggs such as is likely to incite broodiness in the birds is averted. It is not always convenient to systematically collect eggs from the nests of colony houses standing long distances from the homestead, and such eggs accumulate, and remain in the nests, and account for much broodiness among the hens. Then again, fowls on free range, if of the broody kind, are liable to "steal their nests" away from the houses and endeavor to reproduce their kind whether they have been running with males or not, and so many eggs go to the bad.

So much for the advantages to be derived from the keeping of fowls on limited runs where egg production is the main object in view. Has the limited run disadvantages? Well, it all depends upon its size, the number of birds kept on it, and as to whether

**New York City.**

breeding operations are carried on or not. Breeding operations can be successfully carried on where a right number of fowls are confined to a limited run—that is, a run composed of a grass inclosure of such an area as to maintain freshness for an appreciable length of time—and where a roomy scratching-shed is provided for the sheltering and exercising of the birds during periods of inclement weather. To attempt to breed robust fowls generation after generation on an ungrassed city lot is to come to grief sooner or later. The conditions are too congested and too unnatural. By turning down a vigorous male reared on free range it is possible

or even better than many kept on grass ranges. To make the limited run a success the breeding and rearing operations carried on must be limited. I have known men who have bred and reared some of the finest birds that have ever graced the show bench, and they have done the trick in the back yard; but that is no argument in favor of the back yard run for the breeding and rearing of laying stock. We are discussing the limited run from an economic standpoint, and it requires more stamina to produce a single egg than it does to win twenty ribbons. Several back yard poultry keepers that I know aim solely for eggs. They stock

may lay fewer eggs when running on free range, but such eggs will be high in fertility and will account for strong, livable chicks, whilst the growing stock will possess a constitutional vigor unknown to the birds reared on limited runs. When it comes to breeding and rearing the free range scores high over the limited run; but when it comes to the production of edible eggs for profit I am bound to admit that the limited run is preferable, and my conclusions are based on experiment.

#### JUDICIOUS IN-BREEDING FAR FROM INCEST.

Editor American Poultry Journal:

Friend Stoddard does not change. He is the eternal enemy of incest as he ever was. To my mind, however, judicious in-breeding is far from incest. If I can at any time by mating the progeny I have succeeded in raising from a single pair, create specimens containing one-half the blood of each of my original pair, what is the difference in the blood relationship that would come from a strong hen mated to the male of each so far as the effect of cross breeding is concerned? Health, strength and blood mingled in the product does the business and prolific egg laying is the result.

The whole trouble with this question is in the carelessness of the breeder. I believe it possible for a single pair of fowls to produce a thousand offspring and without any loss in health, size or prolific egg production.

Selection is the grand factor that should accompany this usage, two matings to either family from the first or one-half blood stage, with selection the counterpart of the original pair. With the bringing together of specimens of both strains we have identically the results of the chick from the original pair and will be found to be equally as large, strong and prolific.

For sixty years last season, I have bred Brahmas and eight females layed an average of 88½ eggs each from July 1st to June 1st. Do you doubt for a moment that the flock was anything but a robust, healthy lot to do such laying for Brahmas?

Health, Nature, shape, with proper care is the grand secret in success with any breed. So long as the breeder can at any time in his own flock mate to secure groups of one-half blood of each of his original pair or pen, so long he need have no anxiety about the health, strength and prolificacy of his flock.

I. K. Felch.

#### "DON'T BE A CLAM."

You have no idea how busy we are at Darlington. We had to postpone my own funeral—we really did—because I could not spare the time to attend. My daughter spent an hour arguing with me to show how useless it was to have it unless I could be there, so it has been indefinitely postponed and we are still raising S. C. Wh. Leghorns.

Darlington Egg Farm. Alfred P. Edge, Box B, Darlington, Md

to produce strong chickens from hens kept on the city lot during the spring, but the city poultry keeper who can breed profitable chickens from both male and females reared on his own limited run is, in my humble opinion, extremely clever. He may do the trick with a few bantams, but such pigmies are outside the pale of this article. To put the city lot or the back yard run to any other use than for the confinement of laying stock is to put it to a disadvantage. When it comes to getting eggs, I have proved from past experience that the well managed fowls on the small town run can show up as well

up with pullets when the older birds are approaching a strike and showing signs of moulting. They are wise. It is the best and most profitable system to follow. The price realized on the old birds more than half covers the cost of the younger ones, and eggs are insured nearly all the year round. What has brought the limited run into disrepute so often is the fact that too much is attempted in the space at command.

Has the free range any virtue as a run for fowls kept for breeding purposes, and for growing fowls? Yes, it has such virtues as can never be found on the limited run. The breeding stock

## Review of the Origin of the White Wyandotte

By LOUIS A. STAHMER

**W**HAT ART is simply a beautiful way of doing ordinary things, then the originator of White Wyandottes certainly must have been an artist of the highest order.

Where, in the poultry world, can you find a fowl that would appeal more to an artist than a perfectly formed White Wyandotte? When we speak of the shape of the White Wyandotte we have always to refer to their curves and it is curves that make artistic things possible. Not only with feathers is the Wyandotte a handsome bird, but strip off its plumage and you will still find the same lines of grace and beautiful curves on the carcass.

The Wyandotte is, unquestionably, one of the best varieties of poultry ever produced. It is a breed that recommends itself in various ways, pleasure and profit being its two chief recommendations; properties which every breeder is looking for, and which should never be overlooked when choosing a new breed for the farm or poultry yard.

There is no better fowl for the fancier than the White Wyandotte. In weight they come nearer to the ideal fowl than any of their numerous competitors. As winter layers they cannot be excelled. Their combs are never frozen, on account of being so close to the head. As broilers they command the highest market prices, and are bred exclusively on many big farms for this purpose. They breed true to type and name and throw but a very small percentage of culls. At shows they form the largest class, and White Wyandotte alley is always the center of attraction. Big prices are paid for fine specimens, and the demand for high class birds is ever increasing.

Much has been written about the origin of the breed, but that they originally were sports from the Silver Laced variety is generally accepted as true. It has been held that they were in existence as early as 1870, and admitted to the standard in 1888.

The early Silver Wyandotte produced both black and

white sports and, in as much as the whites, are sports from a recognized standard variety, they naturally are a thoroughbred and not a crossbreed. They received the greatest boom during the year just prior to their admission to the standard. During the year 1883 considerable attention was given to them and the honor of bringing them before the public at this time in good form belongs to Mr. B. M. Briggs and Mr. G. W. Toule.

In looking over some old issues of the American Poultry Journal, during the period of 1883-87 quite a few heated discussions are recorded between F. M. Clemans, Jr., and Mr. Enty, which all helped the breed some.

A few years later when the demand for Silver Wyandottes declined on account of unscrupulous breeders sending out stock which possessed but very little value, the whites suffered also, and for a time, they were, so to say, down and out; but, like the old saying, "You cannot keep a good thing down," they came back better than ever, and the once neglected breed became one of the leaders and has held that position up to date.

The plumage of the White Wyandotte should be chalk white, not brassy or pinkish in appearance. While the old breeders had to fight this brassy condition that made its appearance in the males each year, they have been bred for a number of

Living specimens of White Wyandottes that approach very closely the ideal

years absolutely stay white by our present day fanciers.

The name of Wyandotte was suggested by Mr. Fred A. Houdlette and was given in honor of a coasting vessel bearing the name of Wyandotte which belonged to his father.

White Wyandotte baby chicks are sometimes bluish white in appearance and many a new beginner thinks he has been cheated when he takes off the first hatch of a setting of eggs of this variety. These dark colored chicks, however, will mature into birds that have the whitest plumage of any and the beginner should not worry about these off-colored chicks. We know of some breeders who are willing to pay top prices for them.

# White Wyandottes From Shell to Show Room

By J. C. FISHEL

**T**O BREED good strong stock that commands the highest prices in the fancy market it is necessary to start them right and keep them growing from the shell to maturity, not necessarily by forcing as you would for market but by studying natural growth, giving them all the good clean food they will eat and take care to provide sufficient room

While most of our birds are raised by artificial means, we also use hens when we find them broody, and especially late in the season, and we have learned that the rest will do them good. And while on this subject I wish to say that there is nothing that we have yet tried that really does a White Wyandotte pullet more good than to allow her to sit and hatch a brood of chicks. Give her a safe quiet nest, when she becomes broody, say about the middle of May, and when chicks are hatched allow her to take them for about a month. The seven weeks that she is sitting brooding seems to add a finishing touch in every way. She will moult better, will broaden out and become deepened in breast and body—in fact, it seems that nature had intended something of this kind in order to put the finishing touches on the female, and especially the pullets when only one year old. These hens invariably moult early and moult well and are back in the yards in show shape and in laying condition by the time the early shows are on, and the chicks that they have hatched—even as late in the season as this may seem to some—make us our choicest specimens for late winter exhibitions and for breeders the following year. The only objection we can find to this is where carelessness develops on the part of the owner or manager and where birds are not given the care they should have at this time of the year. If we can get Wyandotte chicks, either male or female, fully feathered when frost comes on we will do the rest and will lose a less per cent than those hatched earlier and invariably get our best chicks.

I really believe the hatching season in the Middle and Eastern States is not over until the latter part of July or early part of August, and it is an old saying but a true one among the fanciers that many of the best specimens that have ever graced our American show rooms were hatched late in the middle of summer. As a rule, hatches are not quite so good then; chicks do not start so well and they require a little more time and attention on the part of the owner to keep them free from vermin and keep them growing constantly, but I don't know of anything connected with the poultry business that pays as well on the investment as the

care and attention that is given to these late hatched chicks that round out into our handsomest specimens in late January of the following year.

The question of feed for young stock as well as old is a matter that must be decided by the owner of the plant and depends largely on the location and the price of the feeds from which the best results are obtained. I have tried nearly all the different brands of feeds, some good, others bad and some indifferent, but as a rule good results have come from the use of cereals that are grown on our own farm, such as corn, wheat, oats, buckwheat, millet and vegetables that can be grown in your own garden to be fed during the winter months. These can be fixed in so many ways, either as mash or dry feed, and we do not believe that there is anything that adds strength and muscle at a less expense

Our system of caring for young chicks when hatched from hens or weaned from brooders is to divide them in small flocks not to exceed twenty-five in one place; give them good shelter and plenty of room to spread out on hot nights; see that they have good ventilation, that their coops are kept clean and absolutely free from lice and mites, two of the worst enemies known to poultrymen. Another caution that I would add, see that your chicks are screened in with wire to protect them from "varmints" at night, but at the same time be careful that ventilation is provided and do not close up your coops so that chicks will sweat and in that way contract colds as soon as they come out in the morning.

After you have been successful in the shows then advertise your birds judiciously. Don't take a little half-inch space in the leading papers and think the people are going to fall over you to get your stock. You will get lost just like the penny in the drawer of twenty-dollar gold pieces. If your stock is worth advertising then take liberal space and carry it twelve months in the year. Don't try the system of spending it all in one month, then wasting eleven months of the time before you begin anew, but keep constantly at it, keeping your name before the breeders in bold type, making claim of everything you have honestly won and do in each and every instance all that you agree to do by your patrons, and trade will eventually come to you and at prices in keeping with the quality of your stock. The young breeder must learn as I learned in starting that he cannot expect the prices at first that he will get later. He must establish his reputation, not alone as a showman but as a breeder of show birds. When he has done this then he may expect not only good prices but the top prices on all good stock he is able to dispose of.

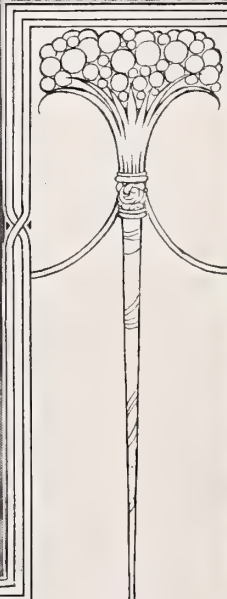

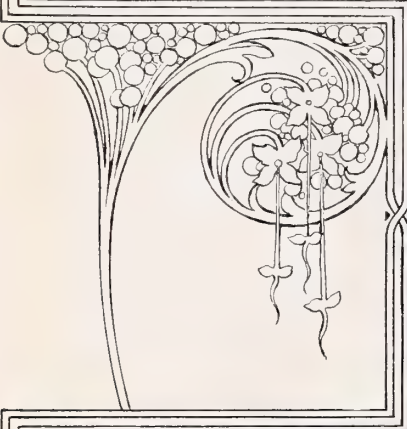

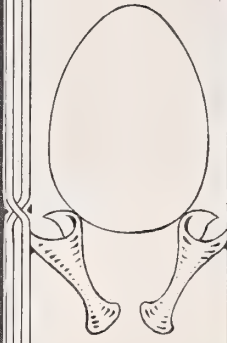

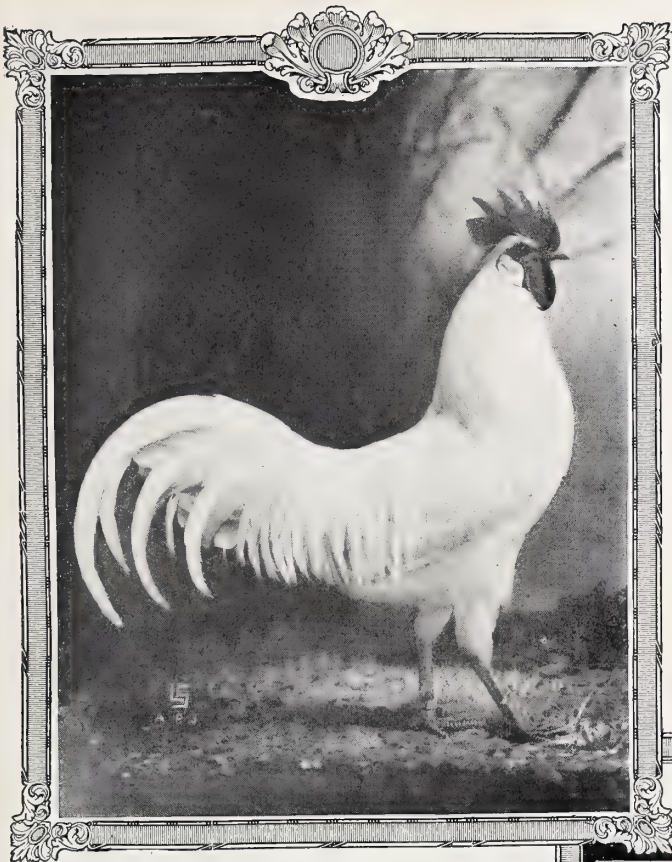

White Wyandottes bred and owned by J. C. Pishel & Son, Box J, Hope, Ind. Color engravings made from photograph. These gentlemen have just issued a very handsome book on this breed. It really is much better than most persons would expect. It contains more up-to-date information on White Wyandottes than any other similar book, and is easily worth 25 cents.

Mentioning White Wyandottes brings the name of J. C. Fishel & Sons, of Hope, Ind., Box J, immediately to our mind. They have been breeding this variety so long and of such fine quality that the firm is known the world over and their Wyandottes have well earned the title of "The World's Best" on the strength of their wonderful record at shows and in egg production. Their catalog is also in the class with "the world's best" and easily worth the 25 cents they ask for it.

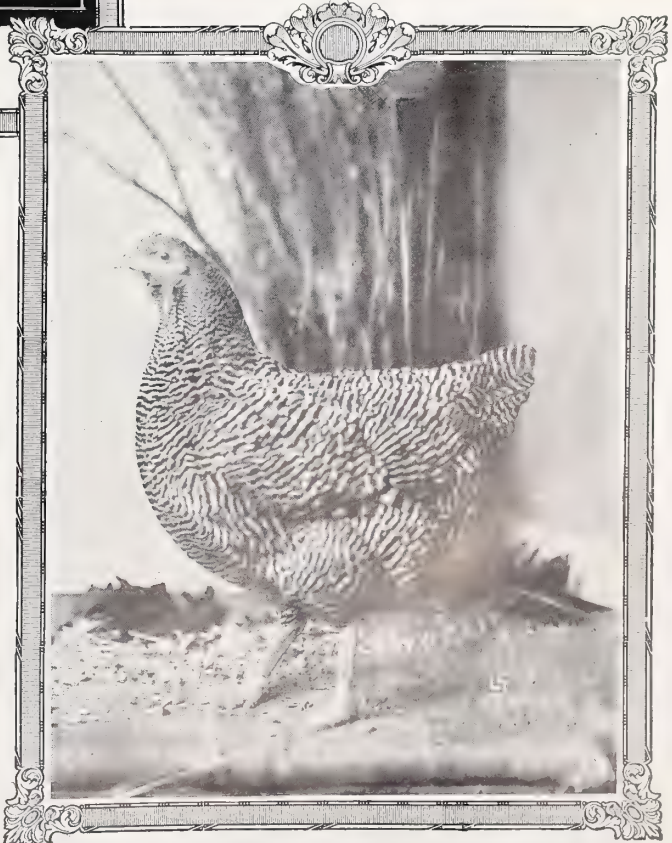

Prize winning S. C. White Leghorn cockerel, Chicago, Dec., 1912. Bred and owned by N. P. Easling, Pekin, Ill.

A "Halbach" White Rock pullet. H. W. Halbach, Waterford, Box A, White Rock specialist, three times in succession winner of grand prize for best display, at Chicago.

First S. C. White Leghorn pullet, Chicago, Dec., 1912. Bred and owned by N. P. Easling, Pekin, Ill.

First prize Barred Pl. Rock pullet at St. Louis, 1912. Bred and owned by W. W. Henderson, Bridgeport, St. Louis Co., Mo.

# White Orpingtons the Fancier's Fowl

By E. S. ALDRICH

HERE never was a perfect bird and there never will be. Hence the interest in breeding. If show winners were easily produced, they would be cheap and plentiful. The fascination in breeding consists in so mating the birds that the less perfect sections are improved in the offspring.

In mating your breeding yards always select with great care the male birds that are to head the yards, as the male is half the pen.

All fowls for breeding purposes should have blood lines that you know are of the best. If you do not own a male good enough for your mating, buy one, for it will be money well spent.

It is false economy to think that you can save money by buying cheap birds and build up good blood lines by yourself. You will, to be sure, save some money at the beginning, but before you have produced birds which will make a creditable showing you will have paid out more money buying stock to cross with your cheap birds than you would have had to pay for good stock in the beginning and then more than likely you will not have any better stock than you had in the start. If you are going in for fancy poultry do not try to save on your first pens, but buy absolutely the best your means will permit. It is much better to buy a bird or birds from a breeder with a good show reputation, that will not get a place in a show, than it is to buy good looking birds from a breeder who does not show. The blood in the better breeder's birds is worth a whole lot more to you in your breeding pens than the accidental good quality of the birds which some other breeder may sell you.

The breeder who wins proves to you that he has good stock and that he knows how to mate it to produce good results.

Buy birds that are line-bred and you will have little trouble securing good results from your matings. If you buy fowls that have been produced by haphazard mating you need not expect much from your matings.

The fancier who understands line breeding thoroughly and practices it in the matings of White Orpingtons will get far better results than the breeder who mates his pens according to their appearance. The old theory of "like begets like" does not hold good in the majority of cases unless the birds come from line-bred stocks and even then the laws of heredity

will assert themselves. Line breeding intelligently followed up works wonders in the improvement of any flock and good points, such as improvement in type and color, can be perpetuated and serious faults or imperfections eliminated. To raise White Orpington chicks properly, they must not be neglected at any stage of their growth, especially during the early stages they must be carefully tended and supplied with suitable food in order to grow into specimens worth while. It is a good plan to vary their rations from time to time in order to keep their appetite up.

Orpington chicks should be hatched as early as possible in the season in order to get size into the birds, as well as Fall and Winter layers. Pullets hatched in March or the beginning of April will begin to lay generally in October and keep it up during the coldest weather. There has never been a new breed or variety of fowls that has made the progress as the White Orpingtons and it is an established fact no new breed has a better foundation in the world in regard to its future. There is no let up in the popularity of the White Orpington and every day new breeders are taking them up. They have gained their popularity entirely on their merits and come up to the requirements of the most exacting demand. Their shape and color is improving from year to year and in the show room they form the largest classes. They can be kept in small quarters. A wire fence four feet high will retain them. They are good sitters and fine mothers. Another thing in their favor is, that when you kill a bird their carcass fills the pan with as fine a quality of nice, juicy meat as you can find anywhere. The breed promises so many fine all around points that, in order to enumerate and go into details of all of them, we would need quite a few more pages than are at our disposal here. Give them a trial this coming season and you will be quickly convinced that everything said here in their favor is absolutely true.

In showing we make it a practice to take a large exhibit, from twenty to fifty birds, and to prepare this number and get them in show condition is no boy's job. It takes several weeks' steady work and your own personal attention during the week of the exhibition. If you do not consider the winning of prizes at any show as worth that much time then keep away from it; if it is worth your time, then do it right. The larger the exhibition the stronger the competition, the more honor to win and the more it is worth to you as a breeder to win.

A BREEDING PEN OF ALDRICH WHITE ORPINGTONS

FIRST PRIZE WHITE ORPINGTON COCK, CHICAGO, DEC., 1912. FIRST PRIZE AND CHAMPION FUTURITY PULLET, ALLENTOWN, SEPT., 1912.

Bred and owned by Aldrich Poultry Farm, 5076 N. High St., Columbus, Ohio. Color engraving from photograph. The above illustration shows the fine type and size of the birds, which was responsible for the many first prizes they have won at the leading shows in this country. At the Chicago show just closed, the Aldrich Farm added: 1, 5, cock; 2, 3, 4, cockerel; 3, 4, hen; 2, 5, pullet; 1, 3, 5, pens, and a number of special prizes to their already long list of winnings.

CONDUCTED BY

RIVIERA, TEXAS

## THE BEST PLACE.

SOME of my fowls have roosted over two years in the open without even the protection of the sun boards shifted from their summer horizontal position and placed on edge to screen the perches from the direct blast of the northerners, a practice I have followed with some other flocks.

One winter the weather was the severest in the knowledge of the oldest inhabitant and one summer the most ancient resident never before saw rain pour down so. My birds that had not the least protection summer or winter kept in splendid health all through, and are the most sprightly and vigorous today of any fowls I ever owned or saw anywhere before in my life outside of Texas, and there is no apparent difference between them and those defended by windbreaks.

Have no misgivings whatever regarding the houseless hennery, for this climate, and predict that poultry could roost out of doors the year round in districts considerably farther north and colder and more rainy than here in

competition with fowls housed in the usual way, and be healthier than the last mentioned.

Now, two years are not four nor ten. One swallow does not make a summer, though one frog may make a spring. If I find in the long run that absence of roofs will not do, I will take it all back like a little man, and then go to work finding whether roof alone, or roof with one side, or two, or three sides, is best for this climate.

Similarly, if the belt in about the center of southwest Texas, and well to the east to get the full benefit of the regular summer seabreeze, isn't the best part of the state for commercial poultry, then I am open to conviction. I remember a conversation between two church goers, heard when a small boy, while standing on the sunny side of an old Puritan meeting house. One said, naming a certain religion, "It is a curse." The other said, "No. Its followers are restrained from evil by it, and a poor religion is better than none." "Wrong," said Captain Latimer, the first speaker, "for its followers don't keep their minds open to conviction." There are no strings on me. Had just as lief experiment in

some other than Nueces county if it is free from mosquitoes, gnats, malaria and other diseases same as here. Several parties have written me from other Texas counties, urging the merits of their respective districts. Let the good work go on. Discussion brings out truth, or should do so. However, without shifting my base of operations, have learned lots about other counties, by travel, printed accounts and conversation, and always to the comparative advantage of this place for poultry.

Texas districts, other than the southwest, now raise great quantities of poultry products and will continue to do so. Fredonia had shipped in 1912, before the year had half gone, thirty-five carloads of eggs gathered from that part of the state. Other points are noted for their great numbers of turkeys annually sent to market, and as a whole, Texas is already a great poultry producer, but only through the ordinary farm yields. The regular commercial poultry plants that are yet to be established, but which are sure to come, and which will be the most numerous and the largest in precisely that part of the state, that is the most advantageous (the natural laws of modern business thus compelling) will cause the statistics of eggs to read, not merely in terms of hundreds of carloads, shipped from a region tributary to one town, but thousands of carloads. There will be and before so very long, too, a Texas "Petaluma." The resources and unique combination of advantages were here by nature and to stay. The outcome cannot be changed by any man or any set of men. Business of any kind concen-

trates at the best places by "manifest destiny."

The variations in natural advantages for commercial poultry raising are as great in this state as its territory is extensive. To find the best place for such business more than a month's or a year's study is needed, so many considerations of soil and climate are involved. Whenever the advantages of rival localities are thoroughly threshed out, and the experience of pioneers in poultry keeping for the food market is published, the bulk of poultry exports will surely be produced in a comparatively very small district. People will come to this district, wherever it is, from every state in the union, for the express purpose of making poultry their sole business, just as the later poultry keepers at Petaluma attracted by its fame, came from many points.

The reasons the new Petaluma district will be comparatively small (though positively large, for there is lots of room), are as follows: The character of the soil is extremely important. From Riviera to the south you soon strike pure sand, utterly execrable for poultry, then further on, an alluvial formation, the silt transported from

the wrecks of mountains long extinct at the head waters of the Rio Grande. It is not as good for the fowl keeper as the diluvial formation of the coastal plain on which Riviera and Talfurias are situated, the soil here being an ocean deposit, not river, and perfectly ideal for poultry. I insist over and over, that the soil as well as the climate is extremely important. It is here neither loam, clay nor sand, but a mixture of clay and an extremely fine sand. The United States government has made a soil survey of the whole Southwest and a map showing the different kinds of soil, and nowhere except in this district is there this wonderfully fine sand, making with its curious mixture of clay, the ideal poultry soil where the birds will keep themselves free from vermin.

Little did I know the wonderful advantages of the ideal poultry soil. To begin with, my Connecticut experience was with the glacial soil, which being translated, means every imaginable sort, in patches. Next I lived on the lake formation or "loess" soil, found in the great trans-Missouri region. A deposit, through long periods of time, of mud at the bottom of an ancient lake. Now, in Texas, I found as above

described, two other formations with which I had no experience as regards poultry. Between the deposits of the glacier, the lake, the ocean and the river, it chanced that in one particular spot of oceanic formation I found the ideal. There are many districts of ancient ocean beds in the United States, but of widely different soils. The Government has found none at any other place with sand of such exquisite fineness as here, and the surveyors sent a jar of it to be kept in the laboratory at Washington, labelled "Nueces fine sand." It is finer than the proverbial "dust of the balance." If it had not by the winds of ages and by the burrowing animals become mixed with clay we couldn't live here. The surveyors named it "Nueces fine sand" on their map because Nueces county is where they found it.

Well, now, what is the good of it? Its fineness keeps the poultry free from lice, makes them healthy and saves their owner lots of work. That's the good of it, and it is much more important than it at first seemed to me. Fowls dust themselves everywhere, but not so thoroughly as here. The fineness is a continual temptation. This sort of

sand is fine enough to enter readily into the very minute breathing pores of lice and kill them in short order. Another advantage is that the birds scratch their yards all over and keep everything neat and sweet, saving their owner the labor of spading.

\* \* \*

Apropos of the plan of having the A. P. A. make moving pictures of poultry raising, and so redeem itself from the stigma in the eyes of many, of doing very little for the poultry food market while doing so much for the

fancy part, I have received two letters from A. P. A. members of long standing, objecting to the expense of such pictures, and claiming also that the original purpose of the association was not to do missionary work in behalf of table fowls.

Well, the "missionary work" will boost fancy fowls equally with food market fowls, and besides I believe that "movies," as mentioned in issue of Journal, November, 1912, page 1536, would prove such a big and impressive advertisement for the A. P. A. that

new members would flock from north, south, east and west and roll in fees enough to replenish the treasury.

It will be a case of the more movies the more members and the more members the more movies, like the instance often cited of buying more land to raise more corn to feed more hogs to get more money to buy more land to raise more corn, and so on. Already the membership is wonderful and away beyond that of any other live stock association in either hemisphere. The old charter members in the old days

Are the Greatest Achievement in Modern Poultry Breeding,  
They are the Product of Over 30 Years of Skill

## EARLY WINNING SHOW BIRDS

I now offer the finest very early hatched exhibition birds that I have ever produced—grand size and shape, fine heads, even clear blue color, and narrow clean-cut vivid barring to the skin. They are matchless and ready to win prizes for you in any competition in the world. The prices are very reasonable.

**My Imperial "Ringlet" Barred Rocks Have Demonstrated  
to All the World a Distinctive Superiority**

**They Stand Without a Rival as the Leading 1st Prize Winners  
at America's Imperial Show, Madison Square Garden, New York**

**A Great Light on the Subject of New York Records**

The "Ringlets," exhibited by me personally, have won at New York a grand total of 25 first prizes—this is almost double the number ever won by any competitor—no other Barred Rock breeder in the world has ever won more than 13 first prizes in the entire history of the New York show—mark the difference—these figures are as remarkable as they are conclusive—they inform the public who have hitherto been confused by conflicting claims.

**They Mean Something—They Sweep Away at One Stroke All  
Doubts and Settle the Question of the World's Leadership**

"Ringlet," First Prize and Sweepstakes Cup Exhibition Pen at Madison Square Garden, New York, 1910-11

prizes on cockerel mated pens which are specials, nor a first prize for each bird in an exhibition pen—a pen is shown collectively and wins but one blue ribbon.

My "Ringlets" have won first prize on exhibition pens at Madison Square Garden 7 times, no competitor has ever won first but four times. I have won both first and second prizes on pens 5 times and no competitor but 3 times.

My "Ringlets" have won at New York ten first prizes on single cockerels and cocks—including first prize and champion cockerel and first cock at the 1910-1911 show—almost as many first prizes on males alone as any other Barred breeder has ever won on anything. I am the only living Barred Rock breeder who has ever won all the regular prizes on pullets at a single New York show, viz: 1st, 2d, 3d, 4th, 5th.

My "Ringlets" have won every Silver Cup and Trophy that has ever been offered at Madison Square Garden to be won three times. In short every trophy on Barred Rocks that has ever been offered to be won three times has been finally won by me and is now my absolute property. Among them are the \$100 Challenge Trophy and the \$100 Association Cups.

**These winnings tell more of the sterling qualities of the Imperial Ringlets than volumes I might write—They tell what the New York Show says.**

The "Ringlet" record for 1910-11 at the Madison Square Garden, New York Show, is the most wonderful ever made by any Barred Rock breeder since the New York Show was founded. (See ad on back cover page for this remarkable record.)

The best is none too good for my customers and if you want to show you will find that judges appreciate the wondrous beauty and sharp "Ringlet" barring of my Barred Rocks. Prices are reasonable and thousands of birds to select from.

**Elegant breeding cockerels, trios and pens of this greatest New York prize blood for sale, and mated to produce winners if desired.**

**Amenia, New York**

never dreamed in the early days of such prodigious growth. But there is still a dozen persons who should join, to one who has already joined.

Mr. Fancier, do not scorn the food market. It is the base of the whole fancy poultry business. A. P. A. should help utility breeders by means of the moving picture proposition.

It is commended to the notice of all fancy breeders that the greater the interest becomes in food market poultry keeping, the greater demand there will be for exhibition-bred or standard-bred stock. Reader did you ever stop to think that people who are not fanciers at all, or who are fanciers to only a very limited degree, and who never exhibit nor who never expect to do so, are the very class who largely pay the bills of the whole enormous fancy poultry business? It is this way: The select spirits tuned way up to the highest pitch of prize winning at Madison Square Garden, or Boston, Chicago or St. Louis, etc., and who sell eggs at \$5 a piece and single birds for \$500, trade with fanciers almost, but not quite, as expert as themselves. The comparatively unskilled, modest little one-horse fanciers will not buy at very high prices. Those who do support the

very elite by paying above figures, sell in turn, at \$1 per egg, mayhap, and \$100 for a choice breeding bird. This class of buyers comprises many more fanciers than are in both the classes above them, and the great number of the transactions offsets the lower prices. Still another class, and, in turn a larger one, buys at still lower rates, and so on, till finally a zone is reached where prices of eggs for hatching are somewhere around \$1 or \$2 per sitting, or just enough to warrant the bother of breeding yards, and packing and shipping, with the expense of a few quite small advertisements added. Breeding stock prices in proportion.

And now we reach the greatest number of transactions of all. No advertising, no packing of eggs for shipping, but neighbors come with their own baskets and carry them away at 50 cents or perhaps 75 cents per sitting. Sometimes the practice is to just double the market price, but there are cases where the owners of large flocks of pure bred birds sell many eggs for hatching at an advance of but a nickle per dozen over current grocery store prices, buyers being not able to appreciate. It is true in some parts of this state.

It needs but a glance at the situation to discover that fanciers as a whole class can reap no ducats by trading with each other. What one puts into pocket came out of the pocket of another, and "t-h-a-r-e-y-e-a-r-r-e." Not intending any invidious comparison, it is just like gambling. In the last analysis the professional gamblers never pay for their board and clothes out of the winnings from fellow experts, but out of winnings from players who try to be experts and pay more or less heavily for the learning, that they are not such. The bumpkins or hayseeds at the very foot of the ladder of skill, combined with trickery, are the ones who finally pay the expenses of all the rest.

To return to the A. P. A., when on top of the opportunity it made for the exhibitors of cattle, sheep, swine and horses to copy our system of judging by a printed standard, thus making all branches of live stock exhibitions more feasible it has given to the breeders of the larger domestic animals the inspiration of a bigger association as regards membership, and customary balance in the treasury, than in case of any other association of breeders of any sort, in the wide, wide world.

A Longfield Winner. Score by McCord, 94½.

## R. C. REDS

### Our Recent Winnings at the Great Chicago Show, Dec. '12

Were 1st hen, 2d young pen, 4th pullet, 5th old pen, 5th cock, shape and color special on female and champion female. In addition to these winnings the 1st cockerel and 1st pullet were bred from females and our 1st Chicago cockerel which we mated and sold Mr. H. A. Robinson.

At the Chicago Show, Dec., 1911, we won 1st cock, 1st chl., 1st pullet and 1st young pen; winning every first we entered for.

In the past two years at this great show we have won more than twice as many firsts as any other Rose Comb Red breeder. Is not this the quality you need to strengthen your flock or wish if just starting the fancy? Eggs in season. Stock, on approval always.

**LONGFIELD POULTRY FARM**  
**BOX 321 : : BLUFFTON, IND.**

It is respectfully suggested that following the example of the Philadelphia North American, the Missouri Station with its enterprising and praiseworthy Mr. Quisenberry at his head; and other trials: A. P. A. might, to great advantage all around, establish and pay for a trial in perpetual session, of laying qualities of breeds, that would hit the nail on the head more squarely than any similar trials have done or are at present preparing to do, so far as practical results are concerned. The crying question is, which is the best breed for laying? Year after year thousands if not indeed millions of people are earnestly asking that question. Time and money of private parties are spent in making separate yards and buildings, procuring birds and trying this and that breed in competition; but generally the conditions are not rigid enough, and even if the experiments are strictly conducted, results prove merely that the experimenters' particular samples from other sources would give very likely other results.

What the public want to know is, the average laying traits of different breeds, not the qualities of a particular squad procured from John Jones or Bill Smith. In other words, the question is, if you and I, and hundreds of others, go to those who have stock to sell, at this place and that, and to very many different places, and stock up with a particular breed, how will we fare in egg gathering on the average, compared with another crowd of hundreds of buyers who buy another particular breed, of hundreds of other parties?

Little it matters what the egg yield is of particular squads of layers selected by their owners for a formal trial, like those lately closed at Storrs and Mountain Grove. The great public are not going to buy of that set of men to any important extent. But it does matter what sort of fowls are in the hands of the general crowd of sellers with whom the general mass of buyers are to deal. Get me?

Now let A. P. A. maintain a station right along year after year in charge of officials absolutely disinterested as regards the comparative merits of breeds, of character above suspicion, with premises under lock and key, and all the recognized precautions. Let them procure healthy birds, lots of them, from the same sources exactly as ordinary buyers do, and completely at random, a bird in a place so as to strike a broad average. Let the ages be the same. Say, one year from date of hatching, so as to be absolutely fair for all breeds. Or baby chicks all hatched the same day.

Whatever the details of the plan, let there be exact equality of conditions. If in one breed a certain percentage of purchases are made from free ranges and the rest from yard let the same proportion obtain in buying other breeds, and so forth and so on. If a certain proportion of purchases are made from advertisers in the papers in case of one breed the same procedure must be used for all other breeds, and even the rank of the party selling must be taken into consideration; that is, is he a high-mucky-muck who wins prizes at big exhibitions, or a beginner of little experience, who both buys and sells at moderate prices.

Such a method would be strictly scientific. It would have universal practical results, for what the ordinary prospective purchaser wants to know is

Newton Cosh, Manager Poultry Department.

the laying quality of the stock he is about to buy, not the quality of unusual birds that are culled by the owner for a formal competitive laying trial, and are either not in the market at all or are held at fabulous prices.

Now to do justice to such experiments as those at Storrs and Mountain Grove, they have a merit of their own. Their value should not be discounted in the least, for it is worth much to know what can be done with exceptional individuals of various breeds. Repeated trials as years roll on will show whether a given breed is improving or growing weedy and petering out as regards the phenomenal layers; while, on the other hand, the repeated trials of A. P. A. will show whether the rank and file are improving or deteriorating.

In addition to the laying feature, the birds selected impartially in every particular as above described could in the A. P. A. trials be weighed and their average weight recorded and in time it could be ascertained whether particular breeds were becoming heavier or lighter under the climate and ordinary treatment of the country. The degree of health, rate of sickness and mortality could be noted. What could be called an authentic history of the progress of our chief utility breeds could be written, embracing all important particulars, not the matter of laying solely. At present there is much guesswork. It is claimed that certain breeds once valuable, have "run out"; this is denied, and who knows? If a tendency either good or bad is proved, it will bear on the question of manufacturing new breeds from time to time.

\* \* \*

The following quotation purports to be a good way of having "eighteen sitting hens" in one room, and its author claims that there will be no argument:

"My experience with sitting hens has been a very successful one, and I sincerely hope this little article

will be of benefit to many readers. First, select a suitable place where wind and rain cannot enter and where there are no rats. Don't try to set hens in the house where you keep your other fowls. No matter if they are shut in, the other fowls will bother them and cause them to become uneasy and break their eggs, with the result of a poor hatch.

"For nests I use cheese boxes, which can be procured from the grocers at 5 cents each, and in some instances for the asking. These boxes being round and low insure the eggs from being broken by the hen jumping down into the nest. In the bottom of the nests I place some slightly moistened earth. Then I fill it as full as I can of fine hay, packing it very firmly and sprinkling a good lice powder thoroughly through the hay. After every hatch I destroy the hay by burning and replace it with a fresh supply to guard against lice and mites. After filling the nest with hay, I place some nest eggs therein. After dark I get the sitting hen, dust her thoroughly with lice powder, place her gently on the nest, cover her with a splint bushel basket and let her sit. Then I put a box of road dust for a dust bath in the room and have plenty of clean fresh water, corn and grit always accessible. On the following evening I uncover her. In the morning she will come off to eat and will return to her nest. I let her sit until she thoroughly makes up her mind to stay, then place from thirteen to seventeen eggs under her, according to the size of the hen.

"I have had as many as eighteen hens setting in the same room with no disturbances, no arguments and no broken eggs."

Much of the above is very good, but

a few amendments are needed. To begin with, if some of the nests are round cheese boxes, others should be square, and painted divers colors, and placed in as great a variety of positions as possible, so as to help each sitter to know her own. But no matter what you do, there will in the long run be "argument," and broken eggs in a room of this kind. The greatest objection, however, and one that should be considered fatal to the plan, is that there is not enough of the right sort of exercise provided.

Unless the sitters have opportunity to run quite a distance, and fly up to a little height, and stretch their wings and skirmish around generally, thus bringing certain muscles into play, a percentage of the birds will suffer from looseness of the bowels, and constipation by turns, and will foul their nests, making the most exasperating nuisance in all hendom.

As the best breeders in the country are more and more following the practice of natural incubation, either entirely, or, anyhow, in case of their choicest stock, the very best way of managing sitting hens is well worth careful study. To "set a hen" has been, during all the ages of humanity since humans began to know enough to keep fowls at all, a pretty simple matter. Yet to set and care for a large number of birds in the very best way possible will make you need to put on your thinking cap. Wish that every reader that discovers a good way would write me describing it. If I was running this 'ere Journal I would print every year, for the benefit of new subscribers, the excellent plan explained on page 1077 with illustrations. Why, oh why, do publishers of poultry papers cherish the idea that a good scheme, novel and important, with an uncommonly fine description and picture, the fruit of time and brains, must never appear twice, when there are so many thousands of new readers constantly coming on to the stage?

TWO

**OPEN AIR**

HOVERS

Nature AND Close-to-Nature

Bird life demands open air—Close-To-Nature Brooders give it. Contact warmth like the old hen—plenty fresh air—no overcrowding. Give chicks these three things and raise every chick in flocks of 100 to 300.

It is natural for chicks to get their warmth by coming in contact with a warm body. Habit and heredity for several thousand years have made this the case. But hot air or furnace is not natural. It dries out, weakens and kills.

Chicks in Close-To-Nature Brooders nestle their backs against a warm body that perfectly stimulates the broody hen.

The Close-To-Nature Brooders have a very long, narrow hover which allows large flocks with no congestion. Such hovers are not possible except with contact heat. For raising chicks in cold weather, the Close-To-Nature Brooders and Hovers excel. Send for free catalogue.

## Ajax Improved Oxygen Vitalizers

### Read --- Sworn Proof

F. J. RUSSELL,  
Breeder of High Class Poultry.  
Summerdale, N. Y., July 12, 1912.  
Reliable Poultry Specialty Co.

Gentlemen: It affords me much pleasure to furnish you with a report of my work with your AJAX IMPROVED OXYGEN VITALIZER for 1912. From my first hatch, I secured a big, strong chick from every egg but two. On the second hatch a chick from every egg but six, and on my third hatch of the season 307 chicks from 307 fertile eggs. I cannot speak too highly of the great worth of this truly wonderful device, and I heartily recommend it to all poultrymen and poultrywomen throughout the world.

With best wishes, I am,  
Very sincerely yours,  
MRS. F. J. RUSSELL.  
Under Seal Sworn to before me this 12th day of July, 1912.  
C. R. CRIPPERLY,  
Notary Public.

## BULLETIN

N. Y. State College of Agriculture

"OXYGEN is essential to normal development, the amount required increasing with the growth of the embryo. The eggs give off carbon dioxide and this increases as the embryo grows."

The Ajax Improved Oxygen Vitalizer delivers just the right amount of oxygen, 99 3/10 per cent. pure, to the egg chamber just when the chicks need it most. **RESULTS! A Big, Strong Chick from Every Egg.**

See Mrs. Russell's Letter Above.

Berwyn, Pa., Nov. 1, 1912.  
Reliable Poultry Specialty Co.  
Alexander, N. Y.

Gentlemen: So that you may fully realize what your AJAX IMPROVED OXYGEN VITALIZER did for me in 1912, I respectfully submit the following:

One Vitalizer costing \$3.50 saved me \$126.80 the very first season.

In my experimental work I fully proved to my entire satisfaction that the AJAX IMPROVED OXYGEN VITALIZER is a positive preventive of chicks dying in the shell and of White Diarrhoea.

You may use this letter as fully as you choose because the Poultry World ought to know the real value of this wonderful scientific device.

I wish you much success for 1913.

Yours very truly,

MARY D. NEWCOMB.

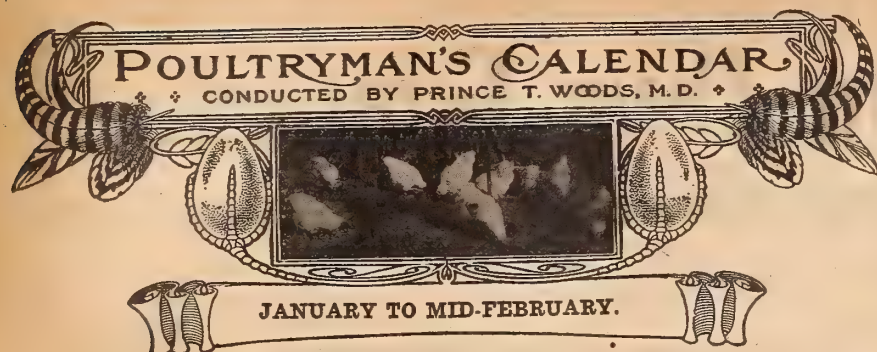

**S**o overwhelming has been the proof which we have received from those who used the Vitalizer last season, that we make and pack with every Vitalizer that leaves our factory, a printed and officially signed "Money Back" guarantee. We guarantee that the Ajax Improved Oxygen Vitalizer will produce a big, strong, vigorous chick from every hatchable egg placed in your incubator. We guarantee that it will prevent chicks dying in the shell and White Diarrhoea; and we furnish you with sworn proof of these facts printed on this page. If you have any doubt as to the strength of our guarantee, write one for yourself. Make it just as strong as you want to. All we ask is that you will carefully follow our instructions, and in all respects give the Vitalizer fair play. It will do the rest. We will cheerfully sign your guarantee, and return it to you with the Vitalizer. **Oxygen is Life.** Without Oxygen in the air that we breathe, we would die. The New York College of Agriculture tells you that Oxygen is essential to the normal development of your chicks. They also tell you that "the eggs give off quantities of Carbon Dioxide." Carbon Dioxide is simply another name for Carbonic Acid Gas. Carbonic Acid Gas, in the quantities that are found in the egg chamber of your incubators, is poisonous. "Dead in the shell" chicks are the direct result of this poisoning. Oxygen, as a powerful germ destroyer, purifies the air, overcomes the effects of the poison, and the chicks hatch, live and are free from White Diarrhoea. The Vitalizer costs \$3.50, complete, ready for use, delivered to you anywhere in the United States. It can be attached to any incubator in two minutes, and is so simple that anyone can operate it. One Vitalizer, bought by Miss Mary Newcomb, saved her \$126.80 the very first season. Her report is printed on this page for your information. If you have any doubts as to the truthfulness of it, write her, but kindly send stamp for reply. The best feature of the whole thing is that you don't have to take any chances in order to see for yourself the truthfulness of every statement that we make. The first thing to do is to send us your order. Do it to-day. Send along your own guarantee if you want to, but please get ready for that first hatch. We publish a valuable booklet on oxygen that we will gladly send you free, upon application.

**Reliable Poultry Specialty Co.**  
Main Street :: Alexander, New York

## \$50.00 in Gold Will be Given Away

To make sure that the VITALIZER is given FAIR PLAY, and to secure the interest of our patrons in the realms of scientific experimental work, we have set aside the sum named above to be divided at the close of the hatching season, among those making the best reports of their season's work, \$25.00 to the first, \$15.00 to the second and \$10.00 to the third. This contest is open to every user of our Vitalizer. No conditions except that all reports shall be received at the office of the Company properly verified, on or before August 1, 1913. Each report to be placed in a separate envelope, and marked "Vitalizer Contest." Reports will be passed upon by a disinterested committee, and awards made on or before Sept. 1st, 1913.

Our best wishes for a Happy and Prosperous New Year. \* \* \*

Have you tested any eggs yet for fertility? Don't sell eggs for hatching until you know that they will hatch all right at home. \* \* \*

If you have not already mated up the breeders, now is a good time. Be sure to give health, vigor and vitality first call when making your choice of breeding birds. \* \* \*

When you buy eggs for hatching bear in mind that no one can positively guarantee what the eggs will produce. The breeder mates his pens the best he knows how, he should not sell eggs for hatching until he knows that they are running well in fertility. You buy the breeder's chances in those eggs. Presumably he has mated for best results to the best of his knowledge and ability. He sets a price on the eggs at which he is willing to let you hatch his chances in them. Don't ask or expect too much. From a single sitting you may get a bird that is better than any the breeder hatches at home, that is

the time the chance you buy in the eggs wins for you. \* \* \*

Every egg from the same mating won't produce a wonder or a winner. Some of the eggs from a good mating are bound to produce exceptionally fine specimens. No one can tell which eggs until the chicks are hatched and grown. When you buy eggs from an honest breeder your chances are as good for getting big value from the eggs you receive as are his from eggs he sets at home from the same matings. \* \* \*

Every sitting of fifteen eggs will not yield fifteen or even a dozen chicks. Some may give high per cent hatches, but in tests covering hen hatching for a period of three years the average was six chicks per thirteen eggs set. \* \* \*

Be reasonable when you try to hatch eggs from home or abroad. Don't blame the eggs for your own foolhardiness. Often the eggs are not at all at fault. The hen may be a poor sitter. She may not be properly handled and fed. There are a good many things

besides the eggs that enter into the causes of poor hatches. \* \* \*

When saving eggs for hatching, gather them often to avoid undue chilling in the nests. Do not keep eggs for hatching in a warm room. Keep hatching eggs in a room where the temperature does not go above 60 deg. F. and not below 40 deg. F. if you want good results. Don't keep them too long, the fresher they are when set the better. Under ordinarily favorable conditions you can keep eggs three weeks and still get a good hatch. \* \* \*

Someone back in the dark ages decided that eggs while being saved for hatching ought to be turned daily. Since that time the advice has been copied many times, both plain and with trimmings. As a matter of fact eggs that are being saved for hatching are better let alone. Don't turn them at all. The more an egg is handled the less it is likely to yield good results. Simply place your hatching eggs in a box or basket in a cool, clean-aided room and let them alone until ready to set them. After incubation is well started, say, 36 to 48 hours after placing them in the incubator, the eggs will need turning twice a day. Rolling them around is perhaps a better term than turning, for that is what should be done. After the first week or ten days the rolling around may be done oftener than twice in twenty-four hours with good results. If the eggs are under a hen you won't have to worry about it, for she will do all the egg rolling necessary. \* \* \*

During the extreme cold weather good sound Indian corn will prove the best relished staple grain. Get good corn and feed all they want of it. It is a

We want every one who reads this ad to write for our new book, "The Fireless Brooding of Chicks," which will show you how to RAISE 90 PER CENT OF THE CHICKS without the danger of fire, of overheating, sweating or smothering. It gives our years of experiments, with all kinds of brooders, showing how we have made and maintained the above record. Worth many dollars to you. No smoke, do smell, no fire, no bother, no expense. Guaranteed to raise the chicks. Sent free. Write for your copy today.

Harvey Bros., 259 Cooper Ave., Johnstown, Pa.

## ONLYA FARM WHITE WYANDOTTES

NORTH, SOUTH, EAST AND WEST WE WIN

Following our great victories at Allentown and Hagerstown, we followed it up at Augusta, Ga., by one of the grandest wins that has been made in competition with the greatest breeders in the land.

ONLYA FARM WHITE WYANDOTTES proved their superiority by winning 2-3 cock, 2-3 hen, 2-5 cockerel, 1-3-5 pullet, 1-4 pen and best display.

Considering the fact that our great wins at Allentown and Hagerstown during the season 1912 in connection with our great wins at the big winter shows last season, makes ONLYA FARM A LEADER AMONG WHITE WYANDOTTE BREEDERS.

### OUR SEAMLESS LEG BANDS

Tell the story. When a bird reaches about a pound in weight a seamless leg band is put on; it cannot be removed; there it remains as the seal of Onlya Farm quality, and every young bird on our farm contains the band.

### WE CAN MEET ANY COMPETITION

Our 1912 matings containing America's noted winners produced the best birds we ever raised, and they are well developed. The price is reasonable and positively every bird sold has been reared on the Onlya Farm, where nothing but White Wyandottes are bred.

### WRITE US WHAT YOU NEED

Onlya Farm, Philip Kearney, Owner, Chas. C. Staaff, Mgr., Florham Park, N.J.

good food for flesh, eggs and sound bodies. Corn-fed poultry is usually mighty good poultry.

\* \* \*

Don't believe all the nonsense you hear about cold water drinking, snow eating and getting the feet wet causing a check in egg production. For centuries a lot of folks have been so afraid of getting feet wet that they have been afraid to keep their own sufficiently well washed. Wet feet won't stop a hen from laying if she has a comfortable home and is well cared for. Ours run in winter when they want to unless there is a long spell of wet and sloop and then we keep them shut in, not to prevent foot wetting, but to keep dirty, wet feet from soiling the eggs. We have never known cold water drinking or snow eating to check egg production. Fowls in open-front houses don't let weather conditions bother them much. Most of their troubles never happen. Usually ours put in a record-busting egg yield when we get sudden changes to colder weather. That is the opposite to what we often read about the effect of sudden cold snaps, but nevertheless it is fact.

\* \* \*

Don't forget that it is important to breed only healthy fowls, that they should have an abundance and variety of wholesome food, that they should be housed in well-planned open-front houses, that they require comparatively little care if that care is only of the commonsense kind. If you remember these things you can forget most of the "poultry troubles," for you won't have 'em.

\* \* \*

Hatches for early chicks should be started soon. February and early March chicks are usually money makers. The cockerels are good, plump roasters by the time chickens are selling at 24 to 28 cents a pound. The pullets, if properly cared for, will make fine fall and winter layers when eggs are at top prices.

\* \* \*

Get in close touch with your breeding birds and learn what they are doing for you. Save labor everywhere you can, but don't let labor saving lead you into the habit of spending as little time as possible with the fowls. A little time given to getting acquainted with the breeding fowl is often time well spent. Cull out any birds that don't keep right up to the standard of health and vigor. Inattentive males, or males that have been badly whipped, are usually better off in the pot than in the breeding pen. If you get the habit of observing your fowls you can

usually tell the drones from the producers without the aid of a trap nest. Market habitual non-producers while the price is good.

\* \* \*

There is a whole lot in the Potter system of selecting laying and non-laying hens if you know how to observe what you see and feel. Some folks see without really seeing, that sort won't find any system much help. The relation of the pelvic bones is not the whole thing, the head points are not the whole

thing, the body points are not the whole thing, the habits don't count much alone; but if you will read the book, get the gist of the various points, group them so that you can combine two or more in one fowl, if you have even average powers of observation you ought to be able to pick nine layers out of ten. "Don't kill the laying hen" is a good rule, but it is better to kill one laying hen than to keep a dozen non-producers. If you haven't read the book, read it.

## More Eggs - Bigger Profits

**Y**OU can have both by feeding Darling's Meat Scraps to your hens. Every ounce of Darling's Meat Scraps is absolutely fresh. Trimmings from roasts and steaks sold over the butchers' counter are picked up by our wagons the same day and cooked that night. In short, Darling's Meat Scraps are made from the fresh trimmings from the edible portion of the carcass. This gives uniform quality and sweetness. Besides—

### Darling's High Protein Meat Scraps

**Contain 55% Protein**

They are low in fat, and fine ground as recommended by both the Experiment Stations and practical poultry raisers.

Darling's Meat Scraps cost no more than goods of lower protein content. Insist upon Darling's 55% Protein Meat Scraps at your dealers.

**Every Poultry Man should send for a free copy of our book on poultry feeding.**

This book is replete with timely, helpful and specific suggestions and hints on the care and feeding of poultry that you should know and profit by. It tells how to increase egg production and egg profits. Whether you own 25, 50 or 500 fowls, you will be tremendously benefited by reading and studying this book. Write for your free copy today. # QUESTIONS AND ANSWERS

Questions will be answered in this department only when full name and address is signed by the writer.

Conducted by

Prince T. Woods, M. D.

## Not Worth Doctoring.

Q. I have a yearling White Wyandotte cock, purchased this year. He has been out of condition and under my observation for about a month, with no material change. He has a slight yellow discharge from the ears. Eyes are bright, one a little watery. He is very thin. He has a great appetite, and at first was very hungry for grit. Though fed well, he does not gain. He is stiff in legs. Toe nails are grown out much too long. Plumage dull and rough. Feathers are rather yellow, though quills are white. Just above each knee joint are sores which discharge a little. He crows loudly and often, shows no sign of throat or lung trouble. Comb and wattles bright and red. No bowel trouble. Is alert and active, but seems rather weak. He is tame and gentle and does not drive the cockerels with which he is yarded as I would like to see him do. Think he spent the summer in a philo coop and then was put into a basement. He is a late hatched chick and has not completed molt yet. If he was not sick he would be an unusually good bird I think. Is it tuberculosis? I have used oculus twice, but see no change in him. How long does a bird usually live with tuberculosis? F. D. Skowhegan, Me.

A. To diagnose this case would require examination of the specimen and laboratory work. If you are sufficiently interested you might arrange for this at your state experiment station, Orono, Me. We cannot say whether trouble is tubercular or not. There are abundant symptoms in this case which indicate chronic constitutional disease. He is not worth doctoring. If the bird were ours we should kill it and burn the carcass. A bird with chronic tuberculosis might live a long time or until it died of some other ailment. The ulcers in front of hock joint are not necessarily tubercular. Trouble of this sort is not uncommon in cocks that have been too closely confined. It usually yields to cleansing and greasing with unguentine if bird is otherwise healthy. The discharge from ear might be due to a variety of causes and of itself might not be serious, syringing with a warm, weak creolin solution is usually beneficial. This case, however, shows con-

stitutional symptoms that indicate serious trouble and malnutrition, viz.: very thin and does not gain after long-continued heavy feeding, though appetite is good, dull and rough plumage, overgrown toe nails, too abnormally tame and gentle for a cock bird. Take these symptoms, combined with your running sores, and you have a condition that indicates that the bird is worthless for any practical purpose.

## Peculiar Symptoms.

Q. I have a cock bird with a very peculiar ailment and have looked all through back numbers of A. P. J., but do not find anything which helps toward the diagnosis of this trouble. The first I noticed was about a week ago. The bird would stand and hold his head sideways, as if to look up out of one eye, then he gradually grew worse and would hold his head way back under his breast. I took him to a veterinary, who kept him for a few days, but was unable to tell what the trouble was. The bird sometimes does all kinds of acrobatic stunts and will turn completely over when having one of these spells. I would not call them fits; in fact, the bird does not seem to suffer any and his comb and wattles do not change color. When I brought the bird home last night he was about the same, and there seemed no change of symptoms. He crowed this morning and would call the chickens when he heard them in an adjoining pen, but the same condition prevailed as before. He seems worse when excited and when you pick him up his head will go under his breast, although at times he seems normal. There are some symptoms similar to limberneck, but that is not what ails him. Previous to this trouble he was running with hens and pullets and had the same kind of food as the rest and none of the others were afflicted. Some time ago we noticed that he would raise his head, when in the yard, and shake it as if to shake off water, and would walk backward a few steps. This I have been told might indicate a surplus of blood or liver trouble. The bird is a Rose Comb Rhode Island Red and was a last year's cockerel. I purchased the pen late in May, 1912, and used them to breed from. All the chicks have been strong and healthy,

although the fertility was not high, but was as good or better than my other birds, so, that as a breeder he has been a good one. Can you give me any information? The case is unlike anything I have ever seen and the veterinary, who has handled chickens more or less all his life, is puzzled. S. J. H. Utica, N. Y.

A. We could not diagnose this case without personal examination of the bird and perhaps not then. The cause of the irritation of the large nerve centers is the difficult thing to get at. We should try giving the bird a 1/4-teaspoonful dose of epsom salts well diluted with water and possibly repeat it the following day. Would feed lightly and give only easily digested soft food for several days. If this does not help, would suggest the treatment we once used on a Red Cap that was similarly affected. This bird was taken with similar symptoms about Christmas time just after returning from a show. He was an imported bird and the breeder was particularly anxious to breed him if possible to do so. We tried various remedies without any apparent benefit. Then we asked permission to dub the bird after the fashion of Game fowls. He had a very large rose comb. The breeder told us to go ahead and we cut off both comb and wattles with sharp shears. Did not do anything to stop the flow of blood, which was considerable. Kept the bird by himself for two weeks, gradually giving more exercise room and feeding lightly. He was rather weak for a time, but the wounds healed nicely, the bird apparently recovered and was bred that spring with fair results. After that we lost sight of him. It might help in case of your bird and it might not.

## Maggots in and About Vent.

Q. Had a White Wyandotte cock, robust, vigorous, active fellow. Never knew him to be sick or have any ailment of any kind. One morning recently noticed that his fluff was slightly soiled, paid no further attention to it, as he seemed bright enough. Next morning noticed that the trouble was worse, not only fluff but legs also were soiled and bird was walking as if it was painful for him to move. Could not attend to him at once, but a little later I prepared a warm bath, intending to clean him and put him in warm quarters to dry, believing that he had some bowel trouble. The fluff being badly matted by this time, I immersed his stern to soak the feathers, moving him from side to side. Looking down I saw what, at first glance, appeared to be a worm, about 1/2-inch long, float-

## DIRK'S RED MITE KILLER

One application kills all mites and prevents their reappearance during the season. Keeps fowls free from body lice. Makes scaly legs bright and clean. Keeps lard, pastry, and sweets free from ants. Bed bugs give no trouble where used. Write to day for special trial price.

M. E. Dirk, Box 102, North Baltimore, Ohio. Marshall & Marshall, Niagara Falls, Ont., Distributors for Can.

## "OCULUM"

Is a "wonder working" poultry remedy. It cures Cholera, Roup, White Diarrhoea and Canker in its worst form; increases egg yield 20 per cent; grows the finest chickens you ever saw; lessens your poultry troubles 50 per cent. So confident are we of the merits of OCULUM that we believe any honest poultry raiser will pay us when he "knows it does the work." At your dealers, or if you prefer, cut out this ad today and mail to us and we will trust you to do right by us.

Hancock Inoculum Company, Box B, Salem, Virginia. Write your name plain. Please send me a \$1.00, 50c bottle of OCULUM. I will test it fifteen days; if satisfied, will pay you; if not, will return what I have not used.

Name..... Address.....

**Question:**  
**Answer:**

## HOW TO GET TOP PRICES FOR EGGS

Don't sell your eggs as fast as they are laid. A new way has been discovered to keep eggs positively fresh for years. Preserve your eggs—then hold them till market supply is low and prices are high. Use Sibil Egg Preservative Compound. Write at once for handsomely illustrated circular explaining how to keep eggs fresh and sweet for any length of time, sent FREE. Every poultry owner should have a copy 75c a pint, \$1.50 a quart or \$5 a gallon. Just address SIBIL EGG COMPOUND CO., 167 W. WASHINGTON ST., CHICAGO, ILL.

ing on the water. Turning the bird over I saw something I never again wish to see, where the vent should have been was a hole at least two inches in diameter and big white maggots, busy as bees in a hive, away up into the intestines. The only remedy I could think of was the hatchet and I deemed that the most merciful cure, though I did hate to lose the bird. What caused the maggots? Doesn't it seem odd that he did not show signs of his trouble sooner? If I had noticed him droopy I should have put him in the "hospital" and found the trouble makers before it had gone so far. Will be grateful for any information.

Lowell, O.

O. W. B.

A. There are a number of varieties of flies that at times deposit their eggs in wounds of animals and fowl. There are other flies which give birth to live maggots and deposit these directly in any favorable spot where the maggots can feed. Undoubtedly one of these pests attacked your cock bird when a favorable opportunity offered. You did the only thing that could be done under the circumstances.

#### White Diarrhoea or Faulty Brooding—Which?

Q. Please give your opinion concerning trouble I had with a flock of S. C. White Leghorn chicks last spring. The symptoms agreed very closely with those given recently of bacillary white diarrhoea, and while the eggs were not from infected stock, there were incubated, in the same trays with the others, eggs which may have been infected. The two lots remained together until taken from the incubator and were easily distinguished by difference in color. There were some serious faults in the brooding. The 200 chicks were in one flock in a large brooder, without any regulating arrangements, and on several cold nights the temperature went much too low. The mortality corresponded fairly well with the daily errors in temperature. The temperatures given below are as found on the several mornings and the number of deaths includes all found in the morning as well as those which occurred through the day:

5th day, 92 degrees..... 1 dead  
6th day, 78 degrees.....21 dead  
7th day, 70 degrees.....41 dead  
8th day, 88 degrees.....19 dead  
9th day, 85 degrees.....18 dead

10th-day, 85 degrees..... 9 dead  
11th day, 78 degrees.....13 dead  
12th day, no record..... 9 dead

After the 12th day the daily losses were small and it happened also that the brooder worked better. In every other respect, except temperature and size of flock, the chicks were cared for the same as the other flock, which did well. Was the faulty brooding of itself sufficient to cause the losses? Could chicks become infected from each other in the incubator? Would it be safe to use any of the surviving males as breeders? Are 200 chicks too large a flock, however large and well-regulated a brooder may be?

Utica, Mich.

H. G. L.

A. We doubt very much if bacillary white diarrhoea had anything to do with this case. It is possible for chicks to become infected in the incubator from diseased chicks, and it is probable that if this had been white diarrhoea both flocks would have been affected. The faulty brooding and large number of chicks in the flock is sufficient to account for all losses in this case. We don't know what type of brooder was used, but, as a rule, no individual brooding device, that is rated at 200 chicks capacity, is capable of caring for flocks of more than 50 to 60 chicks at one time. The exceptions to the rule are specially constructed gasoline brood coops, some compartments in brooder houses and some types of special large flock brooder stoves. If the males, which survived, are well grown, full-sized, rugged, healthy specimens, we should not be afraid to breed them. They probably had a tough streak in them or they would not have come through the experience safely. Don't breed any runts.

#### Colds.

Q. We have a number of young birds afflicted with a cold in the head. A mattery substance is discharged from the nostrils. What will cure this disease?

F. L.

Fort Wayne, Ind.

A. House the birds in open-front quarters, not too many in a flock. Dip heads of affected birds with mouths held open in a fleshly made cresol disinfectant dip. Use one teaspoonful of any good cresol disinfectant (cresol soap, liquor cresolis comp.) in a quart of water. Mix fresh each time used. Do not dip more than a dozen birds

## JOE-PYE Orpingtons

Nell Gwyn, Second Boston Hen, 1912  
First, Grand Central Palace

Great Win  
Grand Central Palace, N. Y.  
Dec. 3-7, 1912

THERE were 73 Buffs in single classes, and 10 pens shown by the biggest and best known breeders in the east.

Out of 14 birds we entered, 10 were placed

Cock, 1st, 2d and 4th; hen, 1st and shape special; cockerel, 3d; pen, 1st; which also took sweepstakes medal for best pen, all varieties competing; sweepstakes cock, all varieties; gold medal for best Buff Orpington; special for best display with 456 points, as against 272 points winning record; special for best male in English class.

We are receiving daily letters telling of customers' wins, both here and in Canada.

JOE-PYE ORPINGTON FARM  
HARRY STACEY BENTON, Owner  
R. F. D. 5, SO. NORWALK, CONN.

## R.C.R.I. Reds

From our Bean line. We are offering some choice exhibition pullets, extremely dark and brilliant in color having rich red under color, also strong in black points. We are also strong on exhibition cocks and cockerels. We can sell you a fine one at a very reasonable price. Remember we always sell on approval, so let us have your order. Mention American Poultry Journal when writing.

Simmons &amp; Crittenden

Geneva, Ohio

## White Indian Runner Ducks

That breed true to type, color and station. In taking up a new breed one naturally wants to buy their stock and eggs from "headquarters" and from stock that you know is mated and bred right. Our White Runners have won at New York, Hagerstown, Indianapolis and Great Appalachian Exposition. We have sold the winners for nearly every show of note the past season. Our yards this season contain the best White Indian Runners in the world. Eggs, \$8 per 12, \$15 per 24.

Mrs. U. R. Fishel, Box R, Hope, Indiana

without renewing solution. Repeat in a few days if necessary. Feed liberally. Use some good condiment in a moist mash three or four times a week to spruce them up a bit.

#### Tar Paper Inside of House.

Q. Would it be all right to line inside of poultry house with tar paper; that is, tack it on studs and then nail weather boards over that? F. B. Anderson, Ind.

A. Tar paper is rather messy for such purpose, there are smooth, hard finish fabrics that are better. But, why

line the house unless the weather boards are very thin? It isn't necessary. If you feel that you must try to make the house warmer, why not use a good waterproof fabric for covering the outside of the house? It is a better plan.

#### Use of Dust Box—Beef Scraps.

Q. (1) How can I teach my pullets to use a dust box? They have a large box half full of clean sifted field dust, located in the sunniest place in the house. They don't use the box and try to dust in the damp earth under the droppings boards and in the corners.

A. (1) You can't make fowls use a bone-dry dust bath if there is another handy place where they can get a moist earth wallow. The term "dust" as applied to an earth bath for poultry is misleading. They don't want an absolutely dry dust bath, not if they can get anything else that will answer their purpose. Note that when you let them have their way about it they will take to moist earth in corners, at roots of bushes, or trees, or old stumps, or any place where they can kick up loose, fine, moist earth. Fill your dust box with fine moist earth, not too moist, and keep

# FRENCH'S POULTRY MUSTARD

Patent Applied For

ABSOLUTELY PURE

**WE** SINCERELY regret being obliged to call your attention to the fact that certain unscrupulous supply houses, taking advantage of the demand that has been created for FRENCH'S POULTRY MUSTARD, have been substituting cheap and inferior Mustard products where the poultry fancier has only asked for "Poultry Mustard" or "Mustard for Chickens."

We have seen samples of some of these articles and they possess practically no value at all. FRENCH'S POULTRY MUSTARD is a scientifically manufactured article, containing the flours of different Mustard seeds, so blended as to produce the greatest strength in the volatile principle that is desired, and that is required to produce the fortunate results arrived at by Mr. Allen.

In asking for Mustard for this purpose, ask for FRENCH'S POULTRY MUSTARD. See that you GET French's Poultry Mustard. The name "FRENCH'S" will protect you and in the future French's Poultry Mustard will only be sold in original packages, under unbroken seal. Shipments in barrels and in 100-lb. packages will be shipped direct from the factory. All other packages will have our name and the seal unbroken. Do not accept Bulk Mustard, and see that our label is unbroken.

Experiments were successfully made in England in 1909, 1910 and 1911 to stimulate egg production, increase vigor and fertility of fowls by the use of mustard. Send us your name and address and we will send you free of charge a copy of a pamphlet as edited by Mr. Ralph Allen, of Herts, England, the conductor of the experiments. The book contains a full account of the experiments extending over the years named, together with a number of testimonials of prominent American users of French's Poultry Mustard. The first issue of 20,000 copies was entirely exhausted within eight weeks of our first advertisement. The second issue is on the press, and contains added testimonials, and will be sent free on application.

French's Poultry Mustard is used and recommended by Edward Corning of the "Corning Egg Farm," Bound Brook, N. J., by "Corning himself," E. B. Thompson "Ringlets," Amenia, N. Y., The Urban Farms, Buffalo, N. Y., Grove Hill Poultry Yards, Waltham, Mass., Haldie Nicholson, Leominster, Mass., and by a great majority of the prominent breeders, and is sure to be used by all. The great egg farms use it regularly, pronouncing it invaluable.

The London Feathered World says: "Poultry Mustard not only increases the egg yield but improves fertility."

One of our best known breeders and a judge writes: "I have used Poultry Mustard regularly during the Winter months, with the result of not only increased yield of eggs, but the stock has been remarkably free from colds and the eggs from my exhibition lots are proving very fertile."

French's Poultry Mustard is an actual improvement upon the mustard used in England during these experiments. One teaspoonful of French's Poultry Mustard for every six fowls is the right amount. Mix it with the dry meal first and then add water until in a crumbly consistency. For Dry Mash use 1 pound French's Poultry Mustard to 200 to 500 pounds of feed according to conditions and requirements of your stock. Mix with a small amount first then with the entire lot. French's Poultry Mustard can be obtained of any dealer for 20c per pound in 6 and 10-pound boxes, 25-pound kegs, or a sample package of 1½-pound can be had for 35c. If your dealer does not have it, write the R. T. French Company, mustard makers, Rochester, N. Y.

"MUSTARD'S EFFICACY FOR INCREASED EGG PRODUCTION, FERTILITY AND STAMINA IS INDISPUTABLE"

THE R. T. FRENCH CO., DEPT. A, ROCHESTER, N. Y.

it filled with that kind. Place it in one of the corners they now make use of and you will shortly find them busy in it.

Q. (2) Will pullets or hens eat too much beef scraps if it is given them clear in hoppers?

T. H. J.

Medina, N. Y.

A. (2) If they have not been in the habit of having it that way some birds will make hogs of themselves at first and eat too much and get a touch of diarrhoea. After that they will show more sense and will not overdo eating the scrap from hoppers. We never bother about it, just let them make themselves uncomfortable at first if they want to, as they come around all right. It is safe enough if you use good scrap and the birds have not previously been starved for animal food. You don't want to use poor scrap, anyway. If you are afraid of their getting too much, put just a little in the hoppers at first and gradually increase the quantity until they have it before them all the time. The majority of scrap troubles are due to poor scrap that is not fit to feed.

Q. I have several yearlings that have developed roup or something. Each have one eye shut and swollen and the whole side of the head is as red as the comb. They are White Leghorns. Cannot detect any foul smell and until a day or two ago they had good appetites. Am giving them permanganate of potash in their drinking water and have given quinine pills (2 grains each) to each bird daily. I am afraid that I am not giving them the right attention. Had about a dozen others with eyes swollen shut on one side but not inflamed, and with the foregoing treatment they practically recovered. Separated them from the rest of course. Three weeks ago I had several hundred hens shipped here and some had colds, and this seems to be the outcome of it. A few others still in the flock sneeze some, but otherwise seem all right. What can I do to cure the sneezing? About a hundred or so seemed very lazy for nearly two weeks after the moving, but seem livelier now and do not sit around so much on the roosts as at first. I suppose the ones with the weaker vitality were more disturbed by the moving. One hen was crippled in the trip and does not seem to improve any. Do you think it worth while to keep her with hope of recovery? One was crippled even worse and I killed her. Have a new open-front house, south exposure, free from drafts. A few birds got wet in a shower and might have got additional cold then. Will appreciate it if you will set me right in my difficulties. Never had any trouble with my own raising and this is my first experience with birds raised by others and don't know what sort of handling they have been accustomed to.

M. R. W.

New York City.

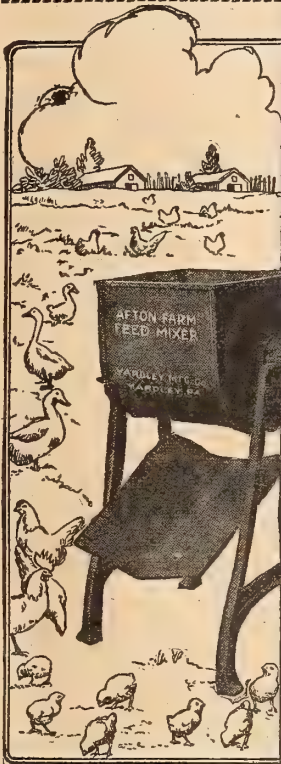

A. The less time you spend dosing and doping fowls, the better. If an emergency arises and you have to doctor the birds, take a short cut if possible. Feeding them pills and dosing the drinking water costs money and consumes time. With large flocks it is too slow a method and generally not sufficiently prompt in good results. Any flock is liable to colds under some circumstances and the introduction of a large flock of birds, shipped from some distance, is often accompanied by some sickness. The best thing is to keep the new fowls away from those on the

home place for two weeks or more. House them in open-front houses, feed greens freely and allow an abundance of wholesome food.

Cripples that are injured in transit are usually better off if put out of their misery and it saves time and money.

If there are any colds one or two

dippings of the right kind will usually set things right. It is seldom that more than three dip treatments for colds, given two or three days apart, are required. If 200 fowls arrive in same shipment and some have colds, give each and every one a head dip as a safeguard against further trouble and

## How a Feed Mixer Will Pay for Itself

**A Feed Mixer is a REAL Economy on Any Poultry Plant, No Matter How Small. It Saves Time, Labor and Feed.**

Suppose you feed only ten quarts of mash a day. Do you know that's nearly 2 tons a year? Yes sir, 2 tons! Now you wouldn't mix 2 tons of feed by hand, if you had to do it in a day. Why, then, should you if you do it in 365 days? Your time is worth as much one day at another.

Let's say you spend an hour a day mixing feed. A mixer will do it better in half an hour. In a year, it will save you at least 200 hours. That's 20 working days. About \$40 worth of time, isn't it?

NOW YOU SEE HOW A FEED MIXER IS A REAL ECONOMY

### "AFTON FARM" FEED MIXERS

FOR MIXING DRY FEED, WET MASH, SEEDS, FERTILIZER

There are other advantages to a feed mixer. Your feeds are fresher and more palatable. They are smoothly and perfectly blended. They are more easily digested. This means that you need less feed, and that your stock is healthier. You can make up balanced rations and special feeds quickly and cheaply. You can mix seeds for sowing. You can make up your own fertilizers. The "Afton Farm" Mixer is used on hundreds of farms. It is always satisfactory. Simple, safe, thorough. Made in 15, 75 and 150-qt. sizes. Hand or power drive. Larger sizes made to order. Write for our free book, "The Secret of Master Feeders."

Yardley Mfg. Co., Box D51, Yardley, Pennsylvania

## CHAMPION BUFF WYANDOTTES

Again prove their superiority above all others at *the great Chicago Show, December, 1912.* In one of the *largest and best classes* of Buff Dottes ever cooped, we won:

**1st, 2d Old Pens  
1st Young Pen  
2d, 4th Cocks  
1st, 3d, 5th Hens  
1st, 2d Pullets**

Shape and color specials. Also *championship silver cup* for *best display.* Our handsome illustrated *mating list* mailed free. Please mention A. P. J. when writing.

**Besuden Bros., Box 359B, Cincinnati, Ohio**

keep those with colds housed apart from the others.

For any such wholesale dipping we should mix, in an 8-quart galvanized iron pail, one gallon of luke warm water and one tablespoonful of a good cresol disinfectant (liquid cresol soap, there are many good preparations of this sort put up under various trade names and selling for from 75 cents to \$1.50 per gallon). This mixture should be made fresh as wanted and should be renewed often if many fowls are to have the head dip. It is effective in all head colds and roup. In giving the treatment, seize the bird in left hand by legs and wing tips, with the right hand grasp the head and hold the mouth open with one finger. Plunge the bird's head into the dip solution and slosh it around. If you exercise reasonable care there is no danger of drowning the bird though it will make the fowl feel rather sick for a few minutes. If there are any crusts on nostrils, squeeze them off with your thumb or finger and give the head another dip. Then let the bird go free and treat another victim. After a few trials anyone can dip fowls for colds as fast as an attendant can hand them to him and it only takes a short time to go through a big flock. This is the quickest, easiest, best and most effective treatment for roup that we know of as well as the least expensive. If the birds have not been neglected too long, and if they are housed in open-front quarters without crowding, they usually recover. Generally one treatment is all that is needed for ordinary cases if taken early.

Don't worry about a fowl every time she sneezes. A bird has to sneeze once in a while in order to keep its nostrils clear and stay alive. If the sneezing is accompanied by bubbles in corners of eyes and a watery nose, then it is time to start the dip treatment. A good many poultry keepers who only have a few fowls spend so much time looking for trouble and sickness among their flocks that it is surprising that they don't find more of it; for those who look for trouble usually find it. If fowls happened to be susceptible to mental suggestion we'd expect to find some flocks sick all the time. At the same time it is well to be sufficiently well acquainted with your flocks to know whether all is well with them or not.

If the birds are not active and fail to take sufficient interest in their food, put a little good condiment into their mash for a short time to brace them up.

#### Loss of Appetite.

Q. What is wrong with my chickens' appetites. I never heard of chickens slowing up on food the way mine are doing. I have about 100 S. C. Buff Leghorns raised in muslin-front coops (from baby chicks to adults). They ate plenty while they were maturing but as soon as they matured and were about ready to lay they lost their appetites.

I have them in a 40 x 12 ft. open-front house. I feed good mixed grain in 6 inches of straw litter and add wheat and oats as their appetites vary. Also feed whole corn on the cob. The mash is made of bran, middlings,

ground oats, corn meal, and blood meal. They eat and scratch for just enough to keep them alive but take no surplus to make eggs.

H. W. L.

Appleton, Wis.

A. We don't believe that there is anything seriously wrong. The birds when full grown will not eat as greedily as while growing unless they happen to be producing eggs, when the appetite is in proportion to the work they do. If your birds scratch and eat and look bright and healthy, and feel plump and of good weight when you handle them, they are probably coming on all right and may be laying well when you read this. If for any reason there really is material loss of appetite you can spruce them up a bit with some good condiment. It is probable that the addition of one pound of poultry mustard to 500 pounds of mash, thor-

#### "DON'T BE A CLAM."

# DON'T BUILD

Potter Portable Poultry House

**Complete, Convenient, Sanitary.** Potter Portable Houses and Fixtures have these good points as thousands of users testify. Potter goods are A1 in quality and low in price. They are made for a purpose and save you time and labor in your poultry work.

**Satisfaction Guaranteed**—when you buy our goods. They are made right and do please our customers. No lice and mites when you use our vermin-proof roosts and nests. For your own pleasure and profit and for the sake of your hens, you cannot afford to be without Potter fixtures.

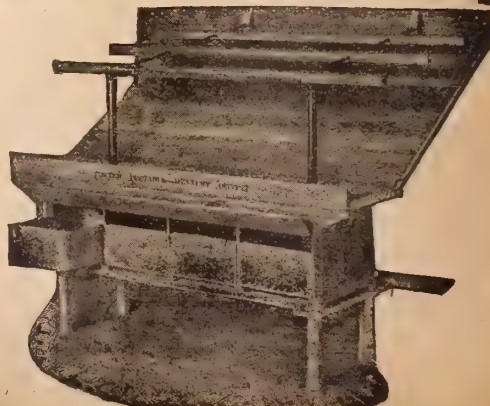

**Our Two Catalogues**—(136 pages, 150 illustrations) on portable houses and coops fixtures, feed hoppers, trap nests, feeds and supplies of all kinds at lowest prices, will interest you. Mailed for two red stamps to cover postage. Write today and be convinced that Potter Poultry Products are for particular poultry people.

No. 41, Style C, 5 ft. 3-perch complete hennerly outfit for 30 birds. Price . . . . \$6.50  
This same style made in 12 different sizes.

POTTER & COMPANY, Box E21 Downers Grove, Ill.

You can buy better, cheaper, more complete ready (factory) made hen-houses, roosting and nesting fixtures, coops, etc., from Potter & Co., because they have been making these goods for ten years and know how.

The cut at left shows an 8x10 ft. Potter Portable poultry house with 5x8 ft. open front scratch shed at each end. A fine house for 50 or 60 birds. It costs you complete with equipment . . . \$76

Potter Portable Hennerly Outfit

oughly mixed in, will be followed by good results.

#### Brooder House.

Q. Would it be possible to make a brooder house with a building which is 22 ft. long and 14 ft. wide?

A. Yes; if you have such a building you can adapt it to whatever brooding system you prefer.

Q. How many chicks will such a house accommodate and what would be the cheapest way to heat it?

A. You ought to be able to arrange it to comfortably accommodate 500 chicks. Economy in heating will depend on the construction of building. A coal-fed hot-water heater would save labor but with so small a flock would cost more to operate than gasoline or kerosene heated brooders.

Q. Would it be possible to heat it without any system of piping? Is there any kind of stove which would do it?

G. F.

Barrington, R. I.

A. With so small a building you would probably find lamp heated individual brooders, or portable hovers, the most convenient, easiest to operate and cheapest to install. There are several good brooding devices of this sort advertised in this Journal. There is also a special brooder stove used for large flocks, but we have not personally used one of these, though have had favorable reports from them. With any of these you will not need a pipe system. If your house is high enough you can install a double deck-pipe hot-water system that will double your capacity.

#### Cement Poultry House.

Q. Would a cement poultry house be warm enough for the fowls if the back and two ends are cement and the south front of boards?

W. N.

Edwards, Ill.

A. Whether a cement house will prove practical or not depends a good deal on your location and how readily an cheaply you can secure supplies. We have seen some cement poultry houses, notably two open-front ones, that were comparatively cheap to build and were apparently very comfortable quarters. As a rule, unless you have plenty of sharp gravel near at hand and unless you are building a sufficient number of houses to warrant the expense for lumber to make the ease for the cement, it costs more to build with cement than we should care to put into such buildings. We would not build a poultry house with a tight front. An open-front house is more comfortable than a closed one, no matter what the building material. Unless your location is too damp a well constructed cement house would be warm enough for the fowls.

#### Mustard.

Editor A. P. J.:—In November issue I note an inquiry from C. S. C., Philippine Islands, asking how mustard should be used and the results of feeding it. I have given this condiment a fair and unquestionable test the past year. As a result of feeding mustard I find that my birds are better in health and better producers.

I have not been able to obtain "mustard meal" and use the more easily obtained ground mustard. I feed one teaspoonful of this in the food for six hens.

As to feeding green mustard leaves I find that the fowls are very eager to

get them, even when other green foods are supplied and I believe they are benefited by being fed these greens, which are easily raised in any climate.

Flora, Ind.

W. H. Kobel.

(Note.—If any of our readers want more information concerning Mr. Kobel's experience with mustard we have no doubt that he will be pleased to answer their queries if they write him direct.—Ed.)

#### Egg Farm in the Argentine Republic.

Q. I am going to emigrate to the Argentine Republic and, being a good poultryman, I want to know if the

raising of chickens for market poultry and eggs does not pay in that country as well as it does in the United States. I need as much information as possible on this subject. Can you refer me to any consular report on the poultry industry in the Argentine and do you know if they have any poultry associations like there are in this country?

Napa, Cal.

E. L. B.

A. Would suggest that you write to Harry M. Lamson, Senior Animal Husbandman in Poultry Investigations, Bureau of Animal Industry, Washington, D. C. He should be able to furnish you with the information you desire.

## CONCENTRATION OF PURPOSE

The concentration of purpose of the Mount Pleasant Farm for the last ten years has produced the greatest known layers.

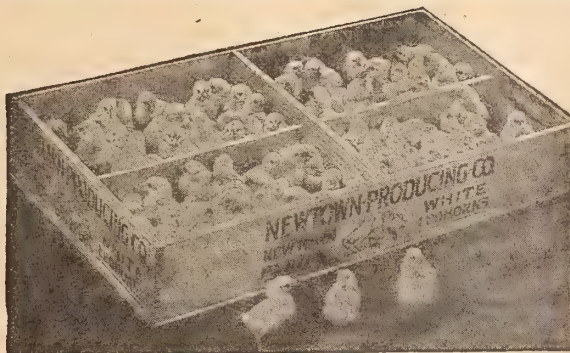

### THE MOUNT PLEASANT FARM SINGLE COMB WHITE LEGHORNS

DAY-OLD CHICKS  
EGGS FOR HATCHING

500 select cockerels, \$2 each.

Our methods of feeding, selecting and breeding are fully described in our new booklet, free. Write today.

Mount Pleasant Farm : Mount Pocono, Penna.

## Buy Chicks That Live Long and Lay Much— "Newtown" S. C. White Leghorns

They inherit the vitality and laying qualities of the parent birds, which have gained world-wide fame for producing the finest eggs in large quantities.

The "Newtown" strain of White Leghorns has been carefully, intelligently and systematically bred for years with especial attention to the development of their egg production, health, vigor and early maturity, and all combined with standard exhibition points.

"Newtown" birds are scientifically hatched in "Newtown" Giant Incubators, correctly brooded, carefully mated and produce chicks that live and lay and prove wonderfully profitable. That's the kind you want.

Order baby chicks and hatching eggs now for April and May deliveries.

Write for our finely illustrated catalog and price list Q.

NEWTOWN PRODUCING CO., Newtown, Pa., U. S. A.

### THE NEW DEPARTMENT

Dr. Prince T. Woods, Director

**T**HIS new A. P. J. Experiment Station Department was announced in the November and December, 1912, numbers. For the past two years readers have been asking us for information which could only be given in such a department. We have had time and the opportunity to make a good many careful tests covering periods of varying length, but sufficient to form an opinion that we are willing to vouch for. We have other tests under way and from now on this department will appear in American Poultry Journal whenever we have a report to make.

Our readers have convinced us that they want a report on things that are GOOD. We intend to here list the good things after we have tested them. So far as possible repetitions will be avoided and to have a complete list of the reports it will be necessary for the reader to keep a file of the magazines containing this department.

Please do not ask us to name the BEST in anything. Among many good things there may be a best, but that is a point where opinions may well differ under different circumstances. Therefore we must decline to name any variety, equipment, food, supply or remedy as THE BEST, thereby indorsing it in preference to all others.

There are many good things. We cannot test all of the good things, but

we intend from time to time to test as many as our capacity and time will permit. When we list anything in this department as good, you can depend upon it that we have found it good in actual and sufficient test. Because we list anything as GOOD does not mean that there are not other similar articles just as good. Keep your lists for reference.

Our friends will please bear in mind that there will be no special favors granted in this department and will please oblige us by not asking for special mention. Nothing will be reported until careful test has been made. Tests will not be rushed or hurried for anybody. In making reports the tests alone will be considered. No one will be specially favored above anyone else. It makes no difference whether the subject of the test is the product of a big advertiser, a little advertiser or someone who does not advertise with us. The same treatment will be given to all and no favors asked or granted.

The majority of the articles tested we purchase in the open market like any other poultryman. However, any person desiring to have a trial made on our Experimental Farm will be accommodated provided a sufficient supply of the goods to be tested are sent to our director, prepaid, and a sufficient length of time allowed for the test. Donated goods will receive the same consideration as goods purchased and no more. Goods by freight or express should be addressed to Director of American Poultry Journal Experi-

ment Station, Plympton, Mass. All mail should be addressed to Silver Lake, Mass.

It should be expressly understood that we do not solicit donations of any sort and no concessions will be made to anyone on account of any favors.

**Things Tested and Found Good.**  
Incubators:

New Homestead Hatcher, 60 egg capacity, new, 1912 pattern, type hot-water, made by Robert Essex Incubator Co., Buffalo, N. Y. Period of test 5 months. Hatches excellent. Chicks large, strong and vigorous and lived well.

Marblehead Incubator, 240 egg capacity, new, 1912 pattern, type hot-water, made by Frank Brown, Marblehead, Mass. Period of test 2 months. Machine plain and heavily built. Hatches excellent. Chicks large, strong and vigorous and lived well.

Hub Incubator, 200 egg capacity, new, 1912 pattern, type hot-water, made by W. H. Somersall & Son, Natick, Mass. Period of test 5 months. Four machines tested in two locations 60 miles apart. Hatches excellent. Chicks large, strong and vigorous and lived well.

Buffalo Incubator, 240 egg capacity, new, No. 2, 1912 pattern, type hot air, made by Buffalo Incubator Co., Buffalo, N. Y. Period of test 6 months. Two machines tested. Hatches excellent. Chicks large, strong and vigorous and lived well.

Brooder:

Wigwam Brooder, 60 chick capacity,

Must hustle or starve if you use a Simplicity Feeder. Saves cost in thirty days. Simplex Supply House, Pontiac Building, Chicago, Illinois.

## THE DRONES

## Kellerstrass White Orpingtons

ARE THE BIGGEST PAYERS BECAUSE THEY HAVE PROVEN TO BE  
**THE BIGGEST WINTER LAYERS**

**Kellerstrass Strain "Crystal" White Orpingtons**

Are the grandest utility birds on record today, and as to their fancy quality they won first at Madison Square Garden, New York, 1905, 1906, 1908, 1909, 1910; also at Crystal Palace, London, England, and Chicago and Boston. If you need some birds to improve your stock or for the show room write us. We have them, and the kind that wins, as our past record shows. Stock for sale at all times. Remember, we are the originators of "Crystal" White Orpingtons, and breed only the one kind. We devote our whole time to this one breed. Eggs for hatching, write for prices. Send for our catalogue.

**KELLERSTRASS FARM**  
ORIGINATOR OF CRYSTAL WHITE ORPINGTONS  
9122 WESTPORT ROAD, : KANSAS CITY, MO.

new, 1912 pattern, outdoor type, heat and moisture supplied by combined hot-water and hot-air system, made by E. F. Hodgson Co., Boston, Mass. Period of test 7 months, February to August, inclusive. Location during test exposed southerly slope. Operated entirely out of doors without shelter of any kind. Twenty brooders used in test. Operation simple, temperature easily maintained, fresh-air ventilation good, moisture supply to hover chamber good; with a little extra attention can be successfully operated out of doors in below zero weather and in high winds. Lamp not affected by wind. Chicks lived well and made good growth. Incubator and Brooder Oil:

Special Incubator and Brooder Oil, made by E. A. Buck & Co., Worcester, Mass. Period of test, 10 months. Quantity tested, 12 barrels. Good oil. Uniform flame and heat with minimum carbon.

#### Foods:

Milk Albumen, made by the Bencroissant Co., Antwerp, N. Y. Period of test, 7 months. Quantity tested, 1,000 pounds. Good in laying mashers and growing foods.

Wirthmore Scratch Food, made by Charles M. Cox Co., Boston, Mass. Period of test, 2 weeks. Quantity tested, 1 ton. A clean and wholesome grain mixture practically free from waste.

Chick Food, made by D. Lincoln Orr, Orrs Mills, N. Y. Period of test, 2 months. Quantity tested, 1,200 pounds. Sweet, sound, wholesome mixture of

fine cracked grains, clean enough for breakfast cereal. Results, good.

Breck's Beef Scrap, made for Jos. Breck & Sons, Boston, Mass. Period of test, 18 months. Quantity tested, 5 tons. Good wholesome scrap. Equipment:

Norwich Automatic Feeder, made by Norwich Automatic Feeder Co., Norwich, Conn. Period of test, 1 year. Number tested, 6 feeders. Good feeders for all scratch grain mixtures, seldom clog. One large feeder will feed flock of 25 hens comfortably. Several sizes.

Gillette Automatic Feeder, made by George K. Gillette, R. F. D., South Hanson, Mass. Placed for tests and improvement before being put on the market. Period of test, 6 months. Number tested, 33 feeders. Changes suggested by A. P. J. Experiment Station incorporated in improved machine. Good feeders for all hard grain mixtures, rarely clog. One feeder will comfortably serve 25 adult fowl or 75 baby chicks. One size only.

Oat Sprouter, made by E. C. Young Box Co., Randolph, Mass. Period of test, 7 months. A good inexpensive sprouter for small flocks.

Brood Coops and Colony Coops, made by E. C. Young Box Co., Randolph, Mass. Period of test, 11 months. Number tested, 18-brood coops and 12 colony houses. Good low cost equipment.

Foster Killing Knife, made by Cyphers Incubator Co., Boston, Mass. Pe-

3 knives. Good inexpensive killing knife.

#### Remedies:

Abbott's Cholera Remedy, made by the Abbott Alkaloidal Co., Chicago, Ill. Quantity tested, 2 large packages. Tests made with four flocks on four farms. Duration of tests, 1 to 2 weeks each. Remedy is in tablet form and is a compound of phenol-free sulphocarbolates. An intestinal antiseptic. If used sufficiently early in the case proves effective in infectious diarrhoea, intestinal irritation, limberneck and diarrhoeas from indigestion or spoiled foods. Remedy is still under test.

Dioxogen, made by the Oakland Chemical Co., New York City. Period of test, 8 months with several flocks and individual cases. Quantity tested, 6 pints. Found useful for cleansing throat, nasal and head cavities in conjunctivitis, roup, colds, simple colds and canker. Effective when used properly and persistently in curable cases.

#### "DON'T BE A CLAM."

A negro woman was arguing with her husband. He said: "Dinah, yo' talk don' affec me no mo' dana flea bite."

"Well, niggah," she answered, "I's gwana keep yo' scratchin'."

Darlington's S. C. Wh. Leghorns are also scratchin'.

Darlington Egg Farm. Alfred P. Edge, Box B, Darlington, Md.

## SUCCESS ASSURED

In the poultry business, fully explained in free booklet, "What and How to Feed." Simplex Supply House, Pontiac Building, Chicago, Illinois.

## KAUP, QUALITY BUFF ORPINGTONS

MADE A SPLENDID RECORD IN THE SHOW ROOM LAST SEASON AT CHICAGO, INDIANAPOLIS, APPALACHIAN EXPO., Etc. I claim to sell better birds and birds that have more breeding value at \$3 to \$10 than any other breeder at the same or higher prices. A trial order will convince. HUNDREDS of properly bred cocks, hens, cockerels and pullets for sale in singles, trios or pens at very reasonable prices, quality considered. All young hatched from first prize winners at the above shows. Exhibition birds trained free and shipped in the pink of condition, express prepaid. Satisfaction guaranteed or purchase price refunded. My 1913 mating list will be the finest published on Buff Orpingtons. Will cost 25c each, but, I will send one free, if you mention A. P. J.

F. A. KAUP, BUFF ORPINGTON SPECIALIST, CHICAGO, ILL. Phone Belmont 1724

20 YEARS IN  
the BUSINESS

## NIXON'S WHITE WYANDOTTES

Are a tower of strength in the Wyandotte world, by reason of their great winning, breeding and laying qualities. I have won the very highest honors that can be won in the world, namely, Madison Square Garden, and my customers from all over the States have swept everything before them. You owe it to yourself to investigate where the foundation for so many of the big flocks have come from. Be serious, write me. I have the birds in old or young that will place you in real Wyandotte alley; big sturdy, true typed cockerels that will breed you the type that you have dreamed of at \$3, \$4 and \$5 each. Guaranteed winners.

Chas. Nixon, Judge and Breeder : Box 202, Washington, N. J.

## POLEY'S WORLD'S BEST BUFF ROCKS

### ARE THE WORLD'S CHAMPIONS

They have proven this by their remarkable show records at Madison Square Garden, New York, Chicago, Boston, Kansas City, Allentown, Indianapolis and Philadelphia. At these leading national shows they have won more first prizes than all their competitors combined.

Our flock of over 2,000 birds is now in fine shape and we are prepared to furnish you with just the stock that you want.

We can furnish you with winners for any competition or with the high-class breeding stock that you will need for your breeding pens. The high quality of POLEY'S WORLD'S BEST BUFF ROCKS is the result of twenty years of careful and scientific breeding. If you want Buff Rocks that have the rich, even golden standard Buff Color that are of correct size and type, it will be to your advantage to write us before purchasing elsewhere. Satisfaction guaranteed or money refunded.

Send 20 cents in stamps for our handsomely illustrated catalog, the best Buff Rock catalog ever issued. It gives full information in regard to our stock and our farm, testimonials, show records, photographs of our birds, etc. Address

Feb. 5-8. Fond du Lac—E. Brown, secretary; James A. Tucker, judge.

## CHICK CHATS

By H. P. Schwab

With greetings for the New Year.

Do something in 1913. Make it a year that will bring happy memories in time to come.

Your future depends on YOU.

We are in the midst of the great shows; they are great indeed; they are the success made possible by our breeders.

Buyers are many; quality is in exceptional demand. If you have it—advertise.

Have you noticed the quality in Rhode Island Reds this year—the rich red color, grand wings and tails, and beautiful type. Such progress is pleasing to note. You Red breeders, we congratulate you.

Officially it is claimed that there are seven kinds of eggs, viz.: Extras. "No. 1s," Dirties, Checks, Spots, Leakers and Rots.

The following is clipped from a leading newspaper: The average ratio of operating income to the cost of real property and equipment for three years ending 1911 for each of the five largest

express companies as reported by the interstate commerce commission is—

Wells Fargo Co.....	65.30 Per Cent
Adams Express Co....	26.89 Per Cent
American Express Co..	27.11 Per Cent
U. S. Express Co.....	17.57 Per Cent
Southern Express Co..	372.50 Per Cent

Let us have the Parcel Post with just and reasonable rates.

They tell us that the trouble with voyaging on the sea of matrimony is that too often the cook wants to be captain.

We lately spent part of a day in Pittsburg meeting the boys of the Fanciers Club. All eyes will be turned that way February 17th to 22nd when the great show takes place. Mr. Geo. C. Sutch, No. 5 Lydia St., is the Secretary, write him for list.

We thank our good friend the Major for our "Pilots License," and although its number is 23 we appreciate it just the same and as soon as we can enlist a crew will heave anchor.

We are pleased to announce that Mr. John W. Poley, Linfield, Pa., again has entire ownership of his line of "Poley's Worlds Best Buff Rocks," Mr. Myers retiring. Everybody knows John and

his quality Buffs and, as we have seen his stock this fall, are ready to say they are better than ever. He has special prices for choice breeders and exhibition birds.

The Dollar Poultry Journal has come to stay, it is worth the price, every issue shows improvement and it sells quality stock for advertisers. When you see it in the A. P. J. you can depend upon it.

The November and December issues have started things. They are but the forerunner of what is to come and can be expected. The A. P. J. in the future, as in the past, is going to deserve the support of all who believe in better poultry.

We are specially requested by Mr. Chas. Hall, Trafalgar, Ont., to announce that his First and Third prize Barred Rock cockerels at the "Ontario" were hatched from eggs bought from Mr. H. D. Riley, Strafford, Pa. There were 69 cockerels competing. We are glad to print this, for it shows the right spirit in Mr. Hall to give proper credit where due.

The Palace New York show has made more history, the classes were of the best, with a wonderful attendance and many good sales made. The banquet was a feature and we hope we are not the last to express our thanks for all favors extended. We give a complete show report elsewhere.

At the banquet, Mr. E. B. Thompson's name was proposed for President of the A. P. A. and was grandly received by all. We believe the journal

# Poultrymen Have Confidence In The Globe Incubator---

because all the value---all the invested money is put into the machine itself. We put all the money in the machine. We have never made a statement that was unsound or shaky. Everything we say about the "Globe" is truth—positive fact backed up by seventeen years of a wonderful success. Don't be misled by those low priced machines. You know it takes a great deal of yelling to sell anything that's below standard. We have never had to advertise in that way in our life. The Globe's reputation sells it. It is a standard machine—one that you can depend on.

Thousands and thousands of both men and women have been "stung" by purchasing a machine that looks nice in the picture because the man selling it shows a nice big photograph of himself. It is interesting to note that every user of the "Globe" (and then there are thousands and thousands) is today making money just as fast and practical as it is possible to do in the poultry business. And the best proof that our Incubator principles are scientifically correct is the fact that we make Infant Incubators for physicians. Read our large 1913 Poultry and Incubator Catalogue and see what we have to say about our Infant Incubators. This big book has hundreds of testimonials. This is a mass of evidence—solid facts that are the best guide you can obtain. We want you to read them over. See how enthusiastic these people are about the Globe Incubators. Let them tell you in their own words how successful their poultry business has been since they used the Globe Incubator and Brooders. See below for further information about this catalog. Here's a few further words about these wonderful machines and what they are made of.

Send your order at once. Don't miss this remarkable opportunity. And remember when you buy the Globe Machine you are getting real value.

## Poultry and Incubator Book

Send us 15 cents for our big complete book on Poultry, Incubators, Brooders, Poultry supplies. We will save you many dollars. It has more real information than a whole library of Poultry books. It shows everything that is required to make a poultry farm a success.

C. C. Shoemaker, Box 605, Freeport, Illinois

## The Standard 200-Egg Globe, \$18.00

This is without doubt the most carefully built incubator made. It is made of specially selected lumber—each piece picked. Has a most superior hot water heating system and this system is exclusive in the Globe. The pipes that carry the hot water through the egg chamber are made of regular gas steel tubing so that they are absolutely airtight and water-tight. Insulation is the most thorough ever found in any machine. Regulation system is controlled by what is known as the Compound Double Hydro Wafer. Tanks, trays, lamps, etc., are of the finest model and best material obtainable. Can be run with kerosene, any kind of gas or electricity. And all this most perfect construction makes it possible for you to get those high percentage hatches for which the Globe is famous all over the country. This is the incubator that will make you money. This is the incubator that has the real value behind it and not a pretty photograph of somebody.

**200-Chick Globe Brooders \$11.75** After you have your little chicks all peeping about looking like good money, don't chance them to some brass band brooder. Get them in the Globe and you're pretty sure of cashing in at a profit every single time.

This 200-Chick Globe Brooder has all the basic principles that has made the Globe famous. Has the over-head system of hot water pipes, contains two compacts—one for feeding—one for nursery. Ample light and ventilation. The most efficient lamp on the market. Will never rust. The whole brooder is made to stand the racket.

**For 30 Days Only Combination Price \$23.50** If you buy within the next 30 days you can get one of these perfect 200-egg size incubators and one 200-chick brooder, only \$23.50

men have had their fling, and that it is the proper time to elect a breeder to the highest office we poultrymen have to give. Mr. Thompson is one of our oldest members and a most successful breeder and champion of standard bred poultry for over thirty years. He is well qualified for this office and I am sure that many join in wishing him success.

The specialty clubs are holding annual meetings with renewed interests and increased memberships, their aims are high, and we still hope for the time when a great majority of the breeders will join the clubs and personally interest themselves in the progress of the breeds.

There are no tomorrows on the calendars of the men who do things.

At the Philadelphia show Mr. D. Lincoln Orr was fortunate in securing a copy of the American Standard issued in 1871. We believe this is an original copy of the first standard issued.

Mr. Geo. Urban, Jr., Buffalo, N. Y., has issued a most beautiful catalogue of his well known lines of Black Lang-

shans and White Rocks with the illustrations done in color. You can read it all in half a minute, but it will take a year to satisfactorily feast your eyes on the life like pictures of his great winners shown.

We welcome to our advertising columns Mr. E. L. Miles, Sag Harbor, L. I., New York. Mr. Miles is one of our oldest Barred Rock breeders with his success well known. He has but seldom shown his birds, preferring to breed and sell winners for others to show. Breeding has always been his favorite study and we recall with pleasure the many sessions we have had with him and appreciate their value to us.

"FLEA." The national order of the "Flea" was organized at the late Philadelphia show, Friday, December 13, 1912. The objects are to insure a greater fraternal feeling and interest among the poultrymen and to help the needy wherever found. The dues are but \$1 per year and Mr. Henry D. Riley, Strafford, Pa., is the treasurer. Special meetings will be held in New York, Boston, Baltimore, Buffalo, Cleveland, etc. Full information will shortly be given and we feel assured that this

association will do much good and deserve the hearty support of all.

It is true this was founded on fun, pure and simple, and we are going to have that along with the worthy object of helping our fellow-men.

Williamsport held a wonderfully fine show with over 2,000 birds shown. Classes teeming with quality were features and there were the many breeders of national reputation showing their best. The Williamsport show is all in a class by itself as an early show. The banquet was an added feature this season that was attended by over 100 exhibitors. Messrs. Huston, Stryker, Swartz, Heim and all members have given the poultry world something more to be proud of.

The poultrymen of the Empire state are hoping that Mr. Geo. Tracy will be appointed on the State Fair Commission. It is high time that the poultry interests had proper representation on the board and we urge all poultrymen to write the Governor requesting Mr. Tracy's appointment.

Barred Rocks are better than ever this year, and also far more popular.

## DO YOU WANT EGGS?

### JACOBUS IMPROVED STRAIN SILVER CAMPINES

WHY DID THE SILVER CAMPINE EGGS FROM MY YARDS WIN OVER ALL OTHER WHITE EGGS AT BOSTON, 1911 AND 1912?

## Minorca Breeders, Attention!

Having purchased from Geo. W. Hey the celebrated Geo. H. Northup stock of R. and S. C. B. Minorcas—1000 in all—and added it to our own equally large and valuable flock, we can now supply Minorca breeders with high grade exhibition or breeding stock at reasonable prices. We solicit correspondence and guarantee satisfaction. Catalogue and Special Sale List FREE.

Marcus Allen Northup, Manager, New York & New Jersey Poultry Farm, Inc., Successor to Geo. H. Northup & Son R. F. D. 3, Orangeburgh, N. Y.

## RICE'S S. C. WHITE LEGHORNS

Have had another prosperous season and are again ready to help you out at the early shows. Their past record of winnings at Madison Square Garden and the other leading American shows for the past sixteen years must convince you of the fact that they are bred to win and do it in strongest company. They also have a world-wide reputation as heavy Winter layers of large white eggs and are ready to make money for you through the cold Winter months. I have several hundred choice yearling hens and early hatched pullets at reasonable prices with strong, vigorous cockerels to mate with them. Write me for prices of exhibition stock and choice breeding pens. Please mention American Poultry Journal when writing.

IRVING F. RICE : : : : : CORTLAND, NEW YORK

## PARTRIDGE PLYMOUTH ROCKS

### I Have the Winners for You for Any Show in the Country

A selection from over a thousand of the highest class birds of this variety ever bred. Remember, they are direct descendents of Chicago, Cleveland, Indianapolis, etc., first prize winners. They have the type and color that is recognized as correct by the leading judges of this country. They carry blood lines and vigor that reproduces itself year after year in the offspring.

Partridge Plymouth Rocks are the coming favorites and are rapidly displacing older varieties. Many of the most prominent breeders are adopting them, for it cannot be denied that there is a better all around fowl in existence. Send 25c for my catalog and text book on the breed—the finest book of this kind ever published. Money back if not satisfied. Among up-to-date information on the breed it contains a magnificent color plate insert of a pair of birds in natural colors—worth the money itself.

F. N. Perkins : 22 Harlem Road : Freeport, Ill.

So far we have handled this class at a dozen shows and are delighted with the exquisite quality seen. The features noted in particular are evenness of surface color with superior under-barring. More than ever we are convinced that sharp and clean under-barring is the true and only proper assurance of clean, sound, snappy and even surface color of the proper strength and shade.

The classes of Campines seen so far this season show the interest taken in this variety, they are large and the evenness seen is admirable.

At the Ridgway, Pa., show we found about 800 birds with large and very valuable classes in Houdans, Brown Leghorns, White Leghorns, Wyandottes, Rocks, etc. It was a well regulated show, held in a well lighted hall. The officers, members and exhibitors met there have every reason to feel highly elated over their efforts for the fancy.

Another Philadelphia show has also passed into history. It was a great show, full of interest and business and a record attendance. Our report will give full information of the classes. President Riley with Secretary Moore and Supt. Hickman were well supported by Messrs. Gilbert, Smith, Swiesfort, Fawsett and a dozen others.

Mr. C. F. Rankin, Pittsburg, Pa., was very much in evidence with his line of S. C. Reds, where he was a leading winner. His first prize cockerel was also awarded the cup for best cockerel in the American class and cup for best cockerel in the show.

Mr. C. F. Webster, Girard, Pa., won cup for best display and special for best cock in the show with his first prize White Rock cock. First hen and other prizes were also won by him. At the Williamsport show he won all firsts competed for and special for best bird in show on his first prize White Rock hen. This line has never looked better to us than now. Mr. Webster was represented by Mr. E. H. Lichtenwalter, who also exhibited his Buff Rocks and won all four first prizes.

At Williamsport, Pa., show Mr. S. M. Goucher, Moorestown, N. J., won first prize pen in Barred Rocks and several other rewards. The pen was a beauty, well mated and of the best quality. They repeated this win at Philadelphia. We believe that Mrs. Goucher was responsible for their grand condition and it is seldom we find a pen so well mated and in such superior condition. Such conditions must win.

Eggs for hatching will always be popular among breeders, and particularly those who seek to improve their stock, and those who enter the standard bred ranks. The beginner can't buy from the older breeder his best birds, but he can buy eggs from them, and if properly fed and cared for, and kept growing all the time, his success is assured. This season we have placed winners in several varieties at a dozen shows that were hatched from eggs bought. Eggs for hatching are within the reach of all in price; there is some chance, to be sure, but it is a chance well worth taking.

A judge who has failed to make good raises to make some suggestions, or rather sends his letter and fails to at-

## WHITE WYANDOTTES

Put some new blood in your flock. Blood which counts. We can furnish cocks or cockerels for \$3 each; pullets \$2 each in utility grade. These bred from Boston, Madison Square Garden and Philadelphia winners. Do not delay ordering as first come will be best served. Booklet free. Mention American Poultry Journal.

Wyndmoor Farm, Harry W. Britton, Proprietor, P. O. Box 1000, Moorestown, New Jersey

## IF I BUY BABY CHICKS, WHAT WILL THEY MATURE INTO?

Will they grow into birds that I can feel proud of and that will lay Winter eggs in quantities, or win the blue ribbons for me, or will they be just scrubs that's the question before every one who buys day-old chicks. It's not the first price that counts, but will they be right at maturity?

## Caldwell's White Plymouth Rock (Fishel Strain) "Baby Chicks of Quality"

### From Utility Matings

Will mature into long backed, well made birds pure white in color, that will be the secret of "Winter eggs." Every utility breeder is descended from known good layers that have been bred that way.

### From Exhibition Matings

Will mature into blue ribbon winners. Every exhibition pen is made up of birds with good combs, of good type and chalk white in color, possessing the rich blood lines of generations of Fishel blue ribbon winners. Our birds were among the principal winners at the Indiana Fanciers' Show, Indianapolis, 1912.

### Our Flocks Are Vigorous

All Fall our flocks have roamed meadows and woods accumulating health and vigor. They are now in Winter quarters so full of life and vitality that their chicks will be strong and sturdy.

### Here Is the Caldwell Selling Plan

We are now booking orders for "Baby Chicks of Quality" for Spring delivery. We never have been in such fine shape to handle orders of any size. Our fine plant is fully stocked with the finest birds we ever owned of both utility and exhibition quality. An early placed order enables us to so arrange our hatchings that we save money. By your faith you are entitled to that saving so we will allow you discounts for early placed orders, the earlier the greater the discount. Safe arrival of chicks is guaranteed.

### A New Catalog Is Now Ready

One of the finest ever issued by any breeder. It tells just how "Baby Chicks of Quality" are produced and describes every grade of stock that we have to sell with prices. A copy is ready for you.

R. C. Caldwell : Box 1021 : Lyndon, Ross County, Ohio

## Get a Yesterlaid Hatch!

the Strain that lays heavy when egg prices are highest!

Below is a case of Yesterlaid

Eggs. These eggs brought 63c a doz., wholesale, for table use, because they were laid when egg prices were highest and because their large, uniform size and dead white color command a premium of 5c to 20c in any

market. Hens that lay premium bringing eggs when the price of any eggs are 'way up, mean profits!

## Yesterlaid Range Raised Laying Leghorns

have been specially bred for generations to be heavy winter layers of such eggs. A Yesterlaid hatch will give you a foundation of heavy winter layers of these premium price bringing eggs.

## 95% fertility reported!

A majority of reports on Yesterlaid hatches show 95% fertility. Yesterlaid methods of mating and feeding are such that high fertility is certain. Eggs from Yesterlaid breeders are large dead white and uniform in size. Chicks hatch from these eggs like popping corn and inherit the vigor and strength of their famous progenitors—Lusty Tom and Lady Laymany—quickly developing into plump broilers or heavy winter layers of premium eggs.

Twelve experiment stations have ordered Yesterlaid stock because of super-superiority!

Here's what one says: "I am delighted to find your claim of 95% fertility substantiated. Of 100 eggs sent, we found only 3 infertile and one dead germ." Prof. W. A. Lippincott, Kansas Agricultural College. Some others make these reports: "The eggs I bought of you hatched 28 chicks from 30 eggs." G. Kennedy, Wright City, Mo. "Last Spring I bought eggs from you. The first pullet to lay started at 4 months and 11 days." B. Smith, Englewood, N. J. "Yesterlaid chicks developed into prize winners. One won first and sweepstakes as best cockerel in the show. Also won first and sweepstakes as best trio." K. K. Bowman, Bonae Terre, Mo.

### SPECIAL OFFER—To Jan. 31st

For \$5 we will ship you, express prepaid (east of Rockies) two settings (30 eggs) of specially selected eggs from our first grade Standard matings—regular price \$6, f.o.b. Pacific. In addition we will send you "Poultryology" free—a complete practical text book on the methods of feeding, marketing, breeding, etc., which have made Yesterlaid Egg Farms so successful—written by the manager himself, Mr. R. C. Lawry. This offer is good only to Jan. 31st—and is made solely to get new customers, for we know that any body who gets Yesterlaid stock will order again. Order now—pin a five dollar bill to coupon, fill it out and mail TODAY.

Name \_\_\_\_\_

Address \_\_\_\_\_

This book alone brings \$1 net. (144 pages—67 pictures). This offer is good only to Jan. 31st—and is made solely to get new customers, for we know that any body who gets Yesterlaid stock will order again. Order now—pin a five dollar bill to coupon, fill it out and mail TODAY.

tend a meeting being held at the time he visits the show. Wonder if he ever considered that his failure was simply due to his own lack of ability? Think this over.

\* \* \*

Beware of imitations. The kind of mustard that we have used and recommended is "French's Poultry Mustard." Take no substitutes, for we know nothing of the other kinds. Be sure to insist on "French's" every time and you will find value and pure goods with results.

\* \* \*

The Dune Alpin Farms, East Hempstead, L. I., N. Y., made a very neat clean-up at the Palace New York show with their S. C. White Leghorns by winning four first prizes along with about all the rest offered in that great class. It was a feast to see their display and to note the quality and condition. Mr. Kerr, like many other good things, improves with time, and the improvements he is making with this line of Leghorns and White Orpingtons is good to see.

\* \* \*

Haldie Nicholson, Leominster, Mass., breeder of the cockerel line of Barred Rocks, has sold birds that have made several grand records this season. This line has been unusually successful for several

years and beside the winnings he has made at Boston, birds of his breeding have won the country over. He writes us that he has a large and fine lot of birds to offer, and we know what that means.

\* \* \*

He also breeds on one of his farms Blue Orpingtons, Blue Wyandottes and Blue Leghorns. The foundation of his stock in these he imported, and we note they have been winners wherever shown. After the shows we hope to visit Mr. Nicholson and will have some further reports on these for our readers.

\* \* \*

We spent one day at the Dallastown, Pa., show judging several classes and were surprised to note the large entries of Barred Rocks and White Rocks, Silver and White Wyandottes, Leghorns and Reds. The first prize Barred Rock hen and pullet shown by J. W. Smith were rare specimens of great value, and were well shown.

\* \* \*

Dunrobin Farm, Red Bank, N. J., never do anything by halves in their varieties of White and Buff Orpingtons and Buff Orpington Ducks. At the Palace, New York show they won first cockerel in both White and Buff Orping-

tons. Those birds stood out strong and sound in quality and were shown to perfection in condition.

\* \* \*

Mr. R. V. Hicks is making a reputation east in judging R. I. Reds. At both the Palace and Philadelphia shows his work met with entire satisfaction of the exhibitors.

\* \* \*

Canada's great show, "The Ontario," was held this week with over 5,000 birds shown. The Plymouth Rocks were among the largest classes shown, and the average quality the best we have seen there. In Barred Rocks 157 birds were shown, with the first cockerel and pullet phenomenal specimens. There were 113 White Rocks with many great winners, and in the Buff and Partridge classes there were nearly 100 birds more.

\* \* \*

The exhibit of Barred Rocks by Mr. R. J. Walden, Middleburg, Md., at the Williamsport show had its feature in its first prize pullet and his first prize pullet-bred cockerel. The pullet was a great winner in a large and very strong class and attracted attention with her pronounced color and sharp barring. The cockerel referred to was a beauty and as rich a specimen as we have seen.

## BRUCE & ABBOTT'S BUFF ORPINGTONS

Go Marching Through Georgia and capture more BLUES at Atlanta, Oct. 28 to Nov. 2, than any of their competitors. 1st chl., 1st and 2d hen, 3d pullet and 5th pen. No other breeder won more than one 1st prize. Look up the competition and decide for yourself whether or not it takes the very best quality possible to win highest honors at this great Southern Show. Also remember our sweeping victories at Pittsburg, Indianapolis, New Orleans and the recent Indiana State Fair. Write for prices on stock. Mating list ready December 20th.

BOX 10

WHITELAND, INDIANA

## NOFTZGER'S PARTRIDGE ROCKS

**WIN AT CHICAGO**—My birds again won four out of the five firsts, demonstrating my ability to produce the quality necessary to win. I have a large flock of brothers and sisters of these prize winners which I will sell at reasonable prices.

**COME TO THE ORIGINATOR AND GET THE BEST**—My pens this year will contain the finest birds I ever owned, reaching still more closely the perfection for which we strive. My free catalogue contains much valuable information. Send for it today.

S. A. Noftzger, Originator of Partridge Rocks, Box 38, No. Manchester, Ind.

## Miss Carey ENGLAND Toynton, Spilsby WHITE ORPINGTONS GREAT SALE

Grand International Palace Show, 1912  
the stud first for the fifth year in succession

There is not another stud in existence that can offer you the record in breeding winning males for the leading events that this stud holds. Can you breed the deep, wide, low, cobby, heavy, pure white male for which the stud is noted? If not, now is your chance, for owing to the possibility of removal I am greatly reducing my stud, and never before probably in the history of whites has such a valuable collection of birds into the market.

My customers in America have won first this year all along the line—over 16 firsts by different customers in cockerels and pullets have been recently recorded against the best imported stock, and warmest testimonials have been received to almost every order.

The stud has stood right at the front for the past four years in breeding White Orpington male winners at the leading events at home and abroad, and it is unanimously granted this year by English and American visitors to be the grandest lot of deep, wide, low, cobby, weighty, snowy males and exquisitely typed females of purest white ever seen together in a single yard. While the good red eye and neat low comb is in nearly every chicken.

The quality of the birds I ship is so well known that old customers write or cable orders without other correspondence leaving the selection entirely to me and thus get the first pick of the best birds.

A limited number of grand trios and breeding pens headed by extra fine males including some of the birds out of my own pens for which big prices were refused last season, fit for keen competition.

A wide selection of pens headed by very fine males mated to breed winners.....\$200. and \$100.

Single stock birds.....\$10 \$15 \$20 \$35 \$60 \$100.

But for sure success it is better to purchase a trio or pen and get the pullets bred to produce the class of male. A few celebrated winners quoted on application. Eggs per sitting (unfertiles replaced).....\$5 \$10 \$15.

Buff and White Orpingtons and Faverolles bred. A splendid lot of testimonials by leading journals, American and English judges and customers, by return mail. All orders over \$35 value landed free in this country. Order today before the best are sold. Cable "Carey" Spilsby.

# CURRENT NEWS of the Poultry World

By  
J. F. SCHUREMAN

Dr. F. M. Reed, of Wyandot, Ill., has disposed of his entire flock of R. C. Brown Leghorns to W. O. Chase, of Hillsboro, Ill., and will devote his time to the breeding of Rhode Island Reds. This is no doubt one of the best flocks of R. C. Brown Leghorns in the country, Mr. Reed having been a winner of the blue ribbons in most of the big shows for a number of years.

A school in poultry culture is to be held in Superior, Wis., this winter under the direction of the College of Agriculture of the University of Wisconsin.

According to a statement just issued by the Nebraska Department of Agriculture, the value of the poultry products in that state for the year 1911 exceeded \$43,000,000, or about 6 per cent of the product of the entire country.

A 5-year-old Black Spanish hen, owned by Mrs. Taylor Collins, of Marseilles, Ill., has adopted six kittens and cares for them as tenderly as if they were her own chicks. The kittens have learned to heed the call of the hen and the hen broods them the same as she would so many chicks.

A department of poultry husbandry has been added to the regular course at the State College of Agriculture at Athens, Ga. A special building is being erected for this department.

Just before Thanksgiving, in a single day, twenty-one carloads of turkeys were shipped from Morristown, Tenn., to the New York city market. The aggregate value of the shipment was placed at \$60,000.

One of the attractions at the recent Quincy (Ill.) poultry show was an incubator in which alligator eggs direct from Florida were hatched in plain view of the spectators.

While handling a hen at a Wisconsin poultry show a couple of weeks ago, Judge Charles V. Keeler lost the stone setting out of a ring he wore. The stone had no sooner hit the floor of the coop than the hen gobbled it up and swallowed it. Mr. Keeler at once offered the owner of the hen \$200 for her, but the offer was turned down and the judge left the show without recovering his property, which he valued at \$200.

J. H. Jones, formerly of Topeka, Kan., has purchased a tract of land near Oklahoma City, Okla., and will at once establish an up-to-date poultry farm thereon. He is an experienced poultryman and will no doubt make a success of his venture.

Dr. J. B. Spangler, of Mechanicsburg, Pa., claims to have the champion Pekin duck layers of the country. There are

four of them and they were hatched on April 25. They commenced laying on September 3 and during the month of October they laid 72 eggs. During the first three weeks of November they produced 74 eggs.

H. N. Conn, of Boston, Mass., has purchased an interest in the La Belle poultry ranch, near Aurora, Colo., and will assume the active management of the enterprise. The ranch covers 20

acres of ground, on which there are buildings valued at \$46,000. It is planned to spend between \$70,000 and \$80,000 in enlarging and improving the plant. Eighty acres of additional land will be purchased, new buildings erected and new equipment installed. At present the incubator capacity is 15,000 eggs and there are 4,000 laying hens and over 16,000 spring chickens on the ranch. When the improvements are completed it will be the largest poultry plant in Colorado, if not in the West.

Poultry breeders of Jefferson county, Arkansas, are planning for the erection of a building in Pine Bluff to be the permanent home of the Jefferson County Poultry Association and in which the annual exhibitions may be held.

John R. Hill, of Urbana, Ohio, a breeder of Brown Leghorns since 1874,

## DE VOSS' COLUMBIAN PLYM. ROCKS

20th Century Hatchery, Box 73, Chatfield, Ohio

has sold his entire flock to a California fancier and will retire from the fancy.

\* \* \*

Frank Tilford, a New York capitalist, has purchased the Lakewood Farms Products Company's poultry farm near Lakewood, N. J., for his daughter, Miss Julia Tilford, who will operate it. It is one of the largest poultry farms in the world, with a 45,000-egg incubator capacity and accommodations for 25,000 laying hens. To add to the area of the property, several adjacent farms have also been acquired. It will be known as the Laurelton Farms, Inc., Mr. Tilford and his daughter forming the corporation. Miss Tilford has had

some experience in poultry culture and will breed both fancy and market poultry. Extensive improvements will be made and an expert poultryman will be placed in charge.

\* \* \*

Judge F. H. Shellabarger, of West Liberty, Iowa, was elected president of the Iowa branch of the American Poultry Association in December. The vice-presidents elected were Mrs. N. B. Ashby, of Des Moines; L. G. Wertz, of Sioux City, and W. A. Hartman, of Winterset.

\* \* \*

A "turkey trot," the first show of the kind ever held in the United States, was pulled off at Cuero, Texas, on No-

vember 26. Great crowds of people, including the governor of the state and other notables, gathered in Cuero to see 20,000 turkeys trot through the streets.

\* \* \*

Prof. N. E. Chapman, poultry expert of the University of Minnesota, is trying to interest the farmers and poultrymen of that state in the matter of increasing the weight of their market poultry. He says: "There are approximately 10,242,000 chickens in Minnesota. Feeding them until they weigh one pound more will add \$1,000,000 to their value."

\* \* \*

Members of the Salt Lake City, Ogden, Provo and Logan (Utah) Poultry associations are agitating the matter of forming a state association to work for the improvement of the poultry industry of Utah.

—o—

## SECOND NATIONAL EGG-LAYING CONTEST.

Six Hundred Hens from United States, Canada, and England Make a Good Start.

The second National Egg Laying Contest began at the State Poultry Experiment Station at Mountain Grove, Mo., November 16th, 1912. Six hundred hens from many states, Canada and England are represented. Also one hundred hens are used in a feeding experiment and the results will be announced each month. The exact formula for each method of feeding will be announced later, one announced each month.

Most of the pens which have not laid this month contain pullets which are not mature. The total egg production for the fifteen days was 739 eggs, and Silver Wyandottes made the splendid record of 60 eggs for fifteen days. The English pen of White Leghorns was second, with 41 eggs. This pen of Leghorns was many days on the road and began laying in less than a week after they arrived. They are the busiest lot of chickens we ever saw. They are so active, so busy, and such hustlers that it is really interesting to watch them. The pens are nearly all of much higher quality than last year. As the birds become accustomed to their new quarters, and as they mature, they will begin laying and change the standing of many of the varieties and pens. The birds are all much younger than they were last year.

Since January 1 there has been more than 4,000 people visit the Experiment Station and inspect the method of conducting these contests, and our other experimental work. These people registered from thirty-six states, Canada, Cuba and Scotland. We hope to make the present contest more interesting, beneficial and helpful than the first one. A more careful study will be made of the details, the type and measurements of a hen, etc. We have several pullets bred from last year's best layers and we will see what these are able to do compared with their mothers' records.

Additional prizes are being offered from time to time. The Missouri Branch of the American Poultry Association offers the following cash prizes: For the best record made by a pen from a member of the Missouri Branch:

- \$7.50 for best pen record.
- 5.00 for second best pen record.
- 2.50 for third best pen record.

The lowest temperature for the month was 20 degrees above zero and the highest 66 degrees.

## S. C. WHITE and BUFF ORPINGTONS, S. C. W. and BUFF LEGHORNS, BUFF ORPINGTON DUCKS

Our first S. C. White Orpington cockerel winning A. P. A. medal best cockerel in show and our first S. C. Buff were the talk of the show at Palace Show, New York. Exhibition and utility stock and eggs.

Dunrobin Farm, A. B. Dalby, Owner, Red Bank, New Jersey

## White Rocks

Early's White Rocks made a wonderful record in Hagerstown, the greatest Eastern show, by winning all five 1st prizes and all specials offered for White Rocks. 1st and 5th cock, 1st ckl., 1st and 3d hen, 1st and 3d pullet, 1st pen, special for best White Rock male and special for best White Rock female. Read this over again and just stop to consider what quality it took to do this. This is my latest winning, but I can show winnings for years. My 1st ckl. at Baltimore, also A. P. A. special for best ckl. in American class is only one of many sensations my birds have caused. Write me your wants. They have won for me and can do it for you. Mating list ready Jan'y 15th. Will sell eggs this season from best pens I ever owned, and at prices that will be within reach of all. Mention A. P. J. when writing.

A. R. Early : : : Roslyn, Maryland

We live in deeds, not years; in thoughts, not breaths;  
In feelings, not in figures on a dial.  
We should count time by heart-throbs. He most lives  
Who thinks most, feels the noblest, acts the best.  
Philip J. Bailey.

**T**HE OLD ROMAN DIETY, Janus, for whom our first month is named, is represented with two faces looking in opposite directions, and it is stated that for this reason the month was named in his honor, since, from its place in the calendar, it might be considered to be looking at the same time backward into the past and forward into the future. Consecration of the day took place by offerings that were new, and by the wiping out of old feuds and enmities. Today after centuries of time, at the beginning of a new year, we continue to look in both directions in an effort to better meet the conditions of the future. No one of us undertakes a new thing without some thought of betterment by so doing, and in all new undertakings the experiences of the past should prove of great value in its accomplishing.

Recently, a reader who is interested in the story of Mrs. Farmer, as told in this department a few months ago, writes that with all her best efforts bent on compassing her daily round of duties as housewife, mother and general manager of her small home, she feels more and more her inability to meet the demands made upon her. She writes, "There are not enough hours in the day, not enough strength in the body, not enough wisdom in the head for me to half do the things I should like to do for my little family of husband and three little ones."

There may be consolation for this conscientious mother in the fact that many other mothers have been, and are, similarly situated. A mother of small children finds many times, during this precious period, when there are "not enough hours in the day, not enough strength in the body," and especially "not enough wisdom in the head," for no adult has ever tried to cope with the mind of a child, as its director, without feeling a woeful lack of wisdom. But from this mother's written word we may be sure of one thing, whatever else there may be lacking,

there is love enough in her heart, and this will cover a multitude of sins of omission in other directions, for from this love of home and family all domestic virtues spring. Probably no greater good than this can come to man or woman, that of being a part of some family, of filling a niche in a family circle. To miss this tie, this brotherliness which comes only through family association is to miss one of the most vital things of life. It may mean a life of service of sacrifice, of apparent small accomplishment, but it is worth the cost. Have you not seen a man or woman who lived a life apart from others and who could see so little good in the world that the only wonder was that they continued to live in it? A week of this mother's life with her little family, would put a new meaning into the art of living for such unfortunate individuals. It would teach them that co-operation in work or in play is a very vital part of every sane person's life. We cannot live for ourselves alone, without losing that which we seek. It is the teamwork that we do with our associates that develops the best there is in us. Without it we are, at best, but warped one-sided individuals. Any work with or for those we love is a step toward better work and greater accomplishment. It may uncover our limitations, but it will prove one of the best incentives to conquer such handicaps. For the mental attitude in such matters acts as a tonic on physical disability until with the belief and determination that we can accomplish certain things, we are able after many trials to do so.

It is frequently said that in America, at least, the habit of unrest and dissatisfaction has established itself as a part of the very life of the people. Such a habit when carried to excess becomes a vice. It robs the individual of any powers or abilities which he may possess, it weakens his purpose in life and demoralizes his mental capacity until he finds himself unable to carry through

anything which he may undertake. There is nothing which will more surely prevent such a condition of affairs than a deeply rooted interest in some regular employment which brings comfort and pleasure for those we love. The little woman who has "not hours enough in the day," although she is overburdened with care and responsibility, and undoubtedly is much over-worked, may be sure of one thing, that she has not for a moment lost sight of her purpose—that of doing her best for her home and family. That she is unable to compass her round of daily duties is a small matter in comparison. She may well look backward into the past with thankfulness for love of home and family and peering into the future foresee all the good that co-operation in loving service in the home, in useful work wherever it may be, foretells.

#### Parsley Omelet.

By H. A. L.

Break six eggs into two bowls, whites and yolks separately, beat until light, and add salt and pepper to season and a heaping teaspoon of finely chopped parsley. Place two ounces of butter in an omelet pan and when hot, pour in the omelet mixture. Allow it to finish cooking over a gentle fire, rolling it carefully as it browns. Serve immediately on a hot platter.

#### Bananas en Casserole.

By E. R. W.

Select good bananas, skin and scrape off the coarse fiber. Cut into quarters and dust lightly with sugar. Roll in flour and place in layers, with a little butter here and there in a casserole. Bake until the bananas are soft. This will require about fifteen minutes in a hot oven. Serve with a lemon sauce made by boiling together three-fourths cup sugar, one-quarter cup boiling water, juice of one-half a lemon. Serve hot.

#### Plunkets.

By J. C. B.

Cream one cup of butter and gradually add to it one cup of sugar. Beat

## Covert's Barred Rocks Win

CHICAGO, 1912

In the largest and best class of Barred Rocks ever brought together either east or west, 393 birds in all. First cock (29 in class), first and fifth hen (79 in class), second cockerel bred hen. The first and fifth hens are the same birds that won last year as pullets. I have also won at Buffalo, Cleveland and many other large shows during the past five years, demonstrating I have been and am producing exhibition quality for I raise all the birds I exhibit. My matings this year will be superior and I can supply your wants in either stock or eggs. Ten grand pens cockerel and pullet matings. Send for mating list. I guarantee to please you in your dealings with me. Write today, mention A. P. J.

**Covert Barred Rock Farm : Willoughby, Ohio**

the whites of six eggs to a stiff froth, the yolks of six eggs until light and creamy, then beat together. Add the beaten eggs gradually to the butter and sugar mixture, alternately with a half cup of flour, three-fourths cup of corn-starch and two teaspoons baking powder. The dry ingredients should be sifted together once previously. Add a teaspoon of vanilla and bake in muffin rings, well buttered. A few chopped nut meats or chopped dates may be added to the mixture if desired.

#### Dropped Eggs in Cream.

By J. C. B.

Place one-half a cup of sweet cream in the chafing dish, and when it begins

to steam, break six eggs in the cream. Sprinkle slightly with salt and pepper and cook slowly for ten minutes. Serve on triangles of buttered toast.

#### Delicious Orange Cake.

By J. C. B.

Sift one and one-half cups of sugar and cream three-fourths of a cup of butter with it. This can best be done with the hands, as the mixture should be very light and creamy. Add the well-beaten yolks of three large fresh eggs and one and one-half teaspoons of orange extract, then add alternately one cup of rich milk and one and one-half cups of flour which has been sifted several times, with one and one-half

teaspoons baking powder and one-half teaspoon salt. When this has been properly mixed, fold in the stiffly beaten whites of three eggs and put in pan to bake, taking care to have the mixture higher around the sides of the pan than in the center. Bake in a moderate oven.

#### Molasses Candy.

By J. C. B.

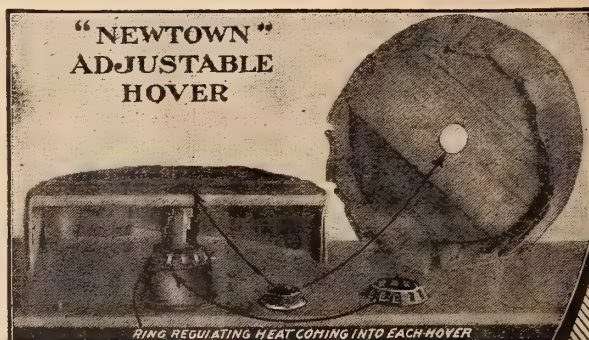

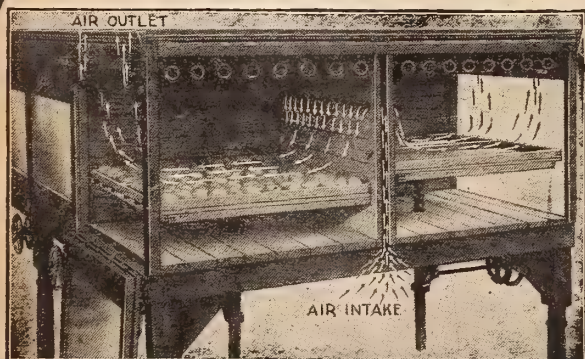

Two cups molasses, one cup sugar, one-half cup butter. Mix and boil until it will harden in cold water. Turn out on buttered plates; when cold enough pull until it is a light yellow; twist it and cut with the shears. This is nice, and will not stick to your hands or teeth.

## Hatch Healthy Chicks And Keep Them Healthy

## Use The Newtown "Giant" Incubator and Brooder

Leading  
Poultrymen  
Are Using

# Newtown "Giant" Systems

### The Newtown "Giant" Incubators Give Chicks Pure Warm Air

"Newtown" Giant Incubators hatch the most chicks with vitality and strength to live, because they furnish proportions of heat, fresh air and moisture as near like those supplied by the mother hen as is possible.

Look at the picture above. See how the pure fresh air is drawn into the top and back of the egg chamber. This fresh air cannot chill the eggs, because it is warmed before reaching them by the heat from the pipes at the top. Gases and impure air escape through the ventilating holes above the door of the egg chamber, which insures the chicks always having oxygen-laden air from which to gain strength and development.

Because of the tightly closed bottom moisture cannot escape, but remains in the air, preserving the liquid part of the egg and aiding greatly in giving the chick its health and freedom.

### Heat Regulated, Top Raised and Lowered in Each Newtown Hover.

In the Newtown Brooding System fresh air is drawn through holes into the pipe box, is warmed by the heating pipes and rises through the radiator of the hover. The temperature is regulated in each individual hover to suit the age of the chicks, by simply moving the cast-iron adjusting ring of the radiator.

Hover top is raised and lowered on the graduated steps of the radiator, giving chicks of different sizes the room they require. Week-old chicks may be placed in one hover, two weeks old in the next and still older ones in another hover.

These special hover features are found only in the "Newtown" Brooding System.

### Other Systems Being Supplanted

The great features of pure, fresh, yet properly warmed air, with just the right amount of moisture in the incubator, and the individual heat and space regulation in brooders, are rapidly causing other systems to give way to the Newtown. The Newtown plan is the key to scientific hatching and brooding. Investigate before you buy.

# Raise Early Chicks Indoors

**POSITIVELY—absolutely**—there is no other brooder that is in the same class with the Cyphers Paradise for successfully raising chickens in the winter time and early spring—doing so with safety, comfort and economy. Every owner of a Paradise Brooder knows this because he has found it out by actual experience. Read the reports below—in brief form—and send to us for more like them.

## Sample Reports From Customers

### Her First Year's Experience

Smyrna, N. Y., Sept. 14, 1912.

Cyphers Incubator Co., Buffalo, N. Y.

I purchased a Cyphers 244-egg Incubator last spring and in three hatches from 625 fertile eggs, I got 553 strong, healthy chicks. When chicks were 36 hours old, I placed them in a Cyphers Paradise Brooder and cared for them in it until they were two weeks old.

I have placed as many as 197 in the base section of my "Paradise," taking care of them there until I could get home-made brooders to put some of them in, although 50 in one compartment were as many as could be taken care of to best advantage. The 197 I left in only part of a day.

The Paradise Brooder is in my opinion the best indoor brooder made. I can care for one hundred chicks in it as easily as twenty-five any other way. I am well pleased with the square dealing and fairness of Cyphers Company. This was my first year's experience with artificial incubating and brooding.

MRS. F. J. ROYCE.

Shows Two Four-Section, Eight-Compartment Paradise Brooders In Use. Sold In Single Sections, If Desired. Each Compartment Holds 50 Or More Newly-Hatched Chicks.

### "Would Have Been Money Ahead"

Kilbourn, Wis., Sept. 6, 1912.

Cyphers Incubator Co., Buffalo, N. Y.

In regard to the Paradise Brooder, I consider it the only truly successful brooder for handling baby chicks in the early part of the season. While it was cold and wet I kept no records of the number run through mine, but don't think that we lost over one-half dozen chicks in our Paradise Brooder during the three months it was in use. We took the chicks from the incubator, the next morning after hatching, put them in our Paradise Brooder and kept them in same three weeks, then moved them to outdoor brooders where they did very well. Expect to install a No. 3 Standard Cyphers Incubator for next season. We expect to equip our place with Cyphers goods entirely as fast as we can. If we had started with Cyphers Incubators, Brooders, etc., we would have been good money ahead.

G. H. PRITCHARD.

### "400 Chicks In 15 To 20 Minutes"

St. Charles, Ill., April 16, 1912.

Cyphers Incubator Co., Buffalo, N. Y.

Replying to yours of the 13th regarding my experience with the Cyphers Paradise Brooder, will say I would not exchange it for any other brooder I ever saw—in fact after using it I would not accept any other make of indoor brooder as a gift, if I had to attend to it myself. With the Paradise I can take care of 400 chicks in 15 to 20 minutes. I can run in just before I go to bed and in a minute's time make sure that every chick is in perfect condition, or can soon make him so. Have kept chickens in it with fine success nearly three months, but realize that the brooder is not intended to hold the chicks that long. Speaking from personal experience I do not believe that there is another brooder in the market that is anywhere near the equal of the Paradise.

C. B. SANDFORD.

### "Very Great Success With It"

Freeport, N. Y., Sept. 22, 1912.

Cyphers Incubator Co., Buffalo, N. Y.

We use your Paradise Brooder and have had very great success with it. I placed all my day-old chicks in it and gradually advanced them to higher sections, according to their age. Have had 75 in each compartment at a time, up to say two weeks. Then thinned them out and now I have quite a number of my pullets laying from my January and February hatches. The birds are fine and handsome and admired by all who see them. We are not selling our pullets because we are raising from 3,000 to 5,000 pullets, our object being broilers and eggs, and so far we are thoroughly satisfied with results from your Incubators and Brooders.

FREEPORT POULTRY FARM,

W. H. Wood, Manager.

**PLACES TO USE:** THE PARADISE BROODER can be operated with success in a dwelling house, store room, stable, poultry building or other structure where the temperature does not go below freezing. It will give excellent satisfaction in any of these locations. No better or more convenient place can be found than near a window in a room of an ordinary dwelling—a south or east room preferred, where the sun will shine in on bright days. FOR DETAILED ILLUSTRATED DESCRIPTION OF the Paradise Indoor Brooder (heated by coal oil stove or by gas) write today for our 1913 Complete Catalogue and Poultryman's Guide, "Profitable Poultry and Egg Production." 244 pages, 7½ x 10 inches, 500 instructive illustrations. FREE on request. Fully describes our more than 100 standard poultry articles for progressive, successful poultry raisers. Address place of business nearest you.

# NOTES FROM ENGLAND

CONDUCTED BY

MISS CAREY, TOYNTON RECTORY, SPILSBY, ENGLAND

## THE OUTLOOK FOR THE POULTRY FANCY.

FROM all sides comes the story that 1912 has not been one of the best years on record among the majority of poultry fanciers abroad and at home. In America the intense cold of the early spring proved to be the undoing of many broods of early chicks, and England suffered greatly from a long, wet dismal summer, the worst on record. This spoiled the corn crops in many parts of the country, which in turn raised the price of food stuffs and depressed trade all over agricultural areas. A pronounced labor unrest, together with the increased cost of living, has had a marked effect on the amount of money at liberty to be expended among those who hitherto ran poultry largely as a hobby, and in consequence many exhibitors could not afford the advertisement of a good win and had to be content to show a few of their best birds or to leave the exhibition alone for a season.

But once again, already, is the pendulum on the return swing, as depression of this kind rarely lasts and with the coming of 1913 fresh and brighter prospects seem to be in the air. It rests largely with the vast body of fanciers themselves to pull matters around to their former briskness and prosperity.

It should not be lost sight of for one moment that the poultry industry is one of the largest of the great natural industries of each country, that on the egg yield depend vast hosts of the population for a great deal of the cooked food and manufactured foodstuffs, and

that the egg market of any country is never likely to decline. Few countries with a large population can cope with the demand. Millions of eggs have to be imported into England each year to supply the market and as long as a market is good there must be a permanent demand for stock birds and, above all, for good winter layers and good table fowl.

In order to be a successful poultry farmer two things are essential: first to have a breed that can and does produce one of the highest egg records in the country, especially during the winter months when eggs are high, and a breed that can at the same time give you in the cockerels hatched one of the finest table birds and then to go out and back your breed by facts before the world, not as individuals alone, but shoulder to shoulder with all fellow-fanciers in the same variety. It is largely for this object that our clubs are formed. It did not take long for fanciers to realize that individual effort in keeping a good breed before the public notice was usually too expensive, but that by throwing small subscriptions into a common pool, a fund of several thousand dollars could be quickly raised with which, backed by a force of determined men with a good article in their hands, no limit could be put on what they might accomplish.

Here and there from time to time we find a breed waning slightly in popular-

ity and trace the cause. It may prove perhaps that the breed is only adapted to laying and can only show profit on one side of the account, but if it is a good all around breed, one with a double string on its bow as an egg producer and good marketable bird, one has usually to look to the club as the cause of decline or to the breeders themselves. It may be they have during a time of unusual success grown careless in their efforts of popularizing the breed, for nothing tends so easily to more certain ruin than too much success, unless those responsible are ever looking ahead rather than to the immediate gain of the moment. In such cases prompt measures by leading breeders will usually result in pulling depression round by some big movement.

The fact that some breeds are favorites with many of the most prominent breeders of the day the world over, is proof sufficient of merit which makes popularity, since hard-headed men of business do not take up a useless article as a rule and place money to the extent that money has been put into the popular varieties unless they see something in the innate qualities of the breeds that are bound to last and hold out through any temporary spell of depression in trade and regain its own against any short boom or purely fancy article. The only class of boom that breeders need to guard against are those on breeds that have been in existence many years and had once a short popularity quickly lost and then again years after brought to the front and boomed once more. Look at the past history of a breed on the boom, and it is not difficult to foresee its future.

## CROWTHER WINS AT CHICAGO

AGAINST THE BIG BREEDERS OF THE EAST, SOUTH AND WEST

In two of the great Chicago shows we have won second, fourth and two fifths on cocks; two firsts, fourth and fifth on hens; first on cockerel; first and fifth on pullets; first, second, third and fifth breeding pens; best color on male; best shape on male; best color on hen; best shape on female twice. Our 1st prize hen of this year, the greatest S. C. hen in the world. Write for our free mating list, it tells the story. Please mention American Poultry Journal.

**Ira M. Crowther : Box A : Willoughby, Ohio**

## GREAT CHICAGO WIN

The only exhibitor in Black Orpingtons to win on cock, hen, chl. pullet and pen. Not one good bird, but many. We won on both old and young birds on males as well as females. It will pay you to consult the SPECIALIST for your wants. Don't fail to write for

### Our Grand New Catalog

Every statement guaranteed. Price list complete on both eggs and stock. Get a start with our great Winter layers; they will please you. Ten pens of choice stock already mated for the egg trade. Write now, and remember our catalog is free.

**Blue Ribbon Poultry Farm, Box A, Columbus, Indiana**

## GOOD TO KNOW

by C-W Zimmer

Happy New Year.

Turn over a new leaf.

Remember it is now 1913.

Well begun is half done; start right.

We wish you a prosperous year and trust A. P. J. will be the means of assisting you in this prosperity.

The Chicago show was the quality show of the west.

Reese V. Hicks, S. T. Campbell and T. E. Quisenberry were some of the prominent officials of the A. P. A. who attended the Chicago show.

Detroit seems to be the popular meeting place for the A. P. A. convention in 1913.

E. W. Groves, Clayton, Mo., had a grand exhibit of White Leghorns at the Chicago show, where the sprightly Leghorn was out in all her glory. Three hundred and fifty-five birds, each one conditioned and groomed into the pink of condition. To win a place here was indeed an honor and Mr. Groves captured three first prizes and several other places. He issues the handsomest catalogue ever published by any breeder, for which he charges fifty cents. It is well worth the price and if you are interested in Leghorns you should send for it.

Sunswick Poultry Farm, South Plainfield, N. J., are concentrating all their

efforts to producing Quality Buff Orpingtons and Buff Orpington Ducks. In order to supply the demand for baby chicks and ducklings they have recently installed a mammoth incubator.

Frank E. Hering, South Bend, Ind., exhibited some exceptionally fine Silver Campines, winning first cock, first pullet, second hen, on three entries. These birds were pronounced as "ideal" by competent judges. Mr. Hering is fortunate in owning three such fine specimens of this variety in which good birds are scarce.

Robert D. Parmenter, Knoxville, Ill., had some fine White Leghorns at Chicago Show and won consistently, all along the line, winning more points than any other exhibitor; also special for three best cockerels.

Star Egg Carrier and Tracy Mfg. Co., Rochester, N. Y., had an attractive exhibit at the Chicago Show. They had among other novel and practical devices a board box for shipping baby chicks, which is so arranged as to make it impossible to smother them, and at the same time they get plenty of ventilation without draft. This shipping box will interest every one who ships baby chicks.

Among the many prominent breeders that attended the late Chicago Show were the following: Jno. Arnott, of Sunswick Poultry Farm, South Plainfield, N. J.; W. D. Holterman, Ft. Wayne, Ind.; Chas. G. Pape, Ft. Wayne, Ind.; Dr. Smith, of the Iowana Farms, Davenport, Ia.; Mr. Aldrich, Sr., of the Aldrich Poultry Farm,

Columbus, Ohio; Chas. A. Sweitzer, Cleveland, Ohio; H. T. Marshall, Serena, Ill.; Truckenbrod Bros., Mendota, Ill.; A. C. Hawkins, Lancaster, Mass.; Maurice Delano, of the Owen Farms, Vineyard Haven, Mass.; Besuden Bros., Cincinnati, Ohio; Geo. H. Rudy, Mattoon, Ill.; N. P. Easling, Pekin, Ill.; Robert I. Parmenter, Knoxville, Ill.; E. W. Groves, Jr., St. Louis, Mo.; A. E. Martz, Arcadia, Ind.; D. M. Covert, Willoughby, Ohio; Guy Daily, Jeffersonville, Ind.; Chas. V. Keeler, Winamac, Ind.; H. B. Hark, of the Sheffield Farms, Glendale, Ohio; F. E. Harrison, Menominee, Mich.; Ira M. Crowther, Willoughby, Ohio; Eugene Smith, Aurora, Ill.; W. C. Pierce, Carmel, Ind.; Carl D. McCarthy, Kempton, Ind.; T. C. Cleveland, Morgan Park, Ill.; Carl Carter, Columbus, Ind.; W. Etzenberger, Willoughby, Ohio; G. Earl Hoover, Mathews, Ind.; Prof. Stoneburn, Philadelphia, Pa.; Harry M. Lamon, of the Bureau of Animal Industry, Washington, D. C.; Robert H. Essex, Buffalo, N. Y.

### Bourne "Bignum" Poultry Band

Just out for poultry; great success for pigeons.

Patent applied for.

Send for free sample and trial offer. Number shows ten feet away, best band out. First to use numbers you can see. Numbers from 1 to 100 in white, pink and light blue backgrounds. Sizes for Bantams, Leghorns, Rocks and Reds. State Size wanted.

Bourne Manfg. Co., Box M, East Saugus, Mass.

### THE FAMOUS "IDEAL" TRAP NEST

Shows which hen laid the egg! Most efficient; easiest to install and operate. Progressive poultrymen everywhere use them. Practical for you or your money back. No watching! No freight! No freight! Plans, Traps, Bands, Record Sheets. Write now for prices and proof.

# The Darlington Laying Houses

By Alfred P. Edge

**S**O MANY have written asking for a detailed description of the Laying Houses as described in the April issue of the Item that I concluded the quickest and easiest way of reaching the most readers in the shortest time would be to use the columns of American Poultry Journal. I do not wish any one to think for a moment that I have the best and only house suitable for the purpose, but I do want every one to know that I think I have—that don't sound a bit stuck up, does it? And before concluding, will try to tell you why I think so.

The house I use is 160 feet by 16 feet. I prefer this size, it is necessary to load and unload at each end of house and it makes a pretty long carry. Again, this size will comfortably house 1,500 laying hens, I would not advise carrying more than this in one flock. Never carry all your eggs in one basket—the handle might break.

The great aim of every egg farmer

stuff, on this lay cheap building paper to close cracks, on this your second floor, one-inch barn boards will do; use will make it as smooth as you want. The last floor runs lengthwise of building; now you have a complete solid platform on which to build your house proper. Set up your studding on your floor, mine are 5 feet back and 7 front, this regulates the height in the clear, also pitch of roof. Make it what you prefer, as I am a little fellow, this suits me. Some of my visitors have to stoop, but that is their lookout.

On the studding lay your plate. I use same size stuff for plate as I used for the studding. On the plate comes your rafters. I had plenty of 3 by 6, but 2 by 10 will do. Sheathe on your rafters, sheathe back and ends from ground up, cover back and ends with 1-ply roofing, letting it come up on roof, say, 3 inches. The sheathing finishes flush at back with no overhang of roof. Use 2-ply on the roof and let it come

sing it. Say it after me. ALL THE AIR POSSIBLE, BUT NEVER A DRAFT. That's right, I never told you a truer thing.

The dropping boards are 3 feet from floor. The perches are built on movable runners, 5 inches above the boards. This prevents the hens from running on boards and soiling a nest full of eggs. The perches hook up to the roof for convenience of cleaning.

Even if your mother-in-law wants glass windows and wants to pay for them, be firm, NEVER have a glass window in the laying houses. The lower story or basement is used as a winter run and the front is covered with 2-inch mesh chicken wire. They get into the lower story from four openings in the floor under the outside edge of the dropping boards. These openings are 2 by 3 and are boxed in 10 inches above the floor to prevent litter from falling through. Here the hens have a warm place for exercise in the winter and you will find they are traveling up and down all day long. It also adds to their floor space. With the 9-foot partitions every 20 feet you have a 7-foot passageway down the whole front of house. It is a good plan to box in your two end doors, so that when the door is left open the birds cannot get out.

My watering arrangements are simple and a great labor saver. Make a 6-inch rain spout and set it up level, supporting it on your studding at front of house, about 2 feet from floor, this prevents litter from getting into it. Run a small platform under it the right height for hens to drink. Have both ends of trough closed and at lower end have a small opening to empty through floor, closed with a plug. In the morning fill trough and your 1,500 birds are watered in 5 minutes for the day. At night take out plug, run a broom through the spout and it is clean for the next day. My first spout was of tin, but mixing chemicals in the water soon ate it out, and it is now made of copper. Compare this with your 8 gates, 8 pens, and 8 water vessels, to be cleaned and filled each day and tell me where is that "Clam!"

Now what are the advantages of this kind of a house? In the first place, you can carry several hundred more hens in the same house; one man can take care of many more birds in the same time; you have a much drier house than where it is on the ground level and if roup ever gets amongst your birds you will appreciate this. If you want to realize the truth of this, go into your lower story on some ugly day and compare the temperature and humidity with that of the upper. The dropping boards are cleaned every day; it becomes a simple operation in this kind of a house. The boards are cleaned into a barrow which is wheeled from end to end and at the lower end of each house is the manure pit where it is dumped. No gates to open, nothing to interfere. So it is with all the operations necessary in the house.

What are the disadvantages? I know of but one. Difficulty in cutting off an ugly southeast wind from sweeping through your house, but the partitions every 20 feet, running out into the house prevent this in a great measure, also the 3-foot closed solid from floor up, in front. There come days when it is necessary to close your muslin frames in front at lower end of house. Here is where you are expected to use your brains. The reason you can carry

Type of laying house on the Darlington Egg Farm, Alfred P. Edge, Proprietor Box B, Darlington, Md.

should be to economize as much as possible in his labor bill. Many egg farms that have proved a failure, I believe if the truth were known, could trace their fall to their labor bills. Therefore make all your arrangements so one man can care for the greatest possible number of birds, put in every labor saving device that does not cost too much. Understand this article is written for the beginner, I do not care three cents for you old "hacks" who know it all, or think you do. I would rather be the means of saving some beginner from making a costly mistake than—well, than to run on the same ticket with even "Teddy"—now you know my politics.

The finished house has no gates, no pens, all is open from end to end. In building, the first thing to do is to set two lines of posts, 3 feet in the ground, 8 feet apart, these carry the house and are cut to line, say, 5 to 5½ feet high. On the posts are laid sills, about 3x4, on sills lay first floor cross-ways, a girder should run down middle of house lengthways, this is supported on posts resting on flat stones. This is simply to carry spring of floor, it saves the need of expensive joists.

The first floor can be any old rough

down the back 3 inches which closes the joint from any possible draft from the northwest.

You now have a completed shell that is tight and warm save the front, which is due south. Close up front solid from floor to such a height as to leave a 3-foot opening the whole length at top. I close both corners solid to the roof for about 6 feet at each end to stiffen building. Hang 3-foot frames, 9 feet long from plate, hinged to same and opening in and up. These are covered with muslin. The amount of open front must be regulated by your climate. Last winter one night here it registered 16 deg. below and several nights were 6 deg. below. My whole front was of muslin frames and I did not have a frosted comb.

At every 20 feet run a solid partition out at least 9 feet into the room. This is to cut off draft lengthwise as in a long house it becomes a regular funnel for draft. This is the great objection to a long house with birds in one flock. Remember a draft is fatal to your birds and must be guarded against at all times. Give them all the fresh air you can without draft. I will say this again before I am through and if I cannot make you believe it that way, I will

so many hens in this house is that though they have a limited floor space per hen, yet each hen has the use of the whole 160 feet. Do not make the mistake and think that because the 160 feet is room enough for 1,500 hens that 80 feet will be ample for 750, as it will not. Now I hear one of your old steady standby's say, "You can't get as many eggs per hen from your large flocks" as you can from your small flocks. (Noah said that first.) Well, suppose you can't, how many more eggs must you get to pay that extra man you have at \$30 per month?

This house takes about 25,000 feet of lumber, but when it is done you have something to show. If you don't need 160 feet now, make it less and add to it later. One word more: If at any time I can be of service to a beginner, remember all roads lead to Darlington, where advice is free and you will see a strain of S. C. White Leghorns second to none.

In conclusion, let me say to the beginner, look after your breeding house. This is the most important branch of your farm. Make it right and everything will be right, and above all things, carry your breeders on range. What was it I told you sometime back?

Listen: ALL THE FRESH AIR YOU CAN GET, BUT NEVER A DRAFT!!

### THE ST. LOUIS SHOW.

The St. Louis show which was held at the Coliseum brought to that city the finest lot of birds ever exhibited there. It was the best show ever given in St. Louis due to the hard labor of Henry Steinmesch, T. W. Orcutt, W. W. Henderson and E. W. Grove, Jr.

The B. P. Rock class was very strong, 74 birds being on exhibition. W. W. Henderson, Bridgeton, Mo., won four firsts and several seconds and thirds.

White P. Rocks, 39 birds shown; very strong class also.

Buff P. Rocks, 51 birds shown. Thos. B. Elliott, Wellston, Mo., won most of the firsts.

The Silver Wyandottes were the best ever shown in St. Louis. A. & E. Tarbox, Yorkville, Ill., won 4 firsts, 4 seconds, several thirds and fourths; also several silver cups and 22 other specials.

Columbian Wyandottes, E. Schaaf, 3126 Leola Ave., St. Louis, won most of the ribbons in an entry of 41 birds.

S. C. Rhode Island Reds were strong—E. W. Mahood, Webster Groves, Mo., won 3 firsts.

S. C. White Leghorns were the largest class, 86 birds on exhibition. E. W. Grove, Jr., won 1st cock, 1st hen, 1st pullet, 1st pen, and several seconds and thirds.

S. C. Brown Leghorns were not as strong as in former years, however, the quality was better than ever shown before. Rosemont Farm, Webster Groves, Mo., won as usual most of the prizes. Their first hen, "Missouri Queen," is the best brown Leghorn hen we ever saw.

Among the prominent visitors were Wm. Miller, Crescent, Mo.; Mr. and Mrs. Robt. T. Brown, Springfield, Ill.; George Hartley, Newton, Ill.; Mr. and Mrs. Elmer V. Shultz, Webster Groves, Mo.; Wm. Chamberlain, St. Louis, Mo.; Mrs. C. H. Wilhite, Greenfield, Ill., and Mrs. Kelly, of Whitehall, Ill.

# Here's the Way

## Duston White Wyandottes Win

Dear Sir:—The young man captured first prize in his class and was against a strong entry. He is very fine and we are well pleased with him. . . . of your state had several entries, Wyandotte cockerel included, and took second to our bird. Our bird was much the better bird, being way ahead of the . . . bird which would not have captured even second had it not been for his plumage, etc.

Dear Mr. Duston:—You may be surprised to know that I won at . . . every first in the class which was as follows: 1st cock, 1-2-3 hen, 1-3 cockerel, 1-3 pul., 1st pen and silver cup for best pen in the show.

### AND PLEASED WHEN RECEIVED

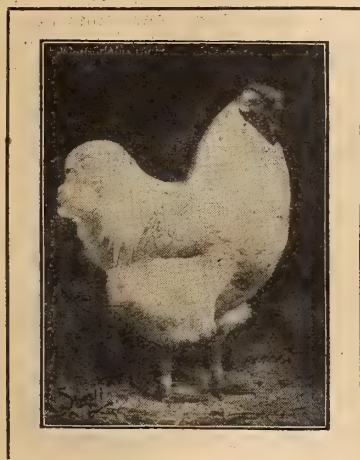

Dear Sir:—Received the pullets o. k. I am perfectly pleased with them and thank you much for the excellent selection you made for me. They are much nearer to standard requirements than any pullets I ever saw and I have certainly seen a few, etc.

Dear Sir:—The birds arrived in good shape and I am well pleased with them. Kindly accept thanks for your excellent treatment. I consider the cockerel a bargain, etc.

Dear Sir:—I wish to extend my thanks to you for sending such good birds. They are very satisfactory and much better stock than I expected to get. But I knew I should be well treated as I had a sample of your fair dealing before. After thanking you again for the good birds, etc.

### AND ARE GREAT LAYERS

My Dear Mr. Duston:—You are at liberty to use any part of this letter you please. Sorry, I could not complete year at old stand (party moved from Massachusetts during the record), the record for the fourteen birds is 190, 161, 250, 205, 170, 206, 200, 180, 175, 127, 140, 135, 130, 170, average 174. (I sold these pullets to the Fal and why some were so far behind, I do not understand unless later hatched Duston.)

Dear Mr. Duston:—I was down to the . . . show last Thursday, I won there 1st cock, 1-3 hen, 1st cockerel, 1-2 pullet and 2d pen, won gold special for best exhibit of Wyandottes, all varieties competing. Wouldn't give my 2d pen for the 1st for \$25.00 difference, etc.

### AND BREED WINNERS

Dear Sir:—Perhaps it will interest you to hear what I have done with the cockerel and eight pullets I purchased from you early this year. We are having our show this week and again had Judge Tucker. I won 1-2-3 pullets and 1-2-4 cockerel. Cock and hens in moults, so couldn't show, etc.

### AND EGGS SOLD PRODUCE WINNERS

Dear Sir:—I am very pleased to inform you I have had great success with your stock winning in strong competition 7 firsts, 5 seconds, 5 thirds, 4 fourths, 1 fifth and four cups for best collection this year. There is no doubt you can supply the stock to beat any you can get, etc.

Now, friends, these are all features you are looking for in your flock. Are you getting them from the one you have? Are you just starting? You want to start right for it's easier to start right than get right after a wrong start. Remember it's the specialist that knows the breed and how to produce the quality. Remember I am the original White Wyandotte man, and have for years produced winners for the whole broad land. Remember, and this is worth considering, you can only buy from me birds of my own raising or raised especially for me. Remember it's quality I want (and you want, too) let the "other fellow" do the "any old thing." If it's crackerjack stock you want on all the strong lines mentioned above send to me for I have the grandest stock of old and young I ever had. Send 15 cents for beautiful and helpful catalogue to the breeder that has made possible the world's best flock. Please mention American Poultry Journal when writing.

Arthur G. Duston, Box 1020, South Framingham, Mass.

### OXYGEN AS APPLIED TO ARTIFICIAL INCUBATION.

THERE was a time away back in the dim and foggy past when the United States mail was carried in a stage coach. In those days it required ten days to get a letter from Washington to New York. It is not so very many years ago that Alexander Graham Bell, who claimed that he had invented the telephone, was called a fakir, and his telephone a fraud. Within the memory of many who will read this article was the time when those who predicted the horseless carriage were characterized as hopelessly insane.

It is not so long ago but that we can all remember it when people engaging in the poultry business were told that to insure getting eggs in winter they must keep the poultry house air tight and artificially warmed.

All this is now past. Science delving deep into the unknown and supposedly unknowable has made wonderful strides in nearly every field of human en-

school of experience that fresh air is absolutely indispensable in the successful keeping of fowls.

Now, what is air? As defined by the International Encyclopedia, "Air" is a "mixture of gases known as hydrogen and oxygen, 79 per cent of the former and 21 per cent of the latter. With these is also found in small quantities carbonic acid gas, helium ozone, etc." The life giving and life sustaining property is oxygen. It is a well known medical and scientific fact that when the oxygen content of the air we breathe falls below 21 per cent all animal life must suffer. It is oxygen that makes combustion possible. Without oxygen in the air a candle or gas light will not burn. It is through oxygen as a combustible agency that the waste products of the human system are consumed. If you wish to experience the results of a lack of oxygen in the air, shut yourself in a small, tightly closed room for an hour. If you wish to note the results of an abundance of oxygen, observe the bright eyes and red cheeks of your

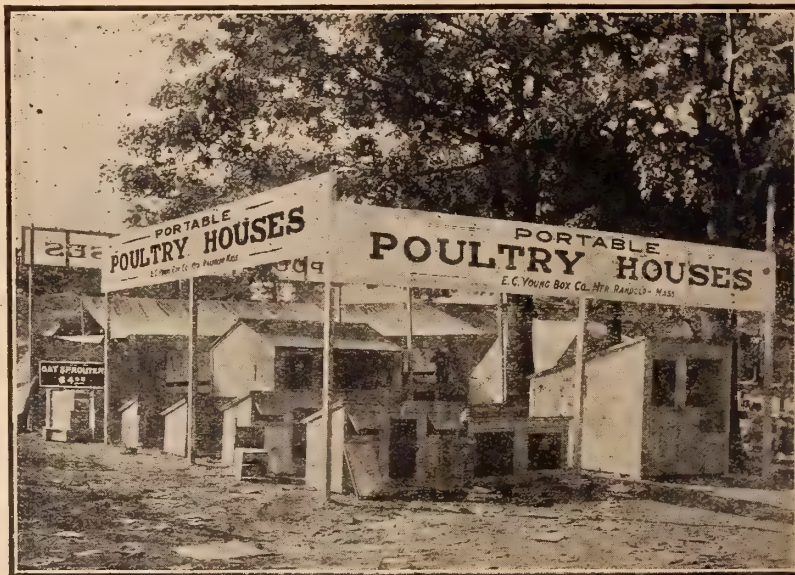

Exhibit of the E. C. Young Box Co., Randolph, Mass., at the Brockton Fair.

deavor, and of course the end is not yet. My dear reader, do you recall your thoughts when you first heard suggested the "curtain front fresh air" houses for poultry? Did you not look upon the suggestion with much credulity, and didn't you say "tommy rot" or something along that line?

I did, and I personally know of scores of good people who said the same thing, and perhaps more forcefully. It seems to be a human characteristic, which knows no denying, that we only believe those things that human experience has taught us to be true. It may be well that this is so, else would we often find fraud flourishing at the expense of a too confiding public.

The poultry industry has not been overlooked by those engaged in scientific research. Incubators have come. They have been vastly improved and without them the poultry business would be in a bad state. We have scientifically balanced rations for our fowls. We know better than ever the value of all poultry foods, and the constituent elements of the egg. Better than all we have learned, through the

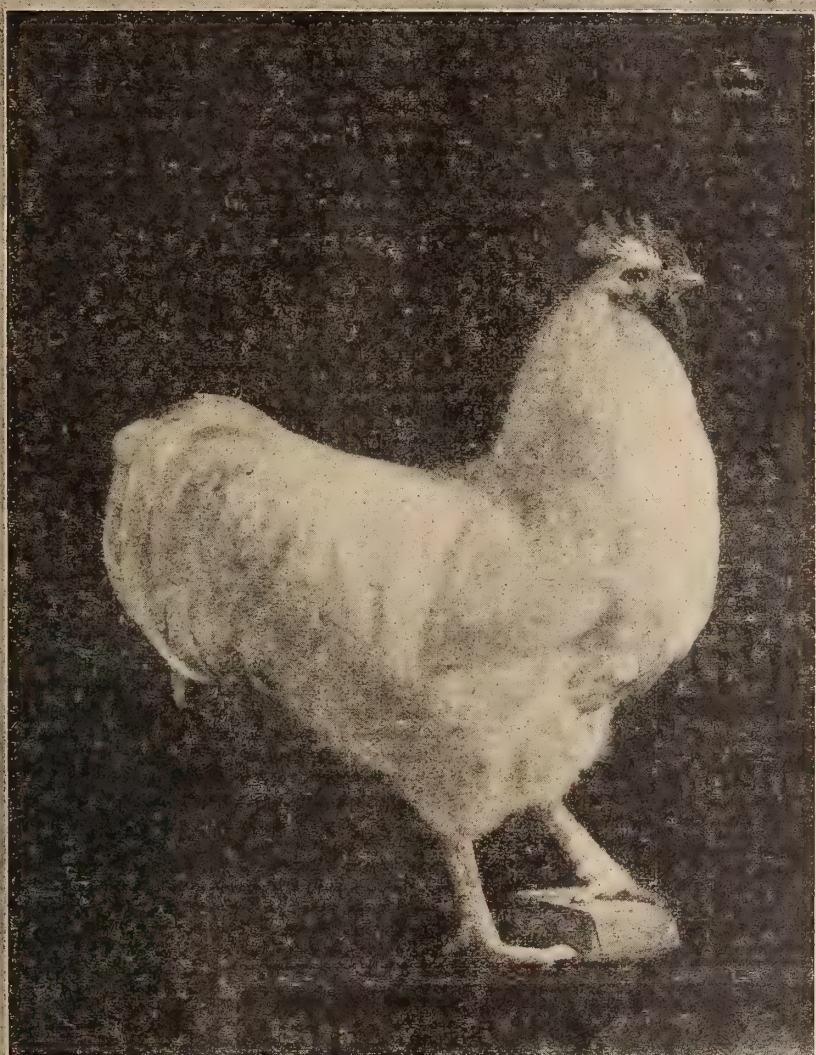

children as they come in from play. If you wish to observe the power of oxygen, watch the results as it is being administered to a patient in the very last stages of dreaded pneumonia. If you want to see the effect of oxygen upon your poultry, go into the curtain front, fresh air house on a cold winter's morning, when the hens are hustling for the morning meal. Snappy, bright eyes, red combs and healthful activity sparkling from every feather tell of a bodily vigor that only comes from an abundance of the life giving oxygen.

With this introduction to the subject of oxygen in general, let us pass to the subject of oxygen as applied to artificial incubation. To begin with, if I could have ten cents for every "dead in the shell chick" taken from my incubators during the past twenty years I am sure that it would make a right snug sum of money. As human experiences are much alike, I believe it a fair statement to make that the money lost to the poultry industry every year through the "dead in the shell" route would run into the hundreds of thousands of dollars. Further, I believe it

a fair statement to make that these losses constitute one of the very greatest drawbacks to successful incubation today. By successful incubation I mean the getting a good big, strong, vigorous chick from every egg in the incubator that on the 15th day shows a fully developed embryo. I am assuming, and I fully believe, that all incubators are good incubators. In this day of development there is not very much difference in any of them in the results that may be secured. I do know that I can put 15 eggs under the good old hen that show 15 fully developed embryos and on the 21st day I will

last two or three days of incubation. You know how you have turned and cooled those eggs with much care from the 3rd to the 18th day. Then you close the door of the incubator and keep it closed until the hatch is complete. During the last three days those baby chicks are trying to break their way into the world. The activities consequent upon their expulsion from the shell has been developing large quantities of carbon dioxide. This is but another name for carbonic acid gas. Confined in a space say two feet square and ten to twelve inches deep are those 140 little fellows working like beavers

There is no prettier sight than a flock of fine White Plymouth Rocks on the velvety green background of a fancier's yard, and when this flock consists of over 1,000 of the highest grade birds of this variety then this sight becomes an unexcelled treat for the eyes of the observer. The above illustration, made from absolutely unretouched photo, shows to perfection the magnificent type to be found in Mr. Halbach's birds. It was an easy matter for this bird to win first at Detroit, 1912. Persons interested in White Rocks will do well to send for his fine catalog. Address H. W. Halbach, Waterford, Wis., Box A.

invariably take off 15 good strong chicks. I also know that I can put (and often have) 140 eggs into my incubator that on the 15th day show full development and on the 21st day find to my sorrow from 15 to 40 per cent of them "dead in the shell." If you will but give this fact a moment's thought, you will be at once impressed that there must be a cause for this condition. There is a reason. It is nothing more or less than a lack of oxygen in the egg chamber during the

to get out. The only air that gets into that egg chamber is that which passes up through the cylinder that holds the lamp, and from that there is a certain amount of the oxygen that is burned out. Such as does get into the egg chamber is not sufficient to diffuse the carbon dioxide with which the egg chamber has become filled, allowing the oxygen content of the air in the egg chamber to often fall as low as 15 per cent. Under these conditions carbon dioxide poisoning takes place, hence the

(Original and Largest Correspondence School of Agriculture)

"dead in the shell" chicks when the hatch is complete. If further proof is wanted as to the existence of these facts, we have but to read the Bulletin of the New York State College of Agriculture, published in December of last year. They say "Oxygen is essential to normal development, the amount increasing with the growth of the embryo. The eggs give off large quantities of carbon dioxide, and this increases as the embryo grows." Stand in front of the incubator when the hatch is progressing and note the panting of the little chicks. They are saying as plainly as though they were shouting it through a megaphone, "Give us air, give us oxygen." As soon as the hatch is completed and the ventilators are opened wide, note the difference. The panting ceases and the chicks lay down to rest after a hard struggle for existence in that poison laden atmosphere.

In that dreaded disease with which human beings are often afflicted, known as Bright's disease, the medical world says that death results by reason of the fact that the uremic poisons in the system are not carried off by the secretions. So I believe we may safely trace the death of little chicks from white diarrhea to the accumulated carbon dioxide poisons that accumulate in the system during the last two or three days in the incubator. In my twenty years of experience in the poultry business I have never known a real case of white diarrhea in chicks that had been hatched under and raised with the hen. I believe, therefore, that "dead in the shell" chicks and white diarrhea are directly traceable to the conditions that prevail in the egg chamber of the incubator during the last stages of incubation.

Surely carbon dioxide is a poisonous gas under the conditions that are found in the incubator, and all animal life must suffer to a greater or less extent when subjected to those poisonous fumes for several days, as little chicks are.

In the spring of 1912 my attention was called to the advertisement of a concern that are making an oxygen vitalizer.

The claims made by the manufacturers were so strong that I could scarcely believe them. I bought the vitalizer, however, and used it. To my surprise and very great pleasure I found it would do all and more than was claimed for it. I found that the chicks came stronger where the oxygen was used and that after the chicks were out there were no signs of white diarrhea. Chicks grew like weeds from the very start, and in fact I secured the best hatch that I ever had, notwithstanding that 1912 was the worst year that I have ever experienced in the poultry business.

As a result of my experimental work I have become fully convinced that the only safe way to avoid the losses that come from the "dead in the shell" chick route, and from white diarrhea, is to use the oxygen treatment. The oxygen vitalizer for baby chicks is only another name for the fresh air poultry houses in which we get such excellent results with our adult fowls.

I am certain that the spotlight of science has found a way to stop the losses that we have all suffered in the

hatching and raising of little chicks. Let the good work go on.

(Signed) Ora Overholser,  
In charge of the Experimental Poultry  
Yards, Eaton, Ohio.

#### TIGHTEN UP THE LOOSE SCREW.

Dr. H. F. Ballard.

I AM glad my article on the "Loose Screw" has attracted attention. I have read all the comments with much interest, but so far without finding one that accounted for the "milk in the cocoanut." I firmly believe it cannot be accounted for. People will answer ads just out of curiosity and we will have to put up with it. I believed all this when I first wrote.

What I wanted to bring out, though it seems I have not succeeded very well, was the fact that no breeder can be at all this needless expense and sell good birds at \$1, \$2 or even \$3 each. These breeders who are doing it are doing so at a loss, and I believe they always find it so, sooner or later, and then they either raise their prices or quit the business, most of them the latter.

How many names of breeders that we saw in the ad pages of the journals ten years ago do we see now? Not 10 per cent! They have become disgusted and quit and their places have been taken by a large number of new—I was going to say "suckers," but that is putting it too ridiculously strong. I believe they do really expect to make a success of it when they begin, and I

OCULUM lessens poultry troubles 50 per cent; a free trial ad page 116.

# Biggest Incubator Bargain of the Year

60-Egg Capacity—Made by the  
Prairie State Incubator Co. Only

**\$8.00**

Think of it! Here is a high grade hatcher, made by one of the oldest and best known incubator manufacturers—in the **LARGEST, NEWEST and BEST EQUIPPED** incubator factory in the world—by a firm who have been "at it 30 years"—for only \$8.

It is built entirely by machinery—every part being perfect—no hand or guess-work about it—thus the highest degree of efficiency is obtained at lowest possible cost.

## No Better Incubator at Any Price

**CASE** is double with cotton batting insulation. Outside is clear Cypress, inside is also wood—not paper, card board or other cheap material as in most low priced machines.

**HEATER** is new design, absolutely gas tight, solderless, all joints double seamed—practically a one piece heater that can never leak smoke into egg chamber. A better heater can not be had in any other machine at any price.

**LAMP** is fool-proof, self-centering with positive clamp. No springs—no adjustment—always fits in place. Can't smoke—always gives clear, bright flame. Easy to keep in order.

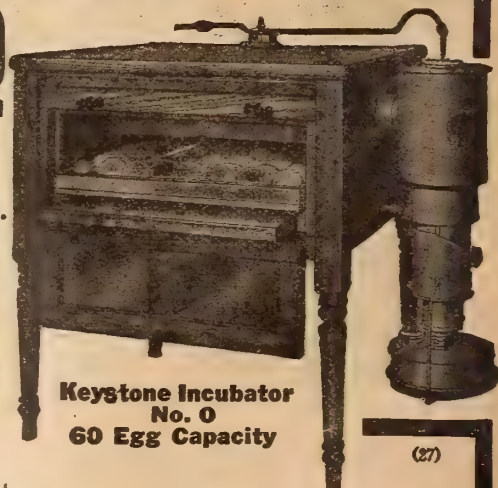

**REGULATOR** is a powerful, accurate steel and zinc thermostat with toggle joint. Nothing better ever invented—nothing cheap and flimsy about it.

**SAND TRAY**—the triumph of incubation—the method of providing humidity that insures "chicks that live." Don't buy an incubator without this important feature and expect to hatch the most "livable" chicks. Covers entire bottom of machine, providing plenty of moisture at all times under all conditions.

## PRAIRIE STATE INCUBATOR CO.

50 Main St.

HOMER CITY, PA.

Keystone Incubator  
No. 0  
60 Egg Capacity

## You Can't Make a Mistake

in buying this high-grade, low priced machine. It is built on the famous Sand Tray Prairie State hatching principle—in fact is a small size Prairie State machine, thus insuring the operator not only the highest per cent hatches, but the **most chicks that live**. Our reputation is ample assurance we would not put out any but the best. Write today for pamphlet fully describing this "Biggest Incubator Bargain of the Year."

am perfectly free to say it is generally their own fault when they fail. So you see, friends, I have opened up a pretty big subject. I intended to when I wrote that article.

We can discuss it all winter, and there will be more to say next spring. Mr. Burr says I may have "overlooked the fact that there are others in the business." Hardly, brother. I do not claim to be the "great and only." I realize there are others besides myself. But you must remember that in my specialties they are fewer than in most varieties. Now if I get 25 inquiries to one sale in an unpopular variety, what must be the condition of things in the most popular?

As for the "attractive literature" Mr. Burr speaks of, I try to tell the truth in my ads and circulars. But most people in this enlightened country of ours do not seem to want the truth, either in poultry, politics or religion.

No, I do not use much "honey." It is chickens I am trying to sell, and I do not believe in palaver.

Neither do I use a typewriter. Hand made or typewritten letters have nothing to do with the quality of a man's stock. Unlike Mr. Burr, I

But I defy any person to show that I ever made extravagant claims for my birds. If I had, I would probably have made more sales and had ten times the complaints. I seldom have a complaint from stock sold, and that fact has been one of the bright spots in my experience. Some of my critics seem to forget that during all this thirty years' experience I have been a buyer as well as a seller, and that I have "seen the shield from both sides," and I will say that my buying experience has been pretty good. Not 10 per cent of my purchases have been failures, because I soon learned who to buy from and stuck to them. Remember that, stick to a good breeder.

The idea that you should change strains every time you want to get a little new blood is a mistake, and if you are breeding Partridge Cochins, Pencilled Hamburgs or other parti-colored varieties you will spoil your color every time. I have sold birds to the same breeders for three to twenty years with very little or no kicking. It is generally the new breeders who make us the most trouble, the ones who expect to build up a big paying business on a \$2 sitting of eggs, or a \$5

Three section portable poultry house manufactured by the Dyer Portable House & Mfg. Co., 4433 North 40th Ave., Chicago, Ill.

should not trust the man's typewriter any sooner than I would him. The easiest gold bricks sold are the ones the finest gilded; that argument don't go with me.

Thanks be, I am not depending on poultry for a living. And I have learned some things in the last thirty years. Enough that the typewritten letter, the big page ad, the brag and bluster, the prize winners bought but not bred by the owner, the man who never has any culls, and the one who has the best in the world, who has been offered \$100 to \$1,000 for his best and refused to take it—this all blows past me and I do not bite—not any more.

I like Mr. McK.'s style and his is mine, but it does not sell the goods.

The Illinois breeder (name not given) who had so much trouble trying to build up a utility strain does not come in my class. All my articles are written from a fancier's, not a utility breeder's standpoint. If I get three good chicks from a fancy standpoint out of fifteen eggs I am perfectly satisfied. A utility breeder with such a result would have a right to kick.

The editor sums it up about right. The extravagant claims of the advertisers and the get-something-for-nothing ideas of the buyers account for most of the trouble.

trio. It can't be done, and they have to find it out by experience.

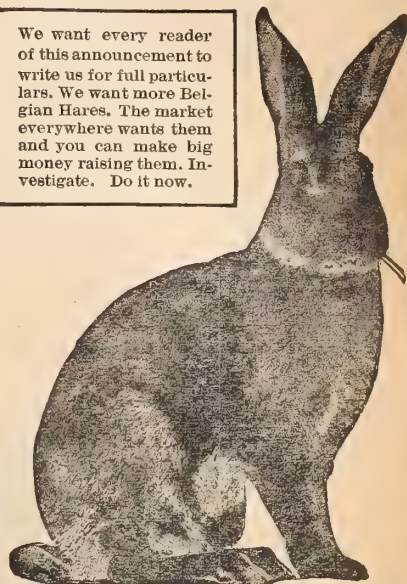

M. E. Pope & Co., of New York City, have issued a handsomely printed, illustrated booklet, "Why You Should Breed Belgian Hares," which is very comprehensive and very complete. It gives a short history of the Belgian Hare, together with articles on the Profit in Dollars, How to House and Feed Them, How to Mate and Breed, Care of the Young, Recipes for Cooking, and Notes on the Hare. The price of this booklet is 10 cents, but it will be sent free for stamp to readers of the American Poultry Journal.

Have you received a copy of the new catalogue of A. E. Martz, Arcadia, Ind.? If not, you should send for one at once, as it tells how things are done by this great Buff Orpington breeder, who in a few short years has built up a most wonderful trade in this popular variety of fowls. Mr. Martz is one of those sound, conservative business men who can be depended upon to do just exactly as he promises, and who, under no circumstances, will have a dissatisfied customer.

Harry W. Atkins, an expert judge, formerly of Huntington, Ind., is now located on the Iowa Farm, Davenport, Iowa.

## MORE MONEY IN Belgian Hares THAN IN POULTRY

We want every reader of this announcement to write us for full particulars. We want more Belgian Hares. The market everywhere wants them and you can make big money raising them. Investigate. Do it now.

### WHAT OUR CUSTOMERS HAVE TO SAY.

The following testimonials are just a few gathered from one month's mail. Read them carefully.

They prove several important points.

- (1) That Pope Hares Always Please.
- (2) That We Ship True Breeders.
- (3) That Belgians Are Very Prolific.
- (4) That True Belgians such as we sell are

Mardy Stock and travel well, even to long distances.

Such testimonials as these prove that when you buy from us you get your Money's Worth.

I received the hares all right on Friday, the 5th. They are fine animals. I've had lots of friends to see them and they speak highly of them.

THOMAS CARROLL, Maine.

The doe came all O. K. and we are greatly pleased with her. We have now a first-class home for our hares. April 6th the doe came. April 16th the young were born—nine good, strong, healthy hares. We feel greatly encouraged and are satisfied we are going to make a success of it.

HICKS & NEAR, New York.

Those Hares received from you are doing very nicely. Doe No. 180 having 5 and No. 186 having 7 young.

G. W. TORNHOLEN, Indiana.

I purchased a trio of Hares from you in February. I now have thirteen young hares 6 weeks old, also another litter about 1 week old. What could you allow me for the young Hares?

H. O. BATEMAN, Massachusetts.

(We bought Mr. Bateman's stock for \$11.00, \$1.00 per pair, and he should get \$15 every three months from his investment in one trio of our Belgian Breeding Hares.)

The doe bought from you kindled the 4th of April and I can spare two does and a buck. They are the finest stock I have ever seen—beautifully colored and extra well grown. The mother doe is far ahead of anything I have ever seen in form and color.

LATHAM HULL, Connecticut.

Had a fine litter of Belgian Hares to arrive today and am well pleased with the animals and results.

A. J. VILSACK, Pennsylvania.

I will now report to you in regard to the Hares. No. 173 kindled on the night of the 18th and No. 184 on the 17th. No. 173 had six and they are all living but one, which was born small and did not live. No. 184 had eight and they are all fine.

IRA H. WATSON, New York.

When you buy from us you get the "Finest Hares that Grow"—Real Genuine Belgians of the Highest Quality—Money-Makers. The Testimonials Prove You Will Be Wise to Buy from Us.

We have issued an illustrated booklet, "Why You Should Breed Belgian Hares," which is comprehensive and complete. It gives you the history of the Belgian Hare, together with facts as to the profit in raising them, how to house and feed them, how to mate and breed, care of the young, recipes for cooking, and many valuable notes. The regular price of this booklet is ten cents, but we will send it to you FREE upon receipt of a postage stamp. Write us today.

M. E. POPE & COMPANY,

Breeders and shippers of "The Finest Hares That Grow." Executive Office 210 West 56th St., New York

# Poultry, Butter and Egg Convention

Sixth Annual Meeting National Poultry, Butter and Egg Association Held in Chicago, October 28, 1912

**A**T the Hotel Sherman in Chicago, October 28, 29 and 30, 1912, there was held a convention which, if not the greatest gathering of poultrymen, was the largest and greatest gathering of poultry buyers ever gathered together. It was the sixth annual convention of the National Poultry, Butter and Egg Association.

This association was started but a short time ago as the National Poultry and Game Association, but it has since changed the scope of its work and now includes poultry, butter and eggs.

The object of this association is to (1) disseminate accurate information among shippers, dealers and consumers of live and dressed poultry, game, but-

differences between the several members and between members and non-members, and to procure uniformity and certainty in trade usages, and of kindred matters relating thereto as they may from time to time arise.

There were delegates from over twenty-five states and an exceedingly large delegation from New York and Boston as well as other eastern markets.

The opening day session was well attended and the meetings were of the usual formal introductory addresses and reports. The reports indicated that the growth of the organization was very healthy and that there were now 447 members in good standing. Of course

and poultry. The opening address was delivered by Mr. A. M. Cochran, Columbia, Tenn., on the subject of "The Poultry and Egg Industry of the South."

Mr. Cochran said in part that the poultry and egg industry of the south was still in its infancy but it was increasing rapidly, having doubled in the last few years. By the south he meant Kentucky and Tennessee, as these were the only two states which were pushing this business on a large scale. At Lansing, Tenn., there was now building a plant which will cost \$25,000 to hold in cold storage these articles. He further pointed out that the best farmers of the south were entering into the poultry business as a branch of their farming operations and he related how one farmer's wife who had sold her eggs and poultry to him kept her tickets until the end of the year and they totaled \$518, which was considered quite a large income from this source alone. He told the circumstances to a member of the local board of trade and the board at once made the woman a present of \$25, and when the local banker heard of it he did likewise. This gave publicity to the woman's efforts and the newspapers took it up so that all of her neighbors began to inquire, "How did you do it?" As a result many in this same neighborhood are planning to do the same thing this winter. The best part of this story is that this woman did this with pure bred fowls. She sold off all her common stock and bought White Orpingtons.

The next address was by Dr. Mary E. Pennington, Chief of the Food Research Laboratory, United States Department of Agriculture, on the subject "Scientific Management in the Poultry and Egg Industry."

In her address Dr. Pennington traced the methods of "scientific management" as formulated and applied by Mr. Taylor in the steel and iron industries, by which methods such help as laborers was reduced from between 400 to 600 to about 140. She said, "The fundamental principles of the management which yielded such results were:

"First, the mechanical processes were reduced to a true science by accurate time observations and the application of physical and mechanical principles.

"Second, the scientific selection of the workmen.

"Third, his education by means of the results yielded by the scientific study of the problem and his continuous development by careful oversight.

"Fourth, intimate friendly co-operation between management and the man."

She then at considerable length explained the methods which she had inaugurated in a poultry handling plant and how by the use of the stop watch many of the operations were considerably reduced in point of time without loss of efficiency.

Next she pointed out how many of the poultry killing plants of the country were poorly located in the buildings which were not adapted for the purpose, which condition was a great handicap to efficient management. Such houses require abundance of fresh air and plenty of light and when these things are missing the work cannot proceed to the best advantage and sanitary conditions are almost impossible. Dressed poultry emanating from such places invariably bears the stamp

ter, eggs and other food products; (2) the advancement and improvement of commercial conditions in said trades; (3) the fostering and strengthening of friendly and co-operative relations between such members in all parts of the United States and the securing to its members improved transportation facilities and just and equitable rates and charges for the same; (4) the education and guidance of public opinion in all parts of the United States to the point of securing the adoption of legislation calculated to foster trade and safeguard consumers, and (6) the settlement of

as such membership is taken out by a firm which in some cases employs numerous travelers and assistants, it is impossible to estimate how far reaching such an association is; but some idea can be obtained from the banquet which was extended to the visiting members and guests by the Chicago members. At this banquet nearly 800 guests sat down to a repast which consisted wholly of articles of food which had been in cold storage at least a year.

The second day's session was planned to impart information which would be helpful to packers and raisers of eggs

of that fact. As the greatest amount of fresh air is required in the feeding station, she advocated that it be established on the upper floor or in a separate building.

It is impossible here to reprint the learned Doctor's exhaustive address, which went into many of the technical details of the business which we fear our readers are not interested in. All we can say is that the poultry and egg industry is fortunate in having such a painstaking investigator at the head of the food investigation department.

As the Utility Poultry and Egg Standard Committee of the American Poultry Association was in session at the same hotel at the same time it was arranged for Mr. Robert Essex, chairman of that committee, to address the National Convention upon the work of the "Market Poultry and Egg Standard."

Mr. Essex was well received. He told of the purpose and aim of the American Poultry Association and related some of the circumstances surrounding its formation and history. He told, also, how that an important part of their work was to compile and issue a Standard of Perfection which should so minutely describe a breed of fowls that there could be no difficulty in determining the variety from the description. He also pointed out how that this Standard had always taken

A New York prize winning cockerel bred and owned by Bradley Bros., Lee, Mass.

into consideration the weight of those fowls which were usually raised for market purposes and that this weight was put high so that the breeders had something to strive for, which was, in a large measure, the real influence which kept up size and stamina of the breed.

He emphasized the wonderful growth of the American Poultry Association and pointed out how all of its members were constantly striving through their individual members and the association as a body was lending their assistance to the various state institutions which had poultry departments in connection with their agricultural colleges. He told what some of the experiment stations were doing along the line of increasing the egg yield and that this work was also being closely studied and followed by the members until the breeds of fowls which a few years ago laid only 80 eggs per annum now were producing 180 and even 200 eggs per hen.

He told of the desire of the committee of which he was the chairman to produce a Standard which would be a real help in the promotion of the utility poultry and egg world and asked for the assistance and co-operation of the National Poultry, Butter and Egg Association.

As a result of Mr. Essex's remarks the National Association introduced the

following resolution, which was carried:

"Resolved, Whereas the American Poultry Association, a national organization of breeders and specialty farmers of poultry and eggs, are preparing a market poultry and egg standard for general distribution; and,

"Whereas, It is the sense of the committee of the A. P. A. preparing this standard that the same should be especially edited with a view to its

distribution also to packers and general farmers of poultry and eggs to the end that the product may be improved; and,

Whereas, The A. P. A. has invited the National Poultry, Butter and Egg Association to appoint a committee to collaborate with their committee in the preparation of the said standard to the end that the National Poultry, Butter and Egg Association may add the

## THE AUTOMATIC INCUBATOR

POSITIVELY CANNOT OVERHEAT

The Automatic is an entirely new principle of incubator construction—not simply an improvement over old makes. Yet it is not an experiment for it has had four years of actual practical test under all conditions and in varying degrees of heat and cold so that we are now ready to offer it to readers of American Poultry Journal with our unconditional guarantee that

**The Automatic Positively Cannot Overheat and Does Not Require any Regulation of the Lamp Flame.**

It absolutely assures correct heat, correct ventilation, correct moisture. You will never have any more incubator troubles if you use the Automatic. You positively avoid the cooking of the eggs. You never have to worry about getting up in the night to adjust the regulator. In hundreds of tests it has demonstrated that it hatches a much greater percentage of fertile eggs than setting hens do, and no other incubator begins to compare with it. Guaranteed to last five years, at least, without repairs, and sold on our forty-day free trial plan. It will pay you to use the Automatic Incubator no matter what your past experience with others has been—you can soon save its price in the actual results attained. Just a postal request will bring you our catalog No. 38. Don't worry—It can't overheat.

Automatic Incubator Co., Delaware, Ohio

authority of its endorsement to the work; now be it

"Resolved, That the president of the National Poultry, Butter and Egg Association appoint two members of the association to act with the committee of the A. P. A. with authority to endorse the said standard in part or whole."

The next speaker was Prof. W. R. Graham, who has charge of the poultry department of the Ontario Agricultural College. He was introduced as having recently been studying the conditions surrounding this industry in England and other European markets and was asked to relate some of the lessons which he had observed there.

Professor Graham said that the

greatest factor for success in European markets seemed to be: standardization of the various products. He reported that while some English dealers admitted that occasionally they might get a tub of butter from Ireland which was superior to the Danish, yet more often they would get poor butter from Ireland; but, on the other hand, that which came from Denmark was always the same at all seasons. English dealers declared that there was no other country upon which they could so surely rely for the same even standard of quality as Denmark.

He argued for more co-operation between the dealer and the producer and pointed out that the greatest difficulty as it existed in Canada, and he

presumed it was the same in the United States, namely, the long lapse of time in getting the new laid egg into the cooler. He pointed out that our areas are much greater than on the old country but there are many areas in this country where the number of hens per acre was fully as many as in England and he was of the opinion that if an effort was made along this line much improvement could be made and a great saving in the large losses from poor quality of eggs be largely overcome. It would help if the producers of commercial eggs would dispose of the male birds or pen them by themselves as soon as the breeding season was past, so that the new laid egg would be an infertile egg. He urged that every

5-FIRST PRIZE COCKEREL WINNERS AT CHICAGO SHOW DEC 1911 BRED AND OWNED BY  
F. A. TECKTONIUS Route 5 RACINE WIS.

effort should be made to keep the new laid egg in as cool a place as possible until it was gathered and put into the cooler.

The third day of the convention was given over to discussing transportation problems of which there seemed to be a great many. There were some railroad representatives present and the discussion was interesting and at times lively. It would seem that there are many problems still to be solved and for this purpose the association maintains a permanent headquarters at New York city. From a practical standpoint it was surprising the great amount of the egg losses caused by breaking in transit and there is no question but that if such losses can be overcome the buyer can afford to pay higher prices at the point of production.

While there were some changes in the various committees, practically the same officers were elected throughout.

The president is Mr. Harry Dowie, New York; secretary, Mr. Chas. E. McNeill, Chicago, Ill.; treasurer, Mr. W. H. Whitecomb, Chicago, Ill.

#### SHIPPING EGGS BY PARCELS POST.

Fifteen large fresh eggs were mailed to Postmaster General Hitchcock last night by Allen C. Bussey, 1002 New York Life building, for the purpose of promoting an experiment to prove how perfectly fresh eggs can be shipped in the parcels post in a container devised for that purpose.

Though the parcels post will not be started until January 1, Mr. Bussey thought he would seize time by the forelock, mail his carton of eggs to the postmaster general as first class mail, and let the postmaster general himself see that it was entirely feasible to send eggs in parcels post.

Mr. Bussey has written a letter to the postmaster general asking him to write on receipt of the eggs, letting him know of the success of the plan. Mr. Bussey has patented an egg container which he says will stand all shocks incident to the roughest travel.

The box is made of thick cardboard and so constructed in "V" shaped wedges that it offers, he believes, the maximum protection from breakage. The egg boxes vary in dimension according to the needs of the shipper. The box shown in the illustration is 4½ inches wide, 3 inches high and 13

inches long. A box this size will hold a dozen eggs. A larger sized box is made which will hold 15 eggs. According to Mr. Bussey, the boxes are so safe that setting eggs may be sent through the mail without danger of breaking or spoiling.

According to the postoffice officials, the benefits which may be expected to follow the introduction of the parcels post will not be confined to any particular section of the country nor to any particular parts of the population. With rates which will be uniform to every one, which can be easily determined in each case by reference to tables which will be readily accessible to every person wishing to send a parcel, and which will be for the great majority of parcels appreciably lower than the lowest rate hitherto charged by the express companies for similar service, it would be difficult, say the postoffice men, to place any limit on the possibilities opened by this new departure in the mail service.

On the matter of cost a close examination of the rates laid down for the parcels post with those recently prescribed for the express companies by the Interstate Commerce Commission shows that for short distances, say, 500 miles, it will be cheaper to send any package up to seven pounds by the parcels post; that for long distances of about 1,500 miles and over the parcels post rate will be lower on packages up to two pounds in weight, and that in other cases the express rates will be slightly cheaper.

#### Handy for Packettes.

There is every reason to suppose that the greatest use of the parcels post will be made by persons wishing to send small packages a short distance, and it

# THE "CYCLE"

## Hatches in Nature's Way

Because it follows natural principles. These points found in the CYCLE will appeal to you. They are vital to success.

FIRST: The heated air is applied on top of the eggs only, as under the hen. SECOND: No direct air passes through the hatcher to carry off the natural moisture in the egg. THIRD: Being circular, with the lamp in the center, the radiation is equal throughout the machine. FOURTH: The heat is brought close to the eggs with no waste of heated air space. FIFTH: Eggs are turned and cooled similar to Nature's way. STUDY the hen and investigate the CYCLE. It will pay you.

Our machines were used exclusively in the original Philo System Plant where over \$1500 from 60 hens in ten months has been cleared from the sale of eggs, baby chicks and fowls raised on a city lot 40 feet square. One of the largest plants in America saved over \$700 this year by using our system of brooding. We sell the best brooder ever made for \$2.50.

### CYCLE HATCHERS

Holds 50 eggs. Constructed entirely of metal. Self-regulating. Requires no moisture. Will not warp, shrink or crack. Will last a lifetime. Hatches hens', ducks', geese and turkey eggs equally well.

\$6

### BROODER-HATCHERS

Holds 50 eggs. A compact, safe and practical incubator and brooder combined. One lamp serving both purposes. Saves about one-half the cost of hatching and brooding chicks.

\$8

### Testimonials

Paris, Ky., Feb. 16, 1912.  
Cycle Hatcher Company, Elmira, N. Y.

Gentlemen:—Have used your Cycle Hatcher with excellent results. From my first hatch I had forty-seven chickens from forty-eight eggs. Have used two other incubators, but prefer the Cycle to either of those used.

Respectfully,  
Mrs. Henry Scott Clay.

Carterton, Clansfield, England, May 20, 1912.  
Cycle Hatcher Company, Elmira, N. Y.

Gentlemen:—I take great pleasure in informing you of the great success I have had with the Cycle Hatcher. I also have a sixty-egg machine, but I can hatch more and stronger chickens with the Cycle. I have had hatches of 45 and 40 out of 48 eggs from the Cycle incubator.

Yours truly,  
Henry Naseby.

Winona, Wash., Jan. 26, 1912.  
Cycle Hatcher Company, Elmira, N. Y.

Gentlemen:—I have one of your splendid Metal Mothers and will say that it is far ahead of any other incubator I ever used.

Yours respectfully,  
F. P. Whetzel.

Squaw Valley, Calif., April 16, 1912.  
Cycle Hatcher Company, Elmira, N. Y.

Gentlemen:—The two Cycle Hatchers I purchased last year are giving entire satisfaction. We have averaged between 90 and 100 on every hatch yet, and don't think they can be beat.

Yours truly, Claud H. Johnson.

Cycle Hatcher Company, Elmira, N. Y.

Gentlemen:—I have used your Cycle Hatcher three years. Set it six times one year, and four times the other two years. Once I got 42 chicks out of 49 eggs. Twice I got 46 chicks out of 49 eggs. The most of the time I got 44 and 45 chicks. I think there is no other incubator that will beat it.

Yours truly, Lilly R. Hargis.

Fort Worth, Texas, September 28, 1912.  
Cycle Hatcher Company, Elmira, N. Y.

Gentlemen:—I bought a Cycle Hatcher from my local dealer and hatched forty-eight chickens out of fifty-one eggs, my first hatch. A much better record than I have been able to make with several other machines which I have tried.

Yours truly,  
C. P. Davenport.

### CYCLE HATCHER COMPANY

285 NORTH AVE.

ELMIRA, NEW YORK

Everything for poultrymen,  
including Poultry Foods,  
Remedies and Supplies  
of all kinds

is precisely in such cases that the charges of the express companies have in the past been said to be extortionate and will, in the future, be higher even under the new schedules than those of the parcels post.

The question of price is, however, only one consideration; and on other grounds, such as efficiency, simplicity and availability the service of the parcels post should be superior, according to the postal authorities.

### Classes of Mail.

At the present time all mail matter is divided into four classes. Without going into details, it may be broadly said that the first class includes letters and other matter written by hand or on a typewriter; the second class, newspapers and periodicals; the third class, books and printed matter other than newspapers and periodicals, and the fourth class, a great variety of things, from queen bees to wall paper, not falling into the other three classes.

The introduction of the parcels post will affect only matter mailable in the fourth class, and the principal point to be noted is that books will not be allowed to go in the parcels post.

The definition of what may go in the parcels post is broad. It includes everything which is not now embraced by law in the first, second or third classes and states specifically:

Practice will, of course, determine what materials fall under the ban of the restrictions named; but, in a general way, it seems likely that a farmer will be able to mail to his consumer in the city a dressed capon or a pound of butter; that a parent may send his child a pair of skates or a box of candy, and that a merchant may send to his correspondent a pair of boots, or a suit of pajamas. A man may buy a steak and mail it home for dinner.

### Particular as to Stamps.

It is important to remember that ordinary stamps will not be accepted for postage on parcels. The special parcels post stamp must always be used. The cost of sending a package by parcels post, as shown in the accompanying table, will depend on the weight of the package and the number of zones through which it is to be sent.

If a parcel is to be sent within the postal district in which it is posted, the charge will be 5 cents for the first pound, and a cent a pound additional for each additional pound up to the limit of 11 pounds, for which the charge will be 15 cents.

For a package to be delivered outside the postal district, but not outside the parcels post zone in which it is mailed, the charge will be 5 cents for the first pound and 3 cents for each additional pound up to 11 pounds, for which the charge will be 35 cents.

### How Charge Varies.

The charge increases with the number of zones the parcel has to cross and a general idea of the cost may be obtained from the accompanying table. According to Mr. Fosnes, a branch of the parcels post system which is in force in several countries, but which is not to be introduced at present into the United States, is a cash on delivery service. This service is popular in India. Its operation is simple and it brings in a moderate surplus to the government.

What takes place is this: A man in Calcutta, for example, sees a price list or an advertisement of a watchmaker

in Bombay. He writes to him, ordering a particular watch to be sent to him c. o. d. The merchant delivers the watch at the postoffice in Bombay, with a bill showing the charge. On the arrival of the parcel in Calcutta it is delivered at the house of the purchaser and the postman collects the price, which is remitted by money order to the Bombay merchant. For this service the government of India charges 1 per cent of the value of the article, in addition to the regular postal charge.

"The introduction of the new system of trading is always accompanied by some inconvenience in the transition period between the old and the new," said the postmaster. "But after the habit of purchasing by mail and of securing delivery by parcels post has once become established it will seem as much a part of the natural order of things as a daily visit to the market, basket on arm, was to our grandmothers."—Minneapolis Tribune.

### BANTAMS.

By Theodore Van Ginck

Bantams are, as a rule, very tame and soon get acquainted with their owners and eat from the hand, therefore they do not require much training for the showroom. All Bantams have an elegant appearance, the cocks strut about proudly, their breasts brought out prominently. It is highly amusing to see such a little sultan leading his mates, occasionally alighting upon a gate or other slightly elevated object to crow with his clear high voice.

Once, long ago, I saw in Holland a few of the ordinary black-breasted Bantams, colored as light as Brown Leghorns. The minute I observed them the cock bird flew in a straight line to the top of a fairly high stable.

A bird in the air attracted his attention. He sounded some warning-toned calls and came down again into the midst of his mates. A minute after the whole troupe disappeared into the brush oak behind the farm, flying over the gate and a brook much like pheasants. Nobody who saw those healthy, bright looking chickens could see what a severe test they had stood, being raised under almost wild conditions. When they were six or seven weeks old, their mother would fly to and alight on a large branch, not high above the ground, where the little chicks had to follow her. Later on they slept just as all the chickens on that farm did, i. e., on the branches of the trees, and they slept here every night, until the first snow began to fall, when the farmer's wife put them in one of the stables.

#### Bantam Housing.

I have seen Bantams housed and raised under almost all conditions—behind glass and in open-air houses, with apparently the same results.

But both systems will prove to be too extreme in the long run, when raising line-bred Bantams. Those raised behind glass and protected from the influence of the weather are liable to take on every kind of disease when, later,

they must be housed under contrary conditions, while those raised with less protection, i. e., in open-air houses, will be hardy.

But many a Bantam youngster will not be able to stand this test and will die, while many others will look stunted and never come into fine condition. It seems their small bodies cannot supply them with sufficient heat, when they are not in the pink of condition. Bantams will give their owners more pleasure and profit when well taken care of, that is, when they are protected from wet and rain in winter time and hot sun rays in summer time.

Bantams thrive very well in confinement, but it may well be understood that everything must be clean and free from lice. One can keep Bantams in half dozen lots in houses with a ground space of 3 by 6 feet the whole winter through, when necessary. But as soon as they are put together in the breeding pen they need more room to insure fertile eggs and strong chicks.

Herewith is the description of a good Bantam house, designed below:

The front is 10 feet long and 6 feet high, and is boarded one foot and 6 inches high in order to keep out drafts. The remaining part is covered with fencing; narrow fencing is the best, as it keeps the sparrows out. The house is 4 feet deep, the back is 5 feet high, giving the roof a backward slope. The roof must be waterproof, while the back and side walls are made of ¾-inch lumber to keep out the wind and the rain. When possible it is the best way to have the house facing south. The little roosting compartment, of which we give a separate illustra-

tion to show the details, is fixed against one of the sidewalks. Its floor is about 2 feet and 10 inches above the ground. The roosting compartment is 3 feet wide and 4 feet deep. The ventilation holes are at the highest point in the front. This is nearly opposite the little door at the back and insures a slow and regular air stream, which will not be too cold.

Along the outside wall are the nest boxes, each 12 inches wide and deep. They are four in number. A wooden frame holds the four nests together and

"IF CHICKEN CHOWDER won't make your hens lay, they must be roosters." Full particulars and 48-page Poultry Book free for the asking.

905 South 13th St. OMAHA, NEB.

## Raise Strong Active Chicks Grow Green Food in Winter

Chickens raised with the International Sanitary Hover grow big and strong. They are not crowded, for the International has no corners, and is warmer at the curtains than at the center. Perfect ventilation prevents smothering. The lamp of the

### International SANITARY HOVER

can be lifted out by person standing. Used anywhere at a moment's notice. No platform or other carpenter work necessary. Fireproof and sanitary.

#### Also Grows Green Food

In eight days the International Hover will transform 12 quarts of oats into enough green food to feed 500 laying hens three days. This means eggs a plenty in winter, for green food is an egg-producing necessity.

Endorsed by Kellerstrass, Owen Farms, Wm. Cook & Sons, Rufus Delafield, Rose Farm and Monmouth Poultry Farms.

Send for Catalogue. Agents Wanted.

## GOLDEN AND SILVER CAMPINES

The fowl that is creating a sensation. Our birds are gathered from the world's best. Cockerels for sale but no females. Egg orders booked now at \$10 per 15. Ten chicks to a setting guaranteed.

The Grand White Faverolle. From the best yards in England. No stock for sale. A few orders will be taken for eggs at \$15 per 15.

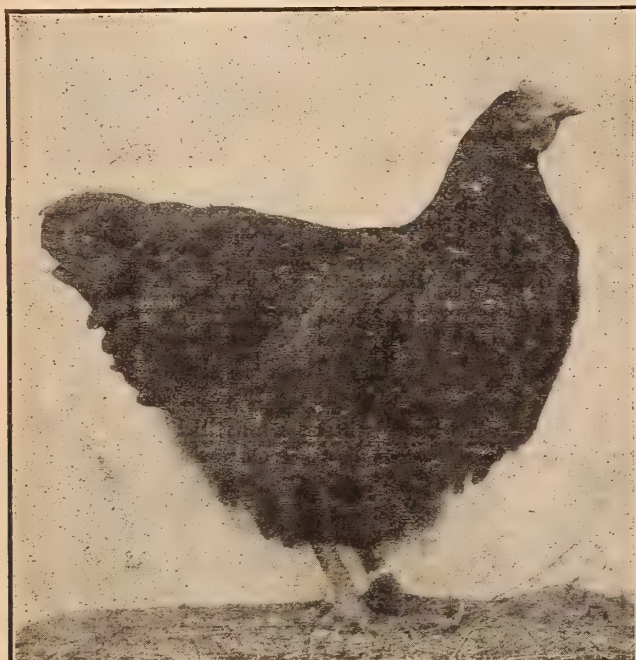

AUG. D. ARNOLD - - BOX 777 - - DILLSBURG, PENNSYLVANIA

makes it easy to take them out occasionally to clean them.

They are covered with a board, 12 inches broad, while the divisions are nailed together by three boards, four inches broad, two in the front and one in the rear at the bottom. Three perches are fixed in the house and their shape depends upon the breeds that are kept.

For the clean-legged breeds round perches of about one and a half inch diameter are the best, as they keep the legs in shape. This is especially true in regard to the back toe. It is a well-known fact that when the birds roost on unsuitable perches, their back toes are liable to grow too much inside. This is a great fault for the Game Bantams and a fairly important fault for the other clean-legged breeds.

BLACK ORPINGTON PULLET, FIVE MONTHS AND ONE WEEK OLD; WINNER OF FIRST AT DALLAS, TEXAS OCT. 1912. HATCHED FROM EGGS PURCHASED FROM BLUE RIBBON POULTRY COLUMBUS IND. LAID HER FIRST EGG NOV. 5<sup>th</sup>. SIX MONTHS OLD TO A DAY, RAISED BY A BRANSHAW, DALLAS, TEXAS. I HAVE SIX MORE AS GOOD FROM THE SAME HATCH.

For the clean-legged breeds the perches can be 2 to 2.5 feet above the floor.

For the feather legged breeds a round pole of 2½ to 3½ inch diameter, sawed lengthwise through the middle, makes a very good perch. They are a great help to keep their foot feathers in good condition. To prevent their breaking their foot feathers when trying to fly upon the perches, it is advisable to place the perches not higher than 14 to 16 inches above the floor. For the Japanese Bantams the perches have to be about the same height. It is well to have sawdust or river sand on the floor, as it absorbs the odor of the droppings, by making them dry quickly. In the same way it keeps the floor clean so the birds will not soil their plumage so easily.

Underneath the laying and roosting

house is a good place for a box containing ashes, earth or river sand, to use as a dustbath for the Bantams. A wooden box of about 1½ to 2 feet square is the best thing for this purpose. Don't fill the box to the top, or they will throw out too much of it. It will be well remembered that it is not good for the health of the chickens to scratch in a house where the soil is so dusty that the air is practically filled with fine dust all the time. Have your drinking fountain as far away as possible from the dustbath, a little above the floor, but just within reach of the Bantams.

Their morning food should be some good mash food, given in a clean pan, while their grain food will do the most. The longer they scratch for the grain, the better it will work. When you

hen many of them are killed in the first weeks of their existence under the feet of their mother. The same trouble will be found when a big hen is set to hatch Bantam eggs. As a rule she will crush a great many of them, the shells being thinner than those of the eggs of the larger breeds.

Bantam hens will prove to be the best hatchers and raisers for their own chicks, provided that not too many are given to them. For the smallest Bantams 6 to 8 eggs and the same number of chicks will prove to be the best number, while the larger kinds, such as the Cochin and Brahma Bantams, can successfully take care of 2 or 3 more eggs or chicks.

For feeding the Bantam chicks the same methods can be followed as in feeding the larger chicks, except that some foods will prove to be too coarse for them, in which case they must be changed for more suitable food.

It will pay well to give the little chicks careful attention in regard to lice and headlice, especially in hot weather, as more chicks are killed by lice than is realized. When vermin is found give your chicks something to destroy the lice at once. Fortunately two good remedies for both kinds of lice are on the market and are well advertised in the poultry papers.

In the summer months never put your Bantam chicks where they cannot get in a shady place, as this will in many cases be fatal. Never forget that chicks want exercise just as well as the matured chickens.

At the age of 4 to 6 weeks, it is time to start feeding them a certain food in order to develop certain requirements of the breed, while other properties must be kept down. Game Bantams should be fed on bone-making food, while no such food should be given to them which develops the growth of their feathers too much. They should not be given any more wet food after being about 2 months old. Rose Comb Bantams and Sebright Bantams should be fed on such food as will supply them with well developed bone and, besides this, the feather-making food should be given to them in a great percentage, especially to the former.

The Cochin Bantams, Brahma Bantams and Japanese Bantams should be fed for the greater part on feather forming food, while but little bone-forming food should be given to them in order to keep them low on legs.

Cochin and Brahma Bantams can be hatched successfully later in the season, as no big tail feathers are desired in these breeds, and it helps to keep them low on legs. When feeding your Bantam chicks always keep in mind that you are not after big broilers, but after small chickens with sufficient flesh to give their body the desired shape.

Don't enjoy the appearance of one or more extremely small youngsters in your flock, with the idea that they will turn out as top-notchers when the show season is on. In nine out of ten cases they will prove not worth the price they have cost their owner to feed, etc. If they are cockerels they will never show fine developed tails and their bodies are in most cases badly balanced. If they are pullets they will prove, as a rule, to be bad layers, and if they start to lay, their first eggs usually will be their last ones, for ordinarily they will be egg bound.

cannot give them free range to find green food, give them a good supply of it every day. Good green foods are grass, clover, wurzel, beet roots and cabbage; the first two are the most desirable. Never allow them to eat green food that is in a frozen or rotten condition.

#### Bantam Raising.

In hatching and rearing Bantam chicks much is the same as in raising the larger chicks. They hatch as a rule a few hours earlier than the larger chicks and are, of course, a great deal smaller.

The best thing is to give 8 to 10 chicks to a Bantam hen and 12 to 14 to a small hen of the medium sized breeds. Bantam chicks are rather delicate, owing to their small size.

Often when raised by a big plump

## KEELERVILLE, HOME OF WORLD'S GREATEST STRAIN OF WHITE WYANDOTTES.

About October 1 we visited Keelerville, which lies on the banks of the Tippecanoe River, at the northeast of Winamac, Ind. This very up-to-date poultry farm contains about ten acres of rich sandy soil and is easily designated by the many fruit trees and the systematic outlay, and is easily reached, in that it lies on the main line of the Panhandle of the Pennsylvania railroad, about midway on the direct line from Chicago to Indianapolis—connecting along route with many different railroad systems, reaching to all and any part of the country—and rendering the shipping service the best possible. Between the fine residence, which Mr. Keeler built last year, and the road, is a private park on the bank of the river, and Mr. Keeler's office is in the residence on the second floor and affords a commanding view of the river. He had at the time of my visit completed a new building at the cost of \$1,000; this building is three stories high and is 16x84 feet. The incubator cellar is underneath; the second story is used for a brooder house and washroom, and the third floor is for drying and conditioning. It is the largest and finest for the purpose I ever was in. Last year he built a laying and breeding house 16x120 feet, with large two-story feed room in center. There are forty colony houses, mostly double, built after the Woods plans, and placed at regular intervals along stone drives. Mr. Keeler has a way of his own of doing things and what he does he does right and spares no money to accomplish his ideas. He has been eighteen years perfecting the world's greatest strain of White Wyandottes, and had 2,000 on the place beside the one served with oyster dressing we had for dinner. As a whole they were the finest I ever saw, and the ones I handled I couldn't see where to cut them. This strain of White Wyandottes have such a grand show record and are so widely known one does not have to go into minute detail. "Keeler's World's Greatest Strain" tells the whole story. Mr. Keeler was one of the first to work on "stay white" Wyandottes and his birds are all white and every trace of creaminess is eliminated. It was not so many years ago this was thought impossible. But the "World's Greatest Strain" can show 'em it can be done. The young stock Mr. Keeler is offering are bred from Topeka, Kan., Chicago, Indianapolis, etc., winners. The World's Greatest Strain has won from coast to coast at such shows as World's Fair at Portland, Ore.; Los Angeles, San Francisco, St. Louis, Omaha, Indianapolis, Cleveland, Cincinnati, Washington, D. C., Jamestown Exposition, and hundreds of smaller shows—both under Mr. Keeler's exhibiting and in his customers' exhibits. Last year he determined to pick out the largest and best quality show, centrally located. After looking up records of leading shows he found Topeka, Kan., located within 75 miles of the geographical center of the United States, consequently from December 4 to 9, 1911, he won 1st, 2d, 3d, 4th, 5th, 6th, 7th and 8th cock; 1st, 2d, 3d, 4th, 5th, 6th, 7th and 8th hen; 1st, 2d, 3d, 4th, 5th and 7th cockerel; 1st, 2d, 4th, 5th and 7th pullet; 1st and 2d pen. The World's Greatest Strain was the attraction of the show. The daily papers took it up and used large space on front pages showing photos of winners. This same thing was repeated at the great Chicago show, although Mr. Keeler exhibited display pens, and did not enter into competition. There was always a crowd of enthusiastic admirers around his exhibit, which was one of the finest displays ever seen at Chicago. The Keeler White Wyandotte catalog is most attractive and instructive and every White Wyandotte breeder

should possess one. It is a great book and gives a detailed account of how Mr. Keeler made good with the World's Greatest Strain of White Wyandottes.—H. H. Coburn.

Harry A. Muntz, Elgin, Ill., won second on Single Comb White Leghorn cock in a class of 32 birds, winning over some of the largest Leghorn breeders in the United States. When Judge Rickoff placed the

prizes, he took quite a bit of time in deciding first and second and if Mr. Muntz's bird had been fully developed in feather, he would have stood a good show of taking first. At the Illinois State Fair, 1912, he won 1st, 2d and 3d pullets on three entries, and 2d and 4th cockerels. He has some good cockerels sired by the Chicago winners, also a few pullets and yearling hens. Write him

## THE UHL HATCHERY.

The Uhl Hatchery, New Washington, Ohio, was the second in the United States to embark into the day-old chick business, and is now the largest hatchery this side of Egypt. The main building of the Uhl Hatchery is 90x100 feet and there are two other large buildings, 28x100 and 46x100. Their capacity is 120,000 eggs, placed in ten mammoth hot water machines. They figure to hatch at least 30,000 chicks per week. They have made records of 95 per cent hatches and the chicks are as strong and healthy as if hatched by good mother hen, and they can go her majesty, the hen, one better, in that they are free from vermin and have been clean from start to finish. The fourth day 120,000 eggs are carefully tested and that means some labor. It takes some eighteen people to handle and care for hatches and keep things in running order. It is no small task to properly box and sort out 30,000 or more chicks and it could not be done if this hatchery was not rigidly systematic; as they are, everything moves on schedule and runs like clock-work. This hatchery shipped 280,000 baby chicks last year, beside what were reserved for their own breeders. The coming year they expect to ship 400,000 to 500,000 chicks. Many of the chicks win at good shows, for they are raised from choice stock. Last year they gave prizes for photos of chicks sold by them, as follows: 100 any chosen variety, for 1st prize photo; 50 any chosen variety for second prize photo, and 25 any chosen variety for third prize. Their catalog shows the pictures and gives the names of winners. This plan proved so satisfactory that they will do the same this year. They breed the following varieties: Barred Buff and White Plymouth Rocks; Buff, White and Black Orpingtons; Single Comb White, Buff and Brown Leghorns; Single Comb Black Minorcas; Rose Comb and Single Comb Rhode Island Reds; White, Silver and Golden Wyandottes; Light Brahmas, and Silver Spangled Hamburgs. This firm is entering its thirteenth season, and enlarging its capacity, which is the best possible proof of its reliability and honest methods. They issue a very fine catalog that plainly shows the cuts and explains their business methods. If in the market for getting good, healthy chicks that will live and thrive, write The Uhl Hatchery, New Washington, Ohio.—H. H. Coburn.

## A BIG INCUBATOR BARGAIN.

The old reliable Prairie State Incubator Company, who have been making incubators for 30 years, have just completed the largest and best equipped factory in the world.

This mammoth plant covers seven and one-half acres of ground and has been one and a half years in construction. Hand labor and "saw and hatchet" methods are now entirely eliminated. Powerful machines do the work in a few minutes that it formerly took dozen of high priced workmen to perform. Every incubator turned out is exactly like every other incubator of that pattern. Nothing is left to be guessed at. In buying a Prairie State Incubator every customer has the assurance that his machine is as near perfect as the most modern equipment and thirty years of successful experience can make it.

It is the ambition of the Prairie State Company to accomplish just two things: First—Make the best machine in the world, and, second, Reduce the cost of manufacture so that it can be sold at a reasonably low figure. That they have succeeded and as evidence of this—just read their half page announcement on another page, in which they offer a high grade, 60-egg Keystone incubator for the low price of \$8.00—the "Biggest Incubator Bargain of the Year."

They also publish a 112 page book on artificial rearing of poultry which contains much valuable information for the poultry expert or novice. This book contains chapters on Breeds, Selection of Layers, How to Feed Layers, How to Fatten and Feed Chicks, How to Grow Ducks, Poultry Buildings, Winter Laying Houses, etc. It also explains the principles of successful incubation which has made the Prairie State Incubator famous. A copy of this book will be sent free to anyone who writes for it. Address Prairie State Incubator Co., 50 Main St., Homer City, Pa.

## HUNTINGTON'S LEGHORNS WIN.

## ANCONAS - - HOUDANS S. C. BUFF ORPINGTONS

BABY CHICKS AND EGGS FOR HATCHING

Line-Bred for years from the best stock money could buy, and with unlimited range and mountain air, our birds are superior in health, vigor and in general quality, shape and color. Eggs for hatching from selected matings and produced under the best possible conditions to insure fertility, stamina and quality in the chicks.

**Baby Chicks.** Our capacity is almost unlimited. Your wants will have prompt and the best attention. Breeding Cockerels for sale. Write us your wants, we have the stock to please you and we guarantee absolute satisfaction to all.

**Mountain Orchard Poultry Farm**  
Box 13 :: :: :: Narvon, Pa.

gard is the greatest triumph ever achieved by my White Leghorns, said Mr. Huntington, because the competition was extremely keen and the show over one-third larger than the great St. Louis show. Mr. Huntington had entries at both Chicago and St. Louis but owing to the demands by his customers for immediate shipments he was unable to get his birds to these exhibitions in time for competition. This was unfortunate, because it has been freely reported that Mr. Huntington had a string of youngsters in training for these shows that was truly phenomenal. Readers of American Poultry Journal who have an eye on headliner shows next season will do well to take our tip and learn about pens 1 and 2 of Peerless White Leghorns for 1913. These are some exhibition matings and Mr. Huntington will send any of our readers his mating list free on request.

### WESTERN BARRED ROCKS VICTORIOUS AT THE GREAT 1912 CHICAGO SHOW.

In the largest class ever shown at Chicago W. W. Henderson, 921 Security Building, St. Louis, Mo., made a grand winning. We have visited his farm at Bridgeton, Mo., which is one of the best equipped poultry plants that we have come across, where we found the grandest lot of Barred Rocks we ever saw. Judge Henderson does business on the plan "your-money-back-if-you-are-not-satisfied." We guarantee him to our readers.

### BARRED PLYMOUTH ROCKS.

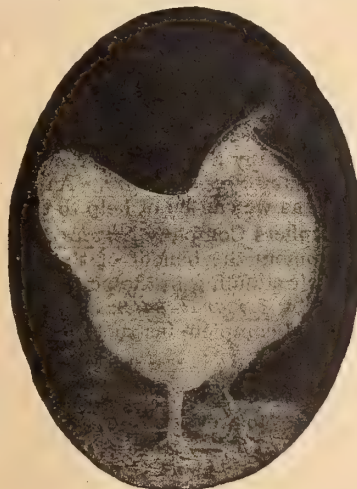

The "Hoosier Strain" was again victorious at the Great Chicago Show, December, 1912, winning 2d and 3d cock and 5th pen pullet mating in the largest and best class ever brought together. At the Chicago Show, December, 1911, we won 1st prize cock, generally considered to be the best male ever shown in Chicago.

At the last two Indianapolis shows, we won just half of the first prizes offered, or as many as the combined winnings of all competitors, besides numerous specials. It takes quality to win at Indianapolis and birds of our breeding have won at this show for ten consecutive years.

We have hundreds of birds for sale, all bred from noted winners, the best lot we ever offered, and will furnish you guaranteed winners for any show, large or small.

Fine breeders to produce winners mated by an expert. Utility birds bred from heavy layers. All stock sold at reasonable prices and shipped subject to approval. All birds are grown on unlimited range and have great stamina and vigor found only in the "Hoosier Strain."—G. Earl Hoover, R. 24, Matthews, Ind.

The Ohio Poultry Plant, Wellington, Ohio, specialty breeders of White Wyandotte Indian Runner Ducks, informs us that they have a large number of cockerels and pullets, cocks and hens for sale at small reduced prices. At the last Cleveland Show,

PERFECTION, JR.

Bred and owned by Geo. H. Rudy, Mattoon, Ill.

this farm showed one pen and won first. At the Wellington Fall Fair, they won first and second in strong competition. At the Wellington Show, held last month, they entered 13 birds and won 1st and 3d cock, 1st, 3d and 4th cockerel, 1st and 2d hen, 1st, 2d, 3d and 4th pullet, 1st and 2d pen, also specials for best pair and best display of Wyandottes, all birds competing and best pen in American class. This is good evidence of the quality of their stock.

## TOO LATE TO CLASSIFY

FOR SALE FANCY POULTRY and pigeons of all the leading varieties. On receipt of 10 cents we mail highly descriptive, illustrated catalogue, which gives full information of 49 breed of dogs; several breeds of cattle, sheep, swine, rabbits, ferrets; price list free. Chas. Landis, Dept. 307, Reading, Pa.

FLEMISH GIANTS. The largest rabbit that grows. Keller's Rabbitry, Tiffin, Ohio.

Absolute satisfaction is guaranteed you. Give this your prompt attention, for Jan'y purchasers are going to get my seasons best values.

C. S. BYERS

ORPINGTON SPECIALIST 14 YEARS

HAZELRIGG, INDIANA

# S. C. Rhode Island Reds

## THE VERDICT IS IN, AND VICTORY UNPRECEDENT IS OURS

At the great Philadelphia Show, Dec., 1912, my line of S. C. Reds won the leading and classy prizes of the entire show, in competition with all birds shown. They won 1st cockerel, 1st hen, 2d and 3d pullets and 1st pen in a class of 122 birds. My 1st prize cockerel was awarded the cup for best cockerel in the entire show, with every one of the 4000 birds competing. He also won color and shape specials with other specials for my entire entry. At Cleveland, Ohio, January, 1912, my 1st prize pen was the sensation of the show, judges and breeders saying they never saw one like it for quality and evenness. Write me your wants. If you want quality birds or eggs for hatching, I can supply you. Absolute satisfaction assured to all. Mention American Poultry Journal when writing.

Schenley Heights Poultry Yards, C. F. Rankin, Prop.

316 Fourth Avenue, Pittsburgh, Pa.

# Bean's Columbian Rocks

## Sensational Winners at the Club's Annual Exhibit, Phila., Dec., 1912

Winning in a large and strong class every first prize offered, and a majority of all. They also won the special for best display in the American class. Their winnings last year formed the best record ever made on any variety, and they promise to surpass everything, for they are better than ever. Their practical worth as layers has again been demonstrated to our satisfaction. They are result producers. Special: I am offering special mated pens of five (5) birds, bred from my best matings, at \$23.50. Larger lots at same reduced prices. Start now with Beans Columbian Rocks and be satisfied. Circulars free.

F. G. BEAN

BOX A

COLLEGEVILLE, PA.

GRANT M. CURTIS

President Cyphers Incubator Company—Head of Cyphers Company Service Department.

Mr. Curtis has been closely identified with the poultry industry—in a big way—for twenty years, as an extensive owner and breeder of fowls, as a poultry journal editor, as an incubator manufacturer and as an active supporter of the American Poultry Association. He is personally at the head of Cyphers Company Service Department and spends a large amount of time in this special work, because he believes thoroughly in helping those who try to help themselves.

W. C. ELLISON

Member Cyphers Incubator Company Service Department

Mr. Ellison has had many years of personal experience with Standard bred poultry, artificial incubation and brooding. Has spent much time in research and experimental work and made a special study of poultry diseases, their causes and cures. Fourteen years a poultry judge. Holds A. P. A. General license. Instructor at Agricultural Colleges and dept. editor of poultry journals.

# Learn All Cyphers Really Means

The men who are back of Cyphers Incubators and Brooders are back of *your success*. The moment you become a Cyphers Company customer you are entitled to the full benefits of Cyphers Company Service—the Service that goes farther, *means more* to help the poultry raiser than it has *ever meant before*. As now organized we are never out of touch with Cyphers owners, so far as we can be of help to them. Their problems are our problems.

The Cyphers Company *Service Department* has been established at great expense to give our customers the benefit of the knowledge and experience of practical poultry men, chosen for their standing in the poultry world—for their ability to advise by bulletins, timely booklets and by *personal letter* every customer, so that they cannot go wrong if the plain information and complete instructions are followed.

## The Men Who Safeguard Your Success

are here daily to answer *your every question*—to write you concerning every condition that may arise in your poultry work. Their advice is just as much to the point, just as practical, just as profitable to you as if they *personally visited you* at your home and made suggestions on the spot.

Mr. Curtis and his right-hand Advisory Aids and Division Correspondents, Messrs. Jackson, Jeffrey and Ellison, have entered into this work heart and soul.

# CYPHERS

For long terms of years they have been prominently identified with the growth of the poultry industry, not only as instructors and judges but as practical breeders. They are *sincerely in earnest* in their desire to give every Cyphers customer

## Service Heaped Up and Running Over

and are in a position to do it to your great advantage. The knowledge and experiences, the tests and records which guide these men in their advice to you *do not come out of books*. They represent the practical, down-to-the-minute developments and tests made on the

## Cyphers Company \$75,000 Demonstration Poultry Farm

On this fifty acre farm we have tested, long and repeatedly, practically every article sold by the Cyphers Company and have worked out the *simplest*, most practical methods for the *profitable production* of chickens, turkeys, ducks and geese. We have learned how to *feed correctly*, how to secure the *largest* egg yields—the *finest quality* of poultry meat.

And on this complete, all-purpose poultry plant our experts are learning continually *new lessons* of value to you—facts and experience which they pass on to you willingly to make your poultry raising a *much greater success*.

No matter whether your purchase is large or small, you have simply to become a Cyphers Customer to secure all this free aid and counsel, our free Bulletins of latest developments which are sent you regularly. Write as many letters as you like, the answers will be prompt—*complete*. And, remember, all this Service is without charge. It is greatly to our interest to help make your work *more successful*.

When you purchase a Cyphers Incubator and Brooder—or any of the Standard Cyphers Poultry Equipment, you stand to win from the very beginning—*because* you have the *right tools*. Cyphers Incubators and Brooders mean no troubles—heat or moisture or any other kind. They *also mean* big, uniform hatches—chicks *that live*. Self-regulating, self-ventilating. Substantial. Fireproof. They are made for men and women who are *in earnest*—who want a *real incubator*, not a toy, a make-shift or an experiment. The kind of equipment that fits into Cyphers Company methods, that insures the right application of our

# Company Service To YOU

## Free Bulletin and Personal Letter Service

The kind for business-like, *money-making* poultry raising.

Here are short extracts from a few letters showing how Cyphers Company Service has proved "extra good measure" for poultry raisers—how quality, plus Cyphers Service and Personal Advice, have insured *best results*, largest profits—the joy of *real success*.

W. E. COWING, *Provincetown, Mass.*—"The publication of "Cyphers Service" Bulletins calls for an expression of appreciation from every poultryman in the country."—Sept. 19, 1912.

F. W. DONALDSON, *West Alexander, Pa.*—"Cyphers Service" Bulletins are, according to our idea, about the best poultry literature that has been published."—June 17, 1912.

E. STEPHENS, *Clinton, Iowa*—"The Bulletins have helped me more than anything I have read on the subject. Cyphers Company customers are for-

tunate in dealing with a firm which gives them full value in appliances and stays with them over the rough places."—July 23, 1912.

J. J. KELSEY, *Rome, N. Y.*—"I consider this "Service" of great value to poultrymen. The Bulletins are concise and valuable to all who may have them."—July 8, 1912.

C. C. BUTTERFIELD, *Bunnell, Fla.*—"The Bulletins are valuable to any one interested in poultry. You are to be highly commended for establishing the 'Service Department.'"—June 12, 1912.

## "Profitable Poultry and Egg Production"

Don't lose sight of *this fact*; poultry meat and eggs will command—and keep on commanding *high prices* throughout 1913. Last season's shortage in the chick and egg crop is one reason. Another thing: poultry feed is unusually cheap *this year*, because of the farm-

# INCUBATORS and BROODERS

ers' bumper crops. These facts are in your favor. It is only a question of being rightly equipped and getting at the thing in a right, business-like way—having the right personal counsel and advice. All these things you secure with Cyphers Company Service and they don't cost you *one extra penny*. We want to tell you more about it—about our 1913 plans and methods—about how well organized we now are to give you the exact information and knowledge you require to back you up all the way through to *genuine success*.

## But Send Today—These Three Books are Free

Write at once for "Profitable Poultry and Egg Production"—positively the greatest free poultry book ever issued. Full of richly helpful, practical information worth *many dollars* to every poultry raiser who *means* business. 244 pages, instructively illustrated. Eight special chapters give the very *latest developments*, the most down-to-date methods for profitable poultry and egg production:

Chapter I—What is Possible in Poultry Meat Production; Chapter II—What Can Be Done in Way of Egg Production; Chapter III—Deep-Litter Feeding Experiments of 1912; Chapter IV—Quick Maturity in General Purpose Fowls; Chapter V—Ages and Weights of Chickens for Table Use; Chapter VI—How to Establish Prolific Egg-Yield Flocks; Chapter VII—Today's Best Chance in the Poultry Business; Chapter VIII—Small-Scale Poultry Keeping on a Practical Basis.

## Your Choice of Three Bulletins Free

This big, free book also tells you how to secure your choice of three of the latest Cyphers Company Bulletins and a free copy of our valuable book, "Reports of Successful Poultry Growers"—the book that contains the 80 reports that won the \$1,000 in cash prizes for the most valuable records and accounts of *poultry raising results* in 1912 all over the country. This book is worth hundreds of dollars to poultry raisers. Its contents alone cost us \$1,000 in cash outlay—and it's the best thing of the kind we have ever done. A copy will be *mailed free* to every reader of this paper who requests it. Write today for *your copy* of "Profitable Poultry and Egg Production"—also the \$1,000 Prize Contest Report book—both are free for the asking. Please send coupon herewith.

HOMER W. JACKSON  
Member Cyphers Incubator Company Service Department

Mr. Jackson has been a large-scale poultry raiser. Made a specialty of poultry and fruit combined. For six years conducted the "National Stockman and Farmer" Poultry Farm. Was Associate Editor of that publication. In 1909 became instructor in Poultry Husbandry at Pennsylvania State College and Agricultural Experiment Station. Author of several Poultry books. Farmers' Institute Lecturer. Resigned position at Pennsylvania State College to enter Service Department of Cyphers Incubator Company, June, 1912.

J. S. JEFFREY  
Member Cyphers Incubator Company Service Department

Mr. Jeffrey has raised Standard Bred Poultry since boyhood. Was Director of Western Ontario Poultry Association 1902-3. Served as Vice-Pres. Canadian Barred Plymouth Rock Club. Was placed in charge of North Carolina Agricultural Experiment Station in 1903. Four years later was advanced to Instructor in Poultry Husbandry North Carolina College of Agriculture and Mechanic Arts. Resigned this position to join Cyphers Company forces. Farmers' Institute Lecturer 1904-11.

W. O. Chase.

Howard S. Lytle,  
Election Commissioner.

Mattoon, Ill., December 5, 1912.

### FORT WAYNE SHOW.

Probably the greatest surprise of the season is the extreme liberality of the Fort Wayne Poultry Association. Besides their regular cash premiums, such as are offered by other associations, they are offering seventy-six silver cups, not one of which costs less than \$6 cash at wholesale prices and the retail value of such cups is not less than \$10 each. A number of the cups are worth \$15, \$20, \$25 and \$35 each. Four of the cups are worth \$50 each and two of the cups are worth \$75 each. We believe that this surpasses anything offered by any association along the same lines. These are not fictitious values, but are the actual values as would have to be paid for the same quality cups in cans in any store. The rules governing the awarding of these cups are so liberal that undoubtedly each and every cup offered will be won by some exhibitor. The American R. I. Red Club, the National S. C. R. I. Red Club, the White Leghorn Club and the Polish Club will have their state meeting in connection with this show, which takes place January 22 to 27, 1913. The show room is within two squares of the court house, right in the heart of the city, and the building is large enough to accommodate 2,500 birds easily. Please send in your name and address at once to the secretary, Mr. J. C. Howenstein, Fort Wayne, Ind., and he will forward to you the nearest premium list of the season. This list contains complete information in regard to the show and it will pay any exhibitor to write and get it.

The poultry exhibition of Pittsburgh will take place January 13-18, 1913, in the famous Exposition Building of Western Pennsylvania. Last year more than three thousand birds were entered and the indications are for a larger and better show this winter. In order to bring out the rare varieties, only three birds or pens have been required to fill a class. Ten dollars is offered for first pen, five dollars for second, and four dollars for first single, two for second. The cash prizes as well as silver cups and other specials may be won whether or not there is competition, providing the class or classes are filled. A handsome cup is offered for best display in every standard breed, thus placing all birds on an equal basis. The members of the association have requested and agreed not to show in competition so all prizes will go to the visitors. Twelve of the best judges in the

country have been secured to place the awards. About \$25,000 worth of stock was sold at the poultry exhibition of Pittsburgh last year, and as the attendance is always large at the Pittsburgh show, there is no doubt but what more stock will be sold this year than ever before. W. P. Craig, secretary, 303 Empire Building, Pittsburgh, Pa., will be pleased to give any further information.

The National Black Langshan Club held its annual meeting in Chicago December 6, 1912. The reports of the secretary and treasurer showed the club to be in a very healthy condition. The election of officers for the coming year resulted as follows: President, M. S. Barker, Throntown, Ind.; vice-president, William T. Blakely, South Pasadena, Calif.; secretary-treasurer, John A. Rhodes, Cedar Rapids, Iowa. Executive board, R. W. Bishop, Guilford, Conn.; L. E. Meyers, Bowling Green, Mo.; R. A. Hewes, Crete, Ill. The club has recently issued a catalogue which will be sent free to all who ask for it. Please address the new secretary. The future of the Langshans looks bright if all the breeders will join the club and help the work along.

The annual meeting of the American Houdan Club will be held at Rochester, N. Y., at the flower city poultry show, Thursday, January 9, 1913, at 2 p. m. There will be a large number of cash specials, together with about ten silver cups, and various club ribbons. Open to members of the club only. A copy of the American Houdan Club Year Book will be forwarded to anyone interested for 4 cents postage. Membership fee, \$1 per year. Address, J. A. Underwood, secretary, Penn Yan, N. Y.

The Consolidated Poultry and Pet Stock Association will hold its annual show at Bluffton, Ohio, January 27-February 1, 1913. This is one of the largest and best organized shows in the state of Ohio and they have employed two of the most noted breeders and judges to help make this show a grand success, namely: D. J. Kohli, with three years' experience in the show room, as our secretary, and Charles McClave to do the judging. Very liberal cash and special prizes will be given. Send for catalogue to D. J. Kohli, secretary, Bluffton, Ohio.

The result of the recent election by mail vote of the Rhode Island Red Club of America was as follows: President, Clifford C. Kaufmann, Nutley, N. J.; vice-president, Geo. P. Coffin, Freeport, Maine; secretary-treasurer, W. H. Card, Manchester, Conn. Executive committee for three years, Lester Tompkins, Concord, Mass.; C. C. Loomis, St. Matthews, Ky.; J. W. Simmons, Geneva, Ohio.

The new club catalogue of the International Rose Comb White Minorca Club will go to the press the first of February and all those wanting space in the same should get their ads and reading matter in early. For full particulars write the secretary, Ralph Roudebush, Hope, Ind.

## EGG PRODUCERS—If you want eggs buy Fishel's White Ply. Rocks

## STANDARD LINE-BRED S. C. WHITE LEGHORNS

EXCLUSIVELY

### I HAVE THE CHICAGO WINNERS

Which have swept the platter clean the last four years and have won more prizes than all other exhibitors combined. My first prize pullet and championship female at the recent show were pronounced by Judges as being the most perfect specimens ever on exhibition at this, the largest quality show in America.

### DON'T BE MISLED

And get your start from a bought reputation, but buy from a specialist who can prove conclusively by his winnings that he breeds the birds himself and knows the art of doing it. The Iowa, Oklahoma and Pennsylvania State Departments of Agriculture and United States Department of Agriculture are among my customers. They know where to buy the best grade of stock for demonstration and experimental purposes. No salvage goes with them. They want the goods. That's why they come here. I have plenty of cockerels, hens and pullets of the best quality I ever owned or saw. Write me your wants. Inclose 10 cents in stamps or coin for the original book of information on "Parkside Strain" of S. C. White Leghorns.

CHICAGO SENSATION—First Prize Pen Cock, Chicago, 1910. Pronounced by Judges the Finest Male Bird Ever Bred.

600 - Egg Bookcase  
Style Sectional Incu-  
bator. Sections oper-  
ated independently.

# Mandy Lee

300-Egg Incubator.  
Note the open-front  
ventilation, openings  
at the eggs. Mandy Lee Incu-  
bators are built in all sizes, 60-  
egg to 600-egg.

Heat, fresh air and moisture are the three necessities in hatching. The perfect hatch depends on your getting the right amount of each. How shall you do it? The Mandy Lee is the

## Incubator that Measures and Does Not Guess

Science reveals the right proportion of moisture to heat. The Mandy Lee Incubator applies the proportion automatically. High heat, low moisture—low heat, high moisture. Ventilation proportioned to the moisture and temperature. It is a matter of figures in the Mandy Lee Incubator. The Hygrometer measures moisture as exactly as the thermometer measures heat. And the Automatic Triple Regulator does exactly what the instruments indicate should be done. The Mandy Lee *adapts* conditions. It does not guess, *you* do not have to guess. The Mandy Lee is the one truly scientific incubator. Write and let us give you the proof.

**New 600-Egg Incubator.** Built in sectional form, one above the other. Other sections of 300 eggs each may be added. Advantages: Save heat, large incubator in small space. Sections operated independently, hatches may come off at different times. Built on the advanced Mandy Lee plan, with air-circulating device, etc.

**Germozone,** Geo. H. Lee's National poultry remedy, is indispensable in every yard. Cures Roup, Colds, Canker, Bowel Trouble, Chicken Pox. Lee's full line of Standard Poultry Supplies, including Lee's Egg Maker, Lee's Lice Killer and Lee's White Diarrhoea Remedy, is on sale with all leading dealers. Call for them. Write direct for valuable books on Incubators and Supplies.

**GEO. H. LEE COMPANY, 1101 Harney Street, Omaha, Nebraska**

Clester, secretary, Zanesville, Ohio.

The fourth annual exhibition of the Muncie Poultry and Pet Stock Association will be held January 27-February 1, 1913. Shellabarger, judge. To know all about the handsome silver cups, the valuable specials, the finest silk ribbons ever

offered, the place to sell your \$10 and \$25 cockerels, the place for winning means business, drop a card to the secretary, W. H. Nation, Muncie, Ind.

The Lyle Poultry Association will hold their second annual show January 21-24, 1913, at Lyle, Minn. Large cash premiums will be offered in every class, also a long list of specials. Henry Hess, judge; William Nordland, secretary, Lyle, Minn.

The next annual meeting of the Rose Comb Buff Leghorn Club of America will be held at Indianapolis, Ind., January 15, 1913, in connection with the National Fanciers' Club. There are many cash, special and silver cups offered. There will also be an election of officers for the coming year. All are specially urged to attend this meeting and also to make as large a display as possible.

We have received a copy of the 1913 edition of the Partridge Wyandotte book and in our opinion this is one of the finest poultry catalogues ever issued by a breeder. This book contains thirty-six pages and cover, finely illustrated with

half-tones of scenes of the farm and illustrations of prize winning Partridge Wyandottes. The cover is beautifully printed and embossed in gold, which makes the book a work of art. This book is published by the Sheffield Farm, Glendale, Ohio, who are specialty breeders of Partridge Wyandottes. Everyone interested in this variety of fowl should secure a copy of this book. See their ad elsewhere in this issue.

For eighteen years one of the largest and best shows in the central west has been held in Cedar Rapids, Iowa, but the show for this year will lead them all in the liberality of its cash and special premiums. It is bound to be Iowa's greatest show. The dates are January 13-18, with Russell and Tucker, judges. For premium list address E. D. Monilaw, secretary, Cedar Rapids, Iowa.

The first annual exhibition of the Merry County Poultry and Fanciers' Association will be held in Duncannon, Pa., January 28-February 1, 1913. Competition open to the world. H. C. Hemperly, secretary, Duncannon, Pa.

## BABY CHICKS—U. R. Fishel's White Plymouth Rocks the Best in the World

### A WONDERFUL WINNING AT CHICAGO ON R. AND S. C. BLACK MINORCAS AND R. C. BROWN LEGHORNS

Two Females from Laddie Man's Harem, full sisters, sired by Prince Laddie out of Vixen.

## Archwood Yards

ORIGINAL SUSSEX STRAIN SINGLE COMB WHITE

## ORPINGTONS

LAY LIKE A GATLING GUN GROW LIKE A WEED

### Laddie Man's Harem

ONE of our special matings for the season of 1913, headed by Laddie Man, whom we believe to be the looest feathered yearling cock bird in existence, with females conforming to his standard, constitute the most superb mating that we have ever had the pleasure of offering. Eggs from this mating at \$25 per setting of 12 eggs. Eggs from the world's greatest exhibition matings, \$10 per setting of 15 eggs. Each and every bird in these matings has a show record at the largest shows on the continent that cannot be duplicated. Eggs from special matings, \$20 to \$30 per setting of 12 eggs.

### Cockerels

We have selected 100 cockerels, some early hatched, some late, each and every one of the highest exhibition quality and without a blemish, some weigh as high as eleven pounds, some as low as eight pounds, all are true Sussex strain birds and will breed into their progeny the characteristics of the strain. To move these birds fast, we offer them at \$25 each, not more than one to a customer, individual descriptions will not be given, neither will the privileges of shipping on approval be extended, however we assure you that your gratification on receiving any one of these birds will more than compensate you for whatever risk you may imagine taking as some of these birds are really worth hundreds while the poorest is good at twice the price. Eight of these birds were sired by Prince Laddie himself. They will be shipped as they run. We will absolutely not select a single bird from this lot for any individual, all will stand an equal chance of getting the best, no matter who he is.

# Wisconsins Victorious—Winners

Winner in Mo. Valley Farmer Contest in 1910. Also a winner in Successful Farming Contest in 1911 and 1912. Read the wonderful records below which prove beyond question that the Famous Wisconsin machines are the **BEST FOR THE MONEY IN THE WORLD.**

**in 3 Big Hatching Contests**

Mrs. Jerry McMahon, Veedersburg, Ind., with a 125-Egg Wisconsin Incubator, hatched 125 chicks from 125 eggs, in the 1910 Big Hatching Contest held by Missouri Valley Farmer, making her a Prize Winning contestant with over a thousand competing. (Sworn Statement).

Mr. C. B. Armitage, Atwater, O., hatched 88 chicks from 88 fertile eggs and 93 chicks from 93 eggs in the 1911 Contest, held by Successful Farming, with his 125-egg Wisconsin Incubator, making 100 p. c. hatches. The two highest hatches of any machine entered in the contest with two hatches.

Mrs. J. W. Mize, Vaughns Mill, Ky., won in the Big Hatching Contest held by Successful Farming in 1912, hatching 105 chicks from 105 eggs and 103 chicks from 106 eggs.

**If You Want to Get Results Like These—Why Take Chances?  
Get a Pair of These Unbeatable Machines—  
You Can't Go Wrong!**

It is folly to take chances with unproven, unknown makes, when you can get the Wisconsin with public records like these for as little and in many cases less money than others. Then, remember, our strong guarantee makes you doubly safe.

THOS. J. COLLIER  
Manager  
Wisconsin  
Incubator  
Co.

## Why Take Chances

**125-Egg Incubator  
125-Chick Brooder**

**Why Pay More? If Ordered

Why Take Chances? Both for**

**\$10**

Freight  
Paid  
East  
of the  
Rockies

I stand ready to prove to you there are no better machines on the market for anything like my low price. I stand ready to let you prove it in your own home, to your own satisfaction (not mine), and pay the freight charges both ways. You take no risk—no chances. I will ship you one of my 125-Egg Hot Water Wisconsin Incubators and a 125-Chick Brooder on 30 days trial, and if you don't find it the best hatching outfit after 30 days trial ship it back, and back comes your money. Machines that win in the Big Hatching Contests year after year surely must have unusual merit. But, remember, they must win your satisfaction or I take them back—return your money—pay all freight cost. I have been advertising in this paper for years. The publishers know me and know that I do just as I agree. I am undoubtedly making the readers of this paper the most remarkable offer on high-grade incubators and brooders that has ever appeared in the paper.

## The Wisconsin Incubator

walls with dead-air space between; top has three walls; large double glass doors; tank and boiler; roomy nursery beneath egg-tray; self regulating; made of high-grade California Redwood, not paper, nor do we paint them to cover up cheap lumber, but we stain and varnish them so as to show quality of

is hot water  
type; has  
double side

has no equal at anywhere near the price. The brooder is a roomy, well made, properly heated and ventilated machine. Fitted with hover, oil lamp and wire scratching yard as illustrated. Both machines complete—set up, ready to use with Taylor "Tycos" thermometers, O. K. burners, safety oil lamps, egg tester—everything but the oil—all for only \$10.00.

## Proof in a Nutshell

Here are a few comparisons of "proofs" that will help you to avoid making a mistake in deciding which machines to buy:

**1st** The Wisconsin has double walls with dead air space, a decided advantage. Some have no dead air space.

**2nd** Egg chamber in the Wisconsin is fully ten inches deep. Some, to cheapen cost of making are scant 8 inches deep.

**3rd** This makes the nursery less than 2 inches and too shallow for little chicks. In the Wisconsin the nursery is 3 inches deep.

**4th** In the Wisconsin there is plenty room between the egg tray and the door for the chicks to get in the nursery. In some incubators you have to open the door in order to put the chicks in the nursery.

**5th** The Wisconsin has large double glass doors through which the thermometer can be easily read. Some have a small single glass, making it necessary to open the door to read thermometer.

If you will make these comparisons, weigh them well, I know you will order my machines and be better pleased, for these are cold facts which actual comparison have proved.

SECTIONAL VIEW, Showing the Double Walls and Dead-Air Space Construction of Our Machines.

## SHIPPING EGGS BY MAIL.

What Will Be Possible in a New Development of the Poultry Business as Soon as the Parcels Post Goes Into Effect.

That the big poultry plants, especially those near the large cities, are going to make a great and very profitable development out of the new parcels post act in the matter of mailing eggs to customers, seems undoubted judging from the preparations now nearing completion at the Tywacana Farms Poultry Company, the big Rock and Leghorn establishments at Farmingdale, Long Island.

Tywacana, which is well known to poultrymen throughout the East, both for its excellent eggs, day-old chicks and breeders and its distinctive Indian Head trade mark, is one of the foremost poultry farms in the vicinity of New York City. Established some years ago by E. F. Yoakum on his Long Island estate, Tywacana is now under the management of A. E. Wright, a poultryman whose name is familiar to poultrymen throughout the East for his prize winners in Madison Square, St. Louis and other big shows. Mr. Wright is a man of progress in poultrydom, and it is characteristic of him that he has grasped this great opportunity by the forelock.

In a few words the proposition is simply this: From the Tywacana Farms will be shipped, daily, fresh eggs to the consumer in the large cities nearby. In place of being given to the expressman, however, and starting on a journey that may be precarious as to the length of time it consumes, and very probably will be dangerous to the eggs as to the character of the handling, these same fresh eggs, neatly done up in specially designed and patented boxes, will go via Uncle Sam's efficient and expeditious route, and be delivered in the morning by a gray uniformed postman with a whistle.

An excellent idea, eh? Sound to the core, provided one thing is looked after, states Mr. Wright. This thing is none other than the absolute necessity for carriers that will prevent the eggs being broken in transit. The whole business rests upon the boxes in which the big white hen fruit is packed.

To get around this Mr. Wright is going to make his own boxes. They have been especially designed and invented for this express purpose. And in order to have enough of them at all times to handle the great Tywacana trade in eggs, Mr. Wright is putting up a factory to manufacture these boxes himself, at Tywacana.

These parcels post egg boxes are made

of double corrugated board, tight, trim and strong as steel. They are light and very cheap, easy to pack and put together, and—but what's all this got to do with the Tywacana mailing egg scheme? Nothing more than this—Mr. Wright, realizing what a big thing this parcels post is going to be for the poultryman, and looking ahead at the inevitable demand for egg shipping boxes, has simply made the factory larger and prepared for selling the boxes, together with larger boxes for shipping hatching eggs and day-old chicks, to poultrymen generally.

Poultrymen cannot realize the importance of the package in the egg business. There is nothing that so pleases a customer and renders him so likely to be satisfied with his article than to have that article arrive in a neat, clean, attractive package. It makes for good will, more business and less kicks and claims for damages.

These boxes manufactured at Tywacana are about as neat, clean and attractive as can be made. They are also cheap and meet every requirement of strength and durability. A sample will be sent to—but better still, there is a neat little booklet, illustrated and nicely gotten up, that will describe these boxes to the queen's taste. Drop Mr. Wright a postal today, addressed to Farmingdale, Long Island, N. Y., and get a copy of this book. It will tell you some things about shipping eggs and chicks that may help you. It will certainly be interesting as describing a novel departure in the poultry world.

A. A. Carver, Lock Box 2, Seville, Ohio, the well-known breeder of Single Comb Reds, has a change of copy in his ad on the back cover page, also has an additional ad in this issue. It would be well for those interested in Single Comb Reds to read these ads over carefully, as he has some magnificent red cockerels, and his price for eggs will not be raised on account of his big winnings; and his matings are the best ever.

Dr. L. D. Le Gear, Kirkwood, Mo., breeder of White Plymouth Rocks, reports the following winnings this season: At the Arkansas State Fair, Nov. 11-16, 1912, he entered seven cocks, eleven hens, four cockerels, six pullets and won as follows: first, second and third cock, first, second, third hen; first, second, third cockerel; first, second, third pullet; first, second, third breeding pen. One silver loving cup for the best fifteen White Plymouth Rocks in the show. A \$50.00 Special Cash Sweepstakes prize for the best 25 birds in the show, regardless of breed. Competition open to the world.

His White Plymouth Rocks also won 13 out of a possible 16 prizes at the great St. Louis show, 1911. His last winning was made at the Missouri State Poultry Show at Springfield, Mo., December, 1912, where he won all specials in the White Rock class and one-half of the regular prizes including 4 first, 4 seconds, 3 thirds, 5 fourths and one fifth. For further information address Dr. L. D. Le Gear, Kirkwood, Mo., or 713 Howard St., St. Louis, Mo.

We take pleasure in announcing to our readers that on and after January 1, 1913, the Sunswick Poultry Farm, South Plainfield, N. J., will devote all their time, thought and skill to the development of the Single Comb Buff Orpington and the Buff Orpington Duck. Since the day old chick business first came into vogue a few years ago, they have been carefully studying all sides of the question, and have finally come to the conclusion that it has come to stay. Still another conclusion is this, that the day of the poultrymen who raise more than one variety is passing, and the day of the specialist is here. The Sunswick Poultry Farm has bred both black and white Orpingtons and have made some of the most sensational winnings with each variety that it was possible to make, and they have raised the grandest birds of each variety that ever were raised, and although they have brought each of these birds to a state of perfection, and though even rival breeders acknowledge that they have some of the finest birds in the country, yet they are discarding the Blacks and Whites in order to specialize in their one choice of all, Single Comb Buff Orpingtons. They inform us that they have built a large up-to-date incubator cellar and have installed a Hall Mammoth Incubator, and will be in a position this season to supply any quantity of Single Comb Buff Orpington day-old chicks or Buff Orpington ducklings. Anyone interested in either of these varieties should write them for full particulars.

C. L. Cunningham & Son, Caruthersville, Mo., are making a special sale on cockerels and pullets this month. They are of the best breeding and have many direct from Kellerstrass that they are making special prices on. They have been winning their share of the premiums at the shows. At Memphis they won over Cook on pen and over Owens on cockerel. They also won over Cook on pen in St. Louis, and over every small breeder at this show on cockerel. Winning in such company as Cook, Fisher and the large breeder from Kentucky.

## EGG PRODUCERS—If you want eggs buy Fishel's White Ply. Rocks

# Don't Let The Profit Slip Through Your Fingers

Start 1913 right. Resolve to bid good-bye to your poultry losses. Let us show you how to add an extra \$1 to every \$7—and win new customers at higher prices.

## OUR GUARANTEE Money Back If Not Satisfied

You are the judge and the whole jury. Write us how many hatchings you ship each year, the number of baby chicks and fresh eggs and present method of delivery, and we will send you information that will increase your profits.

**Higher Prices, Fresh Eggs**—The Brennan law and Parcels Post mean a lot to you. The increased demand and lower cost of transportation combined with our Farmers' Modern Egg Crates, Safe-Eg-Pak 100 Krate and sale-plans will add at least 40 per cent to your profits.

**Farmers' Modern Egg Crates**—Only one handling from nest to customer. Breakage impossible. Provides economical advertising plan for building up individual trade.

**For Breeders**—A simple method of marking each carrier with a pen number and date. Ideal for turning eggs. No handling of each egg.

**Parcels Post**—Write us about your individual conditions and we will answer your questions, even to rates and markets—also how you can avoid all breakage and vibration and insure the

perfect "hatchability" of Your Settings by Safe-Eg-Pak, Specially designed packages for shipping fresh eggs.

**Ship Baby Chicks?**—By all means get the details of our special package—Star-Chick-Box scientifically ventilated. No square corners. Circular interior. Transports delicate chicks safely. Set up—ready to use.

Our STAR SHIPPING COOP same principal. No breakage of plumage. Birds not frightened.

All packages are made of kiln-dried wood. Made light to reduce express charges. Returnable, so durable they can be used repeatedly. Pay for themselves many times over.

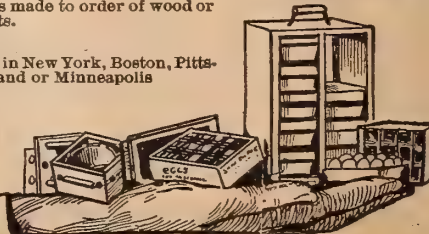

Special PARCELS POST packages made to order of wood or paper to suit your individual wants.

Agents wanted in every county.

These Will Save Them

**STAR EGG CARRIER & TRAY MFG. CO.**

100 DALLAS STREET, ROCHESTER, N. Y.

Only concern in U. S. Making egg and poultry-carrying devices exclusively.

**VALUABLE LITERATURE AND FREE SELLING PLANS**

They have as fine birds as can be found on any small breeding farm of the country. They started right and have been very successful in their matings and have bred all their winners that they have shown this year, which speaks well for them as breeders. Write them if you are in the market for high-class stock.

### MAKING POULTRY PAY.

The poultry plant is the natural place for a central custom hatchery. Almost every poultryman is asked to hatch eggs for his neighbors and usually the business is declined because the poultryman hasn't incubator capacity enough to handle it. Now when any business comes unsolicited it is a pretty good tip that there would be a good deal more if one went after it. That is just the opportunity that is waiting for the man who opens up a central custom hatchery.

The proposition is sound to the core. Everyone knows that one man who makes a specialty of a certain kind of work can do it better and cheaper than a lot of men who only dabble in it. If a man has say a 2,400 egg incubator capacity, he could run it with less work and attention than ten men in different places, each running 240-egg machines. At \$2 a tray, a 2,400-egg machine would earn \$64 per hatch. Other sizes figure in proportion. The customers bring their eggs and call for their chicks. To keep a 2,400-egg machine full, the operator would only need to take in 115 eggs a day—less than two trays a day. When you think of the amount of eggs hatched in your section that isn't even a drop in the bucket. Now the way to start and run a hatchery is told in full in a custom hatching booklet, sent free by mentioning this paper and writing the Candee Incubator and Brooder Company, Eastwood, N. Y.

### TO WHOM IT MAY CONCERN.

The following is to the effect that I have sold and delivered to G. D. Curtis of New York City, president and treasurer of the N. Y. & N. J. Poultry Farms, Inc., my entire stock of Rose and Single Comb Black Minorcas, which is the stock and its descendants purchased from Geo. H. Northup & Son, May 21st, 1909. Together with my entire stock of Minorcas, Mr. Curtis received my lists of customers, cuts of birds and the good will of the business.

One very important stipulation of the agreement is, that the entire stock of birds shall be placed in the care and custody of Marcus Allen Northup, the well known manager of the N. Y. & N. J. Poultry Farms, to be bred and managed according to the best of his ability and judgment along the same lines which his father had followed for twenty-three years previous to my purchasing the stock.

Mr. Northup has now the entire management of this noted flock of Minorcas, and I am confident that Northup's Minorcas will reach a higher excellence than ever before in the history of Minorcas. Mr. Northup is better qualified than any other breeder to advance the interest of this famous strain of poultry, because he has been associated with his father in breeding the same strain and all the blood lines are familiar to him. He is in possession of all the breeding secrets by which his father made Northup's the most famous strain of Minorcas in the world, and these same blood lines will be continued to the betterment of the breed.

While visiting a week last September at the N. Y. & N. J. Poultry Farms, I was much pleased to note so many good Minorcas there, true Northup strain, with their long backs, high graceful carriage, low tails and green sheen to the plumage.

In conclusion, I wish to heartily thank all my customers and friends for their valued patronage during the past three and a half years that I have been in the Minorca business on the farm at Raceville, N. Y., and I cheerfully commend them to my successor for high class breeding stock and eggs, and honorable square dealing.

George W. Hey.

Raceville, N. Y., October 21, 1912.

In the foregoing two sales of the famous Northup poultry business are recorded: One to Geo. W. Hey from Geo. H. Northup & Son, and the other from Geo. W. Hey to New York and New Jersey Poultry Farms, Inc., Orangeburg, N. J.

After the first transaction mentioned, Mr. Hey continued to breed the genuine Northup strain Minorcas at their original home. Mr. George H. Northup retired from active business and Marcus Allen Northup, the junior member of the firm of Geo. H. Northup & Son, engaged his services for a term of five years to the New York and New Jersey Poultry Farms, and after purchasing a few pens of extra

fine, genuine Northup Strain Minorcas, he commenced breeding and selling stock from that farm. Thus for the past three years there have been two farms breeding the genuine Northup Strain Minorcas in its purity, yet the demand was so much in excess of the capacity of both farms that there has never been any competition between the two breeders.

Before entering the poultry fancy Mr. Hey was a musician of considerable ability and prominence, and he was very much disappointed to find that poultry breeding on a large, up-to-date farm demanded too close attention to permit him to keep abreast of the times in his profession, so after much hesitation he decided to quit the poultry business and offered his stock of Minorcas for sale. New York and New Jersey Poultry Farms were the successful bidders, and on the 21st day of October, 1912, the final papers in this transaction were signed and Marcus Allen Northup, manager of New York and New Jersey Poultry Farms, Inc., took possession of the celebrated poultry.

F. O. Wellcome, inventor and patentee of the "Ideal" trap-nest, is the pioneer in

this line, and has sold his trap-nest in every state and territory in this country, also in many foreign countries. He recently received a communication from W. W. Emerson, Winnipeg, Canada, in which Mr. Emerson stated "Our attention has been called to your 'Ideal' trap-nests and monthly record sheets as necessary features in successful poultry farming today. We understand, through Professor Herner direct, that these fixtures are being used at the present time in the poultry department of the Manitoba Agricultural College." When such people as Prof. Herner recommend an article there is no doubt about its being all that is claimed for it. Mr. Wellcome issues a catalogue which gives full particulars about his specialties. This may be had for the asking if you mention American Poultry Journal.

W. W. Kulp, Pottstown, Pa., reports the following winnings at the late Philadelphia show on Rose Comb Brown Leghorns: First cockerel, first and third hen, second pullet. On Rose Comb White Leghorns, first cock, first cockerel, first hen.

## Let Me Save You Money on Your Incubator

I don't care how large or small a machine you want, I can save you money on it. I know incubator values from A to Z. I know what it costs to build them and I know how cheaply the best incubator can be sold. I have been building them for over 31 years. I own the largest incubator and brooder factory in the world. I know what I am talking about. I know that you will receive one of the biggest surprises of your life when you

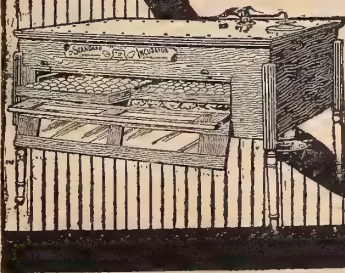

### Get My Rock Bottom Prices on the "Reliable"

Here's an incubator that's made of absolutely the best materials from beginning to end. Thoroughly seasoned matched cypress lumber is used in its construction. A double heating system is built right into the incubator. Yet you can get at it in a second. The Reliable has an accurate regulator—tanks of cold-rolled builder's copper—metal chimney—government standard tested thermometer and all-metal safety lamp. No matter how cold the weather, you can absolutely depend on the Reliable. No worry—no trouble—no bother. It is guaranteed to hatch any egg that can be hatched—in any altitude. No machine can do more. Do you know of any other of which you can be so sure? Built in 7 sizes. One is just your size. Get my prices. Don't buy until you do. Write tonight.

### RELIABLE BROODERS

Are made of the same high grade materials with the same workmanship and care as our famous incubators. Choice of either Hot Water or Hot Air heating. Made in four sizes—for 80, 120, 220 and 300 chicks. Send for detailed description and prices.

J. W. MYERS, President,  
RELIABLE INCUBATOR &  
BROODER CO.,  
Box A-1 Quincy, Ill.

## TO WHOM IT MAY CONCERN.

This is to certify that we have this day sold to Buschmann-Pierce Red Farms our entire flock of R. C. R. I. Reds, including all our winners and selected breeders. Among the winners being 1st cock, 2d hen, and 1st pen at Madison Square Garden, December 1911, the cock that won 3d at New York 1911, also first at Nashville and Memphis 1912, and the first Memphis cockerel 1912. This flock is one of the finest in American, and added to their already great flock, will make them unbeatable.

(Signed) Owens Farms,  
Maurice F. Delano, Mgr.

CARL E. ROGERS, PAINESVILLE, O.

The Buff Orpington breed by Mr. Rogers distinguished themselves by winning two firsts and three seconds at the Great Northern Ohio Fair. The competition was very keen and this win proves the quality to be found in Mr. Rogers flock. He is offering some special bargains, in male birds for the next thirty days. He can please you in both quality and price. Better send for his sales list. His ad appears elsewhere, look it up. Mention A. P. J. when writing.

The Berrydale Experiment Gardens of Holland, Mich., have just completed their 1513 book. They have been issuing this book for many years, and in strawberry circles it is recognized as a standard publication. It is used as a text book in horticulture in more than thirty of the agricultural colleges of this country; it goes to every agricultural county in the United States; thousands of copies are sent to the Dominion of Canada, to Europe, to Cuba, to South America, to Mexico, and many copies are sent to Australia, Asia and Africa. We believe it is the widest read book on horticulture published anywhere in the world. You may be interested to know that the edition for 1912 of 175,000 copies was exhausted several months ago, and the 1913 edition is composed of 185,000 copies. Send for a copy to R. M. Kellogg Co., Three Rivers, Mich.

The Tiffin Chick Hatchery, Tiffin, Ohio, are making great preparations for a large trade in day-old chicks this season, and will be in position to handle all orders promptly, no matter how large or how small. Send for their catalogue and prices on what you want.

A. & E. Tarbox, Yorkville, Ill., foremost breeders of Silver Wyandottes, inform us that they will not exhibit at any other shows this season and that they can supply winners for any show. Their winners at Omaha were 1-3 cock, 1-2 hen, 2-3 cockerel, 1-3 pullet, 1 pen. Their St. Louis winnings are reported on another page of this issue. Write them and mention American Poultry Journal.

other page of this issue. Write them and mention American Poultry Journal.

Mrs. Reginald Stonestreet, owner of Park Poultry Yards, Nashville, Tenn., reports the following winnings at Columbus, Ga.: On White Orpingtons, 1-2 pen, 1-4 pullets, 2-3 hens, 2-3 cockerel. On Partridge Rocks 1st pen, 1st cockerel, 1st pullet, 1st hen. Also the following specials, \$100.00 cup for the best pen in whole show, \$50.00 cup for best pen White Orpingtons, \$50.00 cup for best pen Partridge Rocks, \$50.00 cup for best display Orpingtons, \$25.00 cup for best cockerel and pullet exhibited by a lady, \$25.00 cup for best display exhibited by a lady. White Orpington Club medal for best pen, White Orpington Club ribbon for best pen, White Orpington Club ribbon for best pullet. This was certainly a most remarkable winning, and Mrs. Stonestreet is to be congratulated on same.

Buff Poultry Farm, Fred A. Poertner, proprietor, Berea, Ohio, reports a fine lot of stock on hand this season in their "Wingold Strain." Buff Wyandottes, Buff Rocks and Single Comb Buff Orpingtons. Mr. Poertner will make up several high-class pens of each of these varieties for the egg trade this season, and before placing your order you should communicate with him for full particulars.

On page 1732 of our December issue appeared an ad of R. D. Owen, Preston, Ohio, breeder of Silver Wyandottes. This should have been Creston, Ohio. Mr. Owen has a change of copy in this month's issue and we request our readers to look up his ad, as he has something interesting to offer.

This is the season of the year when you should provide your fowls with a good dust bath. If you are not using Dustyne for this purpose you can do no better than to give it an immediate trial. The Poultry Dust Bath Company of Whiting, Indiana, manufacture this dust bath. Their ad appears elsewhere in this issue.

One of the main attractions at the great Chicago show was the display of forty male birds and a number of choice hens and pullets owned and bred by Geo. H. Rudy, Mattoon, Ill., the well-known breeder of "Perfection" White Wyandottes. This display included a pen headed by the celebrated "Perfection Jr.," the bird which was never beaten in any show room. "Perfection Jr." is now six years old and carries himself with all the grace and proudness which brought the ribbons to his owner wherever he was exhibited.

Another feature of Mr. Rudy's display was a pullet with seven chicks, which she hatched from her own eggs four days before she was five months old, thereby proving that "Perfection" White Wyandottes mature early.

Cockerels sired by "Perfection Jr." and which show the excellent quality of their breeding were also on exhibition and brought forth favorable comment from the visitors. Mr. Rudy reports that he sold a good many of these birds; but has others just as good at home. If you desire White Wyandottes of quality at reasonable prices, address Geo. H. Rudy, route 15, Mattoon, Ill.

Bennington, Vermont, Dec. 12, 1912.  
Mr. T. A. Faulds,  
London, Ont.  
Dear Sir:

I feel that it is due you to tell you how the cock and two pullets that I purchased of you last year have panned out. The pullets layed all through the winter and I raised from them and the cock the best stock that I ever had. All the young birds show their breeding. I have cockerels hatched in May that weigh 7 1/2 pounds. All have good long backs, dark eyes and fine color. I have bought birds from some of the best breeders in the country and I will say that none of their stock comes near yours for quality. I intend showing at Boston in January with the old cock and a couple of his get.

Will you kindly advise me if you can tell from your records just what relation the cock and pullets that you sent me are. I wish to know this for future breeding. Both of the latter came through the moult in good shape and are now laying—and they lay good big eggs. A number of birds that I have purchased lay very small eggs compared with yours. You are at liberty to publish this letter if you see fit.

Yours truly,  
H. H. Shields.

## "DON'T BE A CLAM."

A man from Missouri came to see my plant. Any man you simply Tell, if from Missouri, you must Show him. He saw the Mammoth Machine at work. He saw the laying house at work. He saw the breeding house at work, with a day and night shift. He ordered 800 chicks, and said: "Now I want to see the pretty girls." I showed him a sample (not the best, they won't leave home). He cried: "That is enough, you have the goods, they are full yard wide and will not shrink in the wash."

Darlington Egg Farm. Alfred P. Edge, Box B, Darlington, Md.

# YOU SAVE

LABOR, save feed and get more eggs by using Simplicity Feeder and Exerciser. Price—10-quart, \$2; 20-quart, \$3.

Simplex Supply House : Pontiac Building : Chicago, Illinois

# WHITE ORPINGTONS

Magnificent youngsters fit for any competition. No matter how large or how small your show I can positively help you win. Am especially strong in exhibition hens, cks, and pullets. They are beauties! Also grand breeding males. My winning of the big silver cup for best display of White Orpingtons against the best that England and America produces at Chicago last December, besides 1st pullet, 2d ckl, 3d hen and 5th cock at the same show the year before, is ample proof of the quality of my stock. Write me before buying.

Dr. Guy Blencoe

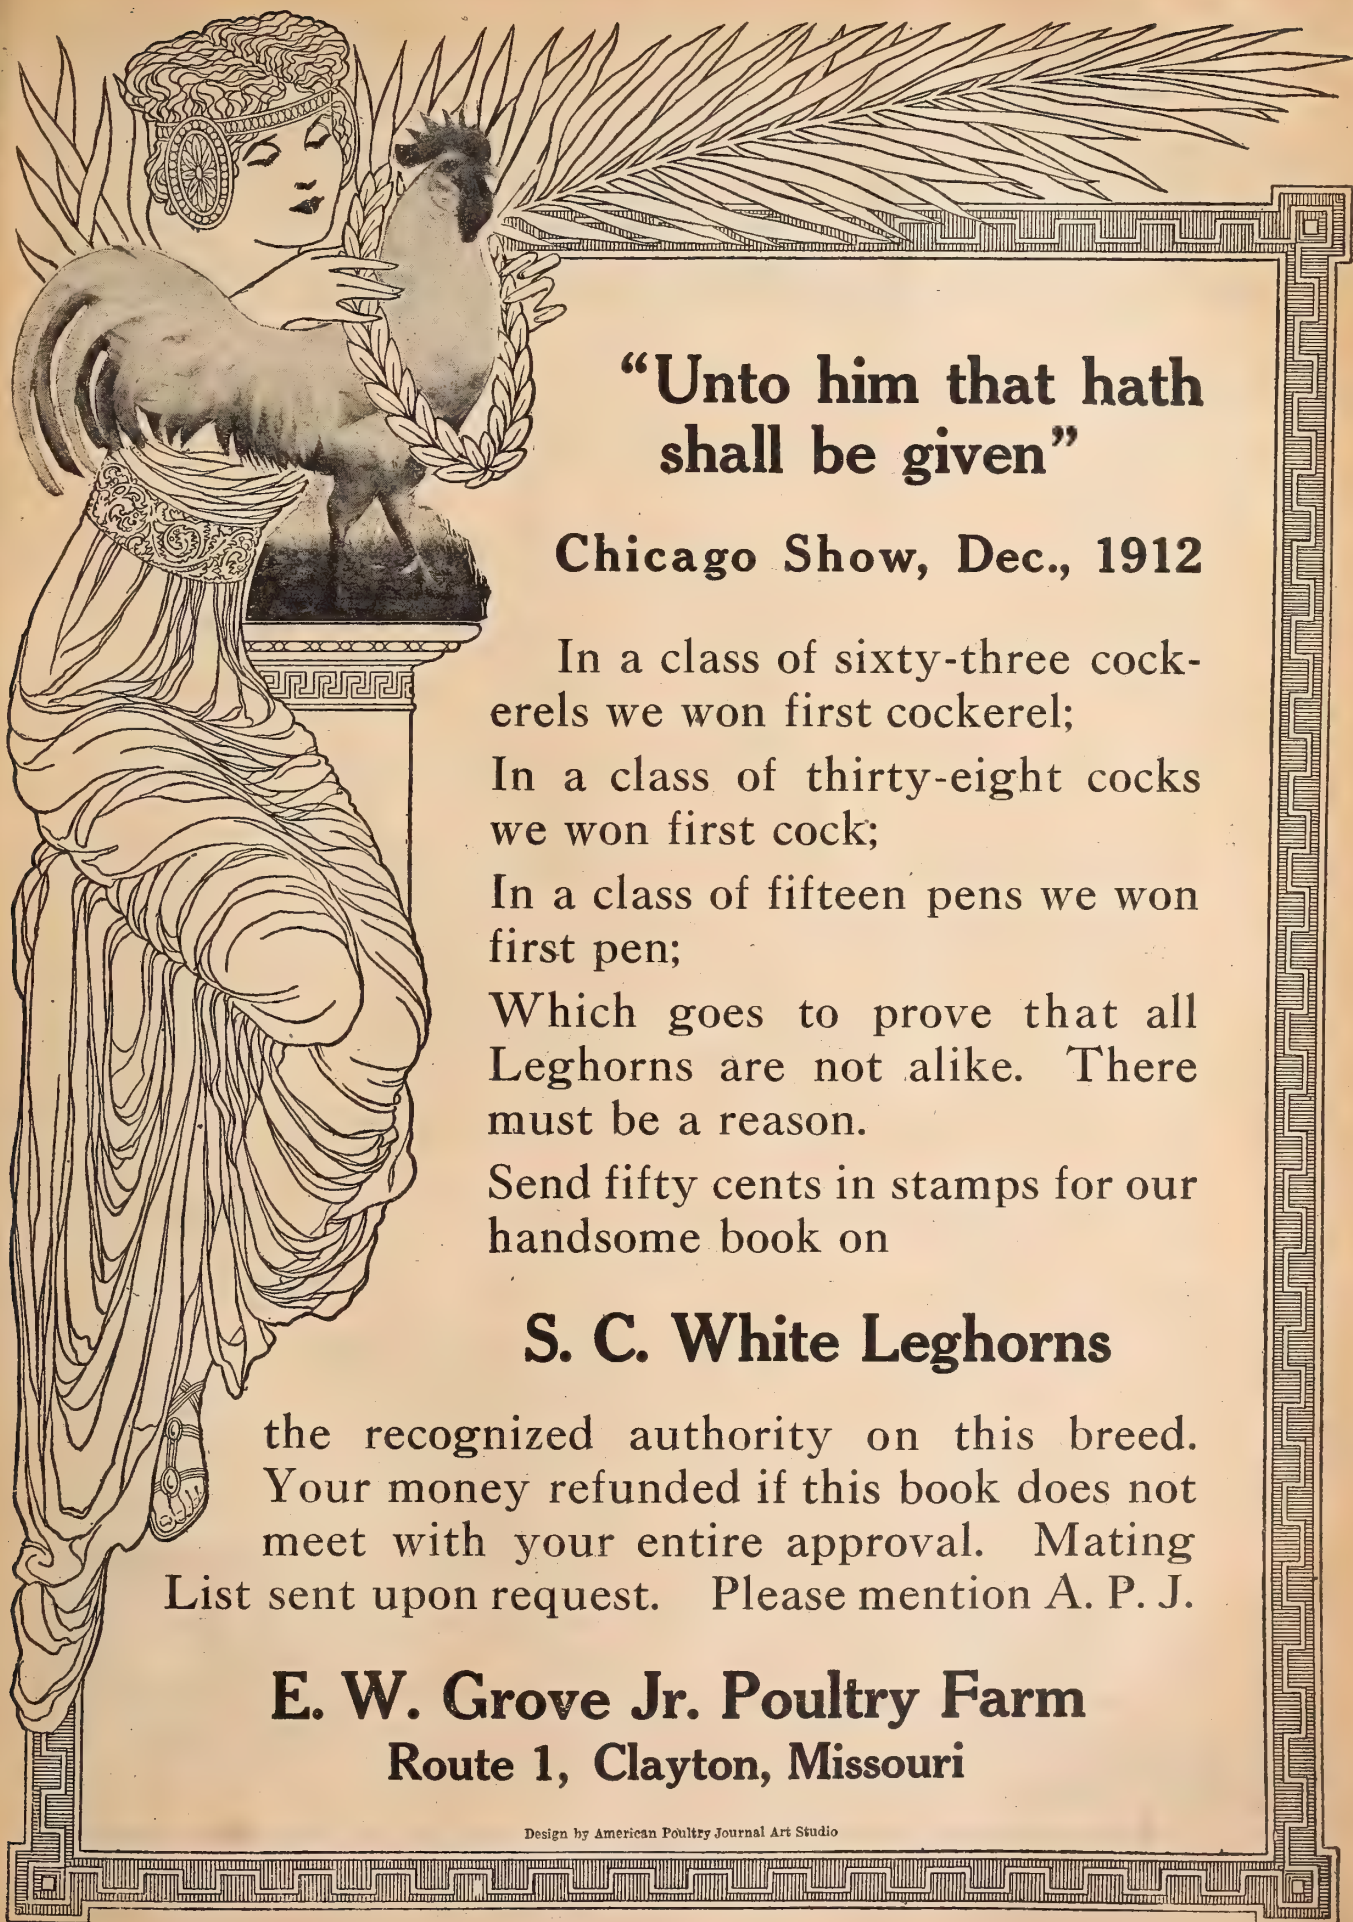

Alma Center, Wisconsin

# VICTORY UNEQUALLED

Has been the record of the Monmouth Strain of S. C. Buff and White Leghorns in the hands of our customers at the Fall shows. The winning of first pen, first and fifth cockerel and second pullet by one of our patrons was the sensation of the great Allentown show. The quality of our Buffs and Whites is the talk of expert fanciers. We will not exhibit at Madison Square Garden or at any of the eastern shows this season, so we are in a position to supply you with winners both in old and young stock. You cannot afford to let this opportunity pass. Write us your wants immediately. A grand lot of utility pullets, cockerels, yearling hens and cock birds in both varieties ready for shipment. NOTE—Send 25c for a reproduction in colors of Schillings' wonderful oil painting of the greatest trio of S. C. Buff Leghorns ever bred. A masterpiece worth having. Mention this paper when writing.

# Buy Your Incubator of Chas. A. Cyphers

**Let Me Save You 50%** My new incubator, the Buffalo, fulfills the life-long demand of thousands of poultrymen for a **Standard Hatcher** at a reasonable price. It offers all the Quality of the best high-priced incubators, at **half the price** of any other incubator containing the **Cyphers Principle**.

## Sterling Principles Maintained

Every vital principle that made my Original Cyphers a World Success is embodied in the Buffalo. The same three-compartment heater; the diffusive ventilation; and the sensitive and accurate regulator; combined with heavy insulation and durable construction; with refinements not included in the original.

Buffalo Incubators insure you big hatches of strong chicks that live and are easily raised to make money for you. Look what they did for these men:

### Buffalo Hatched Pullets Win International Egg Laying Contest.

Sayre, Pa., November 25th, 1912

Mr Chas. A. Cyphers, Pres.,  
Buffalo Incubator Company.

Dear Sir:—It probably will be interesting to you to know that my pen of five pullets which won the Philadelphia North American International Egg Laying Competition at Storrs, Conn., laying 1071 eggs in a year, were incubated in a No. 3 Buffalo.

The Buffalo Incubator runs itself. The hatch percentages were very large—a strong and vigorous chick from practically every egg. My prize winning pullets came out bright and lively, and were laying the second week of November.

Yours very truly,  
F. G. YOST.

—Breeder of Keystone State Strain,  
Single Comb White Leghorns.

### Buffalo Incubator Owner Wins Poultry Item Premium for Best Hatching.

New Park, Pa., November 25th, 1912.

Mr. Chas. A. Cyphers, Pres.,  
Buffalo Incubator Company.

Dear Sir:—I purchased a No. 2 Buffalo Incubator from you last January, and I want to tell you of its good work.

I entered it in the Poultry Item, contest and hatched 220 chicks from 225 fertile eggs in one hatch, and 214 chicks from 223 eggs in another hatch. I won the first prize away ahead of my nearest competitor.

I shall buy more Buffalos this season.

Hoping you may have great success, I remain

Very truly yours,  
C. P. SHIREY.

—Breeder of S. C. White Leghorns of Quality.  
Eggs, Stock and Day Old Chicks.

The Buffalo is simply a wonder. I am proud of it. There is nothing cheap about it but the price.

I offer you an incubator that is second to none in **Durability, Reliability, or Quality**. You can't get a better incubator than the Buffalo, no matter how much you pay.

You can't get one as good. There are incubators and incubators, and nearly any of them will hatch some chickens. The biggest profits are made by operating the Buffalo, which will hatch a strong and vigorous chicken from every hatchable egg.

## Note My Low Prices

OFFER No.	Egg Size	Shipping Weight	65 lbs.	\$10.50
0—	50 to 60			
" " 1—	110 to 120	" "	90 "	14.50
" " 2—	220 to 240	" "	130 "	19.00

half the Standard Price.

# The New BIG 4

## 1440 Egg Capacity Incubator \$84<sup>00</sup>

Occupies same floor space as any standard 360 egg incubator.

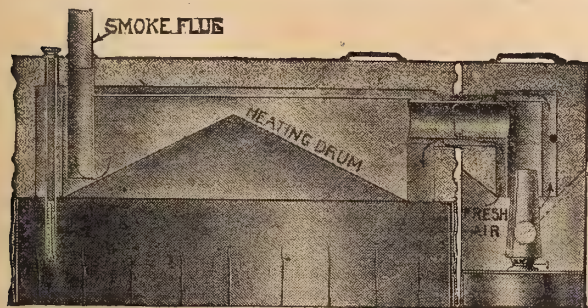

Or incubating section run in conjunction with your present hatcher, whether a Buffalo, Cyphers, Model or Prairie State, will increase its capacity by 1080 eggs. Incubating section alone, 1080 egg capacity, operated with one lamp, costs you but \$60.00.

This is an Incubator, not a Hatcher. You put in 360 eggs every six days, and after the eighteenth day transfer the first 360 eggs to the regular hatcher for the exclusion. Has the other large hatchers beat in quality, in economy of labor, in space occupied and in price.

### Something New In Hovers

**Buffalo Handy Hover \$8<sup>00</sup>**

**Buffalo Home-Brooder Hover \$7<sup>00</sup>**

**Buffalo Handy Hover 100 Chick Capacity.**

The Buffalo "Handy" is a floor-level hover. You can set it any old place.

**Sanitary**—all galvanized iron.

**Heats Easily**—walls are heavily packed with good insulating material.

**Uses But Little Oil**—flame burns with a white light, which indicates complete combustion.

**Hottest At Outer Circle**—heat is brought lowest at that point.

**Perfectly Ventilated**—heater is double with fresh air flue.

**Handy**—just pick it up and set it aside to clean the floor. Lamp flame can be seen without stooping. Lamp compartment or heater is attached to hover with "rolled-edge slip-joint," and is quickly detached for tending lamp.

Has all the good points of others, with thick walls and complete combustion added. Others are thinly insulated, and are hard to heat. Other lamps burn a yellow flame, and waste oil. The Buffalo Handy Hover will heat 10 degrees hotter with same oil consumption; and in a room too cold to use any other hover.

*Send postal for fuller description, or better, send along your order before we are over sold.*

### THE JOHNSON FAMILY — AND CHICKEN RAISING.

A good many years ago I read an expression of Josh Billings, which went something like this: "My son, consider the postage stamp; it sticks till it gets somewhere."

I don't know of any phrase which more perfectly describes the wonderful accomplishments of M. M. Johnson, his wife and son with their "Old Trusty" incubator.

Your correspondent has just visited Clay Center, Neb., a town of but 1,135 inhabitants, yet seventh in the state for postal receipts. I have seen the largest incubator and brooder factory in the world, bar none. I have become imbued with the spirit of rugged honesty, the sure, unquestioning high-quality of "Old Trusty" building.

But what I couldn't see, what will ever be a problem to me, is the way in which it has been accomplished. Everyone knows that "Old Trusty" is the leading incubator in the matter of users, and the results given them. The quality which is the basis of its building is unapproached.

But there is no loud pretension, no "I know how to do it better than anyone" attitude shown. I found a small town, the home of a country-wide industry, and at the same time I met the "home folk" who are running the industry.

Yet it's hard to pick out one thing which has brought this wonderful success. Has

M. M. Johnson, Founder

Mrs. M. M. Johnson

H. H. Johnson, Gen. Mgr.

it been that "sticking till you get somewhere" which was the spirit back of M. M. Johnson, the inventor? No man had more ups and downs than he. Hundreds of thousands have read the story of the trials, the struggles for a living, and the making of a perfect incubator which this farmer, mechanical engineer and incubator man went through. He succeeded far beyond his dreams, and yet he himself admitted he knew nothing about the exact science of it all. He only knew he wanted to build the incubator for the poultrymen of the country which would be the most profitable incubator that could be built. And he did it.

Was it the faithful helping of Mrs. Johnson that accomplished it? Or was it the fact that when the farmer's wife wrote in about her chickens, she got an answer from one of her own kind, from one who was raising chickens herself and making it profitable?

Was it the loyal teamwork of H. H. Johnson, the son? Was it his carrying of the burdens when the inventor himself was too sick to continue?

Or, was it the rugged honesty which would permit no makeshift to satisfy? The determination not to quit until the sure results were obtained?

I couldn't tell you. Nor, for that matter could H. H. Johnson, who now is head of the company. He says, "We built and are building the incubators and brooders which made it possible for us to succeed at poultry raising. The fact that 400,000 other chicken raisers have found it just as profitable and satisfactory is perhaps a natural result."

The story of the Johnson family, and their sticking at it may be summed up in a few paragraphs. After struggling with ill-health and poverty for several years of incubator experimenting, M. M. Johnson built his first incubator and brooder in 1893.

It was right, from the start. Neighbors tried it—it was exhibited at state fairs all over the country—it was proved correct. From every standpoint attempts were made to show its weaknesses, but the attempts only demonstrated its strength.

For nineteen years it has stood supreme. Today, "Old Trusty" is no longer a trademark. It means uninterrupted, increased, sure poultry results to its four hundred thousand users. It is "Old Trusty" in fact as well as in name.

It is a far cry from that first hand made incubator to the bustling enterprise of the present M. M. Johnson factory. I found at Clay Center that 400,000 of these incubators are now in use. In the neighborhood of 100,000 incubators and brooders will be shipped this year. I found a factory employing nearly one-half the population of the town of Clay Center—a factory with an output of 800 finished machines a day, when

necessary. I found an office building 35x80 feet, occupying three floors.

The entire factory is run by electrical power, provided by the firm's own power house, which supplies as well the electric power for the town and surrounding country.

I had read the books describing "Old Trusty" and this surprising family of workers. It will pay everyone interested in poultry growing to read it. But words cannot tell the true story.

The factory and offices of the M. M. Johnson Company are bee-hives of energy. Every worker believes his or her part the one salient feature in the incubator. They don't know how to shirk or skimp.

And over it all is an executive force which by means of the quality of purpose and determination that nothing but the best shall enter into the makeup of "Old Trusty" are accomplishing far more now than ever before in the history of the company.

Your correspondent is not mechanic enough to go into the details of the incubator itself. I read, however, a number of the four or five thousand letters which are coming in every day. I saw in them the proof of every statement made—the figures showing poultry profits right out on the farm, far beyond anything I had ever thought possible.

If every poultry raiser could see what I have seen—if they could visit the factory

and see the straightforward spirit of rugged honesty which I have already mentioned, there is no question that "Old Trusty" would find a home on so many farms this coming year, the factory would be hopelessly swamped with orders.

And the beauty of it all, from the poultry man's standpoint, is that M. M. Johnson & Co., I learned, are assuming every possibility of dissatisfaction on the part of an "Old Trusty" user. I read their guarantee, and it is the most binding guarantee I have ever read—and I have seen them all.

But "Old Trusty" itself is the best guarantee to anyone. When you consider that redwood is used, where pine might temporarily satisfy, when you remember that metal sheeting covers the entire body of the incubator instead of only part of it, that asbestos filling adds to the worth of the machine—when you consider these things, and their extra cost in manufacture, you can readily see the deep-seated quality which is the basis for "Old Trusty."

And what was most surprising to me, I learned that this supremely built machine—this incubator more popular than any three others combined, is sold for much less than the poultryman could build one himself.

My advice to everyone interested in chicken raising is: Write to M. M. Johnson & Co. today for their books. You'll be surprised, as I was, at the high quality of everything. Get an "Old Trusty" and you'll be more than delighted with the results. I know, for I saw the facts and figures from thousands of men who have tested it, and swelled their bank accounts thereby.

### FRIEND "TECK" AGAIN "MAKES GOOD."

The third annual poultry show of the Chicago Association closed 17th inst., signalized by some of the most hotly conducted contests for supremacy ever in evidence at any poultry association meeting. In the Buff Leghorn class this was particularly noted—probably as a result of the "world challenge" issued at the close of last year's Chicago meeting, by F. A. Tecktonius, Route 7, well-known Racine, Wis., breeder of the famous "Tecktonius" Strain Single and Rose Comb Buffs.

In view of the foregoing, it will be of more than passing interest to poultrymen, generally, to know that Mr. Tecktonius' splendid birds succeeded in capturing the following: 1st, 2d, 3d, 4th and 5th pullets: 1st, 2d, 3d and 4th hens: 1st, 2d, 4th and 5th cockerel: 2d, 4th and 5th cock: 1st pen, on Single Combs. 1st cock, 1st cockerel, 1st and 2d hen, 1st and 2d pullet, 1st pen, on Rose Combs. Also all cups and specials for shape and color.

Certainly a remarkable showing—following

as it does upon friend Tecktonius' 252 egg-record at the New York National Poultry Show contest—six previous "clean-ups" at the Chicago shows in as many years—and his well-known successes at the poultry shows of New York, Boston, Providence, Baltimore, Pittsburg, Cincinnati, Columbus, Nashville, Little Rock, Dallas, Houston, Galveston, New Orleans, Des Moines, Minneapolis, Spokane, Regina, Sask., etc.

Mr. Tecktonius is well-known among poultrymen and others as a most enthusiastic devotee to the "art and science" of breeding and mating high-class exhibition and general utility stock. This enthusiasm is in evidence not only in his showings of the results of his own systematic and careful work in his chosen field, but in the interest which he takes in exhibits throughout the U. S. Mr. Tecktonius will, at the close of this month, make a special trip from Santa Fe to New York, to attend the January 3rd annual meeting of the American Buff Leghorn Club.

### WHAT FARMING NOW OFFERS AS A VOCATION.

Much has been written about the tendency of the young man in the past to leave the farm and seek his fortune in the crowded centers of population, and the more crowded vocations of these centers.

Whether this has been responsible or not, the fact must be admitted that the tide of public opinion regarding the preference of metropolitan life has changed, and the drift now is rather from the city to the country, with "back-to-the-soil" nailed to the masthead, as the slogan of those who find in the new order of things a more independent, healthful and happy life—a change which many look upon as coming out of a state of mere existence into the fullness and ideal-ity of rational living.

Whatever may be said in favor of the exciting pleasures and attractions and nerve-straining demands of city residence, it is being increasingly admitted that for a given

The above illustration of chicks in the day-time around a Simplex Brooder stove in the brooder house of H. Vos, Grandville, Mich., was crowded out of our December issue.

Great interest is being manifested by poultrymen in the brooder stove system of brooding chicks. Mr. N. P. Husted, of Grandville, Mich., who used four of these stoves during the 1912 season, has had hundreds of letters asking about his success. His results were so good that news of them has encouraged many who were becoming disgusted with trying to raise chicks because their losses were so heavy. Mr. Husted has been swamped with mail and would esteem it a favor if poultrymen would address their inquiries to the Simplex Brooder Stove Co., 123 Fourth St., Grand Rapids, Mich., instead of to him.

This company has the exclusive right to make and sell east of the Rocky Mountains the stove which has been most successful in California. The maker of that stove sends to the Simplex Co. letters from many eastern inquirers who would save time by addressing them as above.

The Simplex Brooder Stove Co. has an illustrative descriptive catalogue which tells all about the stove, how to use it, how to build houses just adapted to its use, with working plans, names and addresses of users, etc. This book will gladly be sent free if you mention American Poultry Journal.

amount of energy invested by the individual, rural life pays by far the biggest dividends.

There are several reasons why this is so. The freedom of the outdoor life revitalizes and gives abundant energy. And the increase of energy, coupled with exuberance of spirits, most bountifully equips one for the prosecution of his labors, and makes him doubly ambitious for large undertakings.

Then if he takes up farming as a serious business-like calling he has, in these modern times, every aid to economical labor-saving production, of which he can make capital for profitable earnings. One of his chief assets in cultivation, if he is shrewd enough to take advantage of it, is the helpfulness of Planet Jr. farm and garden implements.

Indeed, it would surprise the most expectant user, if he would keep account, of the total saving in time and labor and money in a single season that it is possible for these up-to-date tools to effect.

In the market garden a Planet Jr. hand-tool, combining seeder, wheel-hoe, cultivator and plow in one, makes the usual drudging work seem like mere play, so easily and quickly are you enabled to cover the ground with it.

And in the extensive corn-fields the Planet Jr. cultivators, which work two rows at a single passage, make the work equally light and pleasurable and profitable.

Or in the smaller field of corn, cotton, potatoes or similar crops the Planet Jr. one-

horse hoe and cultivator does so many kinds of work that it becomes a general utility implement.

A new illustrated catalog recently issued by S. L. Allen & Co., Box 1107 T, Philadelphia, which they send on request to those interested, describes minutely the implements to use for scientific cultivation, and tells the particular tools adapted to the different kinds of crops.

This labor-saving method of cultivation, together with the many other attractions offered by Dame Nature, make the "call of the land" louder than ever to him who would really live life to its full.

### WINNERS OF CHAMPIONSHIPS.

Jim Rohan's Belle City Incubator is now a five time champion. The fifth championship was won by Mr. F. E. Bennett, of Ohio, who won his prize in the 1912 successful farming contest. Mr. Bennett's prize was the third won by the Belle City Incubator in as many consecutive years in this very same yearly contest.

In the accompanying panel, Mrs. Laura J. Clark's photograph appears at the top. Mrs. Clark won the great Missouri Valley Farmer and Nebraska Farm Journal contest in 1911, with a record of 140 chicks from 140 eggs. Below Mrs. Clark's photo is a picture of Mr. W. J. Black, who was a winner in the Successful Farming contest of 1911, with a record of two 100 per cent hatches. The third photograph from the top shows Mrs. M. J. Clifton, winner of the 1910 Successful Farming contest, with a record of 140 chicks from 140 eggs. Just above Mr. Bennett's photo at the bottom, is a picture of Mrs. F. H. Osmon, who won the beautiful gold lined, silver "Tycos" loving cup offered by the manufacturers of Tycos thermometers for the best hatch.

Jim Rohan is indeed fortunate to be the manufacturer of the incubators that won these great contests. It begins to look as if he had the correct principle of construction and that he uses the right kind of material to make a successful hatcher.

Mr. Rohan says: "I am proud to have been the manufacturer of so many championship winning incubators. When the same make of machine wins so consistently it proves that 'luck' didn't have anything to do with it, but instead, the incubator must have been simple, accurate, safe, and sure—and the people who operated them are un-

doubtedly the kind of men and women who deserved to win these great contests."

The Belle City Incubator looks like other machines but it is different in construction. It has a simple, perfect self-regulator, a fine hot-water heating system, copper tank and boiler, safety lamp; double walls and double door, with dead air space all over, with roomy nursery and strong egg tray. Equipped with "Tycos" thermometer, egg tester, burner, funnel, and everything you need, including valuable instruction book on operation, hatching and care of chicks.

Mr. Rohan has invited our readers to write him a postal card for his new book of Hatching Facts. It's a good idea to do that if you are planning to purchase an incubator or brooder. Rohan's address is Box 27, Racine, Wis.

### INCUBATORS AND THEIR HATCHES.

That some incubators will hatch stronger, bigger, surer-of-living chicks than others is no longer disputed by practical poultry men. There was a time when some were disposed to argue the point, but facts have accumulated so rapidly that to question these results now is almost to convict oneself of unfamiliarity with incubator methods and hatching progress.

Incubators are of all grades. They run from the high-class machine designed to "hatch every hatchable egg" down to the cheap, box-like affair which hatches a few bandy legged weaklings. Such chicks have little chance of growing to maturity and if they do, are not the kind from which paying strains are developed. On the other hand, the "hatch every hatchable egg" kind will give you big, sturdy chicks that live—the kind you do not have to dope with one thing and another. They are "well-born" chicks—the kind that leads you securely along to poultry success.

How then are we to judge which machine is good and which to avoid? Price can not be depended on. We have in mind one that sells as low as \$8 which has, time and again, hatched every hatchable egg, and gotten strong, livable chicks, when, under exactly similar conditions, another incubator running alongside, hardly reached 50 per cent. Of course, construction and such details form a fairly reliable guide, but as a matter of fact, the great big sales of

incubators are made to persons without previous experience in running them, and almost wholly without technical knowledge. But if this were otherwise, probably a very small proportion of chicken owners are well enough posted to judge a machine by its seeming construction. Note we say "seeming" for wall insulation and other details are impossible of examination without tearing the incubator to pieces.

With all these difficulties of greater or less importance, there is a rapidly growing desire among purchasers "to be shown" before they buy—a desire to see the incubators in operation right while the chicks are hatching, so that one can see precisely how many and what kind of chicks the incubator will produce. Last season, one manufacturer who has adopted this selling plan, claims to have sold 100,000 incubators during the season—a number, he claims, more than equals the sales of any two other makes. Special selling agencies have been established in large and small cities so that prospective buyers can not only see the incubators in operation and hatching, but can receive personal instruction and help in running the incubator he buys. The advantages of having a man handy are "too numerous to mention," although as a matter of fact this particular incubator—the Buckeye—is one of the simplest and easiest to handle.

It is quite probable that there is a Buckeye dealer in your own town. If there is, it would pay you to call at his store, and get the Buckeye facts he can give you. If you don't know whether there is a Buckeye store in your locality, write to The Buckeye Incubator Company, 501 Euclid Avenue, Springfield, Ohio. They will send you their dealer's name, also mail you a copy of their very instructive catalog. This is one of the most readable books about incubators and poultry we have seen. Not too long, yet it gives you an abundance of facts. Every reader of this paper ought to have a copy.

We call the attention of the readers of this journal to the new and enlarged advertisement of the Automatic Sanitary Trap Nest Company of Duluth, Minn. We are informed by the secretary that nests are being shipped to all parts of the U. S., Canada, South America and even to Ireland. Look up their advertisement and write them for free booklet.

## SPROUTED OATS --- WINTER EGGS

Get ready for the highest price for eggs this season the poultry industry has ever seen. For prolific egg production this Winter and fertile eggs next Spring, feed Sprouted Oats. To get great quantities of sprouted oats easily and quickly, buy a

## DOUBLE QUICK GRAIN SPROUTER

THE PERPETUAL POULTRY SILO

A veritable hot house, growth forcing machine that sprouts in 24 hours and grows two inches or more daily. Makes two to four bushels of feed from one of grain. The Double Quick is the original grain sprouter, now in its third season, several thousand being in use in every part of the United States and Canada and is endorsed by hundreds of users. Our catalog will give you scores of letters like the following:

October 7, 1912—"On September 16th I ordered your No. 5 Double Quick Sprouter sent to Maude L. Kaler, Columbia City, Ind., and this one is proving so satisfactory that she wants another one of the same size, and, therefore you will find draft in payment of this second sprouter."—Milo R. Meredith, Wabash, Indiana.

September 14, 1912—"I ordered and received from you last Fall one of your 6-tray grain sprouters. This works very satisfactorily but is far too small to meet my requirements. I want one that will sprout for 1,500 hens. Will you kindly advise me by return mail if you will make a larger size and the price of the same." Later, September 23, 1912—"I have your esteemed letter of Sept. 16th with enclosures. I enclose you my check for which please ship me rush one of your No. 6 grain sprouters."—E. A. Palmer, Providence, R. I.

David Schwertner, Ottawa, Ohio, says: "Last Fall I got one of your grain sprouters and used it last Winter and had good results for the weather we had. It was zero weather nearly all the time, but my chickens laid from three to four dozen eggs right along and I can say the oats did it for all the people around here didn't get any eggs last Winter."

February 26, 1913—"I am enclosing my check for your No. 5 Double Quick Sprouters. Please ship by express. I wish to get one of these machines going at the earliest moment. As soon as I have tested this one and find it satisfactory, as I expect I shall find it, I will give you an order for more." Later, April 27—"I am enclosing my check for two more of your No. 5 Double Quick Sprouters. The one I bought some weeks since is doing good work."—O. H. Latham, Beauty and Utility Barred Rocks, Lancaster, Mass.

Jacob Thomas, Clontarf, Minn., says: "The sprouter which we received from you works the nicest I ever saw for sprouting oats. It works to perfection."

Irwin A. Rush, Phillipsburg, N. J., writes: "I am more than pleased with the Double Quick. We had some very cold weather here for some time, but I had one tray a day of sprouts from 2½ to 4 in. long."

M. O. Richardson, Plattsburg, Mo., writes: "It is the greatest trick ever. It grows oats 10 inches high in six days. I am well pleased with it."

The Double Quick is double walled; insulated wooden walls outside and moisture-tight metal chamber inside; heat retaining, automatic moisture producing, perfectly ventilated and scientifically constructed to sprout and grow great quantities of sweet, crisp sprouts with nothing but clean grain, water and the lamp heat. Made in six sizes from a few hens to 1,000. Send for the complete Double Quick catalogue. It will pay you.

CLOSE-TO-NATURE CO., 38 FRONT ST., COLFAX, IOWA

## "FISHELDOTTE," LARGEST SPECIALTY WHITE WYANDOTTE FARM IN WORLD—WORLD'S BEST WHITE WYANDOTTES.

Mr. J. C. Fishel and son, Charles I. Fishel, are the proprietors of "Famous Fisheldotte," the home of the world's best White Wyandottes. "Fisheldotte" lies at the eastern approach of Hope, Ind., and contains twenty acres of very valuable land, and that, too, within the city limits. "Fisheldotte" is most admirably and advantageously situated commercially for the raising of the world's best White Wyandotte. It is high, dry and healthy and undulating, and with fine drainage, there being no possible chance for water to lie stagnant. These conditions, together with the abundance of natural shade and acres of orchard, give the world's best White Wyandottes a show for their lives and a chance to make good. The length of Fisheldotte is on the road, sloping to a small stream which flows through the yards, furnishing plenty of pure fresh water for the birds to drink. Fisheldotte is advantageously situated commercially, as above stated, in that it can be reached by the Big Four railroad, connecting with the main line from Cincinnati and Louisville at Greensburg, connecting with Pennsylvania lines at Columbus, Ind., Indianapolis and Chicago, making the shipping facilities of the best, and as the buildings are practically all on the roadside, see what a medium for advertising that is, and what a commanding view Fisheldotte presents. The pleasant suburban home of J. C. Fishel lies well toward the city, while the cosy cottage of Charles I. is directly opposite of the office building, which is a two-story building, where several typewriters are kept busy, but J. C. and Charles I. personally open and check all incoming and outgoing mail, and so much mail is handled at this office the United States Postoffice Department furnishes them an individual mail sack. In fact, nine-tenths of the mail business of Hope is done through the Fishels. And think of the express business, too! What would happen to the mail and express business if the fancy poultry correspondence and shipments should suddenly cease, to say nothing of the thousand and one industries the fancy poultry business permeates! To return to Fisheldotte. The shipping room is also in the office building; back of the office is a building 150 feet long, and the brood house has a capacity of 5,000 chicks. Small outdoor brooders are also used, and some chicks are hatched and raised by hens. Colony houses, of which there are fifty in number, are used almost exclusively. A large barn was converted into a poultry building and is lathed and plastered. The conditioning and wash rooms are also lathed and plastered. The conditioning room for males is the finest I ever saw. It has an aisle in the center with 20 pens, 5x5 feet, on either side, and small runs from each pen. Pullet house is 30x40 feet and is lathed and plastered. Everything including J. C.'s residence is painted white, and Fisheldotte is one of the sights of the country. Mr. Fishel is a veteran poultry fancier, having been in the business 35 to 40 years, entering the show room in '79, and is the soul of honor. Charles I. was born and raised in the business, and is considered one of the best Wyandotte judges in the A. P. A., as well as being an expert judge of all other breeds. Messrs. Stahmer & Han were with us at Fisheldotte and took some fine pictures of the birds and buildings, while I put in my time handling the birds and looking things over. There were 4,000 White Wyandottes on the farm at that time—white as snow—bred white and stay white, males in old plumage with not a trace of creaminess, and males getting new plumage whiter than snow. To my personal fancy there is no comb as neat and attractive as the Wyandotte comb, and my experience has been, it stands the frost without a bite, when other combs get badly nipped. The Fishel White Wyandottes have as near perfect combs and head points as ever grew. They are grouped in shape with beautiful spread tails, and they have a long show record book dating back to 1900, when they won at Chicago, again winning more than their share at that city in 1902; winning in 1901 at Indianapolis, and repeatedly ever since. At St. Louis, 1903, San Antonio, Tex., and at the great St. Louis World's Fair in 1904 won a special prize in a class of 800 White Wyandottes. They have also won at Cincinnati, Tennessee State Show, Louisville, Ky., Columbus, Ohio, Springfield and so on. No wonder they are called "The World's Best." J. C. Fishel & Son put out a beautiful and expensive catalog, containing much valuable literature on White Wyandottes and many fine cuts of birds and buildings. Every breeder and lover of the beautiful White Wyandotte should possess one. Write today.—H. H. Coburn.

## COLUMBIAN WYANDOTTES

Our birds have been the very highest winners at New York, Boston and Chicago for our customers as well as for ourselves, including one of the first prize winners at the last Chicago show. Our birds are grand in laced hackles and tail coverts with white backs. We can please you. J. FRANK VAN ALSTYNE, Niverville, N. Y.

## Billings' Rhode Island Reds { BOTH COMBS

have that brilliant, rich, even surface color, with strong, deep red undercolor, with fine head-gear, long bodies and black markings that appeals to the most careful breeder. Have won at Cleveland and many of our largest shows. 1000 head choice breeders and exhibition birds to sell. Write your wants.

**B. M. BILLINGS, : Box A, Oberlin, Ohio**

## BRED-TO-LAY

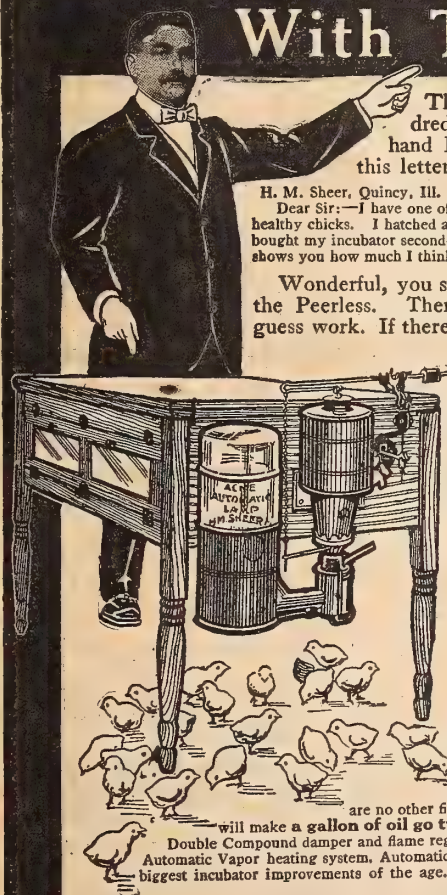

BARRED PLYMOUTH ROCKS

J. W. Parks' Strain Of World Champion Layers

My pullet "Liberty Bell" laid 269 eggs in nine consecutive months. 800 breeders for sale. \$2 to \$3 each. Circular free.

**O. F. Mittendorf : : Lincoln, Illinois**

## 2200 Chicks from 2400 Eggs With The Peerless

Think of it—92 healthy chicks from every hundred eggs. And mind you, this from a second hand Peerless Incubator. Here's the proof—read this letter:—

H. M. Sheer, Quincy, Ill.

Tacoma, Wash., Sept. 28, 1912.

Dear Sir,—I have one of your Peerless Incubators and have hatched quite a number of healthy chicks. I hatched about 2200 out of 2400 eggs. I guess that's going some. I bought my incubator second-hand and wouldn't take twice the price for it now. That just shows you how much I think of my Peerless Incubator. Yours truly, A. GROSHALL.

Wonderful, you say. So do I. But not one bit unusual for the Peerless. There's no taking chances with a Peerless—no guess work. If there's a chicken in the egg, a Peerless will hatch it.

## This Is Why Peerless Incubators Are the Best on Earth

Peerless Incubators are made with my famous Acme automatic fixtures. For over twenty years the most successful men in the poultry business have used Acme fixtures. The very latest and best that my skill and experience can produce is all yours in a Peerless Incubator.

The Peerless Automatic Vapor Heating System.  
The Peerless Automatic Moisture System.  
The Peerless Automatic Ventilating System.  
The Perfected Acme Automatic Lamp.  
The Perfected Acme Trip Burner.  
The Acme Tandem Double Compound Thermostat Regulator.

These are the exclusive patented fixtures that make the Peerless Incubator the greatest and surest hatcher. There are no other fixtures like them. My Automatic Lamp with the trip burner will make a gallon of oil go twice as far as any other lamp on earth. My Tandem Double Compound damper and flame regulator wipes out large operating expense and all trouble. My Automatic Vapor heating system, Automatic Moisture system and Automatic Ventilating system are the biggest incubator improvements of the age.

## My Big Book Tells All

It describes in detail these wonderful features. It tells how you can get the best—absolutely and finally the best—incubator in the world and save money in the bargain, by buying Peerless Incubators disas-

sembled, complete with all fixtures, ready for you to put together yourself in a few hours' time. Anyone can do it. This book is the greatest incubator book of the year. It tells too, about

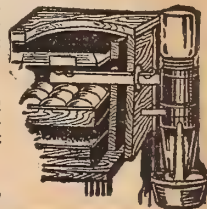

## Big Money in Custom Hatching

the wonderful, new and profitable way to make money in poultry with my brand new 500-egg unit machines. Each unit complete and self-contained. No outside heating plants, no boilers. The only successful 500-egg machine ever built. Learn about

## My New Moisture Generator

(see cut to the right) which can be attached to any incubator, old or new, and assures perfect moisture always. You need my book. It tells how any old incubator can be made over at small expense with my Acme fixtures and made the most modern machine. Send for this book right now—tonight.

**Lester Tompkins, Concord, Massachusetts**

### THE RICHLAND FARMS.

Frederick, Md.—Richland S. C. White Leghorns Are Bred for Highest Quality—A Beauty Plant Where Results Are Had—Baby Chicks, Eggs for Hatching and Choice Exhibition and Breeding Birds a Specialty.

Up to date in stock and buildings, and with modern and approved breeding conditions, this great plant has been a success from its beginning. Year by year it has been doubled in size, and again at this time new houses are being built to accommodate the demands for Richland Farm quality.

The plant is located on high and dry ground and from its yards can be seen the busy city of Frederick, Md., but three miles away. A city of unusual interest and historic value, for General Washington had headquarters there years ago. It also is the birthplace, as well as the resting place of Francis Scott Key, author of the "Star Spangled Banner." It was also the home of Barbara Fritchie, of "Old Glory" fame, whose praise was well sung by the poet Whittier. Near there famous battles were fought and today the visitors from South and North, alike, and of one mind, meet as brothers.

The farms comprise over 600 acres of land with a most liberal allowance for the poultry, a feature being the parks connected with the large laying houses, each of these houses having a special park fenced in of about three acres on both the north and south sides of the building, insuring at all times fresh and green pasture for the laying stock. The colony houses where the breeding birds are kept, also have large and roomy parks with the house in the center. Fruit trees afford shade in all yards, completing the most up-to-date and ideal conditions from which the best of results in health and vigor can be assured.

There was much here to note with special interest. The incubator cellar and arrangements, the roomy space with high ceiling affording plenty of pure air and securing ideal ventilation for the giant machines here with close to 15,000 egg capacity. We have never seen a better brooder house than is seen here. It is double boarded with air space and ceiled in the same manner. Here also the ceiling is high, affording many times the cubic feet of fresh air required and assuring perfect control over all conditions of weather in the safest way.

The six great breeding houses now completed are each 300 feet long, partitioned to make each pen 100x15 feet. A feed room is attached to each house and running water in each pen. The houses are open-fronts, curtained, there are upper and lower sections so that air and ventilation here also are under perfect control. Nest boxes are under the dropping boards with a simple arrangement that closes them up at night, keeping them clean. The perfect contentment seen in the birds here assured us that conditions were just to their liking.

The breeding houses likewise in style and of the colony order, while to the right and left, north and south, the farm is covered with smaller colony houses for the growing stock.

### S. C. WHITE LEGHORNS.

Richland Farms specialty are the S. C. White Leghorns and their line bred for years according to their ideas have proved of special value as layers, as payers and as choice breeding as well as an exhibition line. Their real effort has been along practical lines. Money from poultry is their aim, and the only aim upon which any breeder can build to stay. Hens alone are used as breeders that are full and ripe in maturity; while we will not say this is the only plan to follow, we will say it has its advantages, and no other plan we know of is "better." Of the 5,000 layers seen here we were greatly pleased. Size and evenness of type were the features along with wonderful condition in every bird seen. The beautiful heads, the long backs, well carried tails were noted with special interest, for here was condition with type far beyond expectations. In color it was "Spotless-Town," and the color of legs extra good, and we did not see an off colored eye on the place.

The Richland Farms have reasons to believe that they have well combined practical and exhibition qualities. Their stock has made many grand egg records and the same line has also been exceptionally successful in the show room. Sorry we haven't complete records of both to give, but we do know that they have proven winners wherever shown, and particularly at Baltimore, Hagerstown, New York, Frederick, etc. They won first exhibition pen two years in succession at Baltimore, and this year they sold all five first prize winners at Frederick Show.

**WHITE PLYMOUTH ROCKS.**

Here also in separate buildings are bred a few selected pens of White Rocks and Black Orpingtons, both favorites of Mr. Rosenstock. They are a grand lot of matings, and in White Rocks they won fifth pen at Madison Square Garden, N. Y., 1910. In these as in the leghorns, general quality and conditions are all we could desire and hope for.

This mammoth plant with its now over 5,000 layers, its model buildings and its great success of the past few years, are simply the result and due to the efforts of the owner, Mr. Sam H. Rosenstock, a young man who has tried. Poultry was his pleasure and with rare ability he has made this pleasure his business. We were pleased to meet this man, particularly after seeing what he has accomplished for better poultry. His success is real, and it is well deserved as is the case of many others who have pointed out the way the right way—for all those who will but "try" to follow on to assured profit with a most healthful employment.

After a day spent at Richland Farms we felt assured that we had not only again seen the possibilities of the poultry industry well illustrated, but that we had also met a man worth while.—H. P. Schwab.

**SAVE MONEY ON FENCING.**

James Brown, president of the Brown Fence & Wire Co., Cleveland, Ohio, sends an invitation to all our readers to write for his new 1913 catalog. He promises to save money for chicken raisers on poultry fencing that is five times stronger and more durable than ordinary chicken netting. He also promises to save you money on any other kind of wire fencing you may need, for any purpose. And we have known Jim for many years and know that he tells the truth.

Brown fence is sold direct from factory to you, all freight prepaid—satisfaction absolutely guaranteed. Why not write for Brown's new book—see his new prices—note how his fences are made and what they are made of. Brown usually does some things worth while in his yearly catalogs and we are sure the 1913 editions are up to his standard. If so, you certainly should not miss them. Address a postal to the Brown Fence & Wire Co., Dept. 3, Cleveland, Ohio, and the Bargain Fence Catalog will come by return mail.

**MR. FRANK McGRANN, LANCASTER, PA.**

A picture in words is rather difficult to understand, but I do wish that our readers could stand on the edge of the knoll back of Manager Demmy's house and drink in the view facing south. The ground gradually slopes away in a half circle to the river a thousand feet away, and along the river bank the willows spread their gigantic branches in natural curves and beauty in all directions, in the space between. Walnuts, Sycamores and other beauties of the forest that are gone still survive and afford shade while aiding nature as we have come to know it at its best. Over the river the bank raises and the fertile fields beyond heavy with crops prove that we are in the richest section of agriculture in the United States.

Here, down the bank, part way to the river, Mr. McGrann has built his poultry plant, where for years he has bred his What-Glen strain of S. C. Black Minorcas, a line that is simply wonderful in type and color, as well as in head points and finish.

Mr. McGrann has been a prominent winner at M. S. Garden, N. Y., and other leading shows, but of late has done but little in this line, preferring to sell and let others have the glory. He is also one of our acknowledged judges, particularly of Black Minorcas and I very much doubt if there is a better or more qualified judge of this variety. As a breeder he knows their characteristics and this is most essential in the specialist and to his advantage.

We have before written of this line and told of their wonderful size, form and carriage; of their clean sound color, and of their magnificent head points. These are the features of this line and the quality points we again wish to tell of.

The Minorca is a large bird, but fine tuned, high on legs, a long body, low carried tail with head erect and to finish a good proportionate curve, well placed and strong, on this but a coat of solid sound black with a deep bottle-green sheen and you have in the finished Minorca a bird of exquisite beauty.

The What-Glen type and color is fully described here. They have the size in both males and females; they stand strong and carry well on legs well set. We have handled many of these birds and could only

**BARRED PLYMOUTH ROCKS**

Bred for business and show-room requirements. If you are interested in a heavy laying strain with exhibition quality write me for show record and prices on such as you need. Get my 1912 mating sheet if you need eggs for hatching. O. L. KING, : ROCKFORD, ILLINOIS

**BUFF PLY. ROCKS, "GIANT" BRONZE TURKEYS AND INDIAN RUNNER DUCKS**

Quality of our birds is backed by years of careful breeding. They have won in our own and customers' hands at Chicago, Louisville, Ky., St. Louis, Boston, Atlanta, Seattle, Wash., and many other national shows. Birds in either variety of the very best quality. Toms with great massive frame and bone with fancy plumage, good enough for any show or breeding pen. Buff Rocks and Indian Runner ducks of same high quality.

J. C. Clipp : Box A : Saltillo, Indiana

**IMPORTED ORPINGTONS AND INDIAN RUNNER DUCKS**

Eggs from our best stock delivered direct to you, express paid from England, at \$5 per 15 eggs. Our birds have won at the largest shows in the world. We have been breeding for thirty years, and our strain is well known in England and abroad. This is the greatest offer ever made in Orpington eggs. We furnish the Buff, Black and White, and have some fine stock for sale, either show birds or high class breeders.

FARMINGDALE, L. I., N. Y.

TRADE MARK

Fresh-Air Sunshine Sanitary House for 120 Laying Hens.

marvel in their quality. Here we saw a dozen cocks fit to win any show, and hens of the same quality in any number.

Their young this season promise much. They have them fully matured and as large as old birds. With this stock, they can well supply all demand made on them for the coming show season, also they offer choice breeding birds in any number and all of rich value and quality. They have some special offers in mated trios and pens and it would be well for those who desire to purchase S. C. Black Minorcas to write Mr. McGrann. Let all who can visit this poultry plant, you will see one of the largest and best in America.—H. P. Schwab.

#### PORTABLE POULTRY HOUSES AND FIXTURES.

The ready made portable poultry house and equipment has solved one of the most perplexing problems for the beginner and enabled the expert to have the best possible equipment at the least expenditure of money.

Portable houses are made in all sizes to fit every requirement from a small flock of one or two dozen hens on up. It is doubtful if any amount of money put into an individual hennery could build a house better adapted to the health and comfort of the fowls, both winter and summer, or more conducive to a uniform egg yield. This is because every part has been carefully planned by experts and the construction brought to a high point of perfection.

Some poultry raisers after building a hen house are puzzled to know the best inside fixtures to use, that is, the roosts, drop boards, nests, etc. This vital question is also admirably taken care of in the portable factory built equipment.

As a usual thing the home made fixtures are of a stationary type, admirably adapted to breeding and harboring lice, mites and all sorts of vermin. The mites suck the blood of the fowls at night and hide in dark cracks and crevices by day. The lice burrow into the stationary nests and refuse to be routed except by tearing out the nests and burning them. The fowls are weakened, troubled and worried, greatly lessening the egg yield and the poultryman's profits.

No poultryman, no matter how many or how few hens he keeps can afford to use the old style, vermin harboring fixtures. He can now buy factory made fixtures which are complete and scientifically perfect. Even if it were not true that these fixtures pay for themselves in the ease of handling, saving of time and greater hen efficiency, they would still be the most economical because they cost so little that no

poultryman who considers his name worth anything can afford to spend it in making home made fixtures.

On this page we show photographs of a large size poultry house and a poultry house equipment. These photographs are furnished us through the courtesy of T. F. Potter & Co., Downer's Grove, Ill. Potter & Co. have been making a full line of portable poultry houses and fixtures for the past ten years. These houses and fixtures have many points of merit, not the least of which is lessening the work of the poultryman so that he is able to care for a great many more fowls and also is enabled to keep

death trap or exterminator under the perch. It is an ideal place for them, too, as it is dark and secluded. In the morning the keeper has only to exert a slight pressure on the trap and a little backward and forward motion of it, and all the little "red devils" which have found such a pleasant and secluded retreat after filling up on the blood of the best laying hens, are crushed to death in an instant. These perches are neat and lasting and as they always show the mites up as soon as they appear they enable one to take the matter in hand promptly, keep the hens healthy and in laying condition so they will produce eggs

A Potter Sanitary Portable Roost.

their quarters absolutely clean and sanitary and free from vermin.

A Potter portable hennery outfit consists of three parts: the Potter V. E. (vermin exterminator) roost, the nesting system and the dropboard. These three parts make a complete outfit which can be set up or taken down in a very few minutes. The only place it attaches to the house in any way is by the hinging blocks at the rear which are screwed to the wall. The Vermin Exterminator roosts are so called because each perch is provided with a mite trap or exterminator attached to its underside. In the ordinary hen house fixtures there are thousands of places for the vermin to hide, but with the Potter fixtures there is absolutely no place for the pests except the

to their full capacity the year round.

The nesting system is so arranged that the nests slide in and out. They are just dark enough and secluded enough to exactly suit the nature of the laying hen. The partitions being solid there is no fighting on the nest. Thus the loss of broken eggs is saved and there are no pecked, bloody headed hens. The nests are up off the floor, allowing the hens full scratching room below.

The complete Potter outfit shown on this page will accommodate nicely 40 birds; but this is only one of three different styles and twelve sizes as these outfits are made in sizes varying from a 3-foot, 2-perch outfit for 12 birds to a 10-foot, 3-perch outfit for 60 birds. No matter what size your house

**Weed Out the Hens that Produce Nothing, but Eat Much, with Newtown Practical Trap Nests—\$1.00 Each**

**NEWTOWN PRODUCING COMPANY, Newtown, Pa., U. S. A.**

is or how it is arranged, there is a Potter outfit made to fit it.

In the ten years or more that these hen-henry outfits have been manufactured by Potter & Co. thousands of poultry raisers have equipped their houses with them and they receive many letters from their satisfied customers, in fact, a large percentage of their business each year comes from old customers who are so well pleased with the fixtures that they would not use anything else in their poultry houses.

This is the time of year when poultry keepers are thinking about fixing up their houses and they should be fitted up right and a Potter hen-henry outfit is the proper thing. All outfits are made of very best high-grade material, and are well and substantially built and will last for years. It is not possible to get a more complete, convenient and sanitary hen-house equipment.

Potter & Co. also manufacture a complete line of brood coops, feed hoppers and poultry supplies of all kinds. Space can not be given to describe all of their products here but poultry keepers who want the best in this line should not fail to write T. F. Potter & Co., Downer's Grove, Ill., sending 4c postage for their two catalogs, which contain over 130 pages and 150 illustrations fully describing their complete line of goods.

#### GREEN FOOD FOR FOWLS.

Green food is declared by many leading poultry men all over the country to be the natural food for poultry. Such food, it is contended, keeps the body of the hen in fine condition, encourages the production of eggs, and serves at the same time as a more economical food than any other.

This class of feed, which includes roots, potatoes, cabbages, mangles, turnips, apples, onions, etc., must of course be properly prepared before it can be given to fowls. A machine which, it is asserted by its makers, does this preparatory work most successfully, is the Banner Root Cutter, made by O. E. Thompson & Sons at Ypsilanti, Mich. This machine completely shreds the green products run through it, producing a feed that is palatable, easily digested, and wholesome in every way. The manufacturers of Banner Root Cutters have some interesting printed matter that they will gladly send to any one who would like to know more about this valuable feeding plan for poultry.

#### AT LAST—AN INCUBATOR DANGER SIGNAL.

Since the invention of the first incubator, the maintenance of an even, regular temperature in the hatching has been the most important subject connected with artificial hatching. It has been the stumbling block for thousands of poultry raisers; the one thing lacking in hundreds of otherwise perfect machines. Even in good machines, incessant examination of the thermometer was the only method of keeping up with temperature changes—and it often was inadequate in emergencies, when heaters failed to work and dangerous rises in temperature occurred.

If the temperature of the eggs is reduced somewhat, little harm is done. Nature has provided for this. Excessive heat, however, is fatal, for Nature has made no compensation for this, there being no natural possibility for it. As a result, many hatches are baked to death and thousands of chicks lost. Thermostats have been invented and applied, but with indifferent success, on account of the inability to make them strong enough and sensitive enough at the same time. Still it was necessary to have personal attention at the thermometer.

At last there has come a device that relieves the situation. A simple, safe, reliable invention was perfected—the "TYCOS" Electrical Alarm Thermometer—and brings to poultrymen the thing long wanted; and automatic danger signal working when temperature rises.

The apparatus consists of one of the famous reliable "TYCOS" Incubators Thermometers, the finest instruments of their kind, to which is attached an electric bell and battery. The thermometer rests on the eggs and as soon as the temperature passes the safety point, the bell starts to ring. The bell may be located anywhere—in the bedroom, if desired. Anyone can install the apparatus—its cost is small compared with the great saving it makes and the certainty it assures. The cost of one hatch saved will more than pay for it.

Made by the Taylor Instrument Companies, Rochester, N. Y., the well-known manufacturers of incubator thermometers, this device has all the "TYCOS" quality of best material and thorough testing before leaving the factory. Its price is \$5.00, complete with bell, connections and wire, and no poultryman who desires the best equipment

## S. C. Brown Leghorns

First prize winners at Madison Square, New York, Chicago, Pittsburg, Cleveland, Buffalo and Philadelphia. My prices are reasonable. Write for circular.

**Frank Schellang, R. 8, Erie, Pennsylvania**

## Harter's Buff Plymouth Rocks

Have been leading winners for years. So let me help you to win. Stock for sale. Eggs in season. Write for my mating list. Positive satisfaction to all. Mention American Poultry Journal.

**S. H. Harter, Box 44, Nescopeck, Pennsylvania**

## Tolman's White Plym. Rocks

Baby chicks and eggs for hatching. When you order from Tolman, you get the best at a popular price. Eggs and chicks now ready. Circular and price list free.

**Joseph Tolman -:- Dept. H -:- Rockland, Massachusetts**

## MAPLEWOOD AGAIN PROVES

That it stands for highest quality in S. C. W. Leghorns, White Wyandottes, Pekin and Indian Runner Ducks and Silver Campines. Look up our winnings at Syracuse and Batavia, two of the state's largest fairs. We have for sale a few extra good cockerels in all varieties, also four hundred S. C. W. Leghorn hens, at reasonable prices, to make room for young stock. Orders for day-old chicks now being booked.

**Maplewood Poultry Yards; H. W. Hayner, Supt., Attica, New York**

## Walden's Bar'd Rocks

Philadelphia, New York and Baltimore winners. I can please you with quality and price. Quality is my aim, with satisfaction assured. Choice exhibition stock now ready to ship. Write me your wants. Mention this paper.

**R. J. Walden, Box A, Middleburg, Md.**

## BELMONT FARM

Breeders of the famous Belmont strain of heavy laying, prize-winning White Leghorns, Barred Rocks, and Indian Runner Ducks. As good as the world produces. Winners of hundreds of prizes in the past 26 years. Eggs in one setting, or in thousand lots furnished on short notice. Write for catalogue.

**LORING BROWN, Owner : : SMYRNA, GEORGIA**

## SEARS' BARRED PLYM. ROCKS

Are winners wherever shown. Cockerel bred. Bradley's female line "Fluffy Ruffles." Some choice breeding and exhibition birds for sale at prices that will move them quick. Write for what you want. Please mention American Poultry Journal when writing.

**H. O. Sears : Garden Prairie, Illinois**

## BARGAINS

**IN BUFF AND WHITE ORPINGTONS** Have twenty Buff Orpington hens that I can afford to sell at \$1.25 each if the entire lot is taken at once. Also about forty White Orpington hens at \$2.50 each, good birds and excellent layers. Have between 300 and 400 cockerels for sale cheap. All stock guaranteed to satisfy. Write for full particulars. Please mention American Poultry Journal.

**Aitmont Poultry Farm, R. 5, Colfax, Iowa**

## GOLD COIN BUFF WYANDOTTES

Have won more first prizes at leading shows including Chicago than all my competitors. Cockerels, \$3 and up; pullets, \$2 and up. : : : : : F. E. Short, Elgin, Illinois

## 43 VARIETIES

Poultry, squab breeders, fancy pigeons, ducks, geese, peafowl, pheasants, wild game, dogs. Incubators, feed and supplies. Handsome catalog, 4c.

Missouri Squab Co., Dept. R, Kirkwood, Mo.

Select exhibition stock. Ready for early shows. My customers are sure to win from our selection. Many have been pleased. To make room I will sell one extra good pen of 8-yearling females and male at \$20. Write for literature in full description of the breed.

C. L. PATTERSON

BARBERTON, OHIO

## S. C. Black Orpingtons

Herrick Poultry Yards have been breeding Blacks for eleven years. My winnings at such shows as Chicago, St. Louis, Cleveland and Detroit are positive evidence that I have quality. Some choice stock for sale. Kindly let me quote prices. Please mention American Poultry Journal when writing.

Herrick Poultry Yards : Box 612 : Durand, Michigan

## BARRY FARM

Let us book your order (White Leghorn Hatching Eggs for future delivery on (White Leghorn Baby Chicks

Barry Farm White Leghorns are vigorous and hardy. The females are persistent layers and money-makers all the year round. We use the utmost care in breeding to secure true to type stock. If you want cockerels, pairs, trios or pens, we can quote you most attractive prices. Prompt shipments. Get your orders for this stock as well as for day-old chicks or hatching eggs in quickly.

BARRY FARM : H. R. Barry, Owner : FAR HILLS, NEW JERSEY

## BARRED PLYMOUTH ROCKS

### Exhibition Females My Specialty

My prize pullet bred cockerel at Hagerstown, 1912, was the sensation of the Barred Rock class. In shape and line barring with the richest of color and blood lines placed him first over all others.

### Breeding Cockerels For Sale

Of the same line breeding at special prices while they last. Write me now. Cockerels at \$5 for quick sales. Some selected ones of special merit for \$7.50 and \$10. They are worth double that to any one who wishes to breed high class females. Pullets of my breeding have won first and second at the great Philadelphia show and at others as well. I assure absolute satisfaction to all. Write me.

C. N. MYERS : BOX A : HANOVER, PENNSYLVANIA

## BRADY'S WHITE ORPINGTONS

Made show records last year for myself and my customers unapproached by any breeder in the United States. In the PHILADELPHIA SHOW I won FIRST PEN. The pen winning second was of my birds and in the hands of my customer, V. K. Dayhoff of York, Pa. I also won FIRST HEN and REFUSED \$1,000 for her. In the great NASHVILLE (TENN.) SHOW I sold my two best pullets for \$175. My first hen in this show was pronounced the best hen ever shown in the great South. My young pen was beaten only by a pen of old birds direct from England. My customers, also, won in this show, as well as DES MOINES, IOWA; LANSING, MICH.; WHEELING, W. VA.; LEBANON, PA.; BALTIMORE, MD.; CHICAGO ILL.; MADISON SQUARE GARDEN, NEW YORK, etc., etc. This year I have more size and high show quality than I have ever had and can furnish birds for your early shows that will add credit to their new owners. Write for prices, mention A. P. J. Birds shipped on approval.

J. S. Brady, Parkers Landing, Pa.

and the most satisfactory hatches should fail to place one in every machine.

The Tycoos people are giving away a very attractive little booklet, nicely illustrated, on the subject of Incubator Thermometers. It contains some interesting and valuable facts for everyone interested in hatching, and poultrymen should send for copies (free on request) as soon as possible.

### A COMBINATION HOVER AND GREEN FOOD GROWER.

Something About a Breeding Device That Has Won High Praise from Leaders in the Poultry World—A Hover That Can Be Used Anywhere and Operated by Anybody.

Great inventions are seldom the product of a single masterstroke of genius. They represent a growth, a development, a step-by-step process involving many experiments, many improvements, many disappointments.

So it was with the International Sanitary Hover. For years the best minds in the poultry world had been struggling with the problem of producing a hover simple in design, absolutely safe and capable of raising practically all the healthy chicks committed to its care.

On its face the problem seemed not difficult of solution. It was merely necessary to work out a hover warmer near the curtain than at the center, usable in a barn, a cowstall, a small coop, or some other place less formidable than an expensive brooder house, and fireproof. Hover after hover was invented, each a little better or a little worse than its predecessor, and a good deal of progress was made.

Then, on the Rancocas Poultry Farms at Browns Mills in the Pines, N. J., the Sanitary Hover was invented and the problem was solved. Folks looked at the hover, noticed the remarkable simplicity of it, and exclaimed: "Why didn't some one think of this before?"

### ANOTHER SOLUTION OF BOWEL TROUBLES IN NEWLY HATCHED CHICKS.

One of the most serious problems that has confronted the poultry raiser for a good many years is the frequent development of bowel troubles in the newly hatched chick, and while it has occasionally been traced to heredity, it has been proved beyond question that 95 times out of a hundred such troubles have resulted from some unnatural condition that existed in either the hatching device or the brooder.

We all know that sudden changes in the temperature of a brooder will produce bowel troubles and as a result of that knowledge much attention has been paid to the construction of brooders with a view of preventing such changes in temperature that might prove harmful, but most of us have overlooked the fact that unless those same sudden changes are guarded against before the chicks enter the brooder, all our efforts to prevent those fatal bowel troubles will go for naught.

I have before me a copy of the 1913 catalog of The Buckeye Incubator Co., in which they claim that fully 90 per cent of the bowel troubles in newly hatched chicks are caused by the sudden change of temperature to which the chicks are subjected right in the incubator, when they drop from the egg tray into the nursery.

The Buckeye Co. claim to have tested the temperature of the egg tray and nursery in most of the incubators on the market and found a difference of anywhere from 10 to 20 degrees between the two trays, and if these figures are correct, I can readily understand why so many chicks develop bowel troubles just as soon they leave the incubator.

The Buckeye Co. claim to have built incubators with nurseries and without nurseries for a number of years and in the course of many experiments they proved beyond question that the chicks which remain right in the tray, where the temperature remains the same from the time they are hatched until they are put in the brooder, will invariably show more strength and vitality than the chicks which are hatched in an incubator with a nursery attachment, where they are subjected to a change of anywhere from 10 to 20 degrees immediately after they are hatched.

This argument appears to me to be thoroughly sound and logical because we all know that a chill right at hatching time must be detrimental to some degree at least, and even though it may not be fatal, it must reduce the vitality and leave the chicks in a weakened condition.

As a result of their experience The Buck-

eye Co. have eliminated the nursery attachment from their incubators entirely and they claim that the machines they are now building will produce absolutely healthy chicks with more size and vitality than can possibly be produced when the nursery is used.

I have noticed during the past few years that a number of incubator manufacturers have been so constructing their egg trays that the chicks may be confined there without dropping into the nursery and I am inclined to the belief that the nursery has only been continued because it was customary to put there and I, for one, am glad to see The Buckeye Incubator Co. make a move in the right direction, for I am convinced that it will only be a short time until the nursery, as we know it, will be a thing of the past.

Wm. H. Jones.

#### WINTER STRAWBERRY SHORT-CAKE.

Fall bearing strawberries—yielding delicious fruit right up to frost time—are perhaps by far the most interesting things to be seen on the big place owned by Mr. W. F. Allen, near Salisbury, Maryland, where millions of berry plants, small fruits, shrubs and privet are raised annually, for shipment to nearly every part of the country.

These fall bearing berries, however, are something more than a mere curiosity. They are sturdy, prolific stock, very practical and extremely profitable to the grower, as anyone familiar with the berry market during late August and September, and even into early October, can easily understand.

Full information, and very interesting information it is, regarding these fall strawberries, may be obtained from the very attractive berry book gotten out by Mr. Allen for 1913, and everyone interested in berries, small fruits and shrubs should by all means send for a copy, if for no other reason than to learn something of this new kind of berry. Just drop Mr. Allen a postal at Salisbury, Maryland, and ask for the Berry Book. By return mail you will get a handsomely illustrated fifty-page book, that is a veritable reference work on berries.

It is with the more standard varieties, however, that Mr. Allen has achieved his greatest success and on which the reputa-

tion of his plants rests. For twenty-eight years this berry grower has been breeding up his varieties, until today he has 120 acres in strawberries alone, to say nothing of the acres in raspberries, blackberries, currants, shrubs, privet, asparagus, etc. Almost anything in this line can be secured from the Allen place, in any quantity, at almost any time. Every farm home should have Allen's 1913 Berry Book. It is worth money for its information on berries. Write for a copy today.

#### EGGS WHEN EGGS COUNT.

Have you ever tried to learn why egg production is so greatly reduced in the winter time? Just at the season when you would like to see it best?

It isn't because Madam Hen is a hot-house production and dislikes the cold, bracing atmosphere, or even objects to getting her feet wet.

There are very few days, if any, so cold as to make her unwilling to get out in the open for food and exercise.

She doesn't suspend business in the winter because of her health, for she is warmly clad, and the feed bills show she eats more than she does when she's real busy.

Then where does the trouble lie? It lies in the fact that while the winter has no terrors for Madam Hen, the same cannot be said for bugs, beetles, worms and small animal and plant life generally.

These choice dietary morsels are most important factors in her business of egg production. She is unable to find them during the cold months.

Of course, she can "get along" on corn, wheat, etc.

But—the difference between five and six dozen eggs a year and two hundred is quite another thing. You look upon Madam Hen as a "good thing," and you want to "force her," just as the florist forces his flowers.

If you want more eggs you must furnish your hens the necessary material with which to make them.

Ordinary green bone, obtained at your butchers at little or no cost, supplies these requisites in greater quantity and at less cost than anything else you can feed.

It must of course be ground fine, and a good, strong, reliable grinder that wears

well, does its work thoroughly and runs easily is a necessity.

A grinder which meets the above requirements satisfactorily is the Mann grinder, which has won over 300 first premiums at all kinds of expositions, fairs and poultry shows. The price of the Mann grinder, compared to the increased profits it brings you, is insignificant and makes it decidedly a profitable investment.

#### NEW MANAGER FOR H. W. JOHNS-MANVILLE CO.'S ATLANTA OFFICE.

The H. W. Johns-Manville Co. announce the appointment of Mr. C. S. Berry as manager of their Atlanta, Ga., office, located at 31½ So. Broad Street. To facilitate delivery in the South a stock of roofings, packings, pipe coverings and other J-M Asbestos, Magnesia and Electrical products is carried at this above address. This office also employs a force of workmen experienced in the application of J-M products.

Every breeder knows that about 75 per cent of an egg is water and to get eggs in winter when the price is high your hens must have plenty of pure fresh water at all times, and water is the cheapest thing that can be procured. Your fowls are pretty discerning, too, as to the kind of water they drink and if given a chance will show as great discrimination in picking out their drink as any epicure. One thing they insist on is drinking water of the right temperature. At our poultry farm near Lombard, Ill., we tried this out by placing various pots, pans and bottom filled fountains and one of Moe's top-fill fountains in our yard and let the chickens choose for themselves. The result was, that Moe's top-fill fountain was crowded with poultry customers all day and all the other drinking vessels were neglected, which was solely because the water in this fountain was of the right temperature. This is the fountain that is constructed on the order of the Thermos Bottle. The dead air space keeping the water cool in summer and from freezing in winter and is manufactured by Otis & Moe, Otis Bldg., Chicago.

## Rose Comb Rhode Island Red Cockerel Sale

Hundreds of early hatched, handsome, rich colored birds, sons of such famous winners as Bill Taft Jr., Bill Taft 3d, Bill Taft 5th, Bill Taft 6th, Bill Taft 7th and other winning males of this great blood line. Without question the most popular strain of Rhode Island Reds before the public today. Prices range from \$3.00 each up. Now is your time to purchase a great breeder at a moderate figure. Write today for handsome free catalogue.

## Rosemont Farm S. C. Br. Leghorns

Originators of the "Queen of Missouri" strain which has a prize winning supremacy that is undisputed. They have beauty and utility combined, and carry off first honors at such shows as recent great St. Louis and Springfield (Missouri State), winning 1st and 4th hen, 2d cockerel, 3d and 4th pullet. At St. Louis, 1st, 2d hen; 2d, 3d ckl.; 2d, 3d pul. Exhibition and breeding birds for sale. Mention American Poultry Journal.

ROSEMONT FARM, ELMER V. SHULTZ, BOX 500, WEBSTER GROVES, MISSOURI

## Fogg's S. C. White Leghorns

Are bred for exhibition and heavy laying. Get our prices on breeders and young birds. We have the quality that will please you. Our breeders this season are the finest lot we have ever mated. Write us early about baby chicks and eggs for hatching. Our baby chicks are the kind that live, and eggs for hatching will produce that kind. Send for booklet and mating list now.

N. V. Fogg, Box R, Mt. Sterling, Kentucky

## BABY CHICKS

LIVABLE CHICKS — HATCHED RIGHT

ALL my breeding stock are high class, bred to lay stock, reared on free range in open front houses.

Every variety is carefully mated and true to name. I sell

"quality chicks" at the same price you pay for ordinary stock, from the following varieties: Leghorns, Single Comb White and Brown; Rhode Island Reds, Single and Rose Comb; Plymouth Rocks, Barred, White and Buff; Silver Spangled Hamburgs; Buff Orpingtons; Indian Runner Ducks.

Baby chicks for Spring delivery, \$15 per 100. Eggs from above varieties, \$2 per 15, \$10 per 100. Book your order now for March-1st delivery. A deposit amounting to 25 per cent of order required on either eggs or stock. Better place your order today.

Sidney B. Spinks - - Geneva, Kane County, Illinois

## Halbach White Rocks

Won more than 22 competitors. This would mean a lot at a show of even ordinary competition, but when this record is made at a show like Chicago, 1911-12, it means that my

## "Stay White Strain"

is stronger than the combined strength of 22 other leading breeders. Not this alone. They have demonstrated their superiority by winning the grand prize at Chicago for best display four times.

This evidence is conclusive. If you want to win I have the birds for you. 1800 chicks hatched from my winners. Just write—give me a chance. I can make good. Catalogue 10 cents.

H. W. Halbach : R. 1, Waterford, Wis.

Special utility females, \$2; males, \$4. Fine mated breeding pens to produce show stock, \$25 and \$35. Order at once

JIM ROHAN, and His Championship Winners

# A Postal Brings WORLD'S CHAMPIONSHIP Incubator Facts from Jim Rohan— and His Champions— Don't Spend a Cent For Any Incubator Till You Learn How To Get Into The Championship Belle City Class.

**J**UST write me a postal. I want to send you the most remarkable incubator and brooder news ever published. I want to send you *all* the facts about my 6-time World's Champion Belle City Incubator. I want to tell you about the folks who *won the prizes*, give you information on *how they did it*, show you how to get into the World's Champion Hatching Class. I want to quote you the most sensational, most amazing low price ever made in the history of incubator selling! Let me tell you how to make the most profit out of poultry *right from the start* and at the *least possible cost*—how to make the wisest selection of an incubator and brooder. I want to tell you how I give you 1, 2, or 3 months test right in your own home, and my liberal, personal 10-year guarantee and money-back offer. Won't you write me? Just mail me a postal and I'll send all this information *and more*, absolutely free. Let me tell you how my

## Belle City Wins In 10,000 Hatch-Contests

—how my 6-time World's Champion Incubator won its famous prizes in open competition against all other incubators, many costing from two to five times more;

—how the Belle City won on its *merits*, and won year after year.

I will take you right into my confidence and show you exactly the reasons why 195,720 other folks are making big profits with the 6-time World's Championship Belle City Incubator. I will explain my *manufacturing, selling, and shipping* plan worked out to save big money for you.

I want to tell you exactly how my Belle City is made—how they are different from all others, how I have embodied in them everything worth having *in and on* an incubator—the features that have made the Belle City the 6-time World's Championship Winner. And I want to tell you all about my brooder—the only double walled, hot water, top heat brooder made, guaranteed to raise largest percentage of chicks every time. Let me send you

### My Price Sensation

You will be surprised at the remarkable low price at which I sell my machines direct from factory on 1 to 3 months home test. I want to tell you how I send them all freight prepaid. I want to *show* you how my customers are protected by my ironclad 10 year personal guarantee. I want to tell you *why* my business has grown by leaps and bounds, and why it is growing bigger every day. All I ask is the chance to *prove* everything to you by sending you all the facts and figures. Whether you write to others or not, whether you buy of me or not you ought to *read the news* I want to send you. Won't you write me? Just say "Send World's Championship Hatching Facts." ## SHOEMAKER'S POULTRY BOOK

### AND ALMANAC.

There is nothing in the world like it. It contains over 200 large pages, with many fine illustrations. A number of BEAUTIFUL COLORED PLATES OF FOWLS—showing them in their natural color. Tells all about all kinds of thoroughbred chickens, with life-like illustrations. Prices of eggs for hatching and fowls for breeding purposes. TELLS HOW TO RAISE POULTRY SUCCESSFULLY, their care and management and how to treat all diseases common among them. Gives illustrations and descriptions of convenient poultry houses, and plans to build them.

ALL ABOUT "GLOBE" INCUBATORS & BROODERS

with fine illustrations, complete description, and lowest prices. ALL ABOUT OPERATING THE INCUBATOR. This chapter is marvellously complete, and worth much more than the price we ask for the whole book. This Poultry Book is worth dollars to anyone interested in the raising of fowls. IT IS AN ENCYCLOPEDIA OF CHICKEN-REARING, and no one can well afford to be without it. Will be mailed to anyone upon receipt of only 15c. Money refunded if not pleased.

C. C. SHOEMAKER, Box 605, Freeport, Ill.

# White Plymouth Rocks

My birds were one of the leading winners at the great Chicago show, Dec., 1910. Can supply winners for any show in the country. Write now for prices. Write for circular. Egg orders booked now. Mention A. P. J. when writing.

**J. H. Trobaugh - Box 253 - Delphi, Indiana**

# White Rocks

Koons' White Rocks again prove their winning quality at the Philadelphia show. 1st cockerel, 1st pullet, 2d hen, 4th cock on five entries. Pullet won special for best pullet in show, all varieties competing. Eggs after February 1st, all headed by males having won first prizes, \$10 per setting.

**Koons' Farms : Treichlers, Pennsylvania**

# SKINNER'S STANDARD WHITE WYANDOTTES

Have been winners at the leading Mid-West shows for the past eight years. A grand lot of birds for sale. Mention American Poultry Journal when writing.

**F. E. SKINNER : : : SANDWICH, ILLINOIS**

# BARRED ROCKS

First cockerel and five specials at Philadelphia, Pa. First pullet, second hen and second pen at Camden, N. J. Strong, vigorous stock for sale. Eggs from choice pens.

**MAPLE GRANGE POULTRY YARD**  
**S. M. GOUCHER : : MOORESTOWN, N. J.**

# GREAT CHICAGO WIN

## PARMENTER'S S. C. WHITE LEGHORNS

Won 1, 5 hen; 2, 4, 5 ckl.; 2 pullet; 2 pen; 4 cock; special for 3 best ckl. in class. Also sweepstakes, winning most points. We defeated the former Chicago winners, the Parkside Strain, and also won more points than E. W. Grove Jr. Strain. Our high-up winners were all bred by us and the class in this show was larger than ever, in fact the largest and hottest class ever cooped in America. Let me book your egg order now for future delivery. Can furnish you winners for any show. Also a fine lot of breeding cockerels.

**ROBT. D. PARMENTER : BOX A : KNOXVILLE, ILLINOIS**

# THE HENDERSON STRAIN OF BARRED PLYMOUTH ROCKS

## Victorious Again!

At Chicago, 1912, they won 1st and 2d ckl., 2d cock, 2d and 3d pullet, 5th ckl.-bred hen, 4th ckl.-bred pullet, 3d ckl.-mated pen, 3d pullet-mated pen and grand champion male of all Barred Rocks at this, the greatest Barred Rock show ever held, in competition with America's foremost breeders. If you desire the best blood obtainable, write for my descriptive 1913 mating list.

FARM, BRIDGETON, MISSOURI..

# M. F. & H. : 200-EGG STRAINS : M. F. & H. STOCK, EGGS AND BABY CHICKS

If a Hen is not a Profitable layer, of what use is she to you?

Horses bred for speed are a luxury and should be the property of those who can afford to have them.

Fowls bred for exhibition only present the same proposition as the race horse.

Do you want to keep poultry or do you want poultry to keep you?

"Bred to lay" fowls eliminate the gambler's "chance" and give you the opportunity of engaging in a business wherein success is reasonably assured.

The average hen lays 80 eggs per year. All of these eggs are laid during the months of March, April, May, June and July. The price of eggs for the above months ranges from 15 to 20 cents per dozen, or an average price of 17½ cents, making a total of \$1.17 worth of eggs from the average hen per year. It will cost \$1.60 to feed a hen per year as it should be fed for egg production. According to these figures, the average hen is a failure. According to these figures, if you purchase stock, eggs or baby chicks from the average hen, you will make a failure of the poultry business. The average hen should, therefore, be avoided. She is more prevalent among flocks that are bred for show purposes exclusively, as very little attention is given to egg production. That profitable egg layers are not of the exhibition type is a fact that is being more clearly demonstrated each year.

## Midlothian Strains Are Bred for Eggs

We trap-nest 800 hens and pullets each year, keeping a record of the total number of eggs laid by each hen or pullet. When the breeding season is at hand we are prepared to breed for best results. In making our pens from which we expect our future layers we exclude all fowls with a record less than 144 eggs.

For the season of 1913 we will mate forty pens of eight females to each pen. The egg records of these females are from 144 to 281 eggs. To these females will be mated males from the best egg producers that we possess. Our fowls are winter layers. In January, 1911, flock No. 6, consisting of 73 White Orpington pullets, averaged 52 eggs a day for the entire month. The total number produced for this period was 1,612 eggs. These eggs were sold to private trade residing in Chicago at 60 cents per dozen. The total receipts from the sale of these eggs amounted to \$80.60. An average of \$1.10 per fowl for one month. We have winter layers innumerable that have laid sufficient eggs in less than two months' time to pay for their feed for the entire year.

LADY SHOWYOU

We breed for egg production the following varieties:

WHITE

**Orpingtons**

BUFF

BARRED

**Plymouth Rocks**

WHITE

ROSE AND SINGLE COMB

**Rhode Island Reds**

**White Wyandottes**

**S.C. White Leghorns**

Among our best layers are the champion pen and the champion individual hen of the National Egg Laying Contest, season of 1911 and 1912 conducted by the Missouri State Poultry Experiment Station, Mountain Grove, Missouri. The champion pen consisted of five Rose Comb Rhode Island Red pullets. They laid 1,042 eggs in twelve months, the duration of contest. The champion individual, Lady Showyou, a White Plymouth Rock hen, laid 281 eggs, a remarkable record that will appear in the annals of egg production for all time.

Other champions are: Champion White Orpington hen, with a record of 232 eggs, which outlaid all Orpingtons of all varieties; champion Single Comb Rhode Island Red hen, with a record of 236 eggs; champion Rose Comb Rhode Island hen, with a record of 255 eggs; champion Barred Plymouth Rock pen, with a record of 967 eggs. The laying qualities of our Buff Orpingtons, White Wyandottes and S. C. W. Leghorns are of the same proportions as our champions.

## Stock, Eggs and Baby Chicks

You cannot buy, regardless of price, stock, eggs or baby chicks that will produce the profits that are being produced by Midlothian Strains. Midlothian Farms and Hatchery is today the largest and most profitable poultry plant in this country. We can supply you with:

**Pullets from trap-nested stock with records of 144 eggs and up at \$2, \$3, \$4 and \$5.**

**Hens with individual records of 144 eggs and up at \$6, \$8, \$10 and \$12 each.**

**Hens from trap-nested stock without individual records at \$3 and \$4 each.**

**Cockerels from trap-nested stock with records of 144 eggs and up at \$4, \$6, \$8 and \$10 each.**

**Cocks from trap-nested stock with records of 144 eggs and up at \$5, \$8, \$10, \$12 and \$15 each.**

**Eggs from stock with records of 200 eggs or better, 30c each.**

**Eggs from stock with records of 144 to 199 eggs, 20c each.**

**Eggs from stock not trap-nested but of the same blood lines as trap-nested stock, 10c each.**

**Baby chicks from stock with records of 200 eggs or better, 50c each.**

**Baby chicks from stock with records of 144 to 199 eggs, 35c each.**

**Baby chicks from stock not trap-nested but of the same blood lines as trap-nested stock, 20c each.**

We are now booking orders for eggs and baby chicks. Booking your order now assures the delivery of eggs and baby chicks when you desire them. You may send us your order, enclosing \$5 as a deposit, and send the balance five days before your order is to be shipped. We replace all infertile eggs free of charge and guarantee safe arrival of all chicks. Write for catalogue. Book your order now.

# WARD'S CHAMPION DARK CORNISH

Another big win for Ward at Trenton, N. J. in hot competition; winning 1 cock, 1, 3 hen, 1, 2 cockerel, 1, 2 pullet, 1, 2 pen and several specials on nine entries. See my wins at Allentown and Hagerstown. Mating list ready January 15th. Mention American Poultry Journal when writing.

John W. Ward, Jr. : Box 9 : Pennington, New Jersey

## THE MOST POPULAR FOWL today is U. R. Fishel's White Ply. Rocks SCRANTON'S REDS AT HAGERSTOWN

Win more than all the other S. C. Reds in the show combined, defeating the first prize winners at Allentown and other Eastern shows. They won 1st, 2nd and 5th cockerel, 1st, 2nd and 4th hen, 3rd and 5th pullet; 2nd and 5th cock and 1st pen; color and shape specials and special for best Red in the show. This following the sensational winning of 5 firsts and all specials at Chicago proves that there are no better S. C. Reds in the world today. Can furnish show birds for any show and also a fine lot of breeding birds.

B. H. SCRANTON - BOX 350 - RISING SUN, INDIANA

First Prize Partridge Rock Cockerel at Hagerstown 1911

## BIRD'S PARTRIDGE ROCKS

HAVE THE GREATEST PRIZE-WINNING RECORD ON THE CONTINENT

They just won five firsts and four seconds in a class of 65 birds at Hagerstown, Oct., 1912; making a total of 16 of the 18 firsts they competed for at the Madison Square shows of 1910 and 1911, and the Hagerstown shows of 1911 and 1912. The greatest prize winners and best breeders for you. Write your wants. Stamp for catalog.

## BRONZE TURKEYS

Win all firsts and three seconds at Hagerstown, 1912; making a total of 17 of the 20 firsts at five great shows in 1910-11-12. If interested in the World's Best Bronze write your wants and we will please you at right prices. Stamp for catalog.

1st Prize Bronze Turkey Ctl Mad. Sq. Garden, Dec., 1911

BIRD BROS. : : BOX C : : MEYERSDALE, PENNSYLVANIA

## PEERLESS STRAIN WHITE LEGHORNS

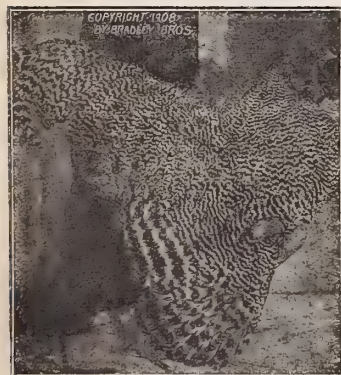

OFF GOES THE HEAD of my youngsters that were not sturdy, lively, rapid growing chicks. That's why Peerless Strain White Leghorns are the greatest layers and show birds in existence. They were leaders fifteen years ago and they now stand out pre-eminently the best of combined utility and Exhibition Leghorns and unmistakably are the greatest money-earning fowl in the world today. Fellow Fanciers, I produce the birds and my customers are winning and getting eggs and making money. That's what counts. If you want cockerels for replenishing or show purposes, write me before you order. I have approximately 100 cockerels selected from a large assortment that were reared on oatmeal, milk and choice grains—for five months they never tasted corn or meat. These birds are silvery white and have bone and muscle to spare. For \$3.50, \$5.00 and \$7.50 each, I will send you birds now that would cost you \$7.00 to \$15.00 in the Spring. In strictly Exhibition birds I can furnish winners for any show and will guarantee them to win, regardless of competition. A customer reports having won 1st at Nashville in the hottest kind of a class with a bird I shipped direct. Today, November 15th, I am shipping a cockerel that approaches perfection for the New York show. Look around and see if any other breeder is actually furnishing his customers with winners for head liner shows. This month I am also shipping a trio of heavy laying stock to Hawera, New Zealand. Remember, I ship everything on approval, and because of my large selection I can usually save my customer considerable money, besides supplying the best blood in the land. Hundreds of strong, healthy pullets, many of them laying, at bargain prices, for quick disposal. Let me have at least a portion of your order, because I can furnish you winter layers and winners that will put you right for your future requirements. Register for my 1913 Mating List and get my 24-page Catalog. Both are free.

Leon C. Huntington, Box 12B, Station A, Omaha, Nebraska

## ROOFING

## Smashing Bargains

## FENCING

### Corrugated Steel Roofing

**1 1/4c Per Square Foot**

Here is the chance of a lifetime to buy the best roofing in the world, at a mere fraction of its real value. Our enormous buying power enabled us to pick up for spot cash a stock of this brand new, perfect corrugated, "V" crimped and Standing Seam Roofing and Brick Siding, at a tremendous sacrifice—way under what it is actually worth. Immediate cash needed made possible this purchase. Just another chapter added to the long list of our famous bargain sales.

### Corrugated Steel Roofing

**Practically Indestructible**

There is nothing else that compares with corrugated steel roofing for real protection. It makes a long, lasting roof. Is fire, rain, frost, wind, sun and lightning proof—warmer in winter—cooler in summer; and under ordinary circumstances does not leak, rot or warp, neither does it taint rain water. You can depend upon it that Corrugated Steel is the best material for roofing, siding and ceiling.

At 1 1/4c per square foot, we furnish our grade AB-700 Steel Roofing, in sheets 22 x 24 inches, 1/4 inches. This price is delivered on board cars at Chicago.

### Galvanized Steel Roofing

**2 3/4c Per Square Foot**

Another big Steel Roofing Bargain. Several thousand squares of the very highest grade specially coated, corrugated, galvanized roofing and siding, made of specially prepared steel, of superior quality. Best roofing, and will last indefinitely. We will furnish it in suitable lengths for any purpose. Only a limited quantity on hand, so we urge you to send us your order immediately. Don't wait to write us again—order today, while this stock exists. Price only 2 3/4c per square foot, and will outlast 4 to 1. Just drop us a line, and tell us the size of your studding and general facts, and we will help you to select proper sheets. If you are not ready to use the material now, we will reserve it for future delivery. If you will give us a small deposit on account. This price of 2 3/4c per square foot is for our Lot AB-800 corrugated material, and is delivered on board cars at Chicago. If you prefer some other style, we will furnish it. We have this same grade in "V" crimped, Standing Seam and Brick Siding. Samples on application.

### Ready Roofing With Supplies

**62c Per 108 Square Feet**

We have several thousand squares of a superior quality Ready Roofing, which we are offering in our AJAX BRAND, 1-ply, at a price of 62c per square of 108 square feet, including necessary cement and caps to lay it. This is undoubtedly the most remarkable bargain ever offered in Ready Roofing. This famous brand is put up 3 or 4 pieces to a roll. The price of 62c per square of 108 square feet is loaded on board cars at Chicago. We will, however, make a freight prepaid price on this same grade of roofing, including nails and necessary cement of 75c per roll of 108 square feet, and at this remarkably low price

### We Pay the Freight

in full to any point east of Kansas and Nebraska and North of the Ohio River.

We will also furnish 2-ply, at 90c; 3-ply, at \$1.05. This Ajax Roofing is guaranteed to wear as long, and give as good service as any Rubber Surface roofing on the market.

### Send for Special Roofing Catalog and Samples

Write at once for our Special Roofing Catalog. Free samples and full instructions for laying roofing.

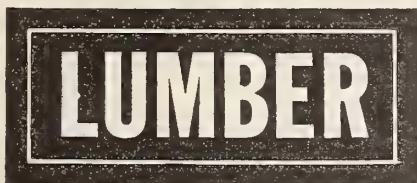

## Explanation

The Chicago House Wrecking Company known to the commercial world as the "Great Price Wreckers" is easily acknowledged the bargain house of the earth.

Our Mammouth plant covers 40 acres, and our list of customers are numbered by the hundreds of thousands, and include people from every walk in life. We sell practically everything under the sun at unbeatable prices. We buy our goods at Forced Sales, taking advantage of Sheriffs, Manufacturers' and Auction Sales. In this way we can sell brand new, clean high-grade goods at prices, in many instances even less than the cost of manufacture.

## Our Guarantee

Our capital stock is \$2,000,000. Any bank or Commercial Agency, or any publisher will confirm our responsibility. We have advertised in this paper for many years. Ask its publisher what he thinks of the Chicago House Wrecking Co., get his personal opinion of the values, and our square methods of doing business. We guarantee each and every article that we sell to be exactly as per our representations. Should you buy anything from us that fails to come up to our representations, or does not agree with your expectations; we will take back such unsatisfactory merchandise at our freight expense. We want satisfied patrons.

Complete houses and barns at an enormous saving. Never before in the history of Building Material has such an opportunity existed. We offer high grade, brand new complete lumber and building material needed for the construction of houses and barns at lower prices than ever before.

**20,000,000 Ft. of New Lumber at Our Yards and Warehouses Ready for Quick Delivery**

We have upwards of twenty million feet of first class, brand new lumber for the construction of buildings of every kind. A wonderful stock of the very finest millwork, interior trim, etc.—enough material to construct cities and villages even where. It is our determination that 1913 will be the "Banner year in the history of our Great Lumber and Millwork department, and the way we will accomplish this, is by quoting prices that undersell any possible competition. The proof of this is in our catalog and literature.

Write today and tell us what you contemplate improving or building during this Spring—talk to us plainly, and we promise you the service straight from the shoulder. No other concern in the world is equipped such as we are. Right in our main yard and warehouses, at Chicago, we can load you out complete, at one time, and in one carload, every single article required for the improvement of the building you have in mind. No where else can you go and get such service.

### Personal Service To You

You can get the kind of service that will give you absolute satisfaction—satisfaction from the word "go." If you have ideas of your own as to the kind of building you want, we will give you the benefit of the Greatest Architectural Department in the world. Will furnish you with plans according to your own ideas and will quote you a price on the material that will make you a wonderful saving. Dollars saved are dollars earned.

Write today for our Book of Plans and Latest Catalog of Building Material and Supplies.

### Brand New WIRE FENCING

**Less Than 1c Per Running Foot**

Biggest of all offers of the past. We come to you with the most wonderful proposition ever known, and offer you the very best woven wire fencing at a fraction of its real value: lower in price than ever before, not withstanding that all other merchants and manufacturers have advanced their prices on fencing. We are determined to simply get all the business in sight, and with that in view, we bought up from manufacturer's sales, 150 carloads of High Grade Woven Wire Hog, Cattle, Field and Poultry Fencing, Barb Wire and Nails, in quantities sufficient to take care of our regular customers and those who will quickly respond to this advertisement.

### Barb Wire Less Than 2c Per Rod

Galvanized, two-point Barb-Wire, full weight (not the light kind) put up regular on spools, containing about 100 lbs. to a spool. It is made of No. 12 wire, with good weight bars. Price per 100 lbs. during this sale, only \$1.95. Order by Lot No. AB-600. Several thousand spools of this Barb Wire. Painted, price per 100 lbs. \$1.75. Order by Lot AB-500. Also have in stock 1000 spools of light weight, new galvanized barb wire, put up 80 rods to the spool, made of No. 14 galvanized wire, No. 15 bars, bars 5 inches apart; price per spool of 80 rods \$1.45. Lot AB-400. We also have several other bargains. You never had a chance like this before, and we advise that you send us your order today. Don't wait until the material is sold—we cannot hold this quotation open.

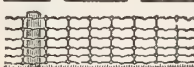

### Galvanized Hog Fencing

**AT A MATERIAL REDUCTION IN PRICE**

100,000 rods of 26 in. Galvanized Steel Spring Wire, 26 in. high, hog fence, put up in 10, 20, 40 and 60 rod rolls, made with 7 bars, spaced 12 in. apart, with No. 9 top and bottom wires. No. 11 intermediate wires, heavier than the regular fencing offered. Price per rod, during this sale, only 15c. Order by Lot AB-900. Same fencing spaced 6 in. apart, per rod during this sale, only 21c. Order by Lot AB-1000. Other heights at proportionately low prices.

### High Grade Poultry Fencing

**48 in. High PER ROD 27c**

A complete stock of all heights of Woven Wire Fencing for every purpose. Do not delay your order, but send it in at once, even if you are not ready to have it shipped. We will hold the material ready to deliver when you want it.

### Several Carloads of Galvanized Wire Shorts

This is smooth wire, put up 100 lbs. to a coil, first-class for general use. Comes in sizes from 6 to 16 gauge. Price for 9 gauge, \$1.25 per 100 lbs. Lot AB-1200. Other sizes in proportion.

### Some Big Bargains in Nails

At last we have the bargain of bargains. 10,000 kegs of genuine galvanized wire nails; will outlast all other kinds. Put up in regular kegs. Price per keg of 100 lbs., as follows:—

10 pennyweight, \$2.00 8 pennyweight, \$2.10  
6 pennyweight, \$2.15 Shingle Nails \$3.00

Also 5,000 kegs of Nails, mixed all kinds in a keg; good assortment, handy to have around your workshop. During this sale only, per 100 lbs., \$1.45. Order by Lot AB-1100. We have other bargains in nails.

Also, in this same job, we have 5,000 kegs of Fence Staples, galvanized; per keg, \$2.00. Lot AB-1400. Crimped wire for reinforcing, cut to any desired length; per 100 lbs., \$2.25. Lot AB-1300.

We have bargains in every line. Write us today for our Wire and Fence Catalog, but the best thing for you to do is to send your order now, and we will hold for shipping instructions.

# ROYAL BLUE BARRED ROCKS

## CHAMPIONS OF THE EAST AND WEST

For thirty years I have been breeding the winners at New York, Boston, Chicago, St. Louis, Topeka and the leading shows from Maine to Texas.

### At New York, December, 1911

in the strongest exhibit of Barred Rocks in America, six out of eight of the winning cockerels were bred and raised on my farm. My first prize sweepstakes New York cockerel was pronounced the best ever exhibited and was the star of the entire exhibition.

### At Chicago, December, 1912

In the largest class of Barred Rocks ever seen in the West, 404 birds, I made a sweeping victory, winning the grand sweepstakes \$100 silver cup for the best exhibit of Barred Rocks. I refused \$500 for one of my winning cockerels. My first prize pullet mating pen was pronounced by the judge an easy winner. MY WHITE ROCKS AT BOSTON, 1912, won first cockerel, first pen, second cock and champion ship cup for best male.

2,000 choice exhibition and breeding birds for sale at honest prices.

EGGS from the world's best breeding pens, one sitting, \$10; two sittings, \$18; three sittings, \$25; \$50 per 100. Catalogue of the champions free.

## THE BIG QUESTION

Why do I, after nearly 20 years of breeding and experimenting with many varieties recognized in the American Standard, now recommend and breed exclusively the

## CAMPINE FOWL

and call them "living egg machines?" Because I do honestly consider that they have in them six characteristics to a greater extent than any other breed of fowls in the world today. 1: Prolificacy; 2: Size of eggs; 3: Number of eggs laid; 4: Hardiness; 5: Small amount of food consumed; 6: Last but not least, their beauty. Now won't you let me tell you more about this wonderful fowl, which are living money makers for me? Remember, it will only be a pleasure.

NOTICE: Campineology (second and greatly revised edition) will be off the press early in January. It will be a work of art and an encyclopedia on the Campine fowl, showing colored cuts and many illustrations. Ten cents to pay postage will be appreciated. For Sale: I have a few birds left that I can afford to part with.

At eight of the largest shows in the U. S. we won

**260 Prizes**

For the breeding season of 1913 we have mated up 35 pens of grand quality, and in addition colony and individual pens aggregating nearly 1000 splendid breeders. Over 2500 birds were available for selection, a number amply sufficient to insure the very highest average of quality.

At LaGrangeville, N. Y. we have our 160-acre Farm which is admirably adapted for a great poultry producing plant. At Bryn Mawr Park, Yonkers, N. Y., is our Metropolitan Branch Plant where we shall have several of our choicest breeding pens of each variety; and shall also have on hand and for sale stock of the finest quality. Bryn Mawr Park station is only 10 miles from New York City.

All our stock has been raised on free range, which in our case means fields, woods and orchards.

**Special Prices on Fine Breeding Stock**

Cocks, \$5.00 and up; Hens, \$3.50 and up; Cockerels, \$5.00 and up; Pullets, \$3.50 and up.

Prices on exhibition stock quoted on request.

The chick crop of 1912 was much below the average, consequently the demand for baby chicks, eggs and stock is sure to be unusually large the coming season. We therefore recommend early placing of orders. By ordering now and making a small deposit customers may insure for themselves shipment on date selected by them.

All our baby chicks are hatched in Hall Mammoth Hot Water Incubators and are equal in every respect to hen hatched chicks.

Mating list, with prices of eggs, baby chicks and stock, now ready. Send for a copy.

**GRANNIS BROS.**

# ALDRICH

## WHITE ORPINGTONS

### Three Record Wins

Five firsts, two seconds, two thirds, two fifths and several specials is our record at the great Madison Square Garden and Baltimore shows, both of which shows were held during the same week ending January 4th. This is a remarkable win when you stop and consider that our birds were in competition with 320 White Orpingtons shown by fifty-seven of the best breeders in America from twenty-one different states, as well as the pick of birds from Canada and England as at New York one complete string was shown by the largest English exporter, and another string was reported to have cost \$10,000 being the pick of England's best, and these were judged by an English judge. We won first pen and first hen at both shows and first cock at Baltimore, in addition to third and fifth cocks, third pullet and fifth pen at

New York, and second cockerel and second pullet and four specials at Baltimore. At Chicago, December, 1912, twenty-four of our birds won twelve regular and nineteen special prizes, including the gold special for best display, having 68 points against 66 among all the rest of our forty-four competitors combined; the president's \$100 cup for the best fifteen birds; grand champion male in class of eighty-five, and White Orpington medal for best pen. And these birds were in competition with 323 birds shown by forty-five exhibitors from sixteen states and Canada. We won first, third and fourth pens; first and fifth cocks; second, third and fourth cockerels, second and fifth pullets and third and fourth hens.

Our complete season's record of fifty-nine prizes out of 150 offered at America's six largest shows at Allentown, Atlanta, Augusta, Chicago, Baltimore and New York, where we won sixteen firsts, ten seconds, sixteen thirds, seven fourths, ten fifths, and over thirty specials in competition with 983 birds shown by 153 exhibitors from thirty states, Canada and England, is all the more remarkable in the fact that out of 152 birds entered by us 110 won prizes and thirteen out of fourteen pens shown were awarded prizes. Thus have we proven our claim that we have

### The Quality White Orpingtons of America

Nearly every bird shown by our customers have won in shows all over the country, in such shows as Atlanta, Hagerstown, Nashville, Little Rock, Columbus, Ga., Louisville, Bismark, N. D., Boston, Battle Creek, Shreveport, La., and in many other shows in many cases defeating birds imported at big prices. This stock was all raised from our winners last year at America's six largest shows where we won fifty-one out of 150 regular prizes offered—a record only excelled by our present season's win.

The ever increasing demand for White Orpingtons on account of their great popularity together with our increased facilities and flock of over 2,000 picked birds have enabled us to reduce the prices on high class birds and eggs to a point never before thought possible by a reliable breeder, thus making it possible for any one to purchase a setting of eggs or breeding pen. If you wish to breed the most popular bird in America today to win at your shows or lay the most Winter eggs, send for our new 64-page catalog with color plates and let us start you right. Eggs, \$5, \$10 and \$15 from the thirty best pens of White Orpingtons ever mated and would advise early booking to save disappointment.

**Aldrich Poultry Farm, R. 7, Columbus, Ohio**

# WHITE PLYMOUTH ROCKS

Superior egg-producing qualities has gained for them the great popularity they now enjoy and which no other variety of poultry has ever obtained. If you are contemplating rearing a few fowls buy the variety you know has proven their excellent qualities. If already a breeder of White Plymouth Rocks, why not head your pen or flock with one or more of

## U. R. FISHEL'S

selected breeders. Remember we have for sale several thousand selected breeders and utility fowls, among this number being several hundred strong, vigorous, farm-reared, husky cockerels that will stamp that Fishel Quality on your flock. Our continuous winnings at 22 largest shows and 5 international expositions prove to you we can give you blood lines no other White Plymouth Rock breeder can give you.

## "THE BEST IN THE WORLD"

has been the claim made for our White Plymouth Rocks ever since we began breeding them over twenty years ago, and as Prize Winners and Egg Producers they are conceded to be "The Best In The World." Our matings this season are by far the best we have ever owned. Our prices for eggs remain the same. Send 25 cents for 64-page book telling all about our 120-acre poultry farm. Tells how and what to feed, how to build, how to care for chickens, etc.

INTERNATIONAL CHAMPIONS

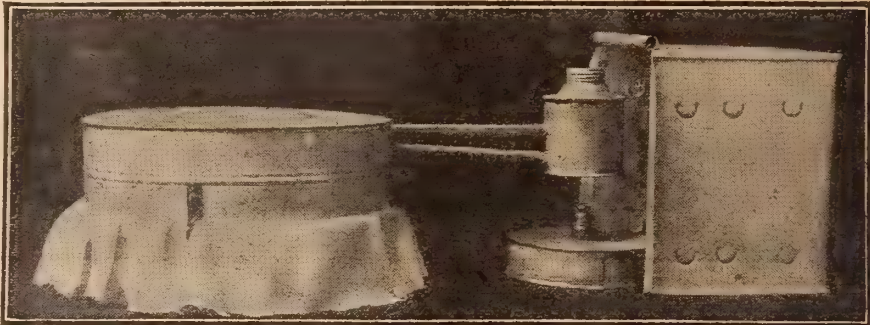

Birds from my yards have won at Dairy and Palace Shows in England, also in New Zealand and at every big show in Canada, New York State Fair 1911 and 1912, ten firsts; Michigan Roundup show, five firsts; Madison Square 1911, 1st, 2d, 3d, 5th and 6th. Birds sold on approval. Duty paid to the United States. Please mention American Poultry Journal when writing.

HIGHWORTH POULTRY YARDS : Fred A. Andrewes, Prop. : LONDON, CANADA

## CANADA'S BEST S. C. & R. C. BLACK MINORCAS

Are the best in the world. The Provincial Show at Guelph is Canada's greatest show. At Guelph Show, December, 1912, in the largest and best class of S. C. Black Minorcas ever shown in America my strain won (principally birds I sold and stock from eggs from my yards) the following prizes: Single Comb—Cock 1-2-3, hen 3-4-7, cockerel 1-2-3-6-7-9-10, pullet 1-2-4-5. There were 18 S. C. cocks, 38 hens, 44 cockerels and 44 pullets on exhibition and in all the years I have been breeding Black Minorcas I never saw as many high class birds in one show. I consider that win of our stock a far greater honor than if I had done the winning. High class exhibition birds at reasonable prices. Good cockerels at \$5.00 and good pullets at \$3.00. Please send for sale cut and testimonials, also complete list of prizes won. Please mention American Poultry Journal when writing.

T. A. FAULDS : LONDON, ONTARIO, CANADA  
PRESIDENT OF CANADIAN BLACK MINORCA CLUB

## \$2.50 For Our All Metal 50-Chick Hover

A perfect hot water system that circulates a warm flannel to lay on the chicks' backs. A hover that can be applied to any colony coop or box in ten minutes; they can't crowd or pile up under this hover. Made of galvanized iron No. 26 gauge, and will last for years. Get our Incubator Book before you buy.

Wendell Incubator Company - 51 Main Street - Holly, Michigan

## America's Best Cochin Bantams

### Win Again at the Great Chicago Show

They won more firsts than all their competitors combined and more they won more points than their competitors. Winning as follows: Black Cochin Bantams—3d ck.; 1st, 2d hen; 1st ckl.; 2d, 3d pul.; 1st pen. Partridge Cochin Bantams 1st, 2d, 4th ck.; 1st, 2d, 4th, 5th hen; 1st ckl.; 1st, 3d pul. Buff Cochin Bantams—3d, 4th pul. Just think of this record in America's greatest show, every entry winning a place. We also won the following cash specials: Best 2 Buff Cochin Bantam cks, best 2 Buff Cochin Bantam hens, 2d best 2 Buff Cochin Bantam cockerels, 2d best 2 Buff Cochin Bantam pullets, best two Partridge Cochin Bantam cocks, best two Partridge Cochin Bantam hens, best two White Cochin Bantam pullets, 2d best two White Cochin Bantam hens. If you are interested, write us. Our beautiful illustrated 1913 mating list will be ready Feb'y 15th.

Wahebe Bantam Yards, W. Besuden, Prop., Box 359B, Cincinnati, O.

# CANDEE

## 1913 Model a Hatching Marvel

**Results Already Received from Coast to Coast Stamp the Candee as the World's Best Incubator.**

Amidst all the discussions about Incubators, one fact stands out clear and distinct: *The Candee is setting a new world's record.*

*Read these facts: (Customers' names upon request).*

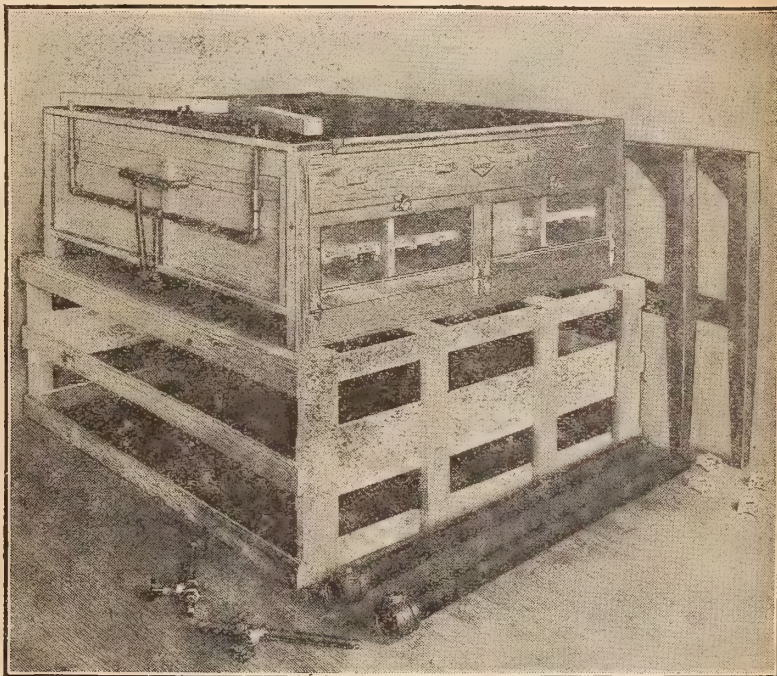

In July 1912 with a cellar temperature of 95°, a Candee operator in Georgia hatched 3,000 chicks and raised 90 per cent of them.

In October, during the moulting season, he hatched 8,500 chicks out of 11,000 eggs.

In September 1912, a Candee operator in New Jersey took off an 80 per cent hatch. In November 1912, another New Jersey operator took off an 85 per cent hatch and exhibited the chicks at the Philadelphia show.

In California in October 1912, a Candee operator on his first hatch, had better than 65 per cent.

Many more 1913 Candees are already running and they are doing equally good work.

A 600-Egg Section Just Unpacked  
With our true Sectional Construction you can quickly set it up.

## Candee Principles Are Right

Ask any man among the thousands who have seen the 1913 models and he will tell you that it is *built right*.

Ask any man who has one installed and he will tell you that it *works right*.

The *automatic compartment control on each 300-egg chamber* solves the problem of hatching on a large scale.

It holds a steady even heat.

It *does away with raising or lowering of egg trays by hand after the operator sees that the eggs are over or under heated*.

It works 24 hours a day, and night watching is unnecessary.

## Approved by the Underwriters

*This means cheap insurance, that you can put the incubator in your house cellar if you wish. It saves you money. It gives you a feeling of security,*

## The Candee Comes to You All Built

We ship promptly and you can quickly set up your machine for this spring's hatching.

The Candee comes to you in separate sections, ready to uncrate and set up on its legs. To you who have thought installing a big machine is a hopeless task, the ease of setting up will be a revelation.

Look at the picture on this page and see how the sections

are sent. Likewise the heater is put together in short order—connections are all assembled at the factory.

We have made it easy for you. Machines are furnished in 1200, 1800, 2400, 3000, etc. up to 20,400-egg capacity.

If you have our catalogue, wire your order at our expense. If you desire our catalogue, write and it will come by return mail.

# "A Great Big Change Coming Over the Poultry Business"

"A GREAT BIG OPENING FOR YOU" *Writes Robert Essex*

**I** LIKE to give my good friends the poultry-keepers a hint when something is happening that they can turn to advantage, and as I am not running a poultry paper, I am paying for this space to tell you.

There is now opening up a *wonderfully large, new market for your eggs and stock—a market that did not exist last spring—a market that never existed before in the way that it does now.*

## LET ME BEGIN MY TALE AT THE BEGINNING.

When I engaged in the poultry business in earnest about Quarter of a Century ago, poultry-keepers were just feeling their way along. There were not many poultry papers to instruct them. The poultry business was just worrying along. But poultrymen are progressive, and as soon as business warranted it the live ones began to extend their farms, raise more chicks, and advertise some more. Then the poultry papers began to spend some of that advertising money getting real poultry news for their readers, and—

**THE POULTRY BUSINESS BEGAN TO GROW.** The farm papers took notice. They said: "There must be something to this hen business." Then the poultry page in the farm paper became a regular thing. That interested the farmers, and they began to buy Standard-breds and eggs for hatching; and the far-seeing poultryman again enlarged his yards and raised more chicks, and did more business.

**AND THE GROWTH WAS SLOW BUT SURE.** Then one or two newspapers began to print poultry news; but it didn't fizz much until last summer, when some bright poultrymen got twenty or thirty of the leading newspapers together and told them how they could teach the GREAT BIG PUBLIC poultry-keeping and get some advertising, too. And all of a sudden we find a score or more of Sunday newspapers telling the PUBLIC how to keep poultry.

Think what it means! In all the years the poultry papers have been doing business they have reached only about 500,000 people at one time. Yet here—just since last Spring—these newspapers have begun to teach a new crowd numbering **OVER TWO MILLIONS.** It means that suddenly there are four or five times as many people as before getting poultry news.

**AND NOW TWO MILLION MORE CUSTOMERS** in prospect than you had last year. It begins a New Era in the poultry business. The live poultryman will reap the harvest for years to come.

I have told you of it! It's up to you to prepare. Do it NOW. Don't wait for hens to sit. Read what President Hicks of the American Poultry Association says:

"The incubator has quadrupled the business capacity of every poultryman in the country. In fact, many claim that if it were not for the incubator, the poultry business would be only a plaything, and not a regular business occupation. But with the incubator and brooder, enabling the poultry raiser to turn winter into summer, thus prolonging his hatching and raising season, the poultry business can be counted today as one of the substantial callings of life."

And now that I have used nearly all my space giving you the news, I must talk a little business—

I want you to send for our New 1913 Annual Catalogue. **IT'S FREE.** It contains Five Chapters telling *How to Make the Most From Poultry—How Money is Made from Standard-breds and from Farm Hens—How to Start Right*, etc. It has 30 Photographs of New Poultry Houses in use on Experiment Stations all over the country, with measurements and costs. Anyway, you cannot afford to buy a machine before you see this Catalogue of the "Essex-Models."

**AMERICA'S LARGEST LINE OF INCUBATORS AND BROODERS**—The World's Best Hatchers. We make 19 Styles and Sizes, from \$2.25 up to \$48 each—Incubators and Brooders of Quality. See illustrations and full descriptions in the book and judge for yourself. Perhaps you would like to say a good word for us to your neighbors who keep chickens. Perhaps they too would like our Catalogue. Your recommendation will help us, and will be appreciated. Write for the Book today.

**Home Lovers, Listen**

A Million People with small incomes buy from us on credit. They furnish their homes in a beautiful way, and they pay us by saving 2 or 3 cents a day.

They get goods on approval. They keep them a month, then send them back if they wish—send them back collect.

And they save from 30 to 50 per cent. That we guarantee to all.

**No Rigid Rules**

You can't suppose those million people accept unpleasant terms.

We sell them on open account. There is no red tape, no publicity—no contract, no mortgage—no interest, no extra price.

We tell them to pay as convenient. They usually send us a little each month. When they can't, we wait. We have no collectors, no rigid rules.

If you only knew how easy our terms are, you would get the things you want. Let our book explain them.

**Try This 9x12-Foot Brussels Rug. \$1.00**  
Order From This Paper. Send Only

Send \$1.00 and try this rug bargain. It must be ordered direct from this paper as there are not enough to catalog. This Brussels rug is a rich Oriental design, ideal for long, hard use. The back is firmly woven of good quality yarn. Rug is well finished throughout. Pay only 75c monthly.

Three Different Colors. Have your choice of red and green combination, or tan predominating, or green predominating. Be sure to state color desired.

No. CC455H945. 9x12 ft. Price.... **\$9.45**

**Dollar Book Free**

Our Spring Bargain Book is a mammoth production. With the mailing it costs us \$1 per copy, yet we send it free. It pictures 4,782 things for the home. Many of the pictures are in actual colors. You never saw such an exhibit. It explains how we take whole factory outputs—how we buy up surplus stocks. How we sell by mail only, and how all these savings give you prices lower than you ever saw. It shows our simple order blank. It tells how goods are sent on trial. It tells our easy terms.

For your own sake, cut out this coupon, send it to us, and the whole complete book will be mailed you free. Do this now—before you forget it.

### BARGAINS

50 cockerels, pure white birds, extra good shape; fit to trot out in the best shows; will sell at \$10 each.  
50 pullets, line bred, extra fine, some top-notchers; they are really worth twice the money asked: will let them go at \$5 each.  
50 pullets, fine in shape and color, good breeders; are now selling at \$4 each.  
75 pullets, utility bred birds, great value at the sale price of \$2.50 each.

**A grand opportunity that you  
should not let pass**

## Our New Catalogue

Is just off the press. This book has cost thousands of dollars to publish, and years of experience. It has chapters on Practical Methods, Profitable Results, Poultry Keeping in the City, White Wyandottes as the Most Profitable Fowl, The Specialist, and What It Means to You, Fisheldotte, the Home of the World's Best White Wyandottes, The World's Best—Why Our Birds are Entitled to the Name, Open Air Houses and How to Build Them, Baby Chicks and How to Raise Them, Natural and Artificial Incubation, Practical Poultry Feeding, Eggs in Winter and How to Get Them, Practical Poultry Pointers; in fact, every branch of the poultry business is covered in this great book. We will be pleased to mail you a copy on receipt of 25 cents in stamps or coin. Our illustrated price list free.

**J. C. Fishel & Son, Box J, Hope, Indiana**

# START THE CHICKS RIGHT

**M**AKE sure—this season—to start your chicks the right way. And it is a well-known fact that the first three or four weeks of their lives is the critical time. Then why not profit by the experience of other poultry breeders—men and women who have found out? A Cyphers four-section Paradise Brooder heated by one lamp, holds 400 chicks in eight separate lots—fifty chicks to the flock—and these chicks are under complete control all the time.

## Sample Reports From Customers

### Far Superior to Other Makes

Tucson, Arizona, July 29, 1912.

Cyphers Incubator Co., Buffalo, N. Y.—

My experience with your Paradise Brooder has clearly proved to me that it is far superior to all other makes of brooders I have used or seen—not merely in a single feature, but in many features, including the following:

1—Pure air. 2—Ability of the chicks to move about and enjoy the exact temperature they desire. 3—Prevents crowding. 4—Fresh water feature that precludes contamination. 5—Facility in handling and feeding the chicks, avoiding the tedious work usually met with in raising large numbers.

This report is based on experience and close observation. Several broods were raised by us in our Paradise Brooder without the loss of a chick, something I never had accomplished before. The greatest number of chicks we had in our two-section Paradise Brooder at one time was 225.

FRED C. WRIGHT.

### "The Busy Man's Brooder"

Pittsburg, Pa., May 2, 1912.

Cyphers Incubator Co., Buffalo, N. Y.—

Kindly ship me another section for my Paradise Brooder immediately. My last hatch turned out much better than I had expected. Your Paradise Brooder is well named, so far as the comfort of the chicks is concerned. I would call it the busy man's brooder. It economizes time and labor, more than anything I have seen along that line. It does away with the necessity of expensive brooder houses. When I looked at the brooder tonight it was a pleasant sight—about forty-five chicks in each of the three compartments spread out on the floor. There is no occasion for the chicks crowding each other in seeking a warm spot.

D. McTURK.

### "4,050 Chicks in Four Years"

Alexander, N. Y., August 14, 1912.

Cyphers Incubator Co., Buffalo, N. Y.—

We have successfully used the Paradise Brooder for four years, and during that time raised 4,050 chicks in it. We can't give this brooder enough praise. We have reared an average of at least 95 per cent. of the chicks.

MURPHY & WINKLEMAN.

Base Section (two-compartments) can be bought and used separately. Later one or more Upper Sections can be added.

### "Without a Single Loss"

Honolulu, Hawaii, March 12, 1912.

Cyphers Incubator Co., Buffalo, N. Y.—

January 7, 1912, I hatched in my 144-egg Cyphers Incubator, 102 White Leghorns out of 112 fertile eggs and February 2, I hatched 117 Rhode Island Red chicks out of 122 fertile eggs. Also purchased a base section (two compartments) of your Paradise Brooder and a Cyphers Style A Outdoor Brooder, equipped with your Adaptable Hover. All the above mentioned chicks were raised in these brooders without a single loss and I must say that you have in the Paradise Brooder an excellent machine for brooding chicks. It is indeed a valuable addition to my poultry equipment.

AUGUSTUS DEERING,  
Ass't Chief of Fire Dept.

### "Raised Over 2,000 Chicks in Mine"

Brookside, Va., March 5, 1912.

Cyphers Incubator Co., Buffalo, N. Y.—

Judging from my experience, the Paradise Brooder is the best indoor brooding device on the market today without any exception. Last season I brooded and raised over two thousand chicks in mine, with comparatively no loss at all.

E. J. KIRKPATRICK.

**PLACES TO USE:** THE PARADISE BROODER can be operated with success in a dwelling house, store room, stable, poultry building or other structure where the temperature does not go below freezing. It will give excellent satisfaction in any of these locations. No better or more convenient place can be found than near a window in a room of an ordinary dwelling—a south or east room preferred, where the sun will shine in on bright days. FOR DETAILED ILLUSTRATED DESCRIPTION of the Paradise Indoor Brooder (heated by coal oil stove or by gas) write today for our 1913 Complete Catalogue and Poultryman's Guide, "Profitable Poultry and Egg Production." 244 pages, 7½ x 10 inches, 500 instructive illustrations. FREE on request. Fully describes our more than 100 standard poultry articles for progressive, successful poultry raisers. Address our place of business nearest you.

# Buy Your Incubator of Chas. A. Cyphers

**Let Me Save You 50%** My new incubator, the Buffalo, fulfills the life-long demand of thousands of poultrymen for a **Standard Hatcher** at a reasonable price. It offers all the Quality of the best high-priced incubators, at **half the price** of any other incubator containing the **Cyphers Principle**.

## Sterling Principles Maintained

Every vital principle that made my Original Cyphers a World Success is embodied in the Buffalo. The same three-compartment heater; the diffusive ventilation; and the sensitive and accurate regulator; combined with heavy insulation and durable construction; with refinements not included in the original.

Buffalo Incubators insure you big hatches of strong chicks that live and are easily raised to make money for you. Look what they did for these men:

### Buffalo Hatched Pullets Win International Egg Laying Contest.

Sayre, Pa., November 25th, 1912

Mr Chas. A. Cyphers, Pres.,  
Buffalo Incubator Company.

Dear Sir:—It probably will be interesting to you to know that my pen of five pullets which won the Philadelphia North American International Egg Laying Competition at Storrs, Conn., laying 1071 eggs in a year, were incubated in a No. 3 Buffalo.

The Buffalo Incubator runs itself. The hatch percentages were very large—a strong and vigorous chick from practically every egg. My prize winning pullets came out bright and lively, and were laying the second week of November.

Yours very truly,  
F. G. YOST.

—Breeder of Keystone State Strain,  
Single Comb White Leghorns.

### Buffalo Incubator Owner Wins Poultry Item Premium for Best Hatching.

New Park, Pa., November 25th, 1912.

Mr. Chas. A. Cyphers, Pres.,  
Buffalo Incubator Company.

Dear Sir:—I purchased a No. 2 Buffalo Incubator from you last January, and I want to tell you of its good work.

I entered it in the Poultry Item contest and hatched 220 chicks from 225 fertile eggs in one hatch, and 214 chicks from 223 eggs in another hatch. I won the first prize away ahead of my nearest competitor.

I shall buy more Buffalos this season.

Hoping you may have great success, I remain

Very truly yours,  
C. P. SHIREY.

—Breeder of S. C. White Leghorns of Quality,  
Eggs, Stock and Day Old Chicks.

The Buffalo is simply a wonder. I am proud of it. There is nothing cheap about it but the price.

I offer you an incubator that is second to none in **Durability, Reliability, or Quality**. You can't get a better incubator than the Buffalo, no matter how much you pay.

You can't get one as good. There are incubators and incubators, and nearly any of them will hatch some chickens. The biggest profits are made by operating the Buffalo, which will hatch a strong and vigorous chicken from every hatchable egg.

## Note My Low Prices

 The Cyphers who will sell you his latest creation, the "Buffalo" at  
half the Standard Price.

# The New BIG 4

## 1440 Egg Capacity Incubator \$84<sup>00</sup>

Occupies same floor space as any standard 360 egg incubator.

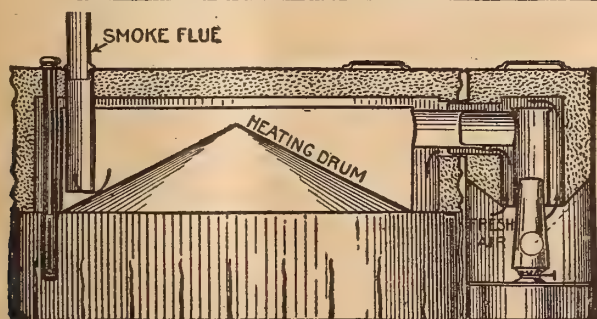

Or incubating section run in conjunction with your present hatcher, whether a Buffalo, Cyphers, Model or Prairie State, will increase its capacity by 1080 eggs. Incubating section alone, 1080 egg capacity, operated with one lamp, costs you but \$60.00.

This is an Incubator, not a Hatcher. You put in 360 eggs every six days, and after the eighteenth day transfer the first 360 eggs to the regular hatcher for the exclusion. Has the other large hatchers beat in quality, in economy of labor, in space occupied and in price.

### Something New In Hovers

**Buffalo Handy Hover \$8<sup>00</sup>**

**Buffalo Home-Brooder Hover \$7<sup>00</sup>**

Buffalo Handy Hover 100 Chick Capacity.

The Buffalo "Handy" is a floor-level hover. You can set it any old place.

**Sanitary**—all galvanized iron.

**Heats Easily**—walls are heavily packed with good insulating material.

**Uses But Little Oil**—flame burns with a white light, which indicates complete combustion.

**Hottest At Outer Circle**—heat is brought lowest at that point.

**Perfectly Ventilated**—heater is double with fresh air flue.

**Handy**—just pick it up and set it aside to clean the floor.

Lamp flame can be seen without stooping. Lamp compartment or heater is attached to hover with "rolled-edge slip-joint," and is quickly detached for tending lamp.

Has all the good points of others, with thick walls and complete combustion added. Others are thinly insulated, and are hard to heat. Other lamps burn a yellow flame, and waste oil. The Buffalo Handy Hover will heat 10 degrees hotter with same oil consumption; and in a room too cold to use any other hover.

*Send postal for fuller description, or better, send along your order before we are over sold.*

HUMPHREY, Avon St.  
Factory, Joliet, Ill.

## Wonderful Fall-Bearing Strawberries

Fruit in fall of first year and in spring and fall of second year. Big money-maker! 500 plants set in May yielded from Aug. 23 to Nov. 11 nearly 400 quarts which sold for 25c per qt. The past season (1912) we had fresh strawberries every day from June 15 to Nov. 15! We are headquarters for

### Strawberries and Small Fruit Plants of all kinds

Big stock of best hardy varieties at very low prices. Plum Farmer, Idaho and Royal Purple Raspberries, also Blackberries, Gooseberries, Currants and Grapes. 30 years' experience. Catalogue free.

L. J. FARMER, Box 301, Pulaski, N. Y.

## Natural Hen Incubator 200 Egg Size only \$3.00

J. F. SIEMS  
Patentee

Let us send you our Catalog and prove to you that we have the Incubator you cannot afford to be without. It assures you immediate success in the Poultry Business. Its cost is very small. It needs but little attention, and produces the greatest percentage of healthy, vigorous chicks. It is the only Incubator without mistakes.

### Over 550,000 Sold

Mr. R. I. Whitmer, from Kans., writes:—"It is the grandest thing I ever saw." Another—"It's a labor-saving invention." Another—"Greatest success of the age." Another—"I hatched out 507 chicks from 540 untested eggs," etc. Thousands of voluntary testimonials. No freight to pay. More agents needed. Send postal form for Catalog containing Special Introductory Offer. Address

Natural Hen Incubator Co.  
Station H, Dept. 4, Los Angeles, Cal.

## Double Your Profits

Plant trees and Bush Fruits in your chicken yards and reap double profits. Many of the most successful poultrymen do this and make more from the fruit than the poultry. The fruit is clear gain and the poultry thrive on the insects from the trees and bushes.

### "Scarff's Fruit Catalog"

Offers special inducements. A reputation of over 25 years is back of every order. Our list is complete, fully describing the products of our 1100 acre Nursery and Seed Farms. Send for our free orchard tree catalog. Also describes our small fruit and farm seeds. Write to day. It's free.

Send names and addresses of 5 Fruit Growers and get a fine currant bush tree.

W. N. SCARFF,  
Box B  
New Carlisle,  
Ohio

## POULTRY FENCE

25 1/2 CENTS A ROD FOR 60 INCH FENCE

Prices on other styles and heights in proportion. Is not a flimsy netting requiring top rail and base board but a strong, substantial fence. The style shown is 23 bars high with stay wires 4 1/2 inches apart. Graduated spacing between the line bars from 1 1/4 inches at bottom to 4 1/2 inches at top. Makes an ideal general purpose POULTRY FENCE and is absolutely poultry and rabbit proof. **Sold Direct to the User.** Write today for large Free Catalogue.

COILED SPRING FENCE CO., Box 82 Winchester, Indiana.

## As Heat Rises Moisture Must Fall

High heat must have low moisture.  
Low heat must have high moisture.

This is a rule never to be violated. A certain definite relation exists between heat, moisture and ventilation. The more closely it is observed, the nearer the hatch comes to perfection.

## Mandy Lee Incubator

Adapts the Moisture to the Heat

Heat  
Moisture  
and  
Ventilation  
Measured—  
No Guessing

It is the one scientific incubator, because it is the only one that measures and secures right relations of hatching requirements. Hatching with the Mandy Lee is exact work. Thermometer, Hygrometer and Triple Automatic Regulator cannot go wrong like machines watched and "tended" without knowing what is wrong or what is required.

Everything is measured, not guessed at, in the Mandy Lee. All is automatic. See Lee's latest catalog for particulars on modern scientific hatcheries, including New 600-Egg Incubator.

Use Germozone this year, standard remedy of the world for Roup, Colds, Cholera, Canker, Bowel Complaint, etc. Also Lice Killer, Egg Maker and White Diarrhoea Remedy. All Lee modern poultry books free. Address

GEO. H. LEE CO., 1101 Harney St., Omaha, Neb.

## Only Live Chicks Count

It is not the number of chicks hatched, but the number raised, that makes a poultry farm profitable. Chicks trampled to death or smothered in the brooding represent loss.

## International SANITARY HOVER

The only hover that is warmer near the curtain than at the center. This, by causing the chicks to distribute themselves near the edge of the curtain, prevents crowding and assures plenty of fresh air.

The Sanitary Hover can be picked up and carried around with ease and used anywhere. No carpenter work is required to set it up. It is fireproof, unbreakable, absolutely reliable.

More sales are being made of Sanitary Hovers than of any other two makes combined. Sixty per cent. of the Sanitary Hovers sold are replacing other brooding devices. If you are going to raise chicks this spring, you owe to them to investigate the results achieved with the Sanitary Hover.

Indorsed by Kellerstrass, Owen Farms, Wm. Cook & Sons, and America's leading poultrymen generally. The concerns named are breeders of the highest priced birds in the country. Every chick entrusted to a hover by them represents from \$10 to \$100 in value. They use the Sanitary Hover because they know it can be depended on.

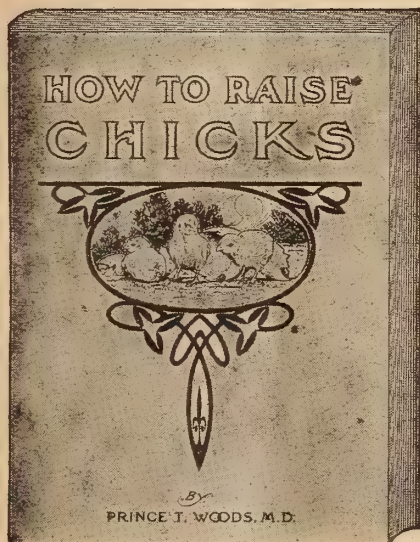

Write for booklet containing a full description of the one perfect brooding device—the Sanitary Hover.

INTERNATIONAL POULTRY SALES CO.,  
Box 511, Brown's Mills, N. J.

# Every Poultry Keeper Everywhere Should Have

—DR. PRINCE T. WOODS' NEW BOOK—

## HOW TO RAISE CHICKS

*Including Revision of "Facts About  
White Diarrhoea"*

A down-to-date manual on breeding poultry getting hatchable eggs, incubation and brooding both natural and artificial, preparing chick foods, feeding chicks, how to raise chicks and how to avoid and prevent disease and losses. Told in plain language. Illustrated with reproductions from photographs and with pen drawings. Tells how to make your own brooders and chick foods. Written by a man who knows how and how to teach others. 88 pages, 35 illustrations and 5½x8

inches in size. Printed on good paper. Well and durably bound in cloth.

**A Book for Everybody Who Keeps Fowls or Grows Chickens Whether  
Beginner or Old Timer in the Field of Poultry Work**

### IT HAS TEN CHAPTERS:

**Chapter I—Selecting and Mating Breeding Stock.** Constitutional vigor necessary in breeding stock to secure vitality in the chicks. Tells how to get it. Selection and care of male bird. Selection of females. Mating. Number of females to a male. The service. Fecundity vs. sterility.

**Chapter II—Food, Vegetable, Animal and Mineral.** What food is. Chief source of all food. How plant grows. Food elements.

**Chapter III—Fowls and Food.** The living fowl and the Life Principle. The living cells. Chemistry of fowl's body. Disposition of food varies with individuals. Variety of wholesome, palatable food necessary. Balanced ration is desirable. Live food needed. Digestion of food. Maintaining body temperature. Exercise. Give the fowl a chance to balance its own ration.

**Chapter IV—Care and Management of Breeders.** Housing. Foods and feeding. Hoppers and automatic feeders. Importance of comfort. Keep them healthy and happy. Well fed healthy breeders managed for comfort yield hatchable eggs.

**Chapter V—Eggs for Hatching.** Selection of eggs. Sex of eggs. Fertility. Gathering and keeping eggs. Time eggs may be kept. Period of incubation.

**Chapter VI—Incubation, Natural and Artificial.** How to get

good hatches with hens. How to get good hatches with incubators. How to test eggs during incubation. Simple home-made egg tester.

**Chapter VII—Brooding with Hens and with Brooders.** How to brood with hens. Brood coops for hens and chicks. Let chicks range and keep hen confined. How to brood chicks in brooders. Heated brooders. Fireless brooders. How to make your own brooders. How to operate brooders. Comfort a better guide to the right temperature than a thermometer. Patience needed in teaching chicks.

**Chapter VIII—Chick Foods and Feeding Chicks.** Home-made chick food, how prepared. Freshly prepared foods best. Commercial foods. Cooked food. Live food. Other necessities. How to feed.

**Chapter IX—Growing Chicks.** Weaning chicks. Colony coops and range. Changes in rations. Growing for stock birds and layers. Market chicks.

**Chapter X—Facts About White Diarrhoea.** What white diarrhoea is. Symptoms of disease. Causes. Is there more than one form? Has germ of specific disease been found? Infection. Prevention. Treatment. Formula for a simple remedy which has proved effective in many cases in many climates for four years.

**Increase Egg Yield This Winter, Save Money on Feed, Make Chicks Grow Rapidly, Strong**  
by installing an Ideal Grain Sprouter and feed your hens the green food that is absolutely necessary to insure prolific egg production.  
Eggs are going higher in price every day, the demand is far exceeding the supply, and it looks like good times and plenty of money for the man who has one of our Sprouters.  
**The IDEAL Grain Sprouter**  
—is the best machine for sprouting grain ever made.  
—will produce sprouts over 2 inches long in 24 hours;  
—sprouts any kind of grain better, in less time and without fuss or muss;  
—produces three to four bushels of feed from one bushel of grain;  
—pays for itself in a single month by saving in feed bills, increasing egg yield, supplying food that makes chicks grow strong and vigorous.  
The "Ideal" is made in several sizes—for a few hens up to hundreds. Can be used in summer (without lamp) as it has proper arrangements for moisture and ventilation to produce quick results and crisp feed.  
**CONSTRUCTION**  
Made of best lumber—double walls, insulated with heavy deadening felt—inside lined with galvanized iron—frame of trays heavy galvanized iron—bottom of tray heavy wire netting—front of machine glass, which induces green sprouts. These sprouts require very small amount of artificial heat which is produced by the Ideal Safety Lamp, the fumes of which pass through ventilators.  
**Get Special Low Price Freight Prepaid Offer Today**  
Don't delay but write at once for special low price freight prepaid introductory offer, full particulars and description of this perfect grain sprouter. No poultryman should be without it. It is the **Biggest Money Maker for the Poultryman since the Incubator was Invented.**  
Made by **J. W. Miller Co.,** Manufacturers of Incubators, Brooders and Poultry Supplies, which is sufficient guarantee of its excellence.  
**J. W. MILLER COMPANY, Box 600, ROCKFORD, ILLINOIS**

# Wonderful!

J. H. KATE

Greatest artificial hatching machine in the world. Shipped *direct* to you from factory. No middlemen's or agent's profits. My big *Free Book*, No. 10, tells all about the X-Ray Incubator and Brooder. X-Ray Incubator is only hatcher on the market that's built on *The right principle!* It has the lamp *underneath*—square in the center—and *not* on the side. This way I get an absolutely *even* temperature in egg-chamber *all the time*. There's no *cold side*—no outside draughts. Always *proper* ventilation and heat. And you get bigger hatches, strong, healthy chicks—and you make more profits! I use a big four-to-eight-quart oil tank on my X-Ray. Once it is filled it doesn't need to be touched again until the *next hatch!* All other machines require filling of lamp *every day*—at least 21 times!

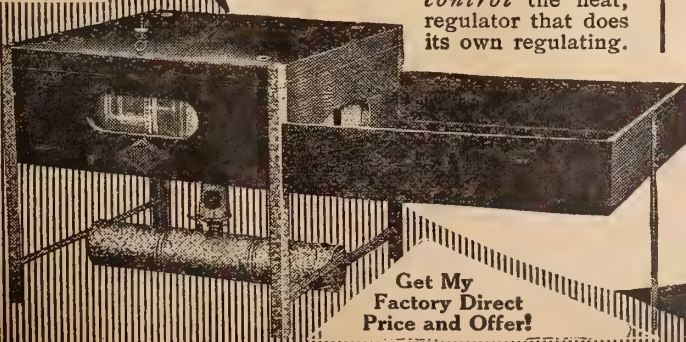

## My X-Ray Incubator Uses Only 1 Gallon of Oil for Entire Hatch and Requires Just 1 Filling of the Lamp!

Just one gallon—that's all! The old-style lamp-on-the-side machines use 3 to 5 gallons. And you have to fuss around with an old dirty, ill-smelling oil-tank *every day*. But I not only save you worry, work and dirty hands—no—

### I Guarantee to Save You From 75c to \$1.25 on Every Hatch

My patented automatic trip—and exclusive X-Ray feature—cuts down the flame at the burner when egg-chamber gets too hot. So there's no excess heat—*can't be any!* No smell. Absolutely no waste of oil! Here's how the saving of oil is made. Another point. My X-Ray Regulator requires no attention whatever—it is purely automatic—takes care of itself. All worry is eliminated. Instead of wasting heat and having a regulator that keeps you busy all day looking after it—my X-Ray has improvements that *control* the heat, regulator that does its own regulating.

X-Ray  
Brooder

Get My  
Factory Direct  
Price and Offer!

To use my X-Ray Incubator means less handling of eggs, much less oil expense, less heat generated and absolutely no waste whatever. Eggs need not be removed during *entire* hatch. Anyone can get the biggest results from this hatcher that is so simple in construction and so easy to operate. If you are going to get an incubator or brooder why not get the ones that are miles ahead of the old-fashioned, clumsy, wasteful machines? The X-Ray Brooder has the same successful heating system as my X-Ray Incubator and I guarantee it to raise every chick worth raising. Both machines are built on the only right *principle*—so both are very successful.

### Write Today for Our Free Book No. 10, on X-Ray Incubators and Brooders

Learn all The X-Ray's better features. Learn of the big hatches other folks have made with my X-Ray Incubator after making failure after failure with the old style hatchers. Remember, I fill your order the very same day I receive it—I have no agents—I *guarantee* to please you and save you money. And I repay the freight.

Write me today.

# Natural Hen Incubator

## Approved by Over 550,000 Buyers

### 200-Egg Size, Only \$3

J. F. Siems Patentee

**BIGGER Hatch—Healthier Chicks. Stop—Think! Why pay a big price for an incubator when Siems Natural Hen Incubator will give you a higher percentage of good, strong, healthy chicks at one fourth the cost. Write at once for full facts—don't take any incubator until you learn all about Siems way of using the natural hen—the only thoroughly successful incubator.**

**A Very Simple System**

The Natural Hen Incubator is no experiment. It has been tested by over half a million people. There are no lamps, no oil, no deadly fumes and no costly mistakes. **No freight to pay.** Eggs stay in healthy, sanitary condition during entire hatch. Different from any other incubator. Has all advantages of old fashioned, setting hen and gives greater percentage of saved, healthy chicks than in artificially heated incubator. A. A. Linnett, Kan., writes: "I have just set my N. H. Incubator for the third time. First hatch, 99 chicks from 102 eggs; second, 97 chicks from 104 eggs." Thousands of other voluntary testimonials. More agents wanted. Write today for FREE Catalog telling all about it and containing special introductory offer.

## I Want Your Name and Address

I have a Poultry Guide Book that every earnest poultry raiser in the United States should read this year. This is the coupon that brings it. It shows the way to bigger and better things for poultry raisers. You can't afford to be without it, and I am going to send it to you free. Fill in your name and address on the blank line below (or write a postal) and mail to **P. M. Wickstrum, the Queen Incubator Man, Box , Lincoln, Neb.**

Your Name \_\_\_\_\_ P. O. \_\_\_\_\_ Co. \_\_\_\_\_ State \_\_\_\_\_

**THE  
QUEEN  
POULTRY  
GUIDE**

## Get Your Chickens on a Money-Making Basis

Queen Incubators  
and Brooders have done this  
for thousands of my customers all over  
the country—in every state of the Union.  
Read of their success in my new Poultry Guide.  
Here are paragraphs from two letters in the book,  
the first from Iowa, the second from British Columbia:

Mrs. Wm. Schenck, Ft. Madison, Iowa,  
writes: "All these little conveniences count  
for a whole lot when hatching as many  
chicks as I do. You can produce chicks with  
less labor and expense with the Queen than  
with any other incubator I ever saw."

"I ran the Little Queen at sea level when the  
ice froze one inch thick in a pan under it and  
got 112 chicks out of 114 eggs."

M. L. Peterman  
Fraser Mills, British Columbia  
Canada

Don't you see it's a valuable book for you to have? You want to know how these things can be done.  
I promise you will find out in the book. Queen users have reasons for being so enthusiastic.

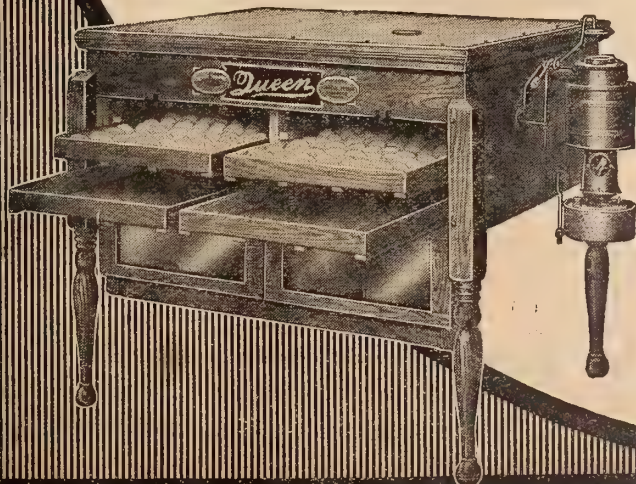

# The Queen Incubator

**Built to last 25 years.  
28 points of superiority.**

**Always sells at a fair price.  
No better at any price.**

Every year the Queen is pressing the high-priced incubators harder and harder. Its sales are increasing at a rapid rate. It works alongside them in hundreds of places—its hatching record exceeds. It has a

better record than even the \$18 to \$40 machines. People have learned it is no use to pay more than Queen prices. I am now selling Queens all over the U. S. They make their own way. I sell on a money-back guarantee. I refer you to any National Bank in Lincoln, Nebraska. Quick deliveries in the extreme East and West through my distributing houses. Now fill out and send in the coupon at the top and let me get my fine book out to you quick. Don't wait—do it now.

Smith Bros. Seed Co., Box 22, Auburn, N. Y.

## HUMPHREYZE YOUR HENS

I keep hens because I enjoy them and because I want fresh eggs.

What is more, I get them. All winter my small flock will average 40 to 50 eggs a day, and I have gathered 58, and I am not a professional poultryman. I usually keep about 70 hens. Around me my neighbors were not getting any. That is, they did not until I told them how. Now they get as many as I do. They say I Humphreyzied their hens, and I have adopted that word for my own.

I will tell you how to Humphreyze your hens, so you can get eggs right through the winter months. If you have no more than 10 hens, it will pay you to Humphreyze them. It costs you nothing to find out how, and I will give you a

**30 Days' Free Trial**

It makes no difference what breed you have. Some breeds are better winter layers than others, but any breed can be Humphreyzied and made to lay in winter. The increased egg crop will, in a short time, more than pay the cost, while the feed bill will actually be about half what it now costs you when, perhaps, you get no eggs.

A piece of fresh bone which you can get at your butcher's for nothing, or a few cents at the most, is a part of Humphreyzing, but if you will

### Send for my book "The Golden Egg"

which is free—you will get the whole thing. I tell you how to care for your flocks month by month, what to do in case of sickness—in fact, my book is an easily understood guide. With it you can make your hens lay, and give vigor and strength to the whole flock. Send for a copy to-day and begin to Humphreyze.

**HUMPHREY**  
White St. Factory Joliet, Ill.

## RANCOCAS Cockerel Bought by U.S. Government

This letter has just been received from RANCOCAS Headquarters:

"Mr. Harry Lamon, the Government poultry expert, has purchased a Rancocas cockerel to head the flock of White Leghorns at the Government farm at Washington, D. C. Mr. Lamon has visited practically all the large Leghorna farms this Fall, and considered this the best bird, combining both the utility and fancy points that he could find anywhere." This bird is to be used by the Government to head a breeding plant to develop what they will advocate as the perfect type of White Leghorns.

At the Trenton State Fair, Fall of 1912, RANCOCAS birds captured the championship, two silver cups, 20 ribbons, and Cash Prizes.

At Syracuse, 1912, all first prizes but one were awarded RANCOCAS White Leghorns, with other winnings for RANCOCAS White Plymouth Rocks.

RANCOCAS birds mean profitable Poultry Raising. We supply birds for competition and condition them for shows.

# Get My Price on This Incubator— It Will Hatch Every Hatchable Egg

You simply can't lose when you buy a Reliable Incubator. It's so thoroughly guaranteed—so well made and of such good material that it can't help producing satisfactory results. Every machine has back of it my 31 years of incubator building experience and the largest incubator and brooder factory in the world. I know just how cheaply a good incubator can be made and how cheaply it can be sold. I know that no matter how much you pay, you can't get a better incubator than

Note the Heating System Is Inside of the Machine.

## The Reliable Incubator

The biggest poultrymen in this country know it will hatch every hatchable egg every time. It's guaranteed to give perfect satisfaction or your money will be refunded. You run absolutely no chance whatever. Read how it's made—then get my price. Now look—seasoned cypress lumber is used in its construction having top and bottom tongued and grooved—thoroughly insulated—**double heating system** built right into the incubator, yet you can get at it in a second. No matter how cold the weather you can depend on the Reliable. It lets you sleep nights. Accurate regulator—tanks of cold-rolled builder's copper—metal chimney—government standard tested thermometer—all metal safety lamp—and all thoroughly inspected before shipment is made. The Reliable will save you money, time and temper.

## The Reliable Brooder

is built upon the same thorough principles, and is of the same excellence of construction, as the Reliable Incubator. Either Hot Air or Hot Water System of heating. Four sizes—for 80—120—220 or 300 chicks. Roof is heavily painted galvanized iron. Every part and attachment made of the very best high-grade materials.

## The Reliable Poultry Farm

offers you a thoroughly dependable source from which to secure either birds or settings of eggs. This is one of the largest and most noted pens in America and only pedigreed stock is bred. All varieties of chickens, ducks and geese. Either birds or eggs successfully shipped anywhere in this country or abroad.

### We Also Handle All Manner of Poultry Supplies

including our Reliable grain and oat sprouter. Send now for prices and descriptions. We will also send you free our new poultry catalog that you will find interesting and to contain many suggestions that will prove profitable to you. Just a postal—or use the coupon if you prefer.

Co.

**125-Egg Incubator  
125-Chick Brooder**

**Why Pay More? If Ordered Together  
Why Take Chances? Both for**

**\$10** Freight Paid East of the Rockies

I stand ready to prove to you there are no better machines on the market for anything like my low price. I stand ready to let you prove it in your own home, to your own satisfaction (not mine), and pay the freight charges both ways. You take no risk—no chances. I will ship you one of my 125-Egg Hot Water Wisconsin Incubators and a 125-Chick Brooder on 30 days trial, and if you don't find it the best hatching outfit after 30 days trial ship it back, and back comes your money. Machines that win in the Big Hatching Contests year after year surely must have unusual merit. But, remember, they must win your satisfaction or I take them back—return your money—pay all freight cost. I have been advertising in this paper for years. The publishers know me and know that I do just as I agree. I am undoubtedly making the readers of this paper the most remarkable offer on high-grade incubators and brooders that has ever appeared in the paper.

## The Wisconsin Incubator

is hot water type; has double side walls with dead-air space between; top has three walls; large double glass doors; copper tank and boiler; roomy nursery beneath egg-tray; self regulating; made of high-grade California Redwood, not paper, nor do we paint them to cover up cheap lumber, but we stain and varnish them so as to show quality of lumber—completing a machine that

has no equal at anywhere near the price. The brooder is a roomy, well made, properly heated and ventilated machine. Fitted with hover, oil lamp and wire scratching yard as illustrated. Both machines complete—set up, ready to use with Taylor "Tycos" thermometers, O. K. burners, safety oil lamps, egg tester—everything but the oil—all for only \$10.00.

## Order Now, DIRECT FROM THIS ADVERTISEMENT

**at My Risk—Money Back if You're Not Pleased—**  
at any rate don't buy until you send for my FREE CATALOG.

Write for a copy today, so that you can compare the material we are putting in our Wisconsin incubators and brooders with the material other makers are using. If you will do this we know you will order a Wisconsin.

I want you to have this book, and I will gladly send it to you free and postpaid. It tells all about these wonderful machines and shows how others have made big money in poultry, starting with the same complete Wisconsin outfit which I offer you for only \$10. If you send your order in, I will send you the book, anyway; it will be valuable to you while you are trying the machine for 30 days. (16)

## Proof in a Nutshell

Here are a few comparisons of "proofs" that will help you to avoid making a mistake in deciding which machines to buy:

**1st** The Wisconsin has double walls with dead air space, a decided advantage. Some have no dead air space.

**2nd** Egg chamber in the Wisconsin is fully ten inches deep. Some, to cheapen cost of making are scant 8 inches deep.

**3rd** This makes the nursery less than 2 inches and too shallow for little chicks. In the Wisconsin the nursery is 3 inches deep.

**4th** In the Wisconsin there is plenty room between the egg tray and the door for the chicks to get in the nursery. In some incubators you have to open the door in order to put the chicks in the nursery.

**5th** The Wisconsin has large double glass doors through which the thermometer can be easily read. Some have a small single glass, making it necessary to open the door to read thermometer.

If you will make these comparisons, weigh them well, I know you will order my machines and be better pleased, for these are cold facts which actual comparison have proved.

SECTIONAL VIEW. Showing the Double Walls and Dead-Air Space Construction of Our Machines.

# What Is a Good Incubator?

(Written by The Man Who Knows)

J. W. MILLER

**D**O YOU know what goes to make up a really good, dependable incubator?

If you have any doubts upon the subject, let me explain my ideal—the ideal which I have worked to embody in my incubators.

To begin with an incubator should have perfect insulation, a sensible heating system, a simple, efficient regulator.

These are the vital things. Upon them depend the success of your hatch, the sturdiness of your chicks, the profits of your enterprise.

There are a few good incubators on the market which meet these conditions perfectly. But there are other points to consider. For, if there's a weak spot anywhere, it is apt to prove costly.

For instance:

—the regulator should be automatic in action, never allowing the temperature to vary even a fraction of a degree;

—the ventilation arrangement should be carried to a point where it cannot be improved upon;

—the lamp and burner should be fire-proof, danger proof;

—the thermometer must be accurate;

—the incubator should have the best nursery advantages, the handiest egg tray, and be constructed of best materials possible to obtain.

As many have said before, you don't have to be an expert to "make good" with a good incubator. But if you are seriously thinking about spending your money for a hatcher, you want one that measures up—point for point—with the specifications outlined above. You want one that you can *readily understand*, one that exploits no freak or untried ideas, one that will stand the most minute inspection, the most unsparing scrutiny and *pay you large dividends on your investment*.

This is not a rosy picture from the draft-room, nor the conversation of an enthusiastic salesman. It exactly describes my "Ideal"—The IDEAL Incubator.

Because of its mechanical features of superiority, the Ideal is the machine you can be sure to make the most money with.

—It is absolutely safe—an explosion or fire has never resulted from its use.

—It gives better results with a smaller expense of operation and with less care and attention.

—It is handsome in appearance, of attractive design, finished in imitation mahogany, and with ordinary care will last a lifetime.

I'm proud of my incubator all the way through. Proud of the hatches made with the "Ideal." 95%, 98%, 100% perfect hatches are the records. These records are not a sensation. They were years ago. But sensations cease to be sensations when they become every-day occurrences. If you buy an Ideal you can obtain the same results.

The money you spend for an Ideal is as safe as if spent for a Government bond—you are sure of the returns—and, as I believe the Ideal is more likely to suit the demands of the people better than any other incubator in the world, and

help them to big profits, I heartily recommend it to all, and stand back of every claim made for it, regarding specifications, hatches, etc.

To those interested in incubators and poultry raising, I will send free my big Poultry Book which contains *actual photographic reproductions and descriptions of standard bred poultry*. I have only a limited quantity of these books on hand, and so that you may be sure of getting one, please send me your name and address at once.

If you send for Free Book immediately, I will also include my special low price, freight prepaid, introductory offer on my Ideal Incubators. When writing, tell me whether you are interested in a 60, 120, 175, 240 or 360-egg size.

Yours truly,

*J. W. Miller*

The J. W. Miller Co., Box 56, Rockford, Ill.  
Manufacturers Ideal Incubators, Brooders,  
Grain Sprouters.

## Another Big Surprise From MILLER

**It Was Low Price Last Year—  
This Year It's Freight Prepaid  
and An Unqualified Guarantee**

Nothing like this has ever been done before.

**My low price now includes everything.**

**There are no extras to buy.**

**No freight to pay.**

**No risk to run.**

You get the incubator that will make good money for you and I'll help you in the bargain. I'll tell you just what I have learned on my Millhook Poultry Farm in 25 years, so you can follow the successful money-making methods that I have perfected.

I tell you how to take care of the eggs before putting them into the Ideal and while they are in. I'll tell you how to take care of the chicks, how to feed them, how to raise them to earliest maturity, at least expense and for greatest profit. I tell you these things in plain words, easy to understand—

**Without a Penny Cost to You.**

If you are interested in poultry raising write me and I'll send you my low price, freight prepaid, introductory offer on Ideal Incubators and Brooders.

**Valuable Money-Making Book FREE**

I'll also include my big poultry book, which contains numerous photo reproductions of standard bred poultry, valuable information for the beginner and articles on the feeding and care of poultry. When writing for free book, address nearest office.

# These People Have Brought A Billion Chicks Into The World!

## Chicken Raisers Have Made Millions of Dollars Out of The OLD TRUSTY INCUBATOR—Make YOUR Share THIS Year

M. M. Johnson, Mrs. M. M. Johnson and Harry Johnson have brought a billion chicks into the world, with the 400,000 Old Trusty Incubators they have made and sold. And the billion Old Trusty chicks have made millions of dollars for the men, women, boys and girls who own Old Trusty Incubators.

Why don't you get your share of chicken profits this year? You take no chances when you buy an Old Trusty. Over 400,000 people have proved it right. They bought on 30 to 90 days' free trial, backed by 10 years' guarantee, and would have returned their machines if the Old Trusty didn't make good. Isn't that proof that the Old Trusty is a money-maker?

Think of it! For 1913, Johnson's price is still less than \$10, freight prepaid anywhere east of the Rockies, and allowed that far if you live beyond. Why pay more? Why pay less? Either one means high cost of chicks and less profit because more value could not be put in an incubator than there is in Old Trusty. Less price means inferior quality which no one can afford. Johnson figures all along the line. There are 400,000 Old Trusty users standing back of the Old Trusty who claim that it averages the largest hatches, the strongest chicks and the biggest profits.

**Give JOHNSON a chance to Help You Make Poultry Profitable by Writing for his "Home Made" 1913 Poultry Book**

These Johnson people get out a remarkable book every year. It's all about poultry and incubators and chicken-raising profits. It is written from many years actual personal experience and from the experience of the 400,000 Old Trusty Customers. It's a plain book, full of plain talk, easy to understand and so practical that you'll get many dollars worth of help from it. Every page is a poultry sermon that you'll read and read again because it comes straight from the shoulder and is practical, not full of theories.

The 1913 edition of this great poultry book is just off the press, and your copy is ready for mailing now. People have said that the Johnson book is worth a dollar—but it's free to all who just write a postal.

### Write It Now

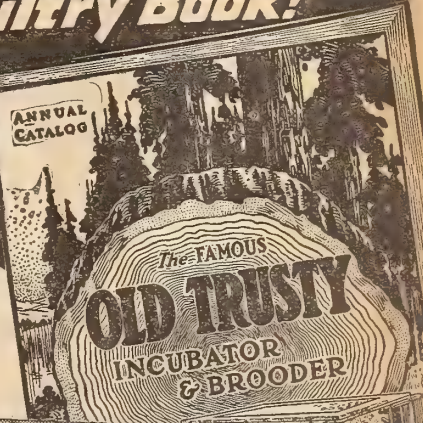

You'll be glad to read this book. You'll be glad to see the hundreds of photographs sent in by Johnson's customers. You'll be glad to know the reason why more Old Trusty Incubators have been sold than several of the next largest makers combined have sold. And you'll be glad to read the reasons why Johnson's price is still less than \$10.00 for 1913.

Don't you want the Old Trusty book—free? Send a postal NOW to

## "In Use 20 Years— No Expense for Maintenance"

That's what the Brown Cotton Gin Co., New London, Conn., say about the J-M Asbestos Roofing on their plant shown below. And this roofing looks good for many years to come.

This is but one of hundreds of buildings on which J-M Asbestos Roofing is still in good condition after fifteen to thirty years of service.

You can't judge how long a roofing will last by the looks. But you can judge pretty accurately how long a roofing will wear by the service it has given others. We'll give you names of responsible business men right in your vicinity who will tell you that such service as above mentioned has been given on their buildings by

## J-M Asbestos Roofing

The reason this roofing gives such long service is because it is made of Asbestos and Trinidad Lake Asphalt—both indestructible minerals. It is literally a flexible stone roofing, so is not affected by water, sun, cold, acids or chemical fumes, and never needs coating. And it affords perfect fire protection.

This attractive roofing can be used on any type of building, and can be easily applied by any one.

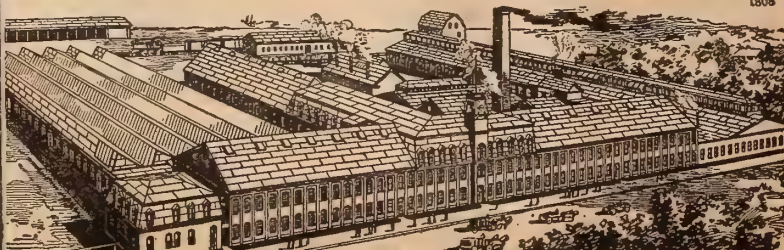

Get it from your dealer—or order from our nearest branch if not at your dealer's.

A sample of the curious Asbestos rock from which J-M Asbestos Roofing is made, sent on request, if you mention Book No. 2026

## After 19 Years

Of Raising Poultry and Making Incubators

## Neubert Offers His 1913 Triumph

At a Price that Saves You \$5

For 19 years I have been testing and experimenting. In that time I have made and sold thousands and thousands of incubators. I started without a cent, as anyone in Mankato will tell you, and built up the biggest business of its kind in the Northwest. All my previous incubators were ahead of others—all my other machines were even more than I claimed for them—but I was not entirely satisfied with them. For 1913 I have added improvements that put the final touch of perfection on my incubators. My 1913 Triumph is my masterpiece—after 19 years of study. The principles have been proved right—and the materials stand for strength, durability and efficiency. I am sure you will get higher percentage hatches of stronger, healthier chicks with my Triumph than with any other incubator you could buy—and my factory price saves you \$5.00 or more.

### Just Mail a Postal Now

At the right, in the square, you will find some of the advantages possessed by my 1913 Triumph. But I can't begin to tell them all here. I want to send you my new book. You must read it before you spend a cent for any incubator or brooder. It tells many interesting facts about the construction of incubators and brooders, and proves that the Triumph beats all others. It is written in simple language, easy to understand. It gives many letters from owners—is illustrated throughout. Just your name and address on a postal card is all I ask—won't you send it to me now?

R. F. Neubert, Box 760 Mankato, Minn.

## Neubert's Triumph

### Read this Description

**The Case** is made of one-inch clear, selected California Redwood, lined with 3-ply then a dead air space. Inner case is made of Basswood, which has no odor—then lined with the same 3-ply building felt. The Triumph case is also lined with a heavy layer of genuine asbestos—fireproof throughout. Sides, top and bottom are all made exactly the same—front has double glass doors with dead air space between.

**Heating System** consists of combination hot water and hot air arrangement—utilizing every unit of heat given off by lamp side, absolutely even temperature, no waste of fuel! Hot water tank all copper, heavy and pure, hot air tube of galvanized sheet steel, does not come in contact with water.

**Triumph Lamp**—made with extra heavy brass Sun-Hinge Burner, with perfect ventilation—absolutely safe and clean—no odors can get into egg chamber. Held in position by our new improved swinging lamp bracket.

**Triumph Regulator**—is famous double-water type, sensitive to slightest variation—keeps the egg rectem temperature throughout the hatch. Special feature also reduces flame at lamp when egg chamber gets too warm.

**Triumph Ventilation**—Most approved scientific principles correctly applied. All gases are quickly carried off and fresh pure air supplied without drafts or chilling of eggs.

**The Triumph comes complete**—already set up to buy—the Triumph is equipped with famous Wilder Thermometer, strong egg trays, high, roomy nursery, lamp, burner, bracket, regulator and egg tester.

## A POULTRY BOOK 80 PAGES. EDITED BY HENRY STEINMESCH

It is different in this that it does not tell how to get rich in the Poultry business—On the other hand, it is full of practical information, telling how to make money from Poultry in a conservative way. It tells of Incubators and Brooders, of Chickens and Eggs, of feed, and care and attention. This book will especially appeal to those who will be satisfied with a Poultry business that pays and who may enlarge their business with time and experience.

By mail postpaid 10 cts., coin or stamps.

**Extra Chicks Raised**

This statement requires no argument! Now plan your work to get more eggs, hatch more and better chicks, carry more chicks to maturity without additional equipment or labor. In other words, increase the efficiency of your entire plant. You can do it easily. This is the way:—Give

**Pratts Poultry Regulator**

to your breeding stock. It will invigorate the birds, bring more eggs with better fertility. That means bigger hatches of husky chicks. Put

**Pratts White Diarrhea Remedy**

in the drinking water for all broods to control this destructive disease and other bowel troubles. Then feed

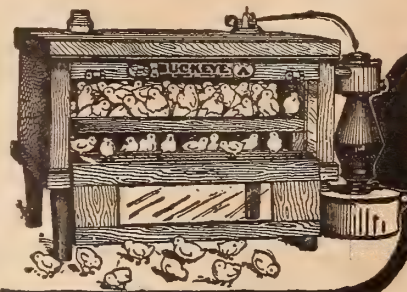

**Pratts Baby Chick Food**

and watch the youngsters grow! It will raise every good chick, and a lot of the weak ones and make them husky and vigorous. Use this combination for better results. Remember

"Your money back if it fails"

Prices: Regulator, 25c to \$9; 25-lb. Pails, \$2.50; White Diarrhea Remedy, 25c, 50c; Baby Chick Food, 25c up. Pratts 160-page poultry book, 10c by mail. Get Pratts Profit-sharing Booklet. Our products are sold by dealers everywhere, or

**Anybody can Hatch Chickens with a Buckeye**

**HATCHING** time is right here. Everybody with chickens is thinking, talking incubators, reading catalogues, seeking information. Here are three most important things for you to determine before you buy:—

**Can I run an Incubator?** Yes, if it is a Buckeye. There are 325,000 Buckeye owners today who operated their own machines successfully the first time.

**Will it hatch every hatchable egg?** The Buckeye is absolutely guaranteed to hatch every hatchable egg. It will not only hatch every hatchable egg, but hatch big, strong chicks that will live and thrive. It means success for you.

**The Price?** You can buy a Buckeye Incubator

**As low as \$8.00**

Under the Buckeye plan we have made it easy, satisfactory and convenient for you to buy by having an agency in your own town. Write us for this firm's name, so you can go right there, see a Buckeye before you buy, see the chicks hatching, and satisfy yourself that it is the machine you want.

Buckeye Incubators are made in five sizes, 60 to 350 eggs and are equipped with every desirable device to hatch strong chicks, using the same principle of hatching and construction as the big 10,000-egg machines.

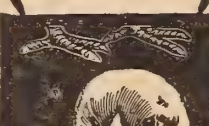

There never was an incubator as popular as the Buckeye. Think of it! Over 325,000 in use—100,000 sold last year—22 years' record.

Write for the catalogue of this incubator that leads. You will be wanting to start your hatches soon. Find out where you can get a Buckeye—go see the chicks hatching and be ready.

# BANTA

Here is what the Banta Incubator will do:

- 1—Hatch more chicks. 3—Last year after year.  
2—Hatch stronger chicks. 4—Cost least to operate.

It is the product of 20 years' experience in incubator making by skilled workmen, most of whom have been with us for years. Its price is based on the principle of a dollar's worth of value for every dollar it costs you. Therefore, if you want

# There are 20 Good Reasons Why to Buy a "Successful" Incubator—

**18 of These Reasons Are  
Found in the Mechanical  
Superiorities. The Others are  
Larger Hatches  
and  
Low Price Offer**

**F**ORGET for a moment that my Success-  
ful Incubators sell for only \$6.75 and up.  
Forget that I've been in the business for  
over 18 years and have gained an enviable  
reputation as a manufacturer of incubators  
successful in performance, as well as "Success-  
ful" in name.

Just read over the list of improvements in my  
hatchers and you'll see why—regardless of price—  
you should be sure to buy a "Successful" for, with-  
out its improvements, other machines are bound to  
fall short of my hatchers—

First, in actual accomplishment; hatching larger  
and stronger and more chicks from same number  
of eggs;

Second, in length of efficient service and reliability  
under all conditions;

Third, in low cost of operation.

You have everything in your favor by starting  
in the money-making poultry business with my  
incubator. I will even go so far as to give you a

## \$25 Poultry Course FREE

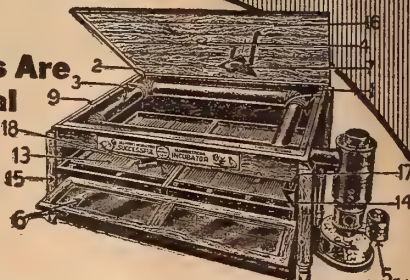

with each machine. This course contains the most  
practical advice ever given. It tells how to pro-  
duce poultry and eggs at lowest cost, explains how  
to sell them to best advantage; in fact takes you  
from the beginning to end of the business, revealing  
everything necessary to insure you a big success.  
Don't delay another day but write NOW and tell  
me you're interested and I'll send you by return  
mail my

## Successful Catalogue FREE

My book tells you about various incubators and  
brooders. It gives you a good idea of the advan-  
tages of each, what size to buy, etc. It is free from  
all exaggeration and tells you just what steps need  
to be taken to make good money from the very  
beginning.

And Up

**Successful Incubators**  
**Life Producers**  
**Successful Brooders**  
**Life Preservers**

**Nowhere Else Can You Find an Incubator That  
Measures Up With These Specifications**

- 1—The Successful is the only machine that heats the colder edges of the body first—like a greenhouse or dry kiln.
- 2—Has round corners on tank giving faster current, more even heat, and better circulation.
- 3—12-oz. copper tank. Heaviest used on any incubator.
- 4—Only hatcher scientifically ventilated. Admits cold air at center of top, the warmest place in any machine. Doesn't create draft which dries out the eggs.
- 5—Safety attachment on lamp burner. Absolute protection from fire. Endorsed by insurance companies.
- 6—Only incubator with two glass doors, through which thermometer may be seen.
- 7—Combination wafer thermostat regulator. Embodying both fluid and metal principles.
- 8—The only machine guaranteed with a guarantee that guarantees and evades no issue.
- 9—Built like a refrigerator.
- 10—Case non-warpable.
- 11—Weights more.
- 12—Cost less per pound.
- 13—Strongest, most durable egg trays.
- 14—Nursery under egg trays. The greatest feature applied to artificial incubation.
- 15—Detachable legs, allowing machine to be stored in very small space.
- 16—The only incubator in the world cabinet made—all corners, all joints dadoed or mitered together thus maintaining all the heat produced in the machine and offsetting the outside changes of temperature.
- 17—Simple, effective application of moisture when necessary.
- 18—Thermometer can be adjusted to bottom of trays just before chicks begin to pick the shell so it's never necessary to open door or pull out the trays to read temperature.

On page 6 of my book you will find the strongest  
guarantee ever placed behind an incubator. Read it  
and you'll never be satisfied to buy an incubator that  
does not promise to do for you what the "Successful"  
guarantees. Write me NOW, before you lay the paper  
aside. Address **J. S. Gilcrest, Pres. and Gen. Mgr.**

# Ironclad Wins Again

## in National Hatching Contests in 1911 and 1912

Ironclad wins again in the Big National Hatching Contest held by Missouri Valley Farmer and Nebraska Farm Journal in 1912, making two successive years in which the Ironclad has won in this big contest. About 2000 incubators entered in this contest. Read sworn and witnessed statement below:

Lockney, Texas.

Ironclad Incubator Co.,  
Racine, Wis.

Gentlemen:—I am writing to let you know that I won in the 1912 Big Hatching Contest held by Missouri Valley Farmer and Nebraska Farm Journal. I placed 148 eggs in my 140 egg Ironclad Incubator and hatched out 148 big strong chicks. I also took off two more perfect hatches during the season and I wish you could see my chicks, they are doing so splendid. My success has been perfect. I have examined quite a few incubators and I like none so well as the Ironclad.

Respectfully yours,  
R. No. 1, Bx. 35. Mrs. C. F. Merrick.

In face of such a public record as this in which 2,000 other machines contested—machine of every known make, style and price—why take any chances on the machines you buy this season. Can you get any better proof of real genuine hatching ability?

### Sworn and Witnessed Proof

In selecting an incubator what you want is the machine that will hatch the most eggs—is best made—will last longest and cost you the least money. We have given you the sworn and witnessed proof of the first—the best hatching ability. We want a chance to prove the rest right in your own home alongside of any machines made on 30 days trial—money back if not satisfied—freight charges paid both ways—let you act as judge. What more can we offer? We leave it all to you.

## THINK OF IT! THIS NATIONAL PRIZE WINNER 140 EGG Incubator FREIGHT Paid Both Chick Brooder East of Rockies Both FOR ONLY \$10

Think of it! You have nothing to risk. We will send both machines—let you use them 30 days—urge you to compare them in quality of material hatching ability, workmanship and price—and if you don't find them satisfactory, send them back—we'll pay all freight charges and return your money. Read how we make them and then you'll know why they win—why we can put them in competition with any. They have no equal—that's why—even at double the money.

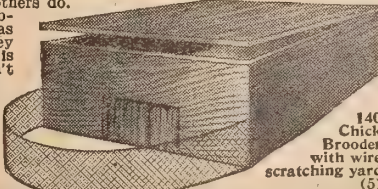

### 5 YEAR GUARANTEE

Imagine this big 140 Egg Incubator made of California Redwood, hot water type with cold rolled copper tank and boiler, triple walls, asbestos lined inside—covered with galvanized iron outside, self-regulating, nursery under egg tray, Tyco's Thermometers, O. K. Burners. Egg tester—complete set up—ready to run with a big 140 Chick Brooder, with wire scratching yard, roomy well made, both for \$10.00, freight paid. Both sold on a 5 year guarantee that insures perfect satisfaction or money back. Where can you equal this Prize Winning Outfit?

### ORDER DIRECT FROM THIS ADVERTISEMENT

Thousands do every year. Remember, back comes your money at the end of 30 days trial if you are not satisfied. Notice we don't say "as represented" like others do.

We leave it solely to you—your word is final. The publishers of this paper know us—know we do exactly as we say—know our word and Guarantee to refund money if for any reason you are not satisfied after 30 days trial, is lived up to absolutely. Ask them if you wish. Don't delay—order a pair today. Or, if you prefer write for our 1913 catalog. Don't buy any other until you compare and find out what their material is—if it is as good as ours—if their machines are set up ready to run when you get them. Notice we plainly tell all this in our advertisements—we have nothing to hide or hold back. Better order from us—our guarantee makes you safe and you will also save money, time and a lot of sorry disappointments.

IRONCLAD INCUBATOR CO., Box 17, Racine, Wis.

John A. Salzer Seed Co., 203 S. 8th St., LaCrosse, Wis.

## Make Them Winter Layers

Did you ever know there was a winter crop—a crop that can net you more in actual dollars than wheat, corn, oats or any of the other grains?

City grocers are asking 60 cents a dozen for fresh eggs, but you know your hens are mighty scarce layers during the winter. What your hens need is a tonic to tone up and make the egg organs active and strengthen the whole system up generally. The use of

## Dr. Hess Poultry Pan-a-ce-a

in the daily rations will bring about these results. It will help you get practically as many eggs in December as you get in June. Its effect is twofold. It makes the egg organisms more responsive and puts vim and vigor into the hen and thus helps her perform her functions more easily. It helps chicks grow and shortens the moulting period. Dr. Hess Poultry Pan-a-ce-a is sold on the guarantee that it must make your hens lay more eggs or your dealer will refund money.

13 lbs. 25c (mail or express 40c); 5 lbs. 60c; 12 lbs. \$1.25; 25-lb. pail \$2.50. Except in Canada and the extreme West. If your dealer cannot supply you, we will.

Send 2c for Dr. Hess 48-page Poultry Book, Free.

## Stahl's Excelsior Incubator Is Backed By 50 Patents Issued by the U. S. Since 1877— And Here Is the Result Of Those 50 Patents

**STAHL'S EXCELSIOR INCUBATOR** is not the product of a day or a year, or ten years—it is the result of 36 years of hard work, constant thought and extensive experimenting. It is the result of a fixed aim of Mr. Stahl to make his incubator perfect. Since 1877, when Stahl invented the first artificial hatching machine, he has secured over 50 patents for improvements. And these improvements are what now make Stahl's Excelsior the simplest, surest, safest, most economical and *most durable* incubator on the market.

### These Advantages

The heating system is the only one that keeps every inch of the egg chamber at a uniform temperature. Thousands of tests under thousands of conditions *prove* it. It's different from others—and just *where* it is different it is *better*. The regulator is a thermostatic *bar*—not a disc. The bar is *more sensitive* than the disc—so the slightest variation of heat in the egg chamber of Stahl's Excelsior is immediately regulated. The thermometer is placed in such position that the mercury comes in contact with the heat in the egg chamber *without* resting on the eggs—and the *scale is on the top of the machine*, so it can easily be read *any time* without opening a door or even trying to look in a darkened egg chamber.

Automatic egg turner—eggs turned without touching them or moving tray. Fire-proof heater—fire simply cannot get out of the heater. Fire-proof lamp—cannot be filled while lighted. Smaller consumption of oil—patented heater uses every particle of heat. Superior frame construction. Double glass doors. Large, roomy, comfortable nursery.

### Write Now For Book

It tells all about the advantages in Stahl's Excelsior Incubator—the result of 36 years of experience. Send a postal now—it will save you money, will insure greatest hatches and biggest poultry profits for you. Address

J. M. Williams & Co. : Box D : North Adams, Mich.

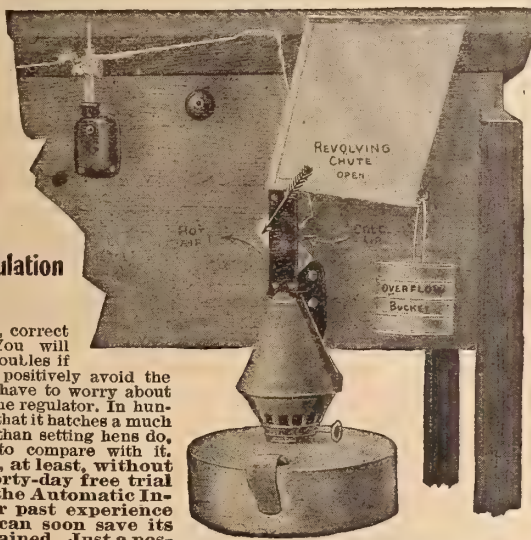

## THE AUTOMATIC INCUBATOR

POSITIVELY CANNOT OVERHEAT

The Automatic is an entirely new principle of incubator construction—not simply an improvement over old makes. Yet it is not an experiment for it has had four years of actual practical test under all conditions and in varying degrees of heat and cold so that we are now ready to offer it to readers of American Poultry Journal with our unconditional guarantee that

**The Automatic Positively Cannot Overheat and Does Not Require any Regulation of the Lamp Flame.**

It absolutely assures correct heat, correct ventilation, correct moisture. You will never have any more incubator troubles if you use the Automatic. You positively avoid the cooking of the eggs. You never have to worry about getting up in the night to adjust the regulator. In hundreds of tests it has demonstrated that it hatches a much greater percentage of fertile eggs than setting hens do, and no other incubator begins to compare with it. Guaranteed to last five years, at least, without repairs, and sold on our forty-day free trial plan. It will pay you to use the Automatic Incubator no matter what your past experience with others has been—you can soon save its price in the actual results attained. Just a postal request will bring you our catalog No. 38. Don't worry—It can't overheat.

Automatic Incubator Co., Delaware, Ohio

## BABY CHICKS

All free range stock and all hatched in our new latest Mammoth machines. This will insure nice, strong, big, vigorous chicks that will win for you in the next Fall shows. We make a specialty of White Leghorns and Barred Rocks. Our prices are very low, considering the high quality chicks we put out. This is our ninth season.

Our capacity will be 40,000 eggs per hatch this season.

We also make full line potato machines, garden tools, etc.

Bateman M'g Co.  
Box 1194  
Grenloch, N. J.

## WHAT SEED PLANT AND OUR SEED TREE CATALOG MEANS TO YOU

1. Complete instruction in all branches of Horticulture.
2. Convincing proof of the value of Northern Grown Products.
3. The very best varieties in cultivation to choose from.
4. Full directions as to when, how and what to grow to get the most out of your garden or farm.
5. Landscaping your home grounds at small expense.

This book of 128 pages, beautifully illustrated, mailed on application. Write today. It is full of just the information you are looking for to make your garden, farm and home profitable and attractive.

## FREE SEEDS

If you mention this paper we will send you either of the following varieties free, to convince you of the quality of our Northern Grown Stock.

May's Selection of Colossal Pansies; May King Lettuce, the new early Head Variety.

L.L. MAY & CO. SAINT PAUL, MINNESOTA

There is \$500.00  
An Acre Profit in  
Growing Berries

No one can grow them to better advantage than poultry-raisers. One acre, or ten acres—that's plenty of land. Sixty dollars an acre will pay expenses of planting and care.

Ten acres can be made to net \$5,000 a year after the first year. One man and his family can do all the work required, and raise a couple of thousand chickens at the same time, because the Berry work and Poultry work come in different months, and do not conflict.

## Get My Ideas

I am a berry specialist and an idea specialist. I think out plans so others can make money from them. I raise poultry and grow Berries, and the two businesses work together with much profit.

Send for my 1913 Berrydale Berry Book. It is full of information. Tell me how much land you have and I will show you how to make it pay. The book describes, among many others, the new Macatawa blackberry, berries three inches around, plants absolutely hardy. Write today—the book is free.

A. MITTING, Berry Specialist

Berrydale Experiment Gardens  
Arenae Ave., Holland, Mich.

**MORRIS' COLUMBIAN WYANDOTTES**—With fine head points and shape and fine colored black wing feathers and tall with fine lacing and tall coverts. 100 choice breeders and exhibition birds to sell. Have won at Cleveland and many other large shows. Write me your wants. L. J. Morris, Oberlin, O.

### Canada's Best Buff Leghorns

## NONPAREIL Barred Plymouth Rocks

**Winners of Highest Awards at America's Leading Shows**

Bred since 1883, they have won their way at the leading shows with unusual success. At New York, Boston, Philadelphia, Chicago, Cleveland, Toronto, etc., they have won over 1500 prizes, of which 294 were first prizes and shape and color specials.

### Exhibition and Breeding

birds for sale. We can supply you winners for any show, in cocks, hens, ckls. and pullets. Choice breeders from our best a specialty. Write us your wants. All correspondence and selection of birds is by our Mr. H. P. Schwab. We assure you absolute satisfaction. Special prices for next two months. Trios and pens mated for best results. Our mating list next Spring should interest you.

**Schwab Bros., Box 452, Irondequoit, N. Y.**

# Bruce & Abbott's Buff Orpingtons

Won more 1st prizes at Atlanta, Ga., Oct. 28 to Nov. 2, than any of their competitors. This was said to be a class of Buffs as strong as had ever been seen at New York or Chicago, and the fact that one of our competitors won 5 firsts at both Madison Square Garden and Chicago, proves this statement to be true. This record alone surely proves we have quality unsurpassed. A postal will get our mating list with a complete description of our 14 breeding pens and photos of our famous winners.

## Sensation at Chicago Show

### MARTZ'S CHAMPIONSHIP BUFF ORPINGTON COCKEREL

We could not compete, but this living model of the Fashion Plate Book is the best Orpington ever caged in Chicago.

400 cockerels and 600 females finished and ready for sale. Such an assortment of "top notch" breeders cannot be found outside my own yards.

**EGGS FOR HATCHING**—Twenty-five matings of wondrous color, correct type, with the laying habit bred in.

The big Orpington Fashion Plate Book describes all matings, my wins at Chicago, Indianapolis, Louisville, Memphis, Nashville and the price of eggs—free.

**A. E. Martz** Buff Orpington Specialist..... **Box A, Arcadia, Indiana**

## THE BEST RESULTS FOR YOU IN POULTRY RAISING

Whether you are a professional or an amateur you want the maximum result from the investment of your time and money.

### "WRIGHT'S NEW BOOK OF POULTRY"

*Is the Key that Unlocks the Door of Poultry Success.*

It is the foremost practical book on Poultry and Poultry-raising that has yet been published, in the opinion of all the leading Poultry Editors and Poultrymen.

The Poultry papers quote from it constantly as the Authority. Hundreds of purchasers have written to us, unsolicited, commending it without stint.

### Will You Examine it at No Expense to You?

We want your permission to place this volume in your hands for **Five Days Free Examination, All Expenses to be Paid by Us.**

Fill out the application form below and mail it to us with 50 cents, and we will send you this book on approval express prepaid.

#### Who Is Lewis Wright?

Lewis Wright wrote his first Poultry book thirty-five years ago. It was called "The Illustrated Book of Poultry." The present work, new throughout, thoroughly modern and up-to-date, is the natural fruit of his long experience in raising and writing about Poultry. He visited hundreds of model plants and interviewed the most successful poultrymen in all parts of the World to secure his data; and his book, first and foremost, is based upon Actual Experience. Mr. Wright was the one Poultry expert selected to write all the Poultry articles for the new 11th edition of the Encyclopaedia Britannica, perhaps the greatest honor that could be conferred upon him.

What safer guide than Mr. Wright can you follow to success? Why not take advantage of Mr. Wright's experiences, his mistakes and successes?

The book has chapters on the following subjects and others: Poultry Houses and Runs—The Science of Feeding Poultry—Practical Management and Feeding of Fowls—The Egg and Sitting Hen—Artificial Incubation—Rearing and Care of Chickens—Poultry for the Table—Poultry Farming—Exhibition Poultry and Utility—Pedigree or Line Breeding—Practical Breeding and Rearing of Prize Poultry—Exhibiting—Judging—A chapter on each breed of chicken of all countries, besides chapters on Turkeys—Guinea Fowl—Pea Fowl—Ducks and Ornamental Water Fowl—Geese and Swans—Poultry Diseases and Vices—Vermin.

#### Let Us Make Our Offer Plain To You.

The 50c you remit with the Application Form is simply an evidence of good faith; it is placed to your credit. The signing of the Form does not obligate you in any way to purchase the book. If you decide to keep it,

you need not remit until the next monthly payment of \$1.00 is due. If unsatisfactory, the book need simply be held awaiting our instructions, and we will at once refund the 50 cents.

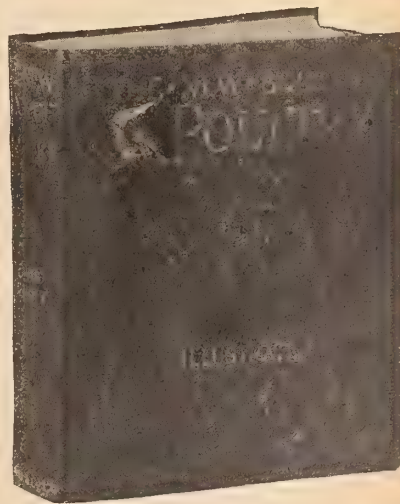

#### We Could Not Make It Easier For You To Inspect This Book

before buying; and the present plan of sale is based upon our unbounded confidence in the very great practical value and usefulness of this work to you. An examination, moreover, will enable you to judge its merits far better than any description from us. But let us add a few details.

#### Special Offer To Responsible Readers:

Let us send you this great work on approval. We want you to examine it thoroughly before deciding. We want you to judge for yourself its great, practical, money-making value to you. The price is only \$8.50. Just send us 50c with the coupon opposite and you will receive the book carriage prepaid. If after five days you don't want it, simply notify us and hold subject to our order. We will then refund your money. If you keep it pay us the balance \$1 a month until settled in full. [If you wish to pay us cash deduct 5%.]

The present stock of the work is limited, and it takes a period of time to reprint. May we ask, therefore, that you mail the Application Form at the earliest possible moment, so that you may avoid the necessary delay should we be out of stock later? The books will be shipped out on approval in the order of the receipt of the Application Forms.

#### Beautifully Printed and Illustrated and Strongly Bound

Forty-five full page plates in colors and black-and-white of this splendid work, all by J. W. Ludlow; and there are innumerable pictures throughout the text. Finely printed in a large, clear, readable type and bound in stout, durable cloth binding with lettering in gold; gilt edges on three sides. Size of volume 9 1/4 x 11 1/2. Weight, seven pounds.

AMERICAN POULTRY JOURNAL,  
542 So. Dearborn St., Chicago

Gentlemen:—I send you herewith 50c, for which kindly send me, carriage prepaid, one copy of Lewis Wright's "New Book of Poultry." It is understood I may examine this work five days, and if I do not wish to keep it I agree to notify you and hold subject to your order, and you are to refund my money. If I decide to keep it I agree to pay the balance of \$8 in monthly installments of \$1 each until settled in full.

# Monmouth Quality

At the great S. I. P. A., Atlanta, Ga., show, December 16-21st was keenly demonstrated by the sweeping victory of Monmouth S. C. Buff and White Leghorns. In Whites won—1, 2, 3, cock; 1, 2, 5, hen; 2, 3, 4, 5, cockerel; 1, 2, pen; and Champion and Sweepstakes Cock of the show. In Buffs won—2, 3, 4, 5, cock; 1, 2, 4, 5, hen; 2, 3, 5, cockerel; 1, 3, 4, 5, pullet; 2, 3, pen. 1st S. C. Buff Leghorn pen 5th year in succession, Madison Square Garden, New York 1912-13, (our only entree.) Also two silver loving cups and many specials. These winnings were made in competition with the Cream of the Southern States and the result speaks for itself. A grand lot of exhibition and utility birds in both varieties on hand. We are now booking egg orders and you cannot afford to wait, so write us at once stating your wants. Our matings this season are superb. Our 1913 catalog and mating list will be ready for mailing about February 1st. **Note**—Send 25 cents for a reproduction in colors of Schilling's wonderful oil painting of the greatest trio of S. C. Buff Leghorns ever bred. A masterpiece worth having. When writing please mention American Poultry Journal.

**MONMOUTH FARMS** J. C. Punderford, Owner  
Thomas Lockwood, Supt. **FRENEAU, MON. CO., N. J.**

## BABY CHICKS

From strictly free range stock, hatched by latest scientific methods producing vigorous, healthy chicks that are top notchers at maturity. Ten leading varieties. Remember we are one of the few hatcheries producing our own eggs from strictly free range stock and can supply in any quantities on short notice. Send three red stamps for our catalogue, describing our immense plant, prices and valuable hints on baby chicks. Please mention American Poultry Journal when writing.

**MIAMI POULTRY YARDS**  
JAS. C. CUMMINS, MANAGER, ROUTE 2, TRENTON, OHIO

## Make Your Hens Lay

A FREE BOOK FOR YOU ON MAKING HENS LAY

Write today for our free poultry books and learn at once what it might take you, alone, years of costly experience to find out. You know how eager fowls are for bugs and worms. Our book tells why. Briefly, it's the animal food they want, and **must have**, in order to thrive best. Chicks, laying hens, cocks, all need it—to develop frame, muscle, feathers, to produce many eggs, to produce fertile eggs. To replace bugs and worms in winter, or, for yarded fowls, feed freshly cut raw bone, prepared with

## MANN'S LATEST MODEL BONE CUTTER

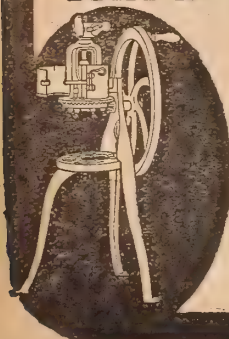

**Try One Free—No Money Down**

This feed is four times richer in protein (the egg-making, body-building element), than corn is, and it is more easily digested and assimilated. Save money by cutting down your grain ration. Make money by getting more eggs when eggs are worth most and by having better eggs for hatching stronger chicks, earlier and heavier broilers.

Mann's Latest Model Bone Cutter cuts the bone (and all adhering meat and gristle) into a fine, soft mash that fowls of all ages relish and can put to immediate use in producing profit for you. It turns easily, cuts rapidly, never clogs, wastes nothing. We sell it on 10 Days' Free Trial, without money or deposit in advance—so you may be sure it is right. We even pay its freight back if you are not satisfied.

**WRITE FOR FREE BOOKS TODAY.** To read them is to know how to feed poultry for most profit.

**F. W. Mann Company, Box 56, Milford, Mass.**

# Wyckoff's S. C. W. Leghorns

Acknowledged Everywhere the World's Greatest Laying Strain—Unequaled in standard qualities. Remember that we are the originators, and for more than thirty years specialty breeders of the justly celebrated Wyckoff Strain of S. C. White Leghorns, the most profitable strain of poultry in America today. Place your orders at headquarters and make no mistake. Eggs for hatching in any quantity from the grandest of matings at \$2 per 15, \$3.75 per 30, \$5 per 45, \$10 per 100. Catalogue and testimonials free.

## ADDRESS

C. H. Wyckoff & Son : Aurora, Cayuga County, New York

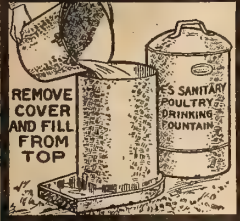

# Rhode Island Whites

*(A new favorite with a reason)*

at Chicago, December, 1912, in the largest and best class of R. C. Rhode Island Whites ever seen in any show soom, McCarthy's Peerless Strain made a clean sweep, winning 1st cock; 1st hen; 1st pullet; 1st pen; \$25. cup for best display and \$15. cup for best shape R. I. White. As every prominent breeder, both East and West, had his birds entered at this show, it proves beyond a doubt that the Peerless Strain is the best in the world. Send for our illustrated catalogue and mating list and become acquainted with this grand new breed.

Carl D. McCarthy : Box Y : Kempton, Ind.

## MOE'S SANITARY POULTRY DRINKING FOUNTAIN

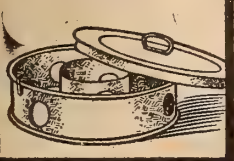

Dead air space between cover and reservoir keeps water cool in summer and from freezing in winter. The nearest thing to a non-freezing fountain that can be constructed without the use of artificial heat. Easily cleaned as an ordinary pail. Sanitary and humane. Manufactured in three sizes: One, two and four gallon capacity.

REPLACE COVER AND YOU HAVE A CONTINUOUS SUPPLY OF PURE WATER

## MOE'S RAT DESTROYER

REMOVE COVER TO BAIT

Insures the safety of your fowls while poisoning the rats in your poultry yard. A simple and much needed device for administering poison safely. A boon to every poultry raiser. One package of Rat Corn free with each destroyer. Manufactured in one size only; 14 inches in diameter.

NONE BUT RODENTS CAN REACH POISON

# THE DRONES

Must hustle or starve if you use a Simplicity Feeder. Saves cost in thirty days. Simplex Supply House, Pontiac Building, Chicago, Illinois.

## FRAZIER'S BUFF ORPINGTONS

Hundreds of properly bred cockerels and pullets for sale that are wonderful in even buff and typical Orpington shape, that will open the eyes of all Orpington breeders the coming season. I hatched from nothing but eggs from my stock that won 34 prizes at Indianapolis (Nat'l Club Meet) Springfield and Louisville, besides seven silver cups and champion banners for color, shape and QUALITY. Every bird I offer for sale is either son or daughter of the above WINNERS. It follows, then, that my \$3 birds will have more breeding VALUE than birds offered by other breeders at equal or higher prices. One trial will easily convince you. Yearling breeders \$2 and up; young stock \$3, \$5 and \$8; show stock reasonable, trained FREE and shipped in the pink of condition when wanted for any show. Eggs now ready, prices reasonable. FREE catalogue February 15th, after my exhibit at the Indianapolis GREAT show.

J. S. FRAZIER : Member of All Poultry Organizations of Prominence : BOX B, ADVANCE, IND.

Y., 1912: 18 entries won 17 ribbons; Philadelphia, 1912: 21 entries, 21 ribbons, 14 specials, 3 cups. Send for mating and egg list, ready January 15, 1913. No stock for sale at present.

Manhattan Farms : : Brighton, New York

## Kellerstrass White Orpingtons

ARE THE BIGGEST PAYERS BECAUSE THEY HAVE PROVEN TO BE  
THE BIGGEST WINTER LAYERS

### Kellerstrass Strain "Crystal" White Orpingtons

Are the grandest utility birds on record today, and as to their fancy quality they won first at Madison Square Garden, New York, 1905, 1906, 1908, 1909, 1910; also at Crystal Palace, London, England, and Chicago and Boston. If you need some birds to improve your stock or for the show room write us. We have them, and the kind that wins, as our past record shows. Stock for sale at all times. Remember, we are the originators of "Crystal" White Orpingtons, and breed only the one kind. We devote our whole time to this one breed. Eggs for hatching, write for prices. Send for our catalogue.

# DON'T KILL THE LAYING HEN

**T**HE HEN that lays is the hen that pays. Hundreds of thousands of hens are killed each year that are in full laying condition, while an equal number are kept in the flock that never have or never will lay an egg, or at best will lay only a very limited number. All this may be avoided if everybody would use the Potter System of telling the layers from the non-layers.

## Cull Out the Drones and Save on Feed

Why should the poultry breeder go on wasting feed by feeding a lot of hens that do not produce enough eggs in an entire year to pay for their feed for one week, when it can be avoided by learning the Potter method of telling to an absolute certainty just which hens are the producers and which are the drones in the flock?

If you know the Potter System you can reduce the size of your flock and save money on your feed bill, and at the same time secure just as many eggs at from one-third to one-half the cost. Is not this worth considering?

The Potter System is the only reliable system on this subject, and anyone can learn it in an hour's time, and we guarantee that anyone with a little practice can go among a flock of fowls and pick out the layers as rapidly as the birds can be handled. We have thousands of unsolicited testimonials from people who have purchased our book "Don't Kill the Laying Hen" and learned how to pick the layers and who consider the book worth many times the cost. Read what a few of them have to say:

## TESTIMONIALS

3095 W. 100th, Cleveland, Ohio.

Gentlemen:—Having received one of your books regarding the laying hen, I am pleased to say that it has done a great deal for me and would not part with it for many times what it cost if another could not be had. Yours truly, JOHN VAN SCHOAR.

304 Grand Allee, Quebec, Canada.

Gentlemen:—I received your book "Don't Kill the Laying Hen" some time ago. I am very much pleased with it and think it the best book I have ever read and would not be without it for any amount you would ask for it, and think every person that keeps fowls should have a copy. Yours truly, ED. ARCHER.

Wellsville, N. Y.

Gentlemen:—I received your book on "Don't Kill the Laying Hen." Will say that it is all you claim it to be and that it is no fraud. I went out to the hen house last night and tried the test. It worked to perfection. I predicted that a few hens would lay the next day, and sure enough some of them have laid. Very truly yours, WM. H. LEO.

Jutland, N. J.

Gentlemen:—Yours at hand and am glad that you have notified me of your new book of the system of selecting laying hens. Your old book has saved me many a dollar on feed bill, besides giving me more room for the layers. I would not be without this book for any money and am glad you have added more to it. Yours truly, M. V. TAYLOR.

977 Wilcox Ave., Chicago, Ill.

Gentlemen:—I must say your book "Don't Kill the Laying Hen" is valuable to any poultry keeper; it is worth its weight in gold and your system reliable in every way. I am more than pleased with it. I have told some of my friends about the system and they got the book and are pleased with it. Yours truly, JOHN MOYER.

Box 105, R. R. No. 1, Charlestown, Ind.

Gentlemen:—I am ashamed that I have allowed almost two years to pass without writing you how thoroughly I endorse and value your book "Don't Kill the Laying Hen." The only thing I don't like is I can't tell my poultry friends all it has taught me. I would not be without it for many times its cost. We frequently ship fifty or sixty hens and get as many eggs as before, showing we had not shipped laying hens. It saves me a trip to the poultry house at night to know which are broody hens. At feeding time I examine all hens on the nest and shut up the broody hens. Yours very truly, MRS. B. R. McCONNELL.

Deer Creek, Okla.

Gentlemen:—Your letter and circulars to hand and contents noted. Yes the best I can do is to have the new book "Don't Kill Biddie." It has made me one hundred and ninety dollars and still making more, and only a few chickens, from 70 down to 44 now. I'm running two machines and selling enough to support me and living like Queen Victoria. Yours truly, G. W. NORMAN.

Tucson, Ariz.

Gentlemen:—Your book in regard to the laying hen received. It is well worth the price. Anyone owning a small flock of chickens ought to have one. Yours truly, J. A. GORDON.

614 Boos St., Harrisburg, Pa.

Gentlemen:—I received your book on "Don't Kill the Laying Hen" and must say it is all it is claimed to be and more. Yours truly, GEORGE J. GRIFFEE.

Lincoln, Kansas.

Gentlemen:—Your book "Don't Kill the Laying Hen" is just the thing for a poultryman. I don't see how I got along without it. I would not part with the knowledge gained from it. Yours truly, MRS. IDA MEIER.

# THE FOURTEENTH EDITION OF THE GREAT POTTER BOOK

is just off the press. Revised and improved to such an extent that it is now without question the **greatest book** of its kind ever published. This book contains 96 pages, (6½x9 inches) and 38 illustrations; printed on super-calendered paper, bound in two kinds of binding—paper and cloth. Will make a very valuable addition to any poultryman's library. In fact, no one who raises poultry, no matter how many or how few, can afford to be without a copy of this great book. The secret this book contains is worth many dollars to anyone.

More than 100,000 copies of this book have been sold during the past few years, which in itself is conclusive evidence of the value of this book. When ordering a copy of this book you must promise not to reveal the secret to anyone except the immediate members of your family. The secrets it contains cannot be obtained from any other source. Everyone who receives this book is pledged not to reveal them to others. Therefore, it is to your interest to obtain a copy of this book at once and become a member of Potter's great "secret" family, stop killing the laying hen, thereby greatly increasing your poultry profits.

The Potter System of telling the laying hen has stood the test of time. It has been advertised in these columns for the past eight years, and during that time thousands of copies of the book have been sold and thousands of poultrymen all over the country have been enabled to turn loss into profit and thousands more can do the same thing if they will take advantage of the following offer:

## How to Get the Great Potter System

Realizing the great importance of this system to all poultry breeders the American Poultry Journal Publishing Co. has secured the exclusive right to print and sell this great work, and the benefits to be derived from system will be given to American Poultry Journal subscribers only.

## OUR GREAT OFFER

In order to supply every poultry breeder with the great Potter System and the greatest poultry journal on earth, we have put the price within reach of all, as follows:

Don't Kill the Laying Hen (Paper Cover) } BOTH FOR  
American Poultry Journal, one year . . . } **\$1.30**

For the Cloth Bound Edition, \$1.50

## A History of Eight Non-Laying Bob-Tailed Hens and One That Was Not Bobbed

Including valuable scientific facts regarding molting. A supplement to "Don't Kill the Laying Hen." This supplement gives the story of One Hen that was not bobbed; the story of the first four non-laying bobtailed hens; the other four non-laying bobtails; how hens having red combs are deceiving; forced molting bad business; how the laying season may be extended and many more eggs obtained, or why hens having good laying organs stop laying early in the season, and much other valuable information which is worth far more to the average breeder than the small price we are asking.

If after a careful study and trial of the system you find that we have misrepresented this system in any particular, money will be cheerfully refunded. We have given this system a thorough investigation and know whereof we speak. If you are already a subscriber to A. P. J., we will extend your subscription one year from its present expiration. Send all orders to

## CAMPINES AND WHITE FAVEROLLES

## BUFF, WHITE, BLUE ORPINGTONS

These yards have now earned a world-wide reputation as one of the finest stock breeding yards in existence. For some time past United States of America, Canada, South America, South Africa and Australia have been drawing a considerable quantity of valuable breeding stock from my pens each year and recently many of the leading governments abroad have written to inquire for stock for the government farms.

My Campine and White Faverolle studs will rank as my Orpington studs have done during past years among the very first, for I handle nothing but the very finest quality whatever I take up and do not expect or breed inferior stock. My yards always open to visitors and which are visited now by fanciers all over the world are the finest advertisement I hold in this country, and the fact that for the past five years my stud has made a record untouched by any other in cups and honors at the Dairy, Palace and Club Shows. Stock birds, \$5, \$10, \$15, \$25 and \$60. Trios and pens, \$35, \$60 and \$100. Eggs, \$5, \$10 and \$15 per fifteen; infertile replaced. **Agents Wanted**—I am prepared to rear large quantities of stock in any of these new varieties and deliver from July onwards.

## "PITTSBURGH PERFECT" FENCES

**T**HE 163 different styles, sizes and weights of "Pittsburgh Perfect" Fence afford a variety from which to choose fencing scientifically designed to perfectly and economically inclose any field, farm, ranch and lawn, and the "Pittsburgh Perfect" chicken, poultry or rabbit yard and garden fences are famous the world over.

When buying fence, select that style specially made for your particular purpose, for in this way only can you experience greatest fence-efficiency and satisfaction at lowest cost. "Pittsburgh Perfect" Fences, made of heavily galvanized Open Hearth Wire, with every joint **WELDED BY ELECTRICITY**, excels in strength and durability, and invests your property with a distinctive appearance of neatness and prosperity.

### ROOFING

### Smashing Bargains

### FENCING

#### Corrugated Steel Roofing

##### 1 1/4c Per Square Foot

Here is the chance of a lifetime to buy the best roofing in the world, at a mere fraction of its real value. Our enormous buying power enabled us to pick up for spot cash a stock of this brand new, perfect corrugated, "V" crimped and Standing Seam Roofing and Brick Siding, at a tremendous sacrifice—way under what it is actually worth. Immediate cash needed made possible this purchase. Just another chapter added to the long list of our famous bargain sales.

#### Corrugated Steel Roofing

##### Practically Indestructible

There is nothing else that compares with corrugated steel roofing for real protection. It makes a long, lasting roof. Is fire, rain, frost, wind, sun and lightning proof—warmer in winter—cooler in summer; and under ordinary circumstances does not leak, rot or warp, neither does it faint rain water. You can depend upon it that Corrugated Steel is the best material for roofing, siding and ceiling.

At 1 1/4c per square foot, we furnish our grade AB-700 Steel Roofing, in sheets 22 x 24 inches x 1 1/2 inches. This price is delivered on board cars at Chicago.

#### Galvanized Steel Roofing

##### 2 3/4c Per Square Foot

Another big Steel Roofing Bargain. Several thousand squares of the very highest grade specially coated, corrugated, galvanized roofing and siding, made of specially prepared steel, of superior quality. Best roofing, and will last indefinitely. We will furnish it in suitable lengths for any purpose. Only a limited quantity on hand, so we urge you to send us your order immediately. Don't wait to write us again—order today, while this stock exists. Price only 2 3/4c per square foot, and will outlast 4 to 1. Just drop us a line, and tell us the size of your studding and general facts, and we will help you to select proper sheets. If you are not ready to use the material now, we will reserve it for future delivery. If you will give us a small deposit on account. This price of 2 3/4c per square foot is for our Lot AB-800 corrugated material, and is delivered on board cars at Chicago. If you prefer some other style, we will furnish it. We have this same grade in "V" crimped, Standing Seam and Brick Siding. Samples on application.

#### Ready Roofing With Supplies

##### 62c Per 108 Square Feet

We have several thousand squares of a superior quality Ready Roofing, which we are offering in our AJAX BRAND, 1-ply, at a price of 62c per square of 108 square feet, including necessary cement and caps to lay it. This is undoubtedly the most remarkable bargain ever offered in Ready Roofing. This famous brand is put up 3 or 4 pieces to a roll. The price of 62c per square of 108 square feet is loaded on board cars at Chicago. We will, however, make a freight prepaid price on this same grade of roofing, including nails and necessary cement of 50c per roll of 108 square feet, and at this remarkably low price

#### We Pay the Freight

In full to any point east of Kansas and Nebraska and North of the Ohio River.

We will also furnish 2-ply, at 90c; 3-ply, at \$1.05. This Ajax Roofing is guaranteed to wear as long, and give as good service as any Rubber Surface roofing on the market.

#### Send for Special Roofing Catalog and Samples

Write at once for our Special Roofing Catalog. Free samples and full instructions for laying roofing.

#### Explanation

The Chicago House Wrecking Company known to the commercial world as the "Great Price Wreckers" is easily acknowledged the bargain house of the earth.

Our Mammoth plant covers 40 acres, and our list of customers are numbered by the hundreds of thousands, and include people from every walk in life. We sell practically everything under the sun at unbeatable prices. We buy our goods at Foreclosed Sales, taking advantage of Sheriff's, Manufacturers' and Auction Sales. In this way we can sell brand new, clean high-grade goods at prices, in many instances even less than the cost of manufacture.

#### Our Guarantee

Our capital stock is \$2,000,000. Any bank or Commercial Agency, or any publisher or will confirm our responsibility. We have advertised in this paper for many years. Ask its publisher what he thinks of the Chicago House Wrecking Co.; get his personal opinion of the values and our square methods of doing business. We guarantee each and every article that we sell to be exactly as per our representations. Should you buy anything from us that fails to come up to our representations, or does not agree with your expectations, we will take back such unsatisfactory merchandise at our freight expense. We want satisfied patrons.

### LUMBER

Complete houses and barns at an enormous saving. Never before in the history of Building Material has such an opportunity existed. We offer high grade, brand new complete lumber and building material needed for the construction of houses and barns at lower prices than ever before.

#### 20,000,000 Ft. of New Lumber at Our Yards and Warehouses Ready for Quick Delivery

We have upwards of twenty million feet of first class, brand new lumber for the construction of buildings of every kind. A wonderful stock of the very finest millwork, interior trim, etc.—enough material to construct cities and villages everywhere. It is our determination that 1913 will be the "Banner Year" in the history of our Great Lumber and Millwork Department, and that we will accomplish this, by quoting prices that undersell any possible competition. The proof of this is in our catalog and literature.

Write today and tell us what you contemplate improving or building during this Spring—talk to us plainly, and we promise you the advice straight from the shoulder. No other concern in the world is equipped such as we are. Right in our main yard and warehouses, at Chicago, we can load you out complete, at one time, and in one carload, every single article required for the improvement of the building you have in mind. No where else can you go and get such service.

#### Personal Service To You

You can get the kind of service that will give you absolute satisfaction—satisfaction from the word "go." If you have ideas of your own as to the kind of building that you want, we will give you the benefit of the Greatest Architectural Department in the world. We furnish you with plans according to your own ideas, and will quote you a price on the material that will make you a wonderful saving. Dollars saved are dollars earned.

Write today for our Book of Plans and Latest Catalog of Building Material and Supplies.

#### Brand New WIRE FENCING

##### Less Than 1c Per Running Foot

Biggest of all offers of the past. We come to you with the most wonderful proposition ever known, and offer you the very best woven wire fencing at a fraction of its real value; lower in price than ever before, not withstanding that all other merchants and manufacturers have advanced their prices on fencing. We are determined to simply get all the business in sight, and with that in view, we bought up from manufacturer's sales, 150 carloads of High Grade Woven Wire Hog, Cattle, Field and Poultry Fencing, Barb Wire and Nails, in quantities sufficient to take care of our regular customers and those who will quickly respond to this advertisement.

#### Barb Wire Less Than 2c Per Rod

Galvanized, two-point Barb-Wire, full weight (not the light kind) put up regular on spools, containing about 100 lbs. to a spool. It is made of No. 12 wire, with good weight barbs. Price per 100 lbs. during this sale, only \$1.95. Order by Lot No. AB-600. Several thousand spools of this Barb Wire. Painted, price per 100 lbs. \$1.75. Order by Lot AB-500. Also have in stock 1000 spools of light weight, new galvanized barb wire, put up 80 rods to the spool, made of No. 14 galvanized wire. No. 15 barbs, barbs 5 inches apart; price per spool of 80 rods \$1.45. Lot AB-400. We also have several other bargains. You never had a chance like this before, and we advise that you send us your order today. Don't wait until the material is sold—we cannot hold this quotation open.

#### Galvanized Hog Fencing AT A MATERIAL REDUCTION IN PRICE

100,000 rods of 26 in. Galvanized Steel Spring Wire, 26 in. high, hog fence, put up in 10, 20, 40 and 60 rod rolls, made with 7 bars, spaced 12 in. apart, with No. 9 top and bottom wires. No. 11 intermediate wires, heavier than the regular fencing offered. Price per rod, during this sale, only 15c. Order by Lot AB-900. Same fencing spaced 6 in. apart, per rod during this sale, only 21c. Order by Lot AB-1000. Other heights at proportionately low prices.

#### High Grade Poultry Fencing 48 in. High PER ROD 27c

A complete stock of all heights of Woven Wire Fencing for every purpose. Do not delay your order, but send it in at once, even if you are not ready to have it shipped. We will hold the material ready to deliver when you want it.

#### Several Carloads of Galvanized Wire Shorts

This is smooth wire, put up 100 lbs. to a coil, first-class for general use. Comes in sizes from 6 to 15 gauge. Price for 9 gauge, \$1.25 per 100 lbs. Lot AB-1200. Other sizes in proportion.

#### Some Big Bargains in Nails

At last we have the bargain of bargains. 10,000 kegs of genuine galvanized wire nails; will outlast all other kinds. Put up in regular kegs. Price per keg of 100 lbs., as follows:—

10 pennyweight, \$2.00      8 pennyweight, \$2.10  
6 pennyweight, \$2.15      Shingle Nails \$3.00

Also 5,000 kegs of Nails, mixed all kinds in a keg; good assortment, handy to have around your workshop. During this sale only, per 100 lbs., \$1.45. Order by Lot AB-1100. We have other bargains in nails.

Also, in this same job, we have 5,000 kegs of Fence Staples, galvanized; per keg, \$2.00. Lot AB-1400. Crimped wire for reinforcing, cut to any desired length; per 100 lbs., \$2.25. Lot AB-1300.

We have bargains in every line. Write us today for our Wire and Fence Catalog, but the best thing for you to do is to send your order now, and we will hold for shipping instructions.

## AUTOMATIC SANITARY TRAP NEST

1913

1913

## The Best is the Cheapest

THIS NEST requires none of your time or attention, no waiting for hen to lay or resetting of nest. Operated as well and better by the hens during your absence than if present to disturb them. It saves time, labor and feed by selecting the good layers from the culls and drones. The good layers produce the hatchable eggs and strong, healthy chicks. All leading breeders are using the trap nest. We are sending them everywhere. Made of galvanized sheet metal, are sanitary, vermin-proof and will last a life time. Write for free booklet or agency or both. Address

Automatic Sanitary Trap Nest Co., Duluth, Minn.

## Banner Poultry Fence

For Sale by Dealers Everywhere  
Descriptive Catalogue Sent

American Steel & Wire Co.

Chicago New York Cleveland Pittsburg Denver

BANNER POULTRY FENCE is an improved square mesh Poultry Fence of great strength, durability and closeness of mesh—a fabric for fencing poultry yards having all the advantages of old style poultry netting with none of its disadvantages—a fabric especially designed to hold all the poultry, from the chick to the grown bird, and shut out small animals. Made of LARGER wires, STRONGER, more DURABLE and SIGHTLY; in fact, a BETTER article at NO increased cost.

BANNER POULTRY FENCE, which we have just placed on the market, meets every requirement of a satisfactory fence for poultry. The spacing between the six line wires at bottom of fence is only  $1\frac{1}{2}$  inches and gradually increases to  $3\frac{1}{2}$  inches at top, so the essential feature of a satisfactory poultry fence—closeness of mesh—is well taken care of in this fencing.

The 4 ft. height, design 2748, has 22 lines or horizontal wires, which are two or three wires more than any other design of poultry fence on the market. The upright wires or stays run continuously across the fence and lock firmly around the intersecting line wires in a loop knot, forming a smooth, solid joint without any sharp, rough edges.

BANNER POULTRY FENCE is easily erected, holds, taut and trim, standing up without sagging; fewer posts are needed, and no top or bottom rails. Posts may be set a rod apart, and if the fence is well stretched it will be strong and effective. It can safely be used next to pasture, as it is amply strong to stop stock as well as confine all small animals. The wire from which it is made is hard, tough and strong, so the fence retains its shape when properly erected. It stretches up like a field fence over any kind of ground. The user of BANNER POULTRY FENCE can make his poultry yard fence just as neat and attractive as any other fence on the place at a saving over the cost of erection of the old style poultry yard fabric.

The many advantages of this new BANNER POULTRY FENCE are making it very popular.

# BYERS STRAIN ORPINGTONS

**BUFF, BLACK AND PEARL WHITE**

During Jan'y I offer and will deliver, the best \$10 and \$15 cocks and cockerels, the best \$35 and \$50 pens, that I have ever known to be shipped for this money, and I know what the other fellows are furnishing for these figures. ## S. C. Rhode Island Reds

**THE VERDICT IS IN, AND VICTORY UNPRECEDENT IS OURS**

At the great Philadelphia Show, Dec., 1912, my line of S. C. Reds won the leading and classy prizes of the entire show, in competition with all birds shown. They won 1st cockerel, 1st hen, 2d and 3d pullets and 1st pen in a class of 122 birds. My 1st prize cockerel was awarded the cup for best cockerel in the entire show, with every one of the 4000 birds competing. He also won color and shape specials with other specials for my entire entry. At Cleveland, Ohio, January, 1912, my 1st prize pen was the sensation of the show, judges and breeders saying they never saw one like it for quality and evenness. Write me your wants. If you want quality birds or eggs for hatching, I can supply you. Absolute satisfaction assured to all. Mention American Poultry Journal when writing.

Schenley Heights Poultry Yards, C. F. Rankin, Prop.

: 316 Fourth Avenue, Pittsburgh, Pa.

## ETZENSPERGER'S REDS OF QUALITY

**WON AT CHICAGO, DECEMBER 12 TO 18, 1912**

2d S. C. pen, fourteen pens competing; 2d cock, thirty-two birds competing; 4th pullet, thirty-eight birds competing; 5th R. C. pen, thirteen competing; 3d pullet, forty-one competing. The hottest class of Reds ever got together. All my old birds that produced these prize winners together with winners this year will be used in my breeding pens this year. My 1910 first Chicago cock bird is the same bird winning 2d this year, he producing some of my best winners, showing what blood lines will do. Also having ideal shape and color. Have a few cockerels, cocks and pullets for sale at the right price. Please mention American Poultry Journal when writing.

## Poultrymen Have Confidence In The Globe Incubator---

because all the value---all the invested money is put into the machine itself. We put all the money in the machine. We have never made a statement that was unsound or shaky. Everything we say about the "Globe" is truth---positive fact backed up by seventeen years of a wonderful success. Don't be misled by those low priced machines. You know it takes a great deal of yelling to sell anything that's below standard. We have never had to advertise in that way in our life. The Globe's reputation sells it. It is a standard machine---one that you can depend on.

Thousands and thousands of both men and women have been "stung" by purchasing a machine that looks nice in the picture because the man selling it shows a nice big photograph of himself. It is interesting to note that every user of the "Globe" (and then there are thousands and thousands) is today making money just as fast and practical as it is possible to do in the poultry business. And the best proof that our Incubator principles are scientifically correct is the fact that we make Infant Incubators for physicians. Read our large 1913 Poultry and Incubator Catalogue and see what we have to say about our Infant Incubators. This big book has hundreds of testimonials. This is a mass of evidence---solid facts that are the best guide you can obtain. We want you to read them over. See how enthusiastic these people are about the Globe Incubators. Let them tell you in their own words how successful their poultry business has been since they used the Globe Incubator and Brooders. See below for further information about this catalog. Here's a few further words about these wonderful machines and what they are made of.

Send your order at once. Don't miss this remarkable opportunity. And remember when you buy the Globe Machine you are getting real value.

### Poultry and Incubator Book

Send us 15 cents for our big complete book on Poultry, Incubators, Brooders, Poultry supplies. We will save you many dollars. It has more real information than a whole library of Poultry books. It shows everything that is required to make a poultry farm a success.

**C. C. Shoemaker, Box 605, Freeport, Illinois**

### The Standard 200-Egg Globe, \$18.00

This is without doubt the most carefully built incubator made. It is made of specially selected lumber---each piece picked. Has a most superior hot water heating system and this system is exclusive in the Globe. The pipes that carry the hot water through the egg chamber are made of regular gas steel tubing so that they are absolutely air-tight and water-tight. Insulation is the most thorough ever found in any machine. Regulation system is controlled by what is known as the Compound Double Hydro Water. Tanks, trays, lamps, etc., are of the finest model and best material obtainable. Can be run with kerosene, any kind of gas or electricity. And all this most perfect construction makes it possible for you to get those high percentage hatches for which the Globe is famous all over the country. This is the incubator that will make you money. This is the incubator that has the real value behind it and not a pretty photograph of somebody.

**200-Chick Globe Brooders \$11.75** After you have your little chicks all peeping about looking like good money, don't chance them to some brass band brooder. Get them in the Globe and you're pretty sure of cashing in at a profit every single time.

This 200-Chick Globe Brooder has all the basic principles that has made the Globe famous. Has the over-head system of hot water pipes, contains two compact---one for feeding---one for nursery. Ample light and ventilation. The most efficient lamp on the market. Will never rust. The whole brooder is made to stand the racket.

**For 30 Days Only Combination Price \$23.50** If you buy within the next 30 days you can get one of these perfect 200-egg size Incubators and one 200-chick brooder, only \$23.50

# THE MOST POPULAR FOWL today is U. R. Fishel's White Ply. Rocks

**I Have the Winners for You for Any Show  
in the Country**

A selection from over a thousand of the highest class birds of this variety ever bred. Remember, they are direct descendents of Chicago, Cleveland, Indianapolis, etc., first prize winners. They have the type and color that is recognized as correct by the leading judges of this country. They carry blood lines and vigor that reproduces itself year after year in the offspring.

Partridge Plymouth Rocks are the coming favorites and are rapidly displacing older varieties. Many of the most prominent breeders are adopting them, for it cannot be denied that there is a better all around fowl in existence. Send 25c for my catalog and text book on the breed—the finest book of this kind ever published. Money back if not satisfied. Among up-to-date information on the breed it contains a magnificent color plate insert of a pair of birds in natural colors—worth the money itself.

**F. N. Perkins : 22 Harlem Road : Freeport, Ill.**

# S. C. WHITE LEGHORN COCKERELS

SIRED BY 1911 FAMOUS NEW YORK WINNER, "BEAU BRUMMELL"

This bird headed the first pen at the Grand Central Palace Show. In color, size and type he is unsurpassed. His sire was William Penn, first prize bird at Philadelphia in 1910. Beau Brummell comes from an unbroken line of blue blooded prize winners. In my yards he was mated to twelve pullets and hens of his own line breeding including four hens that are full half-sisters. The off-spring are the last words in whiteness, size and type. They have been raised in colony houses on free range. The fields were sowed with dwarf rape among rows of rhubarb and sunflowers. Sour milk has been part of their daily feed. In consequence the birds are surprisingly vigorous. Many of the cockerels will equal their sire in size—and Beau Brummell weighed six and a half pounds when six months old. You will see my birds competing for the highest honors at the Chicago show and other big mid-west shows. I have about 100 cockerels to sell from the mating described above. I invite correspondence or a visit of personal inspection. I have no pullets for sale. I intend mating eight pens for the egg trade and I am booking orders now. All communications will receive immediate and courteous consideration.

SOLOMON HERING : THE WILLOWS : BOX 135, R. R. 3, SOUTH BEND, INDIANA

## OPEN-AIR POULTRY HOUSES FOR ALL CLIMATES

*By Dr. Prince T. Woods*

America's Leading Authority on Practical Poultry Keeping

The best house book ever published. Now ready for delivery. Be sure to read it before you build or make alterations in your poultry houses. Just out. 88 pages, 46 illustrations and 5½x8 inches in size.

A WELL WRITTEN, WELL PRINTED, WELL BOUND (in cloth)—a REAL BOOK, not a pamphlet or catalog. Just what you are looking for if you want to be successful with poultry. All NEW. Special illustrations from pen drawings and from actual photographs of construction work. Plainly worded. Easily understood. Tells plainly how to build and what to build so that anyone at all used to handling tools can build a good practical open-front poultry house.

### The Three Best "Fresh-Air" Poultry Houses

Tells how to build the kind of houses that the most successful breeders all over the country are building and recommending. Government workers favor these open-air houses. The "Fresh-air House" has come to stay and you will want to build one. It means Better Fowls, Freedom from Disease in the Flocks, Better Egg Yield, Better Fertility, Better Chicks.

### No Matter Where You Live, If You Keep Poultry You Need This Book

There are nine chapters and every one of them full of live interest and helpful information. Just look over the table of contents:

Chapter I—Sunlight and Fresh Air. Importance of pure open air both day and night for all domestic poultry. Relation of sunlight and fresh air to health and vitality. Nature's best aid in the prevention of disease.

Chapter II—Why Use Open-Front Houses. A few more reasons why you should use open-front open-air houses for the comfort and well being of your fowls as well as the betterment of your profits.

Chapter III—Hints and Helps on Building. Tools and amount of experience required. Materials. Suggestions for saving cost, floors, frame, eaves; shingles or roofing. Portable or permanent buildings. Foundations.

Chapter IV—Location of Poultry Houses. Land. How to face the building. Relation to surrounding country. Prevailing winds and wind breaks. Continuous or colony buildings. Yards.

Chapter V—Dr. P. T. Woods' Improved Open-Air Poultry House. New descriptive photographic illustrations showing how to build and actual construction of house built to illustrate this

book and now being successfully used to winter 100 valuable White Plymouth Rock breeders. Dimensions of buildings. Suggestions for building on colony or continuous plan. Building instructions and list of material required for house to be boarded in, up and down.

Chapter VI—Another Plan for Dr. Woods' House. Line drawings showing plans and detail of frame. House to be boarded horizontally. How to build. List of material required. Complete building PLANS.

Chapter VII—The Gillette Open-Air House. The house used in the International Laying Competition. Description, plans and list of material required.

Chapter VIII—H. H. Stoddard's Open-Air Cage Roost. A protected outdoor roost for fowls in warm or hot, dry climates where no houses are needed. Diagrams showing two types of cage roosts. Night quarters which help solve the stickfast flea problem and afford greater comfort for fowls in tropical and semi-tropical climates. Rain tight roof may be provided where frequent heavy rains prevail.

Chapter IX—The Tolman House. Brief description and some views of this pioneer among modern "fresh-air" houses.

### Does This Mean Anything to You? Greater Comfort for Your Fowls, Better Fowls, Better Returns, Bigger Profits

If it does appeal to you, then you want this book on Open-Air Houses. If it does not appeal to you, better read it and find out what others are winning success with. Fresh-air methods have helped others to become successful and make bigger profits. WHY NOT YOU?

Price of "Open-Air Poultry Houses for All Climates," 75c Postpaid. With American Poultry Journal, One Year, \$1.40. Remember Cloth Bound, 9 Chapters, Profusely Illustrated, on High Grade Paper, Only 75c. Canadian Subscription and Book, \$1.65; Foreign, \$1.90

## Spring Water Poultry Farm

We are now booking orders for day-old chicks for next season. Last Spring we were compelled to disappoint many, for even with our large capacity of 20,000 eggs at one sitting we could not fill all orders. Don't be among the disappointed this season. Breeders only of **Single Comb White Leghorns**. Write for illustrated catalogue. Mention American Poultry Journal.

**SPRING WATER POULTRY FARM .: .: STOCKTON, NEW JERSEY**

## LARGEST BABY CHICK HATCHERY

IN AMERICA

We are baby chick specialists. Our 13th successful season. We now have 150,000 egg capacity. Will furnish from twenty Standard varieties. All first-class utility and show stock. Many customers report of winning prizes, and have sold stock as high as \$25.00 for one cockerel. We received several hundred letters from pleased customers.

If you intend to buy chicks, be sure to write for our catalog. We are booking orders for Spring delivery.

**M. Uhl & Co., New Washington, O.**

# AMERICAN POULTRY JOURNAL YEAR BOOK FOR 1913

Being a Comprehensive and Authenatic Review of the Poultry Industry for the Year 1912—All Thoroughly and Carefully Indexed for Instant Reference. Including a Practical Encyclopaedia on Poultry Culture.

## PUBLISHERS' ANNOUNCEMENT.

With the event of a billion dollar poultry industry in the United States, the publishers of the American Poultry Journal think it about time that a reliable and authentic Year Book or Annual should be published in this country. Many smaller industries—some of them many times smaller—have one or more Year Books published in their interests and these industries liberally support and encourage their publication and sale, as it has been found that the circulation of such books tends to create new interest and promotes its advancement before the general public.

It is the intention of the publishers to issue a Year Book annually for the great and growing poultry industry of this country, and we feel confident that it will be well received, as it will fill a real need that should have been attended to many years ago, and the entire editorial staff of the American Poultry Journal will devote its best efforts to make it worthy of a place in every poultryman's library. With such an organization of experts behind it—with the equipment in materials, statistics, trained clerical force, books, artists, practical and expert writers—must, in the very nature of things, produce a book that will fully and truthfully represent our great billion dollar industry.

## SOME PROPOSED FEATURES.

**OUR CONTRIBUTING EDITORS.**—The entire editorial staff—conceded to be the best staff of poultry editors connected with any poultry paper—will lend a helping hand in the completion of the Year Book, and it goes without saying that such a brilliant aggregation of poultry experts will produce a Year Book of inestimable value.

**THE POULTRYMAN'S ENCYCLOPEDIA.**—Will be composed of about 300 questions and answers, with complete definitions of all the technical words and terms used in the poultry industry. Edited by Dr. Prince T. Woods, with the assistance of the entire editorial staff. This feature will be a great help to the amateur and professional breeder.

**FEEDING FORMULAS.**—All the new and best feeding formulas that appeared in 1912 will be published. This feature will cover the entire subject of feeding poultry for all purposes including winter egg production, feeding for the show room, for the market, young chicks, crate feeding, cramming, etc., by the best experts in this country and Europe.

**DIRECTORY OF EXPERIMENTAL STATIONS.**—Will contain a complete list of all the poultry experimental stations of this country with names of managers, who supports them and what they accomplished during 1912, and interesting and instructive articles by their managers will be in the great American Poultry Journal Year Book for 1913.

**POULTRYMAN'S CALENDAR.**—What to do each month in the poultry yard, conducted by Mr. Prince T. Woods, managing editor of the American Poultry Journal. This will be a thorough and practical treatise on raising chickens and will tell in plain words just what to do each month of the year. This one feature, compiled and edited by the best practical expert in this country, will be invaluable to both the amateur and old-time breeder.

**SPECIALTY CLUB DIRECTORY.**—Will be a complete directory of all the specialty clubs in America, all arranged under the different breeds and will contain the names and addresses of the officers, number of members, initiation fee and annual dues; special prizes given and where in 1912.

**POULTRY SHOW DIRECTORY.**—Will be one of the most valuable features of the book to the fancier, as all poultry shows held during the season of 1911-1912 having 2,000 or more entries will be reported in full. First, second and third prizes won, with names of winner, judges making the awards, number of entries in class, date and where show was held; name and address of secretary, entry fees for different classes, date of next show, and all arranged and indexed for

ready and instant reference. All shows having 1,000 to 2,000 entries during 1911-1912 will be reported as follows: Winners of first prizes, name of judges making the awards, date of show and place where held, number of entries in each class, date of next show, entry fees for different classes, whether exhibition coops are provided by the show management or must be provided by the exhibitor, name and address of secretary. All shows having less than 1,000 entries will be reported as follows: Total number of entries, date and where held, entry fees, who furnishes the exhibition coops, name and address of secretary, date of next show.

**SPECIAL ARTICLES.**—Many special articles will be published, written by the best experts in this country and Europe, such as the newest ideas on poultry house construction, how to prepare birds for the show room, the double mating system, single mating system, how to line breed, how to operate incubators and brooders, fattening and preparation of fowls for the market, how to operate back yard poultry plants, how to operate large commercial poultry plants, how to advertise fancy and market poultry, how to produce eggs throughout the year, and many others too numerous to mention.

**POULTRY JUDGES' DIRECTORY.**—A complete directory of all licensed and unlicensed poultry judges of this country, with postal address—breeds they are specialists in judging, poultry papers they are associated with, leading shows they have judged, and other information regarding them will be given in full.

**HANDSOMELY ILLUSTRATED.**—The publishers of the Year Book will endeavor to make it the handsomest and most artistically illustrated poultry book ever published. Many full page four-color illustrations and full page one-color plates will be used. It will also be profusely illustrated with smaller cuts showing all kinds of poultry appliances and diagrams of different articles described in the text. No expense or pains will be spared to make this feature the best of any book ever published.

**THOROUGHLY INDEXED.**—One of the most valuable features of the Year Book will be the thorough manner in which it will be indexed under main and sub-titles, and sometimes cross indexed. This feature will make it a ready reference library of all the important events in poultrydom that transpired during the year 1912. This feature will also possess a historical value that cannot be estimated at the present time. Suppose that ten or twenty years from now you wished to find out what were the total number of birds on exhibition at the Madison Square, or any other show, held during 1912, and who were the winners and judges, or what a certain egg laying contest did, or what was the best treatment for any certain poultry disease, or what the experimental stations were doing in 1912, or wanted some statistical information on any subject relating to the poultry industry in 1912, you would just go to your library and get the American Poultry Journal Year Book for 1913, would turn to the index on any of these subjects and the information would be right in your hand. And remember it is the intention of the publishers to issue a similar Year Book each year. It is unnecessary to say that such a historical record of each succeeding year will be worth preserving for the generations yet to come.

**PRINTING AND BINDING.**—The book will be published in the convenient size of 5½x8 inches and will be printed on high grade book paper suitable for printing fine halftone illustrations in the best manner possible. The cover will be an artistic and original design, and the binding will be linen thread sewed to make it flat opening. There will be nothing cheap or trashy about the book, as it is the intention of the publishers to make it a representative of the best present day standard of artistic printing and worthy to be handed down to posterity as an example of what the best printer could produce in the year of 1912-1913.

The American Poultry Journal Year Book will contain between 400 and 500 pages and the prices will be \$1 for handsome cloth bound de luxe edition, and 50c for paper cover edition.

## Special Combination Offer

Paper Bound Edition of the "Year Book," and a full year's subscription to American Poultry Journal for only \$1.25, or CLOTH BOUND EDITION and one full year's subscription for only \$1.50. For Canadian subscriptions add 25 cents a year for postage; foreign subscriptions add 50 cents.

**T**HE BROOKSIDE FARMS LEGHORNS are bred from the best foundation blood procurable, and they are a vigorous, productive and fine-looking lot of birds. We have used the Bradley strain, the Barred Rock standard, as the foundation for our Barred Rocks, —a splendidly solid Rock foundation. Our White Orpingtons we have bred from stock which we brought from England, and they are splendid in size, color and vigor. From 7,000 of these birds we have selected 1,300 of the finest yearlings for the production of eggs for hatching and day-old chicks, which we offer at the above prices, and we challenge the poultry world to produce better at any price.

Our poultry buildings are unique. The best that modern knowledge and experience can produce has been put into their construction and equipment, and nothing has been omitted which could add to their convenience or promote the health and comfort of the birds. Our own reservoir on the mountain side provides constantly running water in every building, and only the best procurable foods are used. All these advantages mean much in the production and maintenance of healthy and profitable flock, and the purchaser of Brookside Farms chicks and eggs shares in our advantages. Come and see us and you will find both pleasure and profit in the visit.

BABY CHICKS—U. R. Fishel's White Plymouth Rocks the Best in the World

# WHITE ORPINGTONS

Superb Type and Superior Quality

MY FIRST SHOW, 1912  
TEXAS STATE FAIR

{	1st, 2d and 4th Cock
	1st, 2d and 5th Hen
	1st, 2d and 3d Cockerel
	1st, 2d, 3d and 4th Pullet

Won at St. Louis, 4 Cock; 2 Cockerel; 1, 2, 4 Hen; 1, 4 Pullet; 1 Pen, and Several Specials.

My birds are absolutely white, of that deep-bodied type, low down on legs, up to weight, and I know that I can please you. The last time I showed at Madison Square Garden, 1911, I again controlled the winning male birds. My winnings include first cock, third hen, fifth pen and the cockerel heading the first pen. The winning cock is, without doubt, the greatest White Orpington in the world, having defeated the Crystal Palace champion and all the great cocks of America. These great birds, together with my other prize winners, place Russell Cave White Orpingtons far in the lead. Both in Allentown and Augusta, two shows I made last year, I won at each the

cup to that exhibitor whose ten or more birds of one variety showed the highest degree of excellence and uniformity of type and breeding. This record of winning in two of the most important poultry shows in this country the cup for the ten best birds has never been equaled by any breeder in America. GREAT STAMINA AND VIGOR are to be found in my birds, not usually found in White Orpingtons. I attribute this to strong foundation breeding stock, our pure air and the blue grass range, 100 acres in Russell Cave Poultry Yards, and 8,000 acres in Elmendorf Farm. We still have a few more cockerels, pullets and hens at bargain prices. EGGS from the greatest of all matings, \$5.00, \$10.00 and \$20.00.

Russell Cave Poultry Yards : ELMENDORF STOCK FARM : Route 3, Box 1025, Lexington, Ky.  
LOUIS LEE HAGGIN, PROP.

Two Females from Laddie Man's Harem, full sisters, sired by Prince Laddie out of Vixen.

## Archwood Yards

ORIGINAL SUSSEX STRAIN SINGLE COMB WHITE

## ORPINGTONS

LAY LIKE A GATLING GUN ☐ ☐ ☐ GROW LIKE A WEED

### Laddie Man's Harem

ONE of our special matings for the season of 1913, headed by Laddie Man, whom we believe to be the loosest feathered yearling cock bird in existence, with females conforming to his standard, constitute the most superb mating that we have ever had the pleasure of offering. Eggs from this mating at \$25 per setting of 12 eggs. Eggs from the world's greatest exhibition matings, \$10 per setting of 15 eggs. Each and every bird in these matings has a show record at the largest shows on the continent that cannot be duplicated. Eggs from special matings, \$20 to \$30 per setting of 12 eggs.

### Cockerels

We have selected 100 cockerels, some early hatched, some late, each and every one of the highest exhibition quality and without a blemish, some weigh as high as eleven pounds, some as low as eight pounds, all are true Sussex strain birds and will breed into their progeny the characteristics of the strain. To move these birds fast, we offer them at \$25 each, not more than one to a customer, individual descriptions will not be given, neither will the privileges of shipping on approval be extended, however we assure you that your gratification on receiving any one of these birds will more than compensate you for whatever risk you may imagine taking as some of these birds are really worth hundreds while the poorest is good at twice the price. Eight of these birds were sired by Prince Laddie himself. They will be shipped as they run. We will absolutely not select a single bird from this lot for any individual, all will stand an equal chance of getting the best, no matter who he is.

ARCHWOOD YARDS, J. A. PARKER, CLEVELAND, OHIO  
PENS, TRIOS, INDIVIDUAL BIRDS OF ANY DESCRIPTION \$50 to \$500

# Poultry Books

## AT A CUT PRICE

A complete list of poultry books that everybody interested in poultry should have. This list is made up with the idea of supplying the wants of all poultrymen, and covers about every phase of the industry; in fact, this list of books make almost a complete poultry library, and by taking them all at a cut price you will be well equipped to make a success of this business. The books in this list tell you how to line breed, how to feed for egg production, how to reduce your feed bill, how to mate to produce exhibition birds, how to prevent and cure diseases, how to mix a balanced ration, how to build poultry houses, poultry appliances, etc. Following is the list:

### DR. PRINCE T. WOODS' NEW BOOK HOW TO RAISE CHICKS

128 PAGES—35 ILLUSTRATIONS

A down-to-date manual on breeding poultry. Tells in plain language how to select and mate breeding stock, what to feed and how to feed it, how to care for and manage breeding stock, how to select eggs for hatching and how to care for them before and during incubation, how to get good hatches with incubators, how to raise chicks with hens and brooders, how to prepare home-made chick foods, how to build brood and colony coops. It also gives facts about White Diarrhoea, including prevention and treatment, and much other valuable information that cannot be obtained elsewhere. Price 75 cents.

### OPEN-AIR POULTRY HOUSES FOR ALL CLIMATES

By Prince T. Woods, America's Leading Authority on Practical Poultry Keeping

The best house book ever published. Be sure to read it before you build or make alterations in your poultry houses. 88 pages and 46 illustrations. Tells how to build the kind of houses that the most successful breeders all over the country are building and recommending. The "Fresh-Air House" has come to stay and you will want to build one. It means better fowls, freedom from disease in the flocks, better egg yield, better fertility, better chicks. No matter where you live, if you keep poultry you need this book. This book gives full plans and specifications. Price 75 cents.

### Origin and History of All Breeds of Poultry

This book gives a complete history and the origin of all the recognized varieties of chickens, ducks, geese and turkeys, and is illustrated with 198 colored pictures of fowls painted from life, something never before attempted by any publisher. This is, without question, the greatest book ever published on poultry. The artist's work alone on this book took almost one year's time to complete, but it shows the fowls in their natural colors and correct shape, and these colored pictures, together with the history of each variety, gives the fancier all the information to produce fowls for either exhibition or breeding.

**How to Mate**—This book also tells how to properly mate the different varieties of fowls to produce birds that will conform to Standard requirements. This is something that even the Standard of Perfection does not do. It tells you at a glance what it will take years of practical experience to learn. It is a book that no breeder or fancier can afford to be without, as it is just as suitable for the needs of the experienced fancier as for the amateur. Price \$1.00.

### Successful Poultry Culture

Contains 128 pages and is a practical treatise on everything you want to know about the poultry business. It tells you his method of saving three-fourths the feed bill, and many other valuable pointers which will save you many times the price of the book.

Space will not permit a detailed description of the entire book, but the following will give you an excellent idea as to its great value. Besides 30 illustrations of standard bred poultry and poultry houses, it contains chapters on the following subjects: The Way to Succeed; Some Interesting Poultry Statistics; The Pleasure of Poultry Culture; Advice to Beginners; Poultry and Pin-Money for Women; Boys and Poultry Culture; Poultry on the Farm; How to Succeed on a Small City Lot; How to Succeed with a Large Market Plant; How to Get Eggs in Winter; How to Feed Young Chickens; Success with Incubators; Success with Brooders; How to Cure Diseases; How to Build Poultry Houses; Plans for Model

Poultry Houses; Profits in Poultry Culture; Scientific Feeding. Regular price \$1.00.

### Diseases of Poultry

By D. E. Salmon, D. V. M., Chief of the United States Bureau of Animal Industry. Every poultryman should have this book in their poultry library. It contains 250 pages, and every disease to which fowls are subject is treated in a most thorough manner. The cause, symptoms and cure of each disease is put before the reader in such a manner as to be understood at a glance. With this book in hand you can be your own poultry doctor. Better order one now and not wait until your fowls become ill. Regular price 50 cents.

### "Why Poultry Pays and How to Make It Pay"

A book for the beginner in poultry raising and for those engaged in it who are interested in deriving from the business the greatest profit. The book tells you how to start right, how to succeed with poultry, how to line breed, how to win at the shows, how to breed and prepare fowls for market, how to feed for the production of eggs, contains a chapter on poultry diseases and simple remedies for same. Gives instructions on incubators and brooders, much other valuable information and is profusely illustrated with ideal drawings of standard fowls. Price 50c.

### "How to Build Poultry Houses"

A book devoted to the construction of poultry houses and fixtures gives plans and specifications for building all kinds of poultry houses, brood coops, nest boxes, dust boxes, shipping coops, etc. It will save money by telling just the kind of house desired for the different localities and the size best suited for the various sized flocks. Regular price 50c.

### American Poultry Journal Hand Book

Contains valuable recipes and trade secrets, feed, care and management in health and disease. Pocket size, 15 cents.

**Total \$5.15---Cut Price for the Eight Books, Prepaid, \$3.40**

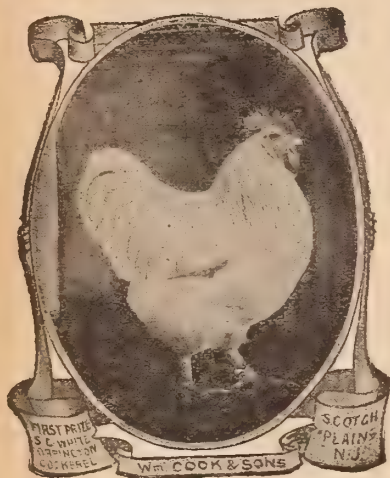

This is a saving to you of one-third from the regular price. Better order now before the price is advanced. If you want only a few of these books send in full price, as no reduction is allowed from the list price unless all eight books are ordered. You need all of them. You can also get any 50-cent book and a full year's subscription to American Poultry Journal for \$1.25, a 75-cent book and a full year's subscription to American Poultry Journal for \$1.40 or a \$1.00 book and a full year's subscription to American Poultry Journal for \$1.50.

**AMERICAN POULTRY JOURNAL PUB. CO.**  
**542 SOUTH DEARBORN STREET, CHICAGO, ILLINOIS**

# WM. COOK & SONS

## ORIGINATORS

OF ALL THE  
**ORPINGTON FOWLS AND DUCKS**

ESTABLISHED 1873 **BOX A, SCOTCH PLAINS, NEW JERSEY**

Eventually if after the best Orpingtons, all varieties, you will send to their originators. Why not now? and avoid loss and disappointment; we guarantee safe delivery and satisfaction, which is backed by a reputation of forty years' standing. This means

much to you. We are not here today and gone tomorrow as some breeders have been and are doing. Then experience counts. Surely we should understand Orpingtons better than a man who has had them just a year or two. We made the Orpingtons, all of them, including the Blue Orpington, our latest production, and are recognized headquarters for the best. A visit to our plant, where you are cordially welcome, will prove this, as well as our thirteen thousand first prizes, and our winning 103 firsts and 72 seconds at Madison Square in six showings, more than 8 times as many firsts as any other Orpington breeder. We can supply on the same day as order is received. The finest line of exhibition and breeding birds that we have ever had. Imported birds from our English plant, personally selected by our Mr. P. A. Cook for the American requirements, which English breeders do not know. Or American bred birds from our many American winners, sons of our first prize Madison Square White, Buff, Black and Jubilee Orpington cockerels.

**EGGS** from the **Finest Orpingtons** in the world, all varieties, and our first prize 1913 winners, \$20 a setting; three settings for \$50. From fine stock and second prize winners, \$10 a setting.

We will guarantee our best eggs at \$20 a setting to produce better birds than from any eggs purchased at \$75 a setting upwards from any other breeder; if not, we will refund in full the money paid us.

**Remember** that many of the first prize winners at the largest shows during the past season were hatched from our best eggs. **Blue Orpington eggs** at one price, \$20 a setting.

If you can advertise **Cook strain Orpingtons** it will add money to your bank account and prestige to your stock. It pays to own **Cook Orpingtons**. Ask the people who own them.

### Send 10 Cents for Illustrated Catalogue

Containing history of the origination of all the Orpingtons and hints on poultry keeping. **Mating List free.** Advice free. Inspection cordially invited. Trains met. Cook's Roup and Worm Powder, also laying and condition powder, for sale in \$1 and \$2 boxes. Ornamental land and water fowl for sale.

## Foolish Experiment Station Work

Try It Out—Try It, If You Want to Know—Mr. Milo M. Hastings'  
Interesting Views.

By H. H. Stoddard, Riveria, Texas

**ILLUSTRATION:** My next neighbor here is interested in truck farming. Says he wants to have his soil analyzed. You see sometimes commercial fertilizers are used to force growth, though all the soil hereabouts is rich by nature. There are various brands of these on the market, of widely different constituents, and my neighbor wants to know which he shall buy for beets, which for onions, or cabbages, lettuce and so on.

Ask the vegetables themselves. All the soil analysis this side of Jordan is of little account. Try one row of beets with the fertilizer of such and such a dealer, another row with another brand,

and so on. Separate these with rows not fertilized. Be sure of uniformity of all conditions. Weigh the crop at market time. Prof. Beet knows more than all the college professors in Christendom. His reply will ring true as steel.

I want to urge, line on line and precept on precept, here a little and there a little, regarding the value of station work. Millions on millions of solid value can be produced of grains, fruits, vegetables, and live stock of every species, by following the conclusions of good, well advised station experiments; and conversely thousands of dollars of taxpayers' money can be squandered by ill-advised station work.

Over and over again, laborious, costly and long continued experiments are carried out without providing absolute equality of conditions.

That clear and convincing writer, Milo M. Hastings, regarding vitiation of experiments for lack of such equality, says with his admirable command of language:

"It should be said that men available for scientific poultry work are very scarce. Poultry keepers schooled in the university of the poultry yard have no conception of scientific methods, and would explain experimental results by a theory that would fail to fit elsewhere. The available scientists on the other hand are seldom poultrymen.

"Among the first men to take up animal husbandry work of all kinds, were the veterinarians. For years the only poultry publications put out by the U. S. Government were by veterinarians. These dust covered volumes with their five color plates of the fifty-seven varieties of tapeworms, still rest on the shelves of public libraries, a monument to the time when the practical poultryman knew only things that weren't so, and the scientific poultryman knew only things that were useless.

"The first general law that all experimenters should know, and the ignorance of which has caused and still causes the waste of the major portion of experimental brains and money, we will call the 'Law of Chance.' Let the reader who is not familiar with such things take two pennies and toss them upon the table. They are both heads up. He tosses them again, one comes heads, the other tails. The third time repeats the second. The fourth both come tails. The law of chance says this is correct. Heads should appear twenty-five per cent, and mixed fifty per cent of the time. Now let the reader try this in a lot of twelve tosses.

Does it prove the law? Try it again. Are all lots alike? Now pitch a hundred times, then pitch pennies all day. By night the law will be so near proven that the experimenter will be willing to concede its validity.

"Now suppose the lots of twelve tosses, each were lots of twelve hens, one, Plymouth Rocks, the other Wyandottes, or one fed corn and the other wheat. The law of chance clearly proves that the larger number of units, the nearer the theoretical tenths will be the experimental results. Note, however, that small lots may by chance be as near the truth as large lots.

"In practice, two grave errors are made: First, conclusions are drawn from small lots compared with each other; second, conclusions are drawn from large lots compared with small lots. In the first case, both may be off; in the latter case, the small one may be off. Examples of the first error are to be found in the scores of contradictory breed and feed tests, that were published in the early days of poultry research. The second error is exemplified in the Ontario experiments in incubation.

"Here is a further example of this error. From the fifth egg laying competition at the Hawksberry Agricultural College in Australia, I copy the following:

No. of hens.	Variety.	Ave. egg yield.
6.....	Cuckoo Leghorn.....	190.16
30.....	S. C. Brown Leghorn.....	177
138.....	S. C. White Leghorn.....	174.93
12.....	R. C. Brown Leghorn.....	173.50
12.....	R. C. White Leghorn.....	172.66
18.....	Buff Leghorn.....	160.55
6.....	Black Leghorn.....	138.33

"The ranking of Cuckoo Leghorns as first is a chance happening due to the small number; likewise the Black Leghorns had a streak of bad luck and received lowest place. To one familiar with such work, the real significance of the table is that the S. C. W. Leghorns did the best work. A totaling of all other varieties gives 84 fowls with an average egg production of 170.5, which bears out the conclusion. As these birds were all kept in pens of six, we would expect to find the highest single pen to be White Leghorns, because when compared with all other Leghorns, they have both the highest average and the greatest number. This accords with the fact that the highest single pen is found to be White Leghorns with an egg yield of 239 eggs.

"The above illustrates another important phase of the law of chance, which says that not only is the average likely to be nearer the theoretical average sought when the number is increased, but that the individual extremes will be more removed.

### Experimental Bias.

"Pet ideas consciously or unconsciously mold practice. A bias toward an idea may show itself in the planning and conducting of an experiment, or it may come out in the later interpretation.

"An illustration of the first kind is found in the early work of the West Virginia Station (Bulletin 60). With the preconceived notion that hens should have a nitrogenous diet, an experiment was planned and conducted as follows:

"One lot of hens was fed corn, potatoes, oats and cornmeal. A contrasted lot reveled in corn, potatoes, hominy feed, oatmeal and fresh cut bone. The results were in favor of the latter ration by a doubled egg yield.

"To any experienced poultryman the reason is evident. The variety of the diet and the meat food are what made the showing.

"About the same time the Massachusetts Station planned a similar experiment. The bias was the same, but it took a fairer form. The hens were both given a decent variety of food and some form of meat. The bulk of the grain was corn in the carbonaceous, and wheat in the nitrogenous ration. The results were in favor of the corn. This astonished the experimenter. He tried it again, and again tests

is by introducing a factor other than the one being tested. This may be done by chance, and the conductor not realize the presence of the other factor, or the varying factors may be introduced intentionally under the belief that they are negligible. Of the first case an instance may be cited of the placing of two flocks in a house, one end of which is damper than the other; the accidental introduction into one flock of a contagious disease; or one flock being thrown off feed by an excessive feed of something unusual, etc., etc. These factors that influence pens of birds greatly add to the error of the law of chance. In fact, it amounts to the same thing on a larger scale. For this reason not only are many individuals, but many flocks, many locations, and many years needed to prove the superiority of the contrasted methods.

"As is well known the Maine Station was for years considered by all poultrymen to be doing a great and beneficial work in breeding for increased egg production. Up until the fall of 1907, the poultrymen of the country were of the opinion that this work was in every way successful, and a large number of private breeders had taken up the use of trap-nests in an effort to build up the egg production of their fowls.

"When early in 1908, Bulletin 157 of the Maine Experiment Station was published, it showed by averages as given in the table on page 202 that the egg yield at the station was for the entire period on the decline. In Bulletin 157 the statement was made that 'arithmetical mistakes' and 'faulty statistical methods' accounted for the discrepancies between the former publications and the criticised data. The further explanation that 'the experiment was a success as an experiment,' etc., only appeared to the public mind as a graceful way of explaining what was to the practical man, an utter failure of the entire work. The unfortunate death of Professor Gowell, together with the fact that he had equipped a private poultry farm with station

First prize cock at Madison Square Garden, New York, 1911, and international champion.

came out in favor of the corn. At last the old theory was revoked, and the fallacy of wheat being essential to egg production was exploded. If by an irony of fate in the shuffling of the hens, the wheat pen had the first time showed an advantage, the experimenter might have been satisfied, and the waste of feeding high priced feed when a better and cheaper is at hand, might have gone on indefinitely.

"Of bias in the interpretation of results all publications are more or less saturated. A common error of this kind is the omission of factors necessary to fully explain results. Items of costs are omitted or minimized. Food cost alone is usually mentioned in figuring experimenting station poultry profit, which statement will undoubtedly cause a sad smile to creep over the face of many a 'has-been' poultry man.

"The writer remembers an incident from his college days which illustrates the point in hand. Let it first be remarked that this was on the new lands of the trans-Missouri country, where manure had no more commercial value than soil, and was freely given to those who would haul it away.

"The professor at the blackboard had been figuring up handsome profits on a type of dairying towards which he was very partial. The figures showed a goodly profit, but a big expense item, that of labor was omitted. One of the students held up his hand and inquired after the labor bill.

"Oh," said the smiling professor, "the manure will pay for the labor."

"When the class adjourned, the students remarked, 'They say figures won't lie, but a liar will figure.'

"The third way, in which experiments are made worthless

First prize White Plymouth Rock pullet at Illinois State Fair, 1912. Owned by Maple Farm of Midlothian, Tinley Park, Ill.

stock, added to the confusion, and the result of the bulletin was the precipitation of a general 'pow-wow' in which the poultry editors were about equally divided between those who were casting insinuations upon the personnel of the station and those who decried the whole effort toward improving the egg yield.

"After going over the publications of Professor Gowell, visiting the station and meeting the present force, I came to the following conclusions regarding the matter:

"Professor Gowell's work is open to severe criticism. Errors have been made in conducting the work at Maine

which have made it possible for a mathematical biologist to take the data and seemingly prove that selection, as practiced by Professor Gowell, actually resulted in lowering inherent egg capacity of the strain of Plymouth Rock hens under experimentation. Had Professor Gowell's successor been a practical poultryman it is my candid opinion that the public would have been given a radically different explanation of the results.

Professor Gowell is the author of the following statement: 'The small chicken grower is earnestly urged to use an incubator for hatching.' This opinion is not in accord with that of the majority of breeders and the more progressive experiment station workers. The opinion has been expressed by Professor Graham and others, that the particular results at the Maine Station may have been due to the decrease of vitality caused by continued artificial hatching. This view may be wholly without foundation. Nevertheless as the common type of incubator is under heavy criticism, and it is pretty well proven that chicks so hatched have not the vitality of naturally hatched chicks, surely a series of

cive to high egg yields. Whether these changes in housing and feeding have been improvements as claimed by those who introduced them, or whether their popularity may be explained in part at least by the psychology of fads, is a point in question, but certainly the marring of a breeding experiment by introducing radical changes in the factors of production is at least unfortunate.

"A much more serious criticism than any of the foregoing is to be found in a change of the size of the flock and amount of floor space per fowl.

"The results of the work at the Maine Station on testing flock size, conducted without relation to the breeding work, gave the following results:

No. of hens.	Sq. ft. per hen.	Egg yield.
150	3.2	111.68
100	4.8	123.21
50	4.8	129.69

"No comparisons of 50 and 20-bird flocks in the same year are available, but by extending the comparisons of the

No. 1—Administration and brooder house in front, breeding house behind. No. 2—Cock paddocks. No. 3—Group of colony houses in orchard range. Iowa Farms Poultry Dept., Davenport, Iowa.

breeding experiments would carry more weight if the replenishing of the flock had been accomplished by artificial means.

"For the first few years of the breeding work the house used was the old-fashioned double walled and warmed pattern. The last few years of this work were conducted in curtain front houses. That the cool house is an improvement over the warm house is generally conceded, but there are many poultrymen who are still of the opinion that the warm house will give a larger egg yield, though at a greater expense and less profit.

"In the early years of the work the method of feeding was also a time-honored one, and included a warm mash. About the middle of the experimental period, Professor Gowell brought out the system of feeding dry mash from hoppers. This custom became a great fad and Professor Gowell preached it far and wide. Perhaps it is an improvement, but it is today much more popular with novices than with established egg farms. Many old line poultrymen have tried dry mash only to go back to wet mash, by which method the hens can be induced to eat more which is condu-

50, 100 and 150 flocks into the 20-flock size, we can get some idea of the error that has been introduced.

#### Overwork May Disturb.

"It is a well established fact in poultry circles that many men who succeed with a few hundred hens, fail when the number is increased to as many thousands. When the breeding experiments under discussion were started Professor Gowell had under his supervision about three hundred hens. When the work was closed the experiment station plant had been increased to four or five times its capacity, and Professor Gowell had a large private poultry plant of his own in addition.

"It is interesting to note in this connection that the last four years of the records are explained by Professor Gowell as being low, due to various 'accidents' (?) Is it reasonable to suppose the true explanation of these 'accidents' would be found in connection with the increased responsibility and size of the plant?

#### The Season May Disturb.

"At the Ontario Station a patent disinfectant wash called

'Zenoleum' was incidentally used to deodorize incubators. Now for some reason, perhaps due to the belief that White Diarrhoea was caused by a germ in the egg, this idea of washing with Zenoleum was conceived to be a possible solution of the incubator problem. In the numerous experiments at that station in 1907, Zenoleum applied to the machine in various ways was combined with various other incipient panaceas, and at the end of the season the results of the various combinations were duly tabulated. The machine with Zenoleum headed the list of livable chicks.

"The idea of contrasting the results of one hatch with one sort with the average results of many hatches of another sort, is very poor science. I very carefully went over the results and compared all machines without it. The results in favor of Zenoleum were less marked but still perceptible. I was somewhat puzzled, as I could see no rational explanation of the relation between disinfecting incubator walls and the hatchability of the chick in its germ-proof cage. Finally I lit upon the scheme of arranging the hatches by dates, and the explanation became at once apparent. The hatching experiment had extended from March to July, but the Zenoleum hatches were grouped in April and early in May, when as one would expect from weather conditions, all hatches were running good. After allowing for this error, Zenoleum appeared as harmless and meaningless as would 'Attar of Roses.'"

The above extracts from a book entitled "The Dollar Hen" are made through the courtesy of Syracuse Poultry Magazine, from whom the book can be obtained. Or from National Publishing Co., Syracuse, N. Y. As a general poultry book it is the best by long odds I ever held in my hand. Aside from the subject matter of the work, Milo M. Hastings, its author, has used in its pages some of the best English that has ever appeared in poultry literature to my knowledge.

He has plainly shown how the Maine experiments through a long series of laborious years were vitiated by lack of equality of conditions. The costly contests of last year at Storrs and at Mountain Grove, while extremely valuable in other respects, were conducted in such a way as to be nearly worthless as regards solution of the great burning question, "Which breed lays the best?" a question

eagerly asked by thousands on thousands of people and involving incalculable amounts of labor and capital. It should be noted that the chief interest of most people in these contests centered on the comparative laying feats of breeds.

This year at new places several experiments are on foot and when the year is up we shall be just where we were before as regards the above burning question. In the prospectus of one of these experiments under the auspices of a farm paper, we find:

"How would you like to realize, say a profit of \$400 per year from a flock of 100 hens, or \$200 from 50 hens, or \$100 from 25 hens?"

"Last year a farm woman in Kentucky proved it could be done if you know how to combine feeding and housing with the laying qualities of the hens.

"There never was a greater opportunity since the world began to make money with a few or many chickens, for those who know how, or are striving to learn the secrets of the business as taught day after day in Mother Nature's school on the farm.

"The great shortage of beef and pork, the higher prices of all other meat, compared with chicken, are creating an enormous demand and better prices for eggs and poultry than ever known before. And the establishment of the parcel post is certain to soon open a ready and direct cash

market in towns and cities between producer and consumer for all poultry products."

The profit spoken of cannot be understood as produced by fancy prices for breeding stock and eggs for hatching; since the farm paper is obviously addressing readers who are raising for the food market, and furthermore it is specifically stated that the profit is to be brought about by combining feeding and housing with laying qualities.

The talk about four dollars per head is simply shameful. No combining of "feeding and housing with the laying qualities of the hens" will give such profit. I know of a party who sells eggs at \$1.00 per dozen for eating, at a very high priced restaurant in New York designed for extremely wealthy patrons, but it is impossible for the ordinary reader to do this. When I found a poultry book written that bore the title, "The Dollar Hen," my heart warmed at once, though I had never heard of its offer. It was such a relief after having met the story over and over again of how "Reverend" So-and-So made eight or ten thousand dollars, or such a matter, in one year by a start of eight or ten fowls, or such a matter, on a plot of ground 40 feet square, or such a matter in a city. Some readers pronounced it false and took the trouble of traveling to investigate.

Bear in mind that the atrocious advertisement, which never should have appeared in any poultry paper, contained this statement, "Anyone can do this," i. e., anyone can reap similar profits. In just those words lay the poison. Guess some real good poultry editors and publishers never noticed those fatal words.

Well, investigators visited the urbane and smiling man of God, and well might he smile, if he was troubled by no qualms of conscience. The "Reverend" did make the alleged profits because he sold eggs for hatching and birds for breeding at very high prices, being enabled to do this because another man who had an axe to grind turned over to the clergyman orders secured by means of the advertising on an enormously expensive scale by said party.

Yes, "anyone" can receive a present of orders at high prices and fill same, and make money beyond the dreams of avarice through the week and preach Sundays, and anyone can sell eggs at \$1.00 per dozen to be eaten by multi-millionaires who dine with friends at anywhere

from \$10.00 to \$20.00 per plate, and upwards, according to the price of the wine imbibed, Things are wonderfully easy for "anyone."

Now to go back to the new contest to be conducted "on a 20 acre farm" by a farm paper which "will in February begin the most intensely practical, valuable and instructive laying, housing, feeding, hatching and poultry-management contest that has ever been attempted. It will be a contest of all methods and conditions, the aim being to find the practical, profitable, better way in every instance. The tests will be worked out with the six most popular breeds of poultry and the results will be made known in weekly and monthly bulletins all through the year."

"The pens will be five females and one male, two pens each of Barred Plymouth Rocks, Rhode Island Reds, White Orpingtons, White Leghorns, White Wyandottes and Black Langshans, 72 birds in all. Accurate records by means of trap nests will be kept of the number of eggs each hen lays; what per cent of them hatch, what per cent of the chicks live, and how they thrive; at what dates chicks of the same age reached given market weights; the weight of feed consumed; cost per egg and per chick raised, etc.

Ending as beginning, "Try it." Try out all important poultry questions. But be sure and guard against disturbing factors and premature conclusions.

# Standardizing Market Eggs and Poultry

Will Mean Thousands of Dollars More to the Producer Every Year—Other Staple Crops Standardized. *By Walter L. Chaney*

THE TENDENCY of the present age is to standardize everything. The steel mills have standardized the structural steel of the United States, the automobile manufacturers have standardized their machines, cotton and wool have been standardized, cotton goods and woolen goods likewise. Potatoes and grains have been classified and standardized. And so have the products of the soil and farm, and the manufactures of the many mills. Poultry and eggs have not been, but are now in process of being classified and standardized.

New York City demands white eggs and pays a premium on them. Boston calls for brown eggs and pays higher therefor. This is and was one of the first steps in standardization of eggs, grading as to color of the shells. To a limited extent eggs have

The skeptic will exclaim, "Impossible!" But this is almost true at this time in some localities. The Single Comb White Leghorn industry now developed at Petaluma, Cal., is an example that bears out the above prophecy or statement. Petaluma ships thousands of dozens of eggs every day in the year. The eggs are shipped fresh laid, some of the farms marking the eggs so that their origin is known; and every consumer who uses them knows that they are laid by the White Leghorns of the Petaluma district. The name of the district is a guaranty of freshness, quality and cleanliness; and the quantity is known beforehand by the purchaser. There are other districts in the United States doing the same thing, and this phase of market eggs is as yet in its inception. The American consumer always wants the best, not the cheapest, and he will pay for quality day in and day out through the year. Quality market eggs will bring from one to five cents more on the dozen than ordinary market eggs. And on each case of thirty dozen eggs this means thirty cents to one dollar and fifty cents. Should

First prize winners at Madison Square Garden as bred by Irving F. Rice, Cortland, N. Y.

been classified, the market qualifications being as to cleanliness of the shells, then as to being fresh, the top quality being quoted as "Fresh-gathered extras," and on down as follows: "Extra firsts," "Firsts," "Seconds," "Poor to fair," and "Fresh-gathered dirties," "Checks," and many other intermediate grades known to the trade. Among others are the cold storage eggs which have their technical names in the trade. Later there will follow a complete standardization as to weight of eggs, then possibly as to breeds producing the market eggs. And finally the time will come when they shall be graded as cotton, wheat and all the other staple crops of the farm now are. They are now graded in the great markets of the world, but the classification will finally reach back to the farm and be standardized at the farm by the producer. After this is completed the purchaser will be able to buy his eggs any place and know what he is getting. He will not just buy a dozen eggs, as at present, but he shall know what he gets as to freshness, quality, quantity, color of shell, cleanliness of the same, what breed produced his eggs, and possibly to know the farm they came from.

it finally average ninety cents to the case, three cents for each dozen eggs, this would mean millions of dollars to the egg producers of the United States. It would pay the producer to standardize his flock of hens, feed for quality eggs, gather the eggs daily, or several times daily, so as to have fresh eggs, keep them clean, pack in attractive packages, and use a farm or trade name to identify his output. And, by the way, this farm name is an advertising proposition and a business asset that may be converted into hard, cold cash. A farm name placed on produce is a guaranty of quality, and the consumer wants assurance of quality.

As a carload of Hereford cattle, Aberdeen-Angus cattle or of Shorthorn cattle sell for more over the scales of our great stockyards, and a drove of Berkshire hogs, a drove of Poland-China hogs or a uniform bunch of any other breed is worth more in the hog alley of the stock yards, so will a coop of White Orpingtons, White Wyandottes or White Plymouth Rocks bring more in the poultry markets of the country. Uniformity of variety stands for uniformity of quality, and uniformity of quality means higher quality in the aggregate. Our poultry must be standardized to

get higher quality, and uniformity is the way to get it. The markets are demanding it.

If the advertisements in the poultry journals indicate anything, and if the poultry exhibitions show anything, the market poultry of the United States is being standardized. These advertisements and exhibitions show that many breeds are falling by the wayside. That fancy is being subordinated to utility. That uniformity and quality are to the forefront. In the December, 1912, issue of one of the leading poultry journals of the United States advertisers were advertising different strains, breeds and varieties to the extent of five hundred, counting each different advertiser as a different variety. Of the five hundred advertised more than 40 per cent were on white fowls, and over 95 per cent of these were White Orpingtons, White Wyandottes, White Plymouth Rocks and White Leghorns. And of all breeds and varieties advertised the Single Comb White Leghorn was way ahead. Rhode Island Reds come after the white varieties. The many buffs follow in numbers after the reds, and the parti-color varieties are only about 30 per cent. And if you will watch the poultry exhibitions you will see that this is about the same. Why is this so? It is because these fowls are a step in the direction of standardization. Here you find uniformity of color. They dress clean and look right to the purchaser, the ultimate consumer, after they are ready to use as table poultry. Then there is the growing inclination of the consumer to buy live poultry so that we may know what we eat, and a clean white bird or one of solid color carries his health certificate with him. As an indication of the direction for standardization may be noted the bringing out of new white varieties, as Rhode Island Whites, White Indian Runner ducks. Then take the loss in popularity of some of the parti-colored breeds that require the double mating system

to produce show birds, and in so doing have lost uniformity.

As said above, market eggs are now standardized to a limited extent in restricted areas, and market poultry hardly to any extent. But, in the near future, market eggs will bear the stamp of quality placed thereon by the producer the day they are laid, and he shall use some apt, suggestive name to designate his output. One of the most suggestive we have ever seen or heard is "Yesterlaid." They will be shipped the same day they are laid, and shall be received by the consumer the same day or the day following. The eggs will be uniform as to weight, quality, color and shape and, best of all, command the top price. Table poultry will come to market well fattened, uniform in shape and color, and be shipped expeditiously so as to arrive in prime condition. And every bird, dead or alive, will bear a leg band giving the name of the producer or his farm, and the location of such farm or owner as a guaranty of the health and quality of such fowl.

These extra guaranties of quality will cost the consumer money, but to the producer this will be the difference between common market eggs and poultry and the standardized kind. It will be the difference between an up-to-date business conducted on scientific, sanitary lines and a sloven, unsanitary business conducted without any thought of responsibility to the ultimate consumer.

Standardized market eggs and poultry will mean a revolution in many communities. Whole neighborhoods will keep the same sort of fowls, produce the same kind of eggs, the same kind of chickens; uniformity will result and higher prices will follow. One cent on every dozen eggs, one cent on every pound of poultry will mean thousands of dollars in the aggregate every year, and two cents' increase would mean tens of thousands. It might be the difference between a living and prosperity.

## Day-Old Chicks and Ducklings

What to Do for the Chicks Before Shipment and After They Are Received. *By Mrs. George W. Church, Townville, Penn.*

THE SHIPPING of day-old chicks and ducklings has long since passed the experimental stage. Most purchasers now find it saves both time and money to buy day-old stock rather than eggs for hatching. Little chicks from good parent stock, and properly incubated will stand shipment well and if properly cared for by the purchaser when received, little difficulty will be experienced in rearing them successfully.

The first consideration in making shipments of baby chicks should be the condition of the chick. No breeder who values his reputation would place a weak or poorly hatched chick in the shipping box. All such should meet with a sudden and timely end as soon as discovered, whether the owner is hatching for another or for himself. A weak, puny chick is only worth the time it takes to kill it, for any attempt to keep and pamper it will result in not sufficient returns to pay the interest on the value of the time spent on it, barring all other expense.

When the chicks are nicely dried off and begin to take notice of the new world in which they have just made their appearance, they should be placed in the little compartments of the shipping box, not more than twenty-five in a compartment. With the chicks so placed the temperature will soon rise to 95° F. and unless left out in the open or unduly exposed to cold storms, will remain so until the boxes are opened at the end of the journey, which may take several days. When removed from the boxes the utmost care should be used to prevent chilling. This should be done in a warm room and each bird given an opportunity to dip his bill in water, when they will drink if thirsty, once they find what the drinking fountain means. The little chicks should then be allowed to rest in a warm brooder of some kind for half an hour or so before feeding.

If the chicks or ducklings are to occupy a brooder, it should be in readiness before their arrival, and in cold weather warmed up to one hundred or more degrees. The floor of the brooder should be well littered with cut clover. Opinions differ as to what is best for the first food given the baby chick. A little dry, freshly ground chick food, ground from good healthy grains, dry rolled oats, hard

boiled egg finely crumbled and mixed with a little dry rolled oats, are all good and these may be varied from time to time with boiled rice, bits of raw potato, sprouted oats or any good green food.

No definite temperature can be named for brooding chicks or ducklings. The owner must have the ability to know when the chicks look comfortable and to recognize their contented chirp. In cold weather they require considerable heat or they will crowd into corners or under the hover, and the death rate assume alarming proportions. After the first week the temperature may be lowered, but from the first the brood must have fresh air, and the hover may be taken out and aired for a few moments in the sun and then put back each day.

Many purchasers of chicks and ducklings prefer to brood them with hens, and they are usually less care than those artificially brooded. Incubator broods are not apt to pay any attention to the clucking of a hen at first. She may even frighten them, when they will pile up off in some corner instead of allowing themselves to be hovered. I find the quickest way to accustom them to being hovered is to place each hen in a box eighteen or twenty inches square in which a nest of straw has been made. The hen should be allowed all the corn, water and grit she will consume before placing her in the box, then she will remain quiet for twenty-four hours if necessary. The chicks should be given her at night.

In cold weather it is advisable to limit the number given to each hen to fifteen or twenty. In mild weather many more may be given a good mother. Here let me say that only "good mothers" should be allowed to have chicks. It is useless to expect a wild, scary hen to mother chicks. Usually with a good hen the chicks will have learned to be hovered by the second day, yet care must be taken in accustoming them to outside temperature, the same as when reared in brooders, but in this case the hen will do most if not all the work.

There are many purchasers of baby chicks who do not realize that success in handling them depends largely on the method of brooding. They do not take into consideration the vast difference existing between the hen hatched youngster, which sometimes before fairly dry thrusts its head from beneath the feathers of the mother and thus early becomes accustomed to outside temperature, and the chick which first sees the light of day in an incubator where it must remain

in a moist atmosphere at one hundred degrees or over for perhaps forty-eight hours.

The fireless brooder has given satisfaction in many instances, but are not at all successful for brooding ducklings until they are several weeks old, as ducklings in drinking, even from a fountain, get more or less wet, and in cold weather at least require more heat than is generated by their own bodies. For chicks it is advisable to fill a jug

with hot water and wrap well with several thicknesses of flannel and place in the fireless brooder to supply warmth.

The youngsters, be they chicks or ducklings, should early be taught the value of daily outings, if reared by artificial methods. It takes time to teach them the way in and out of the brooder, but it is quite necessary to their future welfare, for they will not thrive without fresh air and sunshine, and later on in the season shade must also be provided.

# Type and Carriage of White Runners

Long Bottle Shaped Body, Slender and Carried Erect, With Carriage Almost Straight Up, Advocated.

By J. C. Patton, Charlotte, S. C.

THREE or four years ago there was little and many times no competition in White Runners, even in the larger shows of the country. Even at the Madison Square Garden show in 1912 there were only four single birds and one pen entered, I am told. During the past year, however, this meritorious bird has grown in favor rapidly, and this past Fall and Winter competition in the majority of shows, particularly the southern shows, has been keen. For instance, the greatest duck show ever held in the world possibly, was the recent Southern International Show at Atlanta, December 16-21, where over six hundred runners were on exhibition, with the pure whites leading, the combined entry of the latter being over 380. There were 43 young pens of whites shown in this show; 67 young females and 59 young males, while the old classes were well filled. At the recent Garden show the classes in all colors of Runners except one or two were well filled, and competition was keen. At various southern shows during the Winter entries of two hundred and sometimes more White Runners have been seen.

The editor of A. P. J. has kindly asked my views as regards the "true" type of White Runners. It is not my intention or desire to knock the birds of any other breeder, but those who have visited the various shows where there was real competition must have been impressed with the variety of type shown. The thick necked, thick-bodied bird, White Runner so-called, has been much in evidence, and has been almost invariably passed by in the judging, for the judges at the shows mentioned, and many others, seem to stress above all else, type, station and carriage, with slenderness of neck and body as of supreme importance. In my humble opinion this is right.

During the past year the South has been flooded with thousands of dollars' worth of so-called White Runners, which, according to the requirements of both the British and the American Standards, possess few of the attributes of the breed.

In my opinion, the point of surpassing importance is carriage and true, racy Runner type, the kind that made the breed justly famous in England and promises it equal popularity in America.

The thick, short necked bird, with the short, pudgy body, no matter how nearly wedge-shaped the bill may be, is usually slothful of temperament and devoid of any of the restless activity characterizing the wiry, slender, erectly running bird.

Give us the long bottle shaped body, slender and carried erect; give us the extremely long, slender neck, and give us the bird that actually holds itself almost straight up while running, not merely in fleeting poses of excitement, and we will have the

active, fast moving bird whose virility is stamped in every movement, and whose chief virtue is the capacity to lay an almost endless supply of eggs.

The accompanying illustration of a pair of Runners was snapped in natural standing pose. When on the alert or when running any of them easily assumes a higher degree of body carriage, and when the least bit excited, stands absolutely straight up. They represent my idea of good body and neck shape and carriage. Such well known judges as Tilley, Swain, Brown and others have placed them first at such notable shows as the Madison Square Garden, Atlanta, Hagerstown, and invariably because they possessed this slenderness of type and uprightness of carriage. In the minor points some of them were defective, but they possessed the carriage, at all times, and they represented the type, and they won. Visitors at the recent Garden show will no doubt testify that the first young female and the first young male stood almost perpendicularly at all times, causing much comment for this fact alone.

The prospective buyer should read the White Runner Standard (proposed) carefully, and before accepting birds he should see that they have those qualities demanded for the runner of all Standards and colors, viz., type, raciness and slenderness of appearance and, above all things, carriage.

Let us demand a bird that will show, at all time, a carriage of at least sixty degrees, and for my part I should like to see the Standard requirements calling for as high as seventy-five if it bars ninety-five per cent of all our birds.

You rarely find the heavy set, squatty, loosely feathered and loosely built bird, that prefers to sit about rather than forage, laying anything like even the mildest claims sometimes made.

The true runner of all colors is a bird of snap and vigor, quick in movement and beautiful in carriage. It is the bird, too, whose wonderful activity bears fruit in heavy egg production.

I should like criticism of the accompanying picture from any one truly interested in the true type.

Rape will color the yolk of the egg green, and onions or fish scrap will cause the eggs to taste of these if fed in too large quantities.

The ground should be kept fresh, shade provided in the hot summer months, and the house kept clean. The hens cannot do well if covered with vermin.

Most high layers will lay practically all the color out of their legs and plumage in one year.

Hens lay a few more eggs when males are not used in the pens with them.

Most good layers moult late in the season. They look tough, dirty and weather-beaten as a rule as a result of their hard year's work, but the poor layers spend their time in dressing up and putting on a beautiful coat of feathers, and set them early as a rule.

A pair of typical White Indian Runner Ducks.

# Madison Square Garden Show, New York

Once More a Fine Big Show, the Same Old Stand and the Same Old Management—High Quality Birds Shown. *By Prince T. Woods, M. D.*

almost prohibitive price.

Though we may get more Garden shows, the management is to change. Mr. Crawford has announced his retirement from the field of activities and the 1914 show is to be held under the direction of the new secretary-superintendent, Charles D. Cleveland. Mr. Crawford retires full of years and honors as a great show manager. It is going to take a good man to fill his shoes and keep up the standard of the great New York Show, which has a world-wide reputation as the greatest business show of the country. Mr. Cleveland is popular and he is a hustler and we believe that he will win out for the Garden show in spite of the handicap of increased rent. It is up to fanciers everywhere to get busy and co-

operate with Supt. Cleveland in the effort to make the next show the New York Poultry, Pigeon and Pet Stock Association a great show and a big success.

For this twenty-fourth annual exhibition, the show dates for 1912-13 were December 31 to January 4, inclusive. Attendance was bigger than ever and there seemed no lack of interest on the part of the visitors. The same old arrangement of exhibits was in vogue; it seems to be the only arrangement that the exhibition hall permits. Displays in the center of the hall. Competing birds in rows of double tiered cages and the displays of manufacturing concerns ranged around the sides of the hall, with pigeons, bantams and overflow exhibits in the balcony. Dealers in poultry equipment, supplies, incubators and brooders reported a good business week. Poultry sales were reported at long figures, but not as many of them as for the year before.

The weather was fine most of the time during show week, with only one squally, rainy night and a little flurry of snow, but it did not appear to cut down the attendance any. The hall was filled with visitors from opening time to the closing hour all show week.

The poultry judges at New York were: C. H. Welles, Barred Plymouth Rocks, females and yards; H. P. Schwab, Barred Plymouth Rocks, males, and yards; Fred Huyler, White Plymouth Rocks; George H. Burgott, Brown and Buff Leghorns; F. G. Bean, Buff Wyandottes, Buff Plymouth Rocks, White Orpingtons, females and yards; H. A. Rose, Ornamental Bantams; J. H. Drevstedt, Indian Games, Black Wyandottes, S. P. Wyandottes, Dorkings and Silver Penciled Plymouth Rocks; Rowland Story, Minorcas; T. F. Rigg, Houdans, Creve Coeurs, La Fleche, Polish and Turkeys; H. B. Gleezen, Pit Games; C. M. Bryant, Rhode Island Reds; L. C. Bonfoy, Brahmans, Spanish, Dominiques, Lakenvelders and Faverolles; A. C. Smith, White Leghorns and Andalusians; Charles Nixon, White Wyandottes, females and yards; J. W. Andrews, White Wyandottes, males and yards; F. L. Sewell, Langshans; G. D. Tilley, waterfowl; F. L. Platt, Campines and Buff Cochins; J. Frank Van Alstyne, Columbian Wyandottes; Capt. Max de Bathe, White Orpington males, Blue Orpingtons and Orpington Ducks; M. H. Coffin, Partridge Plymouth Rocks and Partridge Wyandottes; W. Tunncliffe, Hamburgs; B. C. Thornton, Games and Game Bantams; F. H. Davey, Silver and Golden Wyandottes; C. S. Beyers, Buff, Black and Diamond Jubilee Orpingtons.

Following is a list of poultry classes from official catalogue: Poultry Classes Madison Square Garden, New York Show, December 31, 1912, to January 4, 1913.

Grand total, 1913, not including displays.....5,407  
Grand total last year.....5,067

In addition to the exhibits listed in above tables, there were peafowl, cranes, flamingoes and wild turkeys in a large cage display, many varieties of waterfowl and a fine display of partridges and pheasants by G. D. Tilley. Also pigeons and doves in attractive variety by the same exhibitor. English Golden Campines by M. R. Jacobus; Blue Orpingtons and Silver Campines by Capt. Max de Bathe; White Egg American Fowl by Albert Angell, Jr.; Barred Rocks and Black Minorcas by Yama Farms; White and Buff Orpingtons by Owen Farms; Barred Rocks by A. C. Hawkins.

It was a big and interesting show and, taken as a whole, we believe that the classes showed better values and better quality than at any previous exhibit. There was some little dissatisfaction with the judging in some classes, particularly Rhode Island Reds.

We were pleased to see the Buff Cochins coming back again with 23 big fluffy specimens, where there was only one lone hen a year ago. Other Asiatic classes were strong in quality but a little short in numbers. Black Langshans made a good showing with some excellent specimens.

Reference to the table will show the total number of specimens shown as compared with the show a year ago. Barred Rocks showed a shrinkage in numbers, but certainly made good in the fashionable fancy requirements. White Rocks made a fine showing with well filled classes and exceptional quality. Buff Plymouth Rocks were strong in numbers and fine in quality, with some of the old-time strains leading in the ribbons.

White Wyandottes were the best and biggest classes in the show and there were some wonderfully good birds both in and out of the winnings. From all appearances this good old variety is taking a fresh grip on popularity and may be expected to keep right on climbing in favor with those who love a combination of the practical and beautiful. Buff Wyandottes showed well in size, color and quality, but there

does not seem to be the activity and effort for improvement that the excellence of this variety warrants. Columbians and other variety Wyandottes made an excellent showing.

Down in Ancona alley there was all kinds of enthusiasm. One could hear Ancona praises proclaimed at any hour during the show and the breeders sure did put a lot of ginger into the boosting for their favorites. The birds were in fine fettle and showed evidence of good work for improvement. The breed is being boosted along practical lines, and if all the tales we heard of phenomenal laying of big white eggs are only "slightly exaggerated," then the Anconas must surely be some wonders as egg machines. Go to it, gentlemen; we sure do like your push and enthusiasm. It is a fine plan to let folks know it when you have a good thing to push along.

Rhode Island Reds looked good to us; they always do, but in Red alley the light was poor and, because of the double tiering, it was difficult to get a really good view of many of the birds. There was some kicking on the awards and some shifting about on decisions, but after the smoke of battle cleared there did not seem to be any "killed and wounded," and we don't believe that anybody was seriously hurt.

Buff, Black and White Orpington classes were strong in

Second Partridge Plymouth Rock pullet at the late Chicago Show.

numbers and in quality; some sales were reported at good prices and the Orpington folk seemed to be feeling pretty good. Other varieties of Orpingtons made a good showing.

Brown Leghorns were back again in fine fettle and with a new lease on popular favor. Whites and Buffs were well filled classes and the quality good. Other varieties of these sprightly little egg makers were "right there with the goods."

Campine alley was another center of excitement and enthusiasm. There were Campines of English type and Campines of Belgian type. Of course the judging was criticised; that appears to be fashionable at New York. The Campine is certainly a plump and solid little bird for one that does not look its real size, and we are told that they will give the Leghorns a pretty good run in egg production, but it does look as if too much favor is being shown to the rather small and leggy birds in making the awards.

Minorcas made a stronger showing than a year ago and this fine old breed seems to be holding its own in popularity with those who like a good-sized fowl that can lay a goodly number of large white eggs.

# Mr. Schwab's Report of New York Show

Birds Displayed From Many States and From Over the Seas—Wonderful Quality—Breeders Improved Work Seen to Advantage. *By H P. Schwab*

EVERY YEAR all roads known to poultrydom lead to New York. The Garden show, with its long record and prestige, is the "Mecca" of poultrymen. For twenty-four years this show has been the recognized leader in poultry fashions and in poultry success, and in the same breath in which we speak of the Garden show we also speak of its manager, Mr. H. V. Crawford. It is this man who all these years stood at the wheel and has guided it safely through all conditions over and beyond all danger to the smooth waters of content in the harbor of poultry success. The pilot has now retired; his work as far as the future shows are concerned is

done; the deserved days of rest and freedom from all cares have come by his own wish, and he takes with him the love and confidence of all who knew him and of all who knew his work. The wish that he may live long and fully enjoy life is borne in every breast. His monument is of his own making in the prestige he gave the New York show and the great influence his character and work has had the world over.

We welcome Mr. Chas. D. Cleveland, the new manager, for he above all is the right man for the place. A great breeder and a man of sterling quality, he is liked and has the confidence of all who know him. He deserves success and will surely receive the hearty support of the breeders and press.

The feature of this exhibit was seen in the general high grade and improved quality in all the classes; the even select grade was noticeable; quality and condition went hand in hand, and the general superior effect was commendable. Never before have classes of such evenness been seen with such superior condition and such value.

The entries totaled larger than ever before. Poultry in the single classes numbered 2,510. Ducks, geese and turkeys, 190; bantams, 305; pigeons, 960; pet stock, 123; pens, 242, with 1,210 birds; displays with 415 birds, making a grand total of 5,713 specimens shown. The weather was very good all but one day, and the attendance over double of any previous year. Sales were freely reported, with record prices the rule. Mr. Owen selling a White Orpington cock for \$1,000 and Mr. E. B. Thompson refused \$1,000 for his second prize cockerel. I can imagine the amount it would take to buy his champion and first prize winner. Some White Rocks also brought prices way up in three figures, and we know of a dozen sales in other classes of \$100 or more for single birds. It is evident that quality makes the price and that the demand for high grade birds is greater than ever before.

Eggs for hatching were also in general demand, and one breeder told us he had booked orders for half his supply at the show.

The large display of rare water fowls in the tank occupied the center of the Garden and made an attractive centerpiece of interest to all. The collection was complete and the best we have seen. Cages with rare birds of all sizes and all varieties were placed throughout the building. The wonderful coloring and markings of many of the birds were a revelation to us; the blending of colors by their nature was superb and beyond my pen to describe.

The entire Garden was surrounded with displays of incubators, brooders, poultry houses and fixtures. Feeds, etc., were also shown. Egg boxes and egg crates in improved styles were seen, and it is evident that no branch of the industry is being overlooked.

The American Poultry Journal, the only dollar journal in captivity, was met with general favor. The breeders see in this the desired progress that down-to-date conditions demand. The American people appreciate value received, and the breeders realize in this the uplift of the fancy. Quarter and fifty-cent poultry journalism has passed as far as this journal is concerned, and we are going to give all double value at that.

Pigeons and pet stock, ducks, etc., were shown in the gallery and filled all available space there. The exhibit was one of superior merit and value and attracted unusual attention from the great throng of people who attended the exhibits this year.

## The Breeders and Their Birds—Barred Plymouth Rocks.

Unusual interest was centered in the great and wonderful class shown here of Barred Plymouth Rocks. The great breeders and winners of years were competing here, while the birds

from the yards of the absent ones were shown in fact. In this class of 191 birds it remained for Mr. E. B. Thompson to make, all considered, the greatest record ever made at the Garden shows. Never before was such quality seen; the even high grade was a real revelation, and we did not think it possible for any man at this day to make such a clean cut record. Mr. Thompson won: Cocks, second, third, fourth and fifth; hens, third and fourth; cockerels, first, second, sixth and eighth; pullet, first and sixth; pens, first, second and fifth; cockerel mating pen, first; first display; champion male; champion female; specials for color and shape male and color female; silver cup for best pen; Spratt's sweepstakes gold special; special for four best cockerels and for best cock; hen, cockerel and pullet and a dozen others. The victory was complete, with not a spar left standing. The first prize and champion cockerel was the sensation of the show. We have never before seen his equal in either shape, color or barring, with condition and finish perfection. His surface was clean, snappy and straight-barred, while his under barring was uniform in width and very sharp; head points with comb and eyes of the very best. He is the model for the 1915 Standard.

His four winning cocks were in a class by themselves. Judging this class was the hardest work of my life, and I don't believe there was a difference of one-half ( $\frac{1}{2}$ ) point from first to fifth prize. The second cock had just passed his best and had dulled a mite in hackle. Still we have never seen a better finished cock bird; every feather was in place, and he, like the first cockerel, had the best of shape and head.

Mr. Haldie Nicholson, Leominster, Mass., won first cock, also eighth and third cockerel mating pen. The cock was in superb condition, just in full bloom, very narrow and sharply barred and well carried in all his sections. Here also was found ideal types and a magnificent head. There was but one shade of color and but one quality from head to tail—that was of the richest and best. It was a close and a great win.

Beside his Barred Rocks Mr. Nicholson has also won fame with his line of "Royal Blue Orpingtons." He was the first to import this variety, and bought the best of English winners. His birds have won the country over this year and, to top off with, he won here: Cock, first; hen, first, cockerel, first; pullet, first, and pen, first, in the largest and best class seen on this side. The popularity of this variety is good to see, for they sure are a most beautiful bird in form and color.

Mr. C. N. Myers, Hanover, Pa., won first hen and second-prize pullet. He has shown here before and has kept faith and landed well. His winning hen was a beauty, well shown, and in form and color ranks up with the best ever seen here, with very bright and snappy barring. His pullet was of the same style, excellent surface and under and of fine form.

Mr. Henry D. Riley, Strafford, Pa., had his birds placed in all classes, winning: Cock, sixth; hen, fifth; cockerel, third; pullet, fourth, and cockerel mating pen, second. His entire display was one of merit and his cockerel up with the very best, and only beaten by the two most wonderful birds ever seen at any one show. This cockerel carried the best of color and barring, being short only on a little filling out. At his very best he will make a far superior bird to any he has ever shown. Fourth pullet was a very clean and attractive bird that promises well for the future.

The Yama Farms, Napanock, N. Y., made their second exhibit here and won renewed favors by their excellent showing and winning. In Barred Rocks they won: Cock, seventh; hens, second, sixth and seventh; cockerel, fifth; pullets, third and eighth. Their second hen was the first New York pullet of last year and in their third pullet they have another with every promise for the future. Their birds were shown in grand condition throughout.

In S. C. Black Minorcas they made a sweeping record with: Cocks, first, third and fifth; hen, third; cockerels, first, fourth and fifth; pullets, first, fourth and fifth, and first and fourth pens. We believe this is the Garden show record; at least, when competition is considered, we believe this will prove the best record ever made. In size and form this line is a wonder, and with fine head points the rule. In color they are marvels and in finish perfection. We had expected to see a great class of quality birds, but we never hoped to see such superior quality in any one line as was here shown by the Yama Farms. This farm has also made another great record at the Buffalo International, of which we will write later.

Mr. Geo. J. Cunningham, Sag Harbor, L. I., N. Y., who has

won honors here for two or more years, found his early birds just a mite passed and the younger ones hardly finished. The few birds he displayed well show his quality and the improvement he is making yearly. He is a valued breeder sure to win his way, and all his birds have the breeding quality and true merit value back of them.

Mr. E. Anderson, Norwalk, Conn., another of the prominent old time exhibitors who always has good ones to show, exhibited birds of merit in males, but they were not fully finished. We were glad to note their quality. This line is very strong in clean surface color and under-barring. Late moulting handicapped this line.

Mr. Robert J. Walden, Middleburg, Md., and this year a prominent winner at Philadelphia, Hagerstown, Williamsport, etc., entered a few females, most of which were past their best condition. From their quality we feel assured that this line will have to be considered in the future.

Mr. J. W. Smith, Dallastown, Pa., whose line of females has had all guessing, made his first exhibit here, but sent over very young and immature birds. Mr. Smith has a line with wonderful color and barring, and has a future in this line. He has made a grand record at many shows the country over and he will bear watching, mark this.

#### White Plymouth Rocks.

In White Plymouth Rocks a class of 155 birds was seen, and here again finish and condition with beautiful type were features well worth seeing. The Owen Farms by winning first, second and third pens in a class of eleven pens established a new record in this class and in this variety. They also won first and fourth cocks and second and fifth hens. Their other varieties were shown as displays only and one display coop was used to show the silver cups they have won at the leading shows this season. It was a beautiful display of honors won, a convincing though mute statement of the Owen quality.

Mr. L. C. Bonfoey, Vernon, Conn., who cleaned up at the Palace, won here: Cock, second; cockerel, second, fifth and sixth, and pullet, first. This is one of our oldest lines and has been a prominent winner for many years. The first pullet is all that one could desire in form and color and was shown at her very best.

First cockerel went to Hampden Poultry Yards, Chicopee, Mass. He was a finely finished bird of merit.

#### Buff Plymouth Rocks.

In Buff Rocks the Linfield Poultry Yards, with John W. Poley as sole owner and manager, repeated his former winnings at this show, winning in a class of 117 birds of quality as follows: Cock, first and fourth; hens, first, second and fifth; cockerels, third and fifth; pullets, first and second, and pen, first; first display, etc. Mr. Poley has made records there for ten or more years, but he has never made one of more value than this. The class was the largest in years and the general quality very good. His first pen was the equal of his Boston winner of last year, a pen I considered unequalled. The females mated well and the male a rare good one of surprising color and the best of form. First cock the best Buff male we have ever seen, to our mind.

At shows this year we have placed seven first prize winners that we were told were hatched from eggs bought from Mr. Poley. This line has made a wonderful record the country over, and are right now better than ever. Mr. Poley deserves every credit for his great work with this variety.

Other winners here were: E. H. Lichtenwalter, Girard, Pa.; Fred Armer, W. J. H. Goetz, etc.

#### Partridge Plymouth Rocks.

This beauty class received special attention, for it was one of the largest and without question the best in quality ever brought out. The quality was really marvelous all through, for beside their wonderful color and markings their shape was a feature. Bird Brothers, Meyersdale, Pa., made their third consecutive winning here by taking down: Cock, first, second, third and fourth; hens, first, second and third; cockerels, first, second, third, fourth and fifth; pullets, first, second, fourth and fifth, and first pen. Every one of these birds is worthy of special mention for their richness of color and type with excellent finish. Head points were another feature and in the males particularly are worthy of any variety.

Columbian Rocks were not as large a class as usual, or in their usual fine condition.

#### White Wyandottes.

The largest class at the show, with 260 birds competing. It was without question the grandest class ever brought out, with quality and condition the best to be had. Here Mr. A. J. Fell, West Point, Pa., made his superb record by winning four of the possible first prizes, as follows: Cock, first; hen, second; cockerel, first and fifth; pullet, first and fourth, and pen, first, with first display and all specials. It was their type and their rare condition and quality that made possible this great win,

and every credit is due the man for what he has done. In type his birds are the true models of Standard requirements, rightly carried, and in color sound in every section, with beautiful yellow legs and red eyes.

The Rockandotte Farm, Southborough, Mass., won fourth cock and second pen. This pen was about all we could desire, the cock a wonder in form and finish, well carried and a typical head, the females well mated, all of the same mould, and in the rarest of condition. It was a great pen and the judges must have had a job in picking their winner, for they told me it was close and between the two best pens ever seen.

First hen was won by Joseph Russell, of Toronto, on a beautifully shown and finished hen. Mr. Russell made a clean-up at the Guelph show.

#### Silver Wyandottes.

There were 75 Silver Wyandottes shown, making one of the largest classes of years, and one of the best we have seen in years. These old time favorites have been coming back for the past three years and we still hope to see more of them in the future. This year Mr. Leroy W. Seigfried, Waterloo, N. Y., doubled any of his former winnings by taking: Cock, first; hen, first; cockerel, first; pullet, first and third pen, with all the specials. This was a rare collection of winners, with splendid type and the best of markings, the open lacing very sharp and clean.

Golden Wyandottes a very small class.

Black Wyandottes seen in fair numbers and of good quality.

Buff Wyandottes a class of 50 birds with exceptional quality in sound buff color and very fine in type. We have seen beautiful classes of these this season.

Partridge Wyandottes seem to be favorites in this section, and a beauty class was seen here, with the Sheffield Farms, Glendale, Ohio, winning as usual. This season they won all the first prizes but one and most of the other honors as well.

Silver Penciled Wyandottes number 40 birds, making a fine showing.

Columbian Wyandottes numbered 53 birds and were a royal good class in every department. D. Lincoln Orr, Orrs Mills, N. Y., won: Cock, second and fifth; hen, fourth; cockerel, second and fifth; pullet, second and third; pen, first.

Other winners here were G. H. Baker, Sunnybrook Farm, C. N. Bruce and the Columbian Poultry Yards.

#### Anconas.

This variety again proved their popularity in a class of 102 birds, which was one of the largest brought out so far in their history, Mr. H. Cecil Sheppard, Berea, O., winning: Cock, first and fourth; hen, first and third; cockerel, second; pullet, fourth, and pens, second and fourth, with display special. Mr. Sheppard is one of the original breeders of the variety and for some years has been the leading winner at this show.

In Rose Comb Anconas Mr. Sheppard won about all the prizes.

#### S. C. Rhode Island Reds.

There was something doing in this variety all the week, and as we did not handle all the birds we are not in a position to say if all the awards were placed right or wrong. We do know that a great many of the winners looked exceptionally good to us, also that many wonderful quality birds were without ribbons. In cocks No. 982 looked as one of the best to us, No. 996 extra even in rich color and fine head, but we will handle this later and now tell who the winners were. Old Acres Farms, Foxboro, Mass., won: Hen, third; cockerel, first and fifth; pens, first and second, making a great win without any question on their awards. This line of males has more than made good to our notion; they have type and the very richest of color, sound all over and under.

Lester Tompkins, Concord, Mass., was awarded first-hen and female shape special, with several other mentions. Birds of his breeding were liberally shown against him here, and we have seen the winners of many shows this year that were sold by him.

The Wyebrook Farm, Londonville, N. Y., carried off honors with: Cock, first and third; hen, second; pullet, fourth, and pen, fourth. The winning cock was a very good bird and well shown.

Other winners here were shown by J. D. King, E. W. Lewis, A. A. Eddy, F. E. Woodard, A. S. Bailey, Shenly Heights Poultry Yards, etc.

#### Rose Comb Reds.

In a class of nearly 100 birds Mr. Lester Tompkins won: Cocks, third and fourth; hens, first; cockerel, fourth and fifth; pullet, second and third, and pen, fourth. There were many warm ones in these classes, the birds as a rule shown in most excellent condition.

Payne Brothers, Portland, Conn., winning: Cock, first; hen, fifth; pullet, first, and pen, third. Their winning cock, a bird of merit and well shown, very even in color and very sound.

The Red Feather Farm, Tiverton Four Corners, R. I., were close contenders all the way and winning: Cock, second, hen, fourth; cockerel, first and third, and pen, first. A splendid record made by a great line.

Annesley M. Anderson, Morton, Pa., another exhibitor of years and a breeder of note, won: Cock, fifth; hen, second and third, and pen, second.

#### S. C. Buff Orpingtons.

The Buff Orpingtons formed the fourth largest class of the show, with many birds of the old and new world competing. The class was a beauty all through, and we think the richest in both color and type that has been shown to date. In this large and beauty class the Joe-Pye Orpington Farm, South Norwalk, Conn., made a record of which they may well feel proud. With 123 birds competing they won: Cock, first and fifth; hen, third and fourth; pen, first. Their famous Buff cock that has won the Garden awards twice before headed their pen this year. This bird has a record far above that of any other Orpingtons we know of. His own record is the best ever and he has produced birds that have been winners at our best shows. He seems to improve with age and is as great today as ever; such superior quality is of untold value. This line has made other prominent records this season, and we hope soon to visit their home and to tell our readers more of it.

Mr. J. W. Clark, Cainesville, Ont., won well in the Buffs, backing up his record made at the "Ontario." His winnings are: Cock, second; cockerel, third; pullet, fourth, and pen, second.

In the Orpingtons a new exhibitor was found in the Briarcliff Farm, Atlanta, Ga., they showing very strong in all classes, as follows: Buffs, cock, third; hens, first and fifth; cockerel, second and third; pullet, second. In Blacks, cock, fourth; hen, third; pen, fifth. In White, cock, first; cockerel, first, and pen, sixth. This is a beauty record in these great classes. All their birds have the best of type and were shown in excellent condition.

#### Black Orpingtons.

This variety numbered 20 birds and we believe the largest class ever seen here and without doubt the best. Here the Foxhurst Farm, Lime Rock, Conn., made a wonderful winning against the best breed in America and England. It was a beauty class throughout with quality the feature. Here this farm won every first prize offered: Their complete record is: Cock, first and third; hen, first; cockerel, first, third, fourth and fifth; pullet, first, second, third and fifth; pen, first and fourth; first display and all specials. All that goes to make a great Orpington was seen in this line, the beautiful type and exquisite color sound and of the best.

Maj. Hugh A. Rose, Fonthill, Ont., split his string and exhibited both here and at Baltimore at the same time. This was his error. Still he made a strong showing here and won about all at Baltimore. Here he won: Cock, second; hen, fourth; cockerel, second; pullet, fourth, and pen, second. I believe in future the major will show his best all at one exhibit.

#### White Orpingtons.

The Aldrich Farms, Columbus, O., also made the same error and exhibited at both shows the same week. It takes the very best to win at either and the only way to make a just showing is to keep your line intact and exhibit as strong as possible at one show. Here this farm won: Cock, third and fifth; hen, first; pullet, third; pen, fourth and fifth. At this same time they won three firsts and two seconds at Baltimore. Their pens attracted particular attention, being of the choicest and wonderfully shown. It was a beautiful line display.

Mr. A. C. Hawkins won second pen in this class on a very choice and rare collection of quality and mating. The head points of his females are very fine and all were in great condition.

Wm. Cook & Sons exhibited but few birds here, as they were showing south and had made several large and successful exhibits this season. Later we will give their complete record.

There were several other prominent exhibitors in this class, and we dare say that about all the best of the birds were shown here. The class was very even; a real beauty, and with 183 birds in line.

#### Blue Orpingtons.

We were greatly surprised and pleased with the beautiful class of Blue Orpingtons shown. Their color seems to fit the form of this variety, and we will hope to again see next year as large a class. Mr. Haldie Nicholson won as before stated four of the five first prizes in this class, making a record to consider.

Mr. W. H. Depper, South Lincoln, Mass., showing a full line and winning: Cocks, first and second; hens, second, fourth and fifth; cockerels, second, fourth and fifth; pullets, fourth and fifth; pen, second. This line has the true Orpington shape and with even and excellent color. This is a beauty variety

with practical quality, bound to become very popular, for they have the merit.

#### R. C. White Orpingtons.

The breeders surely have done almost the unexpected with this class, for they have in the few years bred them to shape and a type as good as we have seen in any of the S. C. classes. Mr. Lawrence Jackson, Haysville, Pa., made a most attractive exhibit of birds, showing the grandest of form and with ideal Rose Combs. He won: Cocks, first and third; hens, second and third; Cockereis, first and fourth; pullets, first and third; pens, second and third; first display and specials. We believe these Rose Combs in another year will be as popular as the Single Comb variety, as they are bred as true to type and color, with excellent combs.

#### Other Orpington Breeders.

Mr. L. O. Kettering, Pittsburg, Pa., owner of the Sandy Lick Farm, breeder of Buff, White and Black Orpingtons, exhibited a few birds and won well on this his first entry here. Mr. Kettering has been a consistent winner for some years at leading shows and we hope to again see him and his birds here at New York.

Other winners in the Orpington classes were Waldo Richardson, H. B. Prescott, Kolaneka Farms, Capt. Max deBath, Murray Linder, etc.

#### Single Comb Brown Leghorns.

We were pleased to note the class of 135 S. C. Brown Leghorns. It just made the show look like the good old times again when this was always a leading class. The Browns were here in all their glory, shown by their best breeders. The awards were well spread, all getting a share. Mr. Frank Schellang, Erie, Pa., won second cock on a beauty, well shown and of the best color and markings, with fine head. He also won several other places. This line has been a prominent winner this season at our best shows and has years of exhibition records back of it.

Mr. L. B. Resseguie, Millers, N. Y., won second pen on a beauty mating, with a very valuable male heading it. This line has since made a clean-up at the Buffalo International show.

Other prominent exhibitors were Grove Hill Poultry Yards, J. C. Williams, Rockefeller & Hubbard, C. S. Cook, etc.

Rose Comb Brown Leghorns were a class of about 50 birds, with a great many beauties seen.

#### S. C. White Leghorns.

This was a rare class of 115 birds, with honors enough for all. The quality was of the best and birds well shown. Mr. D. W. Young did not win as many prizes as usual, but still with the class and all facts considered he and his line have surely made the greatest record ever. His winnings are: Cocks, first, third and fifth; hens, second, fourth, fifth, sixth and seventh; cockerels, first, second, third, sixth and seventh; pullets, third and fifth; pens, third and fifth. The style, finish and quality of the Young birds have set the pace for years, and it is this same quality that has won all the awards at this show for years.

The Skylands Farms, with Mr. Harlo J. Fiske in charge, made a great record here in winning: Cocks, second, seventh and eighth; hens, third and eighth; cockerels, fourth, fifth and eighth; pullets, second, fourth, sixth and seventh, and pens, first and fourth. This line has been winning for years at our best shows and well deserves the honors won here.

The Elm Poultry Yards, Hartford, Conn., won first pullet and first hen, both on very fine quality and rich birds seen at their very best. Mr. Groesbeck has been coming fast with his Leghorns and has been a close contender and winner at many great shows.

#### S. C. Buff Leghorns.

The Buffs formed a class of 103 birds and one of the choicest ever seen at this or any show. The feature of this class was the first prize-winning pen shown by the Monmouth Poultry Farms, Freneau, N. J., with Mr. J. Courtney Punderford, owner. For real quality and evenness throughout, with the soundest of color and best of size and type, and with choice head points this pen has never been equalled. Mr. Punderford has now won first pen for five (5) years in succession. This was his only entry this year, but in other years has been the leading winner right down the line.

In the single classes the prominent winners were: R. A. Knapp, L. E. Merrihew, M. F. Fielder, W. H. Heil, T. J. & W. F. Lindorf, etc.

Rose Comb Buff Leghorns were well shown and formed a good class.

#### Silver Campines.

With just 130 birds entered the Silver Campines formed a beauty and attractive class. They have landed like a whirlwind and with their quality are sure to stay and become great

favorites. The Manhattan Farms, Brighton, N. Y., here again made a surprising record in winning first and fifth cocks; hens, first, fourth and fifth; cockerels, first, second and fifth; pullets, second and fourth; pens, first and fourth. This line has made all the great shows to date, winning at all and making the greatest record we know of at all. We will soon have more to tell of this line.

Mr. M. R. Jacobus, Ridgefield, N. J., the father of the Campines in this country, who looks to practical worth and white eggs as their main quality and who has made great records at the shows for years, won here: Cocks, second and third; hens, second and third, and pullet, third. In Golden Campines Mr. Jacobus also won well with first hen and several other prizes.

The Manhattan Farms won here also in the Golden four of the five first prizes and several others. Complete their winnings are: Cock, first; hens, second and fifth; cockerels, first, second and fourth; pullets, first, second, third and fourth; pen, first.

#### Black Minorcas.

We have given the Yama Farms' record in the Black Minorcas along with their winning in the Barred Rock class. It was a beauty class of 78 birds, with beauty, condition and the best all around quality as the feature. We can see in this line an improvement of 50 per cent over last year, and fully believe with Mr. Arthur Trethaway, who said: "It is the best class I have ever seen shown."

#### Rose Comb Black Minorcas.

Like the Single Combs this was also a very large and strong class, and the best we have seen on this side to our recollection. The Rose Combs seen here were of the same size and form as the Single Combs, and in color as well as in style and

finish were their full equals. Mr. Ross Swartout, Newport, Ont., was the leading winner here and won: Cock, fourth; hens, first and second; cockerel, second; pullets, first and fourth; pen, first, and best display; this in a class of over 70 birds. Mr. Swartout has been a liberal exhibitor and at the late Ontario show at Guelph, Ont., won about all the awards, also against a great quality class. We expect to see his whole line soon and will tell our readers more of them.

Houdans as seen here again were pleasing in a strong class of very fine birds shown at their best. This valuable variety is still gaining in popular favor.

Lakenfelders were as good a class as we have seen.

Cornish Games, a beauty class, with many rare birds in line. We have seen more and better Cornish this season than for years before.

All varieties of ducks were seen to advantage and at their best, the Indian Runners leading in numbers in both old and young.

The Bronze turkeys were a hummer class and in general condition and quality one of superior merit. Here Bird Brothers for the third and consecutive year won all honors with their line, a record unequalled at any time or place.

Bantams were seen in all varieties and all classes well filled, with the Cochins and Seabrights leading.

Pigeons as usual were a rare collection and filled the gallery all around the show hall.

Note.—My original report of this show went astray in the mails and I was obliged to write this in a hurry. I will later go over this and make further mention as I wished to of other exhibitors and give a description of the classes and birds.

(See complete list of awards on page 259.)

# The Great Boston Poultry Show

Biggest and Best Poultry Exhibition Held in America—Veteran Fanciers' Day Celebrated With Banquet. *By Dr. Prince T. Woods*

**B**IGGEST AND BEST POULTRY SHOW ever held in America, was the verdict rendered by the "old timers" who attended the seventeenth annual exhibition of the Boston Poultry Association at Mechanics Building, Boston, Mass., January 7 to 9, 1913.

It was a big show, a fine show and a most enjoyable show to attend, see fine birds and renew old acquaintances and make new ones. It is doubtful if there is anything to be gained by striving to make a bigger show from the fancy side of the business, but much more might be done along the practical or utility lines. The exhibits of standard-bred poultry and displays this year crowded the hall space somewhat, made it necessary to have the aisles somewhat narrower, and did away with the settees which used to afford the visitor an opportunity to sit down near his favorites and enjoy a chat with some kindred spirit. There were plenty of birds, and plenty of good ones, and to have more might necessitate double tiering of the coops, and that is not to be recommended. We suggest and hope, however, that next year entries close earlier and that the management give more time and attention to arrangement of the exhibits. Some of the classes were scattered a bit, making it inconvenient to view them to best advantage for comparison.

The utility exhibit was good, what there was of it, but there was not enough of it. The association offered a liberal sum in cash prizes and no entry fee in the practical poultry department, but it was evident that utility men did not have a sufficiently clear understanding of their opportunity to see the advantages of showing. Most of the prizes were for dressed poultry, for eggs, and for practical exhibits by colleges. There was nothing in the published announcements to show that exhibits of pens of live utility stock would be made welcome or how they would be judged, although exhibits of well matched females with a male, in the utility department, would have been an attraction, and there was some talk during the show that such exhibits would have been received. It is easy to understand the position of the practical man who does not make a practice of dressing poultry at the home plant. He naturally would not want to kill and dress some of his best birds in order to try his luck at winning a prize on them. We would suggest displays of five well matched females with a male

in the popular variety utility classes for another show, prizes to be awarded by some judge of utility values. The pens ought to be selected for uniformity in shape and size, breadth and depth of body, size and quality of legs and frame, health, vigor and general condition. There might well be egg producing classes, meat classes and general purpose classes.

The Massachusetts State Poultry Association, which held its annual meeting during the show, has taken up the matter of utility exhibits with Manager Atherton for the 1914 Boston show with a view to promoting a better understanding and coöperation between the utility breeders and the show management. In order to facilitate matters the State Association appointed a committee to draw up a utility standard for the 1914 Boston show and to confer with Mr. Atherton in the matter of utility exhibits. The committee are Prof. J. C. Graham, Massachusetts State Agricultural College, John H. Robinson and Henry Dana Smith.

The show management offered a first prize of \$50, a second of \$25 and a third of \$15 for the best exhibit of live and dressed poultry, plans, appliances, etc., by an agricultural college, no entry fee. It is a pity that our agricultural colleges, particularly the New England colleges, failed to take advantage of this great opportunity to do a little real good, both for themselves and the interested public. The Massachusetts State Agricultural College was the only college represented in the exhibits and it had a very creditable display. Prof. J. C. Graham and an assistant were in charge throughout the show, demonstrating the exhibit for the benefit of visitors, who manifested a great deal of interest. Just why other colleges, who are bidding for poultry students and endeavoring to promote interest in their poultry departments, failed to get in on so attractive a public competition does not appear on the surface. It was a great opportunity for desirable publicity and the Massachusetts College exhibit entertained many visitors from all sections of the country, north, south, east and west. The "post box" of the exhibit in which addresses were left for college literature, took in over a thousand names in one day and they represented many different sections of the United States and several foreign countries.

Secretary-Manager W. B. Atherton and his press agent, F. H. Robie, should feel mighty good over the success of this 1913 Boston show. It was not only big and good, but it was well attended in spite of a good deal of unfavorable weather, and it was well reported and featured in the local newspapers. Just before the close of the show "Billy" Atherton was sought out by a crowd of enthusiastic friends,

hoisted to the shoulders of a few admirers, and marched around the hall in honor of his success as a big show manager, an all around good fellow and one who holds the friendship and respect of all who attend the great Boston show.

Opening day had a record breaking attendance in spite of the rain and drizzle provided by the weather man. After the show on the evening of the first day the association gave its annual banquet to exhibitors at the Copley Square Hotel.

Wednesday, as is the custom, was Veteran Fanciers' Day, and was celebrated in the evening by a feast of the veterans, who, while they banqueted, enjoyed reminiscences of the "good old days" to which distance lends so much enchantment. Those present, however, seemed mighty well pleased with present day progress and development.

Those present were: W. H. Brackett, Boston, age 84; F. B. Breed, Clinton, 78; M. L. Hervey, Worcester, 76; H. B. Coffin, Newton, 73; F. B. Perry, Brockton, 73; C. W. Richardson, Rhode Island, 72; C. B. Travis, Brighton, 71; Dr. W. H. Lott, Bellona, N. Y., 70; Frank C. Fowler, Connecticut, 67; W. H. Sylvester, Brockton, 65; Frank L. Fish, Boston, 65; C. A. Ballou, Worcester, 64; P. H. Freeman, Fitchburg, 63; George Urban, Buffalo, 62; Frank C. Nutter, Maine, 60; Dr. C. W. Coolidge, New Hampshire, 60.

Exhibits this year by the manufacturers of incubators and brooders and dealers in poultry equipment and supplies

First prize White Wyandotte cockerel at Ohio State Show. Bred and owned by Ira C. Keller, Prospect, Ohio.

were unusually fine and attractive and the various booths and displays were thronged with interested visitors throughout the show. As is always the case, the chick hatching and flocks of little downy youngsters in various types of brooders caught the crowd and sowed the seed of "hen fever" deep in the systems of many who came out of curiosity but went away determined to have a try out with poultry anyway.

The same old objectionable knock down and drag out soliciting policy seemed to be in vogue with many of the booths along poultry journal alley. We were button-holed by several solicitors for 50 cent papers who offered us their publications "free" if we would only give our name and address; "just turn over the pages and see all you get free," and winding up with an appeal "for just 25 cents to cover postage." Some went so far as to offer us two magazines a whole year for 25 cents. We wonder just how much value there is for the advertiser in such circulation. Of course he has to help pay for it. American Poultry Journal sold at a dollar a year throughout the show and our solicitor sent in a good number of new subscribers.

The judges of poultry at Boston were: C. A. Ballou, Buff Wyandottes and S. P. Plymouth Rocks; A. J. Braun, Polish; W. H. Card, Rhode Island Reds and Black Leghorns; M. L. Chapman, Campines; Frank Conway, Dorkings; M. H. Coffin, Partridge Wyandottes and Pheasants; J. H. Drevenstedt,

Partridge Plymouth Rocks, Silver and Columbian Wyandottes and American Dominiques; Arthur G. Duston, White Wyandottes; E. H. George, White Plymouth Rocks; H. B. Gleezen, Pit Games; John Kriner, water fowl and turkeys; W. G. Minich, Hamburgs, Games and Game Bantams; Richard Oke, Orpingtons and Spanish; F. L. Platt, Columbian Plymouth Rocks and Langshans; H. N. Rollins, Light Brahmas; F. W. Rogers, Dark Brahmas, Anconas and Brown Leghorns; Hugh A. Rose, Ornamental Bantams; Rowland Story, Minorcas; H. P. Schwab, Golden Wyandottes and Cornish; D. P. Shove, Houdans, Buckeyes and Buff Leghorns; C. H. Welles, Barred Plymouth Rocks; C. A. Wheeler, S. P. and Black Wyandottes; Geo. W. Weed, Cochins, Buff Plymouth Rocks and White Leghorns.

Following is a list of poultry classes compiled from the official catalogue:

#### Poultry Classes Boston Show, January 7 to 11, 1913.

Variety.	Cocks.	Hens.	Cock- erels.	Pullets.	Pens.	1913 No. in Totals. 1912.
Light Brahmas	9	13	10	12	7	79
Dark Brahmas	4	5	2	4	0	23
Buff Cochins	6	8	9	13	4	56
Partridge Cochins	3	4	2	5	3	29
Black Cochins	1	4	2	5	1	17
White Cochins	0	0	1	1	1	7
Black Langshans	5	10	10	9	1	39
White Langshans	1	2	1	3	0	7
Buff Langshans	0	0	1	1	0	2
Barred Plymouth Rocks	16	25	48	46	12	195
White Plymouth Rocks	21	29	54	44	16	228
Buff Plymouth Rocks	10	10	13	11	2	54
Partridge Plymouth Rocks	11	12	17	15	6	85
Columbian Plymouth Rocks	6	5	11	9	3	46
Silver Wyandottes	10	6	9	11	3	57
Golden Wyandottes	6	9	8	12	3	50
White Wyandottes	24	24	50	50	13	213
Black Wyandottes	1	3	1	4	0	9
Buff Wyandottes	9	9	11	12	1	46
Partridge Wyandottes	3	5	4	4	1	21
S. P. Wyandottes	11	13	18	21	0	63
Columbian Wyandottes	13	18	21	19	10	121
Blue Wyandottes	3	4	1	1	1	14
Buff Columbian Wyandottes	1	1	1	1	0	4
American Dominiques	3	3	5	3	1	19
S. C. Rhode Island Reds	18	21	41	26	13	171
R. C. Rhode Island Reds	13	10	22	17	4	82
White Dorkings	1	1	0	0	0	2
Colored Dorkings	1	1	1	1	0	6
Silver Grey Dorkings	12	16	6	9	0	48
S. C. Buff Orpingtons	18	14	31	37	15	135
R. C. Buff Orpingtons	1	2	0	0	0	4
S. C. Black Orpingtons	13	17	18	20	7	103
Blue Orpingtons	3	3	7	8	1	26
S. C. White Orpingtons	16	24	17	21	14	148
R. C. White Orpingtons	1	3	2	2	0	8
A. O. V. Orpingtons	1	2	1	3	0	7
Crested White Orpingtons	0	0	0	0	1	5
Buckeyes	5	5	3	4	0	17
Rhode Island Whites	0	0	0	0	1	5
S. C. Brown Leghorns	5	5	13	9	1	37
R. C. Brown Leghorns	4	4	4	3	0	15
S. C. White Leghorns	12	20	23	19	6	104
R. C. White Leghorns	3	3	6	3	2	39
S. C. Buff Leghorns	6	7	9	7	2	39
R. C. Buff Leghorns	1	2	1	1	0	5
Black Leghorns	2	6	8	6	2	32
Blue Leghorns	1	1	1	1	1	9
Silver Leghorns	0	1	1	1	0	3
S. C. Black Minorcas	2	3	8	7	0	20
R. C. Black Minorcas	13	18	14	18	4	93
R. C. White Minorcas	1	1	1	1	0	4
Blue Andalusians	3	5	3	3	1	19
Black Spanish	5	11	9	11	0	36
Mottled Anconas	7	16	12	19	1	59
Houdans	4	3	10	6	6	53
White Houdans	0	1	0	0	0	1
W. C. Black Polish	8	8	6	6	5	53
Silver Polish	1	1	1	1	0	4
Bearded Golden Polish	2	2	0	0	0	4
Bearded W. C. White Polish	0	0	0	0	1	5
Bearded Silver Polish	3	6	3	5	0	17
Buff Laced Polish	3	4	0	1	0	8
Blue Polish	1	1	0	0	0	2
Creve Coeur	0	1	1	1	0	3
Sicilian Buttercups	0	1	4	3	0	8
Black Hamburgs	13	21	20	27	2	91
Golden Spangled Hamburgs	5	7	8	14	1	39
Silver Spangled Hamburgs	14	22	17	19	3	87
Golden Penciled Hamburgs	1	3	2	2	0	8
Silver Penciled Hamburgs	1	2	1	2	0	3
Silver Campines	6	7	12	11	5	61
Golden Campines	2	6	7	6	2	31
Faverolles	2	2	2	2	0	8
Lakenvelders	1	1	1	1	0	4
Dark Cornish	3	3	4	4	0	14
Red Laced Cornish	1	1	2	4	0	8
Red Caps	1	1	1	1	0	4
Erminettes	1	0	0	1	0	2
Games	11	16	18	17	3	77
Game Bantams	10	11	16	16	2	63
Ornamental Bantams	23	32	25	31	3	126
Silkie	0	0	2	2	0	4
Fekin Ducks	3	3	3	3	1	17
Rouen Ducks	2	0	2	4	0	8
Call Ducks	5	2	2	2	0	11
East Indian Ducks	1	1	2	2	0	6
White Muscovy Ducks	1	0	0	0	0	1
Indian Runner Ducks	1	3	5	3	0	12
White Indian Runner Ducks	0	0	3	5	0	8
Buff Orpington Ducks	1	2	0	0	0	3
Bronze Turkeys	4	8	8	7	0	27
White Turkeys	1	2	1	1	0	5
Red Turkeys	1	3	2	1	0	7
Pheasants	0	0	0	0	0	10
Guineas	0	0	0	0	0	2
Geese	10	10	10	12	0	42
Total poultry (not including displays)						3,722
Total pigeons						2,133
Total rabbits						23
Total caviar						62

Exhibits of eggs, dozens.....	61
Exhibits of dressed poultry.....	10
Exhibits of dressed pigeons.....	22

Grand total (not including displays)..... 6,081  
Total, 1912..... 5,645

In addition to the exhibits included in above lists were many attractive displays, including: Water collection by G. D. Tilley, Darien, Conn., of Wood Ducks, Mandarin Ducks, Formosan Teal, Green-wing Teal, Blue-wing Teal, Pintails, European Widgeon, Baldpates, Chiloe Widgeon, White-faced Tree Ducks, Red-billed Tree Ducks, Fulvus Tree Ducks, Black-billed Tree Ducks, Call Ducks, Mallards, Sheldrakes, White-fronted Geese, Snow Geese, Indian Bar-head Geese, Swans, Canadian Geese, Indian Ducks, Brazilian Ducks, Australian Ducks and Red Head Ducks; also displays by same exhibitor of Peafowl, Cranes, Flamingoes and Secretary Birds. Otsele Farm, Whitney's Point, N. Y., had displays of water fowl, Silkies, Pheasants, Guineas and Phoenix Fowl. Massachusetts State Agricultural College exhibited 21 pairs of popular fowls. There were displays of Barred Plymouth Rocks by A. C. Hawkins, Lancaster, Mass.; Grove Hill Poultry Yards, Waltham, Mass., and Tywacana Farms Poultry Co., Framingdale, L. I. Tywacana Farms also had displays of White Plymouth Rocks and S. C. White Leghorns; Paul Klingbeil, Walpole, Mass., display of Partridge Plymouth Rocks; Rockandotte Farm, Southboro, Mass., White Wyandottes; M. R. Jacobus, Ridgefield, N. J., Golden Campines; Frank L. Andrews, Fall River, Mass., W. C. Black Polish; Old Acres, Foxboro, Mass., S. C. R. I. Reds; H. F. Davenport, Fall River, Mass., S. C. R. I. Reds; Harris Fisher Poultry Farm, Wayland, Mass., Light Brahmas; Albert Ellsworth, Athol, Mass., Anconas; Miss Margaret Mahaney, Concord, Mass., turkeys; E. G. Pond, Needham, Mass., pheasants; G. D. Tilley, Darien, Conn., pheasants.

We were pleased to find some of the good old varieties coming back, showing strength in quality and numbers. As a whole the judging of the show was satisfactory and there was very little complaint.

Judge Drevenstedt commented favorably on the quality of the American Dominiques which were in the winnings and said that they were the real old fashioned "Dominicker" and a type that should be preserved. We went over the birds with "Drev." and with A. Q. Carter, of Maine, and found the birds with the blue ribbons the most typical of the variety in size, shape and coloring of any which we have seen of late years. If the breeders will hold to this type and keep away from the Barred Rock style in shape and coloring we look to see Dominiques once more as popular on the farm as they used to be.

Buff Cochins were back again in goodly numbers and it was like old times to see the big fluffy fellows displayed once more by Oakland Farms of Taunton, which for a number of years has not exhibited this good old variety, although in earlier Boston shows these big strings were one of the leading features. The first pen were imported birds which were reported as winners at the Crystal Palace, England, show. Partridge Cochins, though fewer in number, were fine in quality and in Cochins alley we found our old friend Adolph Anderson, as enthusiastic as ever over his favorites, and he explained to us that the first cockerel and the winning five pullets were out of a single setting of eight hens hatched June 7. The cockerel was an exceptionally broad backed, fine, large, well colored specimen for so young a bird and the pullets were excellent in size and coloring. These birds are now owned by Edwin W. Dwight, of Framingham, Mass. Last season the strain was owned by Col. Clark and for many years before that the whole line was owned and bred by Geo. W. Mitchell, Bristol, Conn., under the direction of his poultry superintendent, Mr. Anderson.

Black Langshans were shown in good numbers and fine quality. We were particularly pleased with the first cock shown by Urban Farms, Buffalo, N. Y. There were also exhibits of White and Buff Langshans, but the latter variety does not appeal to us as one that will command much interest.

Barred Plymouth Rocks made a strong class and we found some of the young birds much to our liking, although the craze for fine, narrow barring seems to be being carried pretty close to the limit. Two of the pullets which pleased us most were in the Grove Hill Farm display pen and not in the competition. While the color was fine, it was the size and shape that particularly attracted us. There was fine length and breadth of back with good depth of body, tails well spread at base and legs set well apart. Combine such qualities with health and sprightly carriage and it should give practical values as well as show excellence.

White Plymouth Rock classes would have made a good poultry show all by themselves. There were some exceptionally fine birds in all classes and we did not hear any kicking over the way the ribbons were placed. In White

Rocks, Graves Rockandotte Farm, Southboro, Mass., first pen pleased us most. The birds were well matched and finely conditioned, the color was just about right, but it was the size and shape that pleased us most with this pen. The male was a fine shaped, big bird, possibly a little heavy, but not too heavy to suit New Englanders, who want size and weight in this variety. The females were fine in shape, size and color. We liked the length, breadth and depth of these birds and the angle at which the tails were carried, as well as the evidence of good substantial weight.

Other Rock classes were good. There were some fine Buff and Partridge Rocks that showed good type, and in Columbians we were glad to see better size as well as improvement in color markings.

White Wyandottes were a "blue banner" exhibit and Judge Duston enjoyed himself hugely while judging the classes. Arthur Duston surely loves a good Wyandotte and he had ample opportunity to handle some fine ones at Boston. His judging was a credit to himself and the variety. It was consistent all the way through. We were glad to see true Wyandotte type and shape, with a tendency to firmness of feather, taking the blue ribbons. John S. Martin came down from Port Dover, Canada, with a big string of fine birds and landed four blue ribbons on birds that are pretty close to our ideal for White Wyandottes. We had the pleasure of going over the classes with him and handling the winners, and it sure did give us a relapse of "Dotte fever." J. W. Andrews, of Dighton, Mass., captured first on pen.

There was good quality in Silver and Golden Wyandottes and in the Partridge and Silver Penciled varieties. Buffs were good in color, but many of them shy on Wyandotte type and shape. The winner of shape (male) special, while Wyandotte from head to hocks, was more the shape of an R. I. Red from hackle to tail tip. We would like to see more attention given to true Wyandotte characteristics in this variety. There were several better shaped males in the class than the winner. Columbian Wyandottes showed gains in numbers and quality and there were a number of specimens of fine shape, type and color. Among the newer varieties of 'Dottes on exhibition were the Blues and the Buff Columbians. Black Wyandottes carried good classes.

Orpingtons seemed to be holding their own in popularity in spite of reports that the boom had been on the wane. Buffs showed the strongest classes, with Whites and Blacks following close to the leaders. A new applicant for favor in the Orpingtons was an exhibit of a Crested White variety. This did not look to us much different from the common crested white fowl to be found in most farm flocks and we do not look for it to find favor until some individuality has been put into the breed to give it type and strength of breed characteristics.

Rhode Island Reds, in both combs, were in fine fettle with the same tendency to run into deep mahogany coloring and big birds, "the bigger the better to sell 'em," as some of the breeders say. We believe we like a brighter red and a smaller, neater bird. For practical purposes we think it a mistake to go beyond standard weights for this variety and our inclination would be to have them under rather than over standard weights.

There was plenty of interest in Leghorn and Minorca classes and all along the line in other varieties there was plenty of excellence and standard quality. It is not our intention to attempt a review of the whole show, as Judge Schwab is to make his usual report on the show and a veteran judge and breeder has promised us a review of both New York and Boston shows for an early issue.

We put in quite a little time in the pigeon exhibit, which was larger and better than ever. The pigeon breeders, with their systematic pedigree breeding from single pairs, certainly have worked wonders in color markings. Some of the color combinations would win a fortune for the man who could reproduce the same effect in a breed of poultry. Wonder why no one has made a persistent attempt to get away from the usual patterns in poultry colors. It ought to be possible to get something really new. The pigeon fancier handles color schemes in plumage with the deftness of the artist who works in oil colors.

Next Boston show is to be held January 13 to 17, 1914, and our fanciers are already getting busy with plans for exhibiting there. The utility men would do well to follow their example and plan ahead for the 1914 exhibition if they really want to be properly represented. We know Manager Atherton will welcome suggestions and will be glad to co-operate with everybody interested to make the next Boston show still better than his latest and best. Make your plans now and work them up through the year and then you will have the pleasure of knowing that you have done your level best to win, even if the judges do not hand you ribbons when the awards are all in next season. Get busy!

65,000 A. P. J.'s FOR FEBRUARY, 1913.

State of Illinois, County of Cook, ss.:  
G. M. Atwell, president of the Atwell Printing House, Chicago, being duly sworn, certifies that the American Poultry Journal has contracted for printing and binding sixty-five thousand copies of the February, 1913, issue.

G. M. ATWELL,  
Subscribed and sworn to before me this  
21st day of January, 1913.  
(Seal) HENRY G. EISERT,  
Notary Public.

#### OUR GUARANTEE.

We guarantee our subscribers against loss due to fraudulent misrepresentation in any display advertisement appearing in the American Poultry Journal, providing the subscriber when ordering the fowls or merchandise states that the advertisement was seen in the American Poultry Journal, and places the order during the month or months in which the ad is inserted in our columns and notifies us of the fraudulent misrepresentation of the advertiser, giving full particulars, as soon as it occurs.

#### The "War" On Egg Prices

Chicago, New York, Philadelphia and Boston, as well as a number of smaller cities and towns witnessed, during December of the present winter, a somewhat sensational and spectacular "war" on egg prices, or, as the yellow journals put it, "busting the egg trust."

Certain earnest women of the Housekeepers' League combined with other earnest women in a movement which was intended to help lower the "high cost of living." They joined forces with certain sensational newspapers and with certain gentlemen, whose motives the public might be interested to have explained. The high price of fresh eggs as exploited in the papers was made the object of attack. We don't doubt the honesty of purpose and motive on the part of the many women who were drawn into this movement, but we have no doubt that a good many of them are now wondering whose chestnuts they were instrumental in pulling out of the fire.

Early in December when the crusade started there was an over-supply of eggs in storage. Reports of greater production on account of mild winter weather and slightly increased receipts had a panicky effect on certain merchants who held large storage stocks. The price of storage eggs began to drop, though the nearby fresh eggs at first held fairly firm.

When the "egg war" began prices of all grades of eggs had begun to decline and in some large reliable grocery concerns "selected storage eggs" were already selling at 25 cents per dozen. A Mr. Cassidy of Philadelphia, was prominently identified with the "war" on egg prices, and through him a large proportion of the eggs which were sold by the women's leagues were obtained. Though he was urgently requested, by the women leaguers in a public meeting, to disclose the source

#### SUBSCRIPTION PRICE.

United States and Mexico, 1 year, \$1.00;  
3 years, \$2.00.  
10 cents a copy of all newsdealers.  
Canada, 1 year, \$1.25; 3 years, \$2.75.  
Foreign, 1 year, \$1.50; 3 years, \$3.50.

Look at the address on your wrapper. See that it is absolutely correct and notify us of any mistake, no matter how slight. Note the expiration date which appears thereon, as American Poultry Journal stops with the issue marked on your wrapper.

If you change your address give both your old and new address as well as your subscription number when notifying us of the change.

AMERICAN POULTRY JOURNAL is the oldest poultry paper in America. It has a national and world-wide reputation. The best writers on poultry matters contribute to its columns. It receives the patronage and endorsement of the foremost representative breeders of standard poultry and manufacturers of poultry appliances in the country.

of his egg supply, he refused to do so. Egg stations were established by women in various parts of the several cities, and some made use of delivery wagons, and selected storage eggs were sold at 24 cents and in a few cases 22 cents a dozen. These eggs were represented as "eggs as good as the best." Statements were freely made that eggs really ought to sell the year 'round at 15 cents a dozen, that the price of eggs had been permanently broken, that some of the eggs sold were really fresh gathered and were being sold below cost just to break the extortionate prices which had been charged previously.

Now, as a matter of fact, practically all of the eggs sold by the "Leaguers" in this crusade were candled storage eggs. Mr. Cassidy in a public statement said that they were selected eggs from stocks placed in storage in April, 1912, that they had been candled and from one egg to four eggs per dozen thrown out as unfit for food. There you have it. A good many families were introduced to a quality of storage eggs that they had never before used in their households.

Some storage egg merchants were quite jubilant over the crusade and said they welcomed it as a demonstration to the public of the real value and wholesomeness of the storage eggs. A large grocery firm, however, made a public statement that puts another light on the matter. They said that they had been selling storage eggs at 25 cents a dozen for several days before the crusade started and declared that the demand created for storage eggs by the crusade meant a saving of many thousands of dollars to dealers who had been paying storage on large lots of eggs and which would in a few weeks have dropped to 15 cents a dozen. In other words, the activity of the women in breaking an "egg trust," that did not and does not exist, enabled a lot of merchants who were "long" on

storage eggs to unload their oversupply stocks at a good profit, instead of having to hold them a few weeks longer and sell at a loss. That is one way to "lower the high cost of living" by selling 15 to 19 cents worth of eggs at 24 cents.

Some customers of the "trust busters" complained that the eggs purchased had flat weak yolks and that there was a tendency, when the egg was broken, of the white and yolk to run together. That is a common failing of eggs of the quality of many that were sold by the crusaders. You can't get something for nothing, and real fresh laid eggs in winter cost too much to produce to admit of selling at storage egg prices.

The activity in storage eggs, the weather conditions and reports of heavier receipts and greater production cut the price of fresh laid eggs badly. In two weeks the wholesale price of real new laid eggs was cut from 55 to 39 cents per dozen. We were cut in price \$4.80 per case on eggs within two weeks in December and the increase in production was not enough to help much.

So much has been said about the wonderful profits to be made with poultry and so many remarkable tales of poultry profits have gone the rounds in newspapers and magazines, both as reading matter and as advertising, that those who don't keep hens are beginning to believe that 60 cents a dozen for fancy quality new laid eggs between Thanksgiving and Christmas time is nothing short of robbery.

Back on the farm where the hens shift for themselves, and where no care is taken of the fowls or eggs, the farmer sometimes gets as low as 8 to 12 cents a dozen for his eggs. That is because such eggs have been proved to be of doubtful quality and frequently have a number of bad eggs to the dozen. We don't want that sort of eggs ourselves and would rather go without.

We want a well-fed strictly new laid egg, one that will stand up firm and bright when opened, and one that has a good flavor. When we lived in the city we paid 50 cents a dozen the year round for eggs that we knew were properly fed and new laid, and we did not consider the price exorbitant.

The man who went from Maine to California and said he "found one sort of food the same everywhere and that was eggs," had a peculiar taste or lack of taste. We want our eggs fresh laid and we are particular how the hens are fed. It makes a difference. When we buy eggs we want that difference and we are willing to pay for it, and we know that there are a lot of people who feel the same way about it. There will be a lot more people who will insist on having real fresh eggs after they have been well dosed with the "selected storage" variety and have an opportunity to compare them with real well-fed fresh eggs.

The exact cost of production of well-fed, new laid eggs has yet to be determined. Necessarily it will vary a good deal with the location, local conditions and the number of hens kept, as well as the manner of keeping them. When reliable figures are obtained which include cost of housing, labor, and other cost of operation, as well as the cost of food consumed, it will be found that new laid eggs of the best quality cannot be sold at 24 cents a dozen the year around.

Ten years ago, when the writer lived in Wenham, Mass., we were selling eggs at retail at the door from Thanksgiving to Christmas, at 75 cents a dozen, and the consumers were so eager to get them that they engaged them well in advance. We did not hear any talk about extortion and extreme high prices at that time. During the same period in 1912 very few eggs changed hands at such figures, and in most cases which came to our notice, 65 cents was the top figure, with a few selling at 72 to 75 cents per dozen for selected large dark brown eggs. The prices on new laid eggs during November, 1912, up to the time of the slump in prices in December, were not very different from what they have been the past five or six years. The extravagant stories of "eggs at a dollar a dozen" and the enormous profits to be made in keeping hens for egg production, all tend to hurt the price of eggs. It takes very little publicity of the sort we had in the fall and early winter of 1912 to check consumption, lessen demand, and ruin prices.

When the figures are obtainable we believe that it will be demonstrated that it costs nearly three times as much to produce fall and winter eggs as it does to produce spring eggs. Also the net earnings of the average egg farm will be less per fowl on the high priced eggs of winter than on the low priced eggs of springtime. A good many egg farmers, when eggs are selling at 40 to 50 cents a dozen are really making very little above actual operation and production cost, owing to short yield, and they have to depend on the heavy production of low priced spring eggs to balance their earnings for the year and show a fair profit. We believe that a fixed price the year around for well-fed, choice, new laid eggs, would be much better for both consumer and producer. It would enable the egg farmer to go ahead with his work with the knowledge that he would be sure of a fair return for his labor and investment. Forty

cents a dozen every day in the year would, under present conditions, be a fair and just price for such fine quality eggs.

There are a good many drawbacks in egg farming on a large scale. It takes very little to interrupt egg production and change the balance from profit to loss. Operating cost with small flocks is seldom considered of much account, but when the flock grows from 100 to 1,000 the increased operating cost is considerable, and when the flock reaches 2,000 head, or over, the operation cost and risk of loss is proportionately much greater. Backyard flocks that feed largely on waste, and where labor is considered of little or no account, cannot be compared in cost of keep or in returns with large egg farm flocks, though when estimates are made such small flocks are frequently used to figure paper profits.

During 1912 the cost of feeding a hen a year on an egg farm carrying 2,000

a dozen the year through to show \$2.40 profit per hen. These estimates are for eggs of first quality, and eggs only, they do not consider chickens, sales of breeding stock or anything but eggs, those are in another department and should be considered separately. The assumption is also made that the first cost of the layer and her value as market fowl at the end of the year are practically the same. Not much indication of that alluring advertised \$7.00 to \$9.00 profit per hen here is there?

A man may be able to direct a 1,000 hen egg farm and attend to other business interests if he is fortunate with his hired labor, but when he makes the flock 2,000 or over he will find that it demands most of his time. A man who can successfully direct and conduct an egg farm, and produce first quality eggs that are properly fed, wholesome and desirable, is entitled to a fairly good salary—as good as he could get

PERFECTION III.

First prize Rose Comb Black Minorca cock at Madison Square Garden, January, 1913. Bred and owned by G. A. Clark, Seymour, Ind.

hens or over was not far from \$2.00. To this must be added about \$1.00 per hen more for housing, labor, and other operating expenses. That would make the twelvemonth upkeep for the egg farm hen about \$3.00 per hen for 1912. The cost of carrying only sufficient males for necessary breeding is figured into this estimate. A large flock should average 12 dozen eggs per hen per year. That includes marketable eggs and cull eggs. There will be a good many cull eggs, broken, cracked, small and dirty eggs, that have to be sold below the market price for best quality eggs. Washed eggs cannot be included in shipments of best quality, new laid eggs, without cutting the price on the whole lot. At above figures the egg farmer would have to get 30 cents a dozen for all eggs the year around to show an actual net profit of 60 cents per hen for the year; or 35 cents a dozen to show \$1.20 profit per hen; 40 cents to show \$1.90 profit; and 45 cents

through the same effort in other successful business. Egg farming, and the necessary chick hatching and rearing that go with it, calls for long hours at work, a good deal of hard work, confining work that is difficult to get away from, and a good deal of "overtime."

Suppose a man has a farm worth \$6,000.00 with buildings, that he winters 2,000 head of layers that stand him not less than \$1.50 per fowl, that the food for stock costs him \$4,000.00 a year, and that the operation expenses and labor cost him about \$2,000.00 a year more. Then bear in mind that he has to stand bad seasons as well as good seasons, that he has to look ahead to endeavor to "hit the market right," and that high prices for produce seldom come with high cost foodstuffs, high upkeep and high cost of living. (At least, it hasn't worked that way). If he gets 40 cents a dozen the year around for his eggs, less shipping expenses, it may mean that he gets \$3,-

00.00 a year as his own salary, including the interest on his investment. He has the risk of loss, and with such a flock he will come in for a good deal of hard manual labor as well as the main work of the enterprise. There are a good many things which can happen to knock \$500.00 off that annual return and he is liable to strike one or two off years in each ten that he will be fortunate to pull through with a five per cent profit on his investment. The egg farmer certainly earns his money and no one ought to begrudge him fair return for his labor. Personally we would like to see first quality new laid eggs go to 40 cents a dozen f. o. b. the egg farm and stay there the year through. For honest first quality goods it would be a fair price and much more in keeping with the real value of the product than are the prices of many other commodities.

Comparatively few egg farm eggs ever go into storage, they cost too much to produce and the live producer is alert to find a regular outlet at top prices,—he has to be. The great bulk of storage eggs, like those used in the recent crusade, are eggs that are collected by egg depots, collectors and country groceries and sent into market by large lot shippers. These eggs come from small and large farm and small lot flocks, from fowls that are largely scavengers that feed on waste and in the dung heaps. The eggs are gathered hit or miss, any old way, and the quality, which makes the price, is nothing to brag about. The producers get from 8 cents to 15 cents a dozen for these eggs, the price being governed by the average number of bad eggs found in the lots when candled. The 8 cents is frequently taken in trade at the store by the housewife and she counts her egg receipts all gain as the fowls have to pick up their own living as best they can. Such eggs cannot fairly be compared with the well produced fine quality product of the egg farm. When the government gets firmly established in its work of educating the farmers up to taking care of the fowls and producing better quality eggs and giving them better care, such producers will find that they have to get a better price for better goods and they will demand it.

Meantime the "egg war" is a thing of the past, the oversupply of storage

stocks was worked off and it is doubtful if the public will again stand for the same sort of game for some time to come. New laid egg prices are mending. Possibly they might have dropped as low as they did without the crusade. While the price still holds at cold weather figures; the wise producer will endeavor to make a contract to dispose of his entire output at fixed price the year through and there should be plenty of consumers who will contract to pay 35 to 45 cents a dozen for guaranteed well-fed new laid eggs.

### Does Commercial Egg Farming Pay

One of our subscribers sends us the following editorial clipped from the December 21, 1912, Country Gentleman and asks if the statements are true according to our experience and observation. Here is the editorial question:

#### "Fifty Per Cent on Poultry?"

"A popular magazine presents an astonishing story of an egg farm that is making an income representing fifty per cent profit on the investment! The author has not heretofore been known as a humorist and the magazine presumes to look upon the farm industry seriously. This could be passed as a jest were there not so many earnest inquirers concerning profits in poultry. To them it is misleading.

"One of the leading government authorities on poultry raising was recently heard to say that he did not know of a single commercial egg farm that was paying ten per cent upon the investment. In fact, he knew of but very few that were to be counted successes at all. Even the farm hen who digs up her own food and finds her own shelter can show no such alluring profits as this writer mentions. There are enough handicaps in poultry raising without the addition of such extraordinary statements."

Just at the present time the commercial poultry business is suffering from too much publicity of the wrong sort. There have been too many wonderful tales of wonderful profits, too many lists of figures that lie, too much

newspaper talk about the exorbitantly high prices of winter eggs, and too much of "taint so" and "'tis a lie" on the other side.

We know of very few "commercial egg farms" that are operated exclusively as egg farms. Most of them raise chickens, sell broilers, roasters and fowl. We don't know all the inside facts about the many successful poultry farms which we have visited. There are not many successful men in any business that would open their books for publication without restriction. You can't expect a man to publish the actual items of his business expenses and receipts, but when you see that he is prosperous and continues in business year after year you can be certain that the business is paying him or he would be seeking other employment that calls for less work and shorter hours. Following is a statement which came to us January 1st from a gentleman who "egg farms" one thousand hens as a side line. His yield is not remarkable, probably just about average, but he is pleased:

#### Record of One Thousand Pullets.

Month.	Marketable Eggs Laid.	Value.
January .....	9,300	\$ 271.25
February .....	11,200	336.00
March .....	17,050	312.58
April .....	19,500	373.75
May .....	18,600	341.00
June .....	16,500	316.25
July .....	13,950	325.50
August .....	9,300	240.25
September .....	9,000	270.00
October .....	6,200	222.16
November .....	6,000	250.00
December .....	6,200	222.16

Totals ..... 142,800 \$3,480.90

Average number of marketable eggs per hen for the year, 142.8 eggs.

Average price per dozen received, 29¼ cents.

Amount invested in farm, houses, horse and equipment, \$4,500.00.

Value of pullets at beginning of year, \$1,250.00.

Value of fowls on hand December 31, \$1,250.00.

#### Memo.

All food for 12 months for 1,000 hens and 1 horse.....	\$2,120.00
Labor for year, including board and washing .....	600.00
Taxes on farm, stock and buildings .....	40.00
Depreciation, repair and loss (acct. poultry) .....	80.00
Express on eggs for year....	138.90

Total expense ..... \$2,978.90

Received from sale of marketable eggs ..... \$3,480.90 |

Value of cull eggs used at home and sold at door..... 100.00

Total ..... \$3,580.90

Net profit on eggs from 1,000 hens one year, \$602.00.

The farm was used for other purposes besides poultry. The horse and labor were used for other farm purposes besides poultry. In view of these facts and the further information that the proprietor was able to attend to his regular city business besides overseeing his farm, that the family had a comfortable country home with the good things that go with it and enjoyed the best of health; it would appear that in this instance commercial egg farming as a side line paid rather bet-

## WHITE ORPINGTONS

### An Established Strain with an Established Record

Write for catalogue giving list of winnings at Madison Square Garden, Chicago, Buffalo International, Cleveland, Allentown, Hagerstown and Pittsburgh. We have supplied hundreds of guaranteed winners and have started thousands of people in the chicken business with breeding stock at moderate prices, quality considered. We are now booking orders for winners for the fall and winter shows, in Single Comb as well as the new Rose Comb White Orpingtons, on payment of a small deposit.

BRED AND OWNED BY  
LAWRENCE JACKSON - HAYSVILLE, PA.

ter than ten per cent on the investment.

The gentleman who furnished us these figures positively declines to have his name and address made public. He is experimenting with egg farming as a side line on his home farm with a view to keeping as many fowls as his farm will accommodate and that one poultryman can care for. He pays his poultryman \$25 a month with board and washing which he considers is the equivalent of a salary of \$600 a year.

It will be noted that in October, November and December the egg yield was only about 20 per cent for the flock; in January, August and September, 30 per cent; in February, 40 per cent; in July, 45 per cent; in March and June, 55 per cent; in May, 60 per cent, and in April, 65 per cent. The pullets were of American varieties and were purchased at \$1.25 each.

Most egg farmers with whom we are well acquainted do not claim a profit from eggs alone of more than one dollar per hen per year above cost of food and that dollar has to pay for operating expenses and interest on the investment. We believe that most of them make a profit better than one dollar per hen above cost of food. In the statement here given it will be noted that the thousand hens paid a profit of a trifle more than \$1.20 per hen above cost of food and other expenses, not including labor, and that after paying \$600 for labor the profit to the credit of each hen was a little more than 60 cents per bird. Our friend says that the way he figures it his poultry for market eggs exclusively are paying him about 12 per cent on his actual investment in egg farming, in-

cluding labor, and he considers that very good.

We will be pleased to receive actual facts and figures from egg farmers who are willing to make a report of actual investment, expenses and receipts. Names and addresses will not be published if we are so requested, but we would prefer to have permission to publish names as a guarantee of the statement.

E. T. DeGraff

At the annual meeting of the American Poultry Association, held at Niagara Falls, N. Y., August, 1909, Mr. E. T. DeGraff, of Amsterdam, N. Y., was found guilty of conduct unbecoming a member and was expelled from the association. Previous and up to that time Mr. DeGraff was an extensive advertiser in our columns, but since that time his advertising has not been admitted to our pages until this issue.

Believing that his exclusion for over three years has been sufficient punishment, and upon his assurance that it is his intention to set the pace for square dealing in all his transactions in the future, we have again accepted his contract for advertising and his ad appears in this issue.

We believe that everybody who is at all familiar with the Rhode Island Red history for the past ten years will admit that it was largely through Mr. DeGraff's efforts that this variety came to be the popular fowl that it is today, and in our opinion this is a further reason that he should again be given the privilege of advertising in our columns.

There is no doubt but what Mr. De-

Graff has made some serious errors and has done that which would have been better left undone; but who is there among us who has not made errors? Therefore let us be charitable and trust that Mr. DeGraff, in the future, will profit by the errors made by both himself and others in the past.

### Political Pot Boiling

At this season of the year it is becoming customary for candidates for the various offices in the American Poultry Association to make announcement of the fact that they are candidates for nomination. We take pleasure in informing our readers that we have received communications from the following gentlemen, informing us that they are candidates for either re-election or as new members of the American Poultry Association: Mr. S. T. Campbell, Mansfield, Ohio, informs us that he is a candidate for re-election to the position of secretary of the American Poultry Association and on his past record asks the support of the members of the association and assures us that in the future, as in the past, he will conduct the affairs of the association in the same businesslike manner that has proven successful during the past three years. During the time that Mr. Campbell has filled this important office we have seen the American Poultry Association grow in numbers from a few hundred to several thousand. Of course, all the credit does not belong to Mr. Campbell, but we believe that a large share of it does, as he has certainly handled the affairs of the association, so far as his office was con-

# REGALS AT BOSTON

Crusader III, a Boston Winner

After a series of unparalleled winnings in the leading shows of the United States and Canada **MARTIN'S REGAL WHITE WYANDOTTES** win their crowning triumph at the great Boston Show January 6—11, 1913. They win as follows—Arthur G. Duston, Judge: Cocks, 1st and 6th; Hens, 1st, 4th and 5th; Cockerels, 1st, 3d and 4th; Pullets, 1st, 3d and 4th; Pens, 2d, 3d and 4th.

First Display with a score of 72 points, which is the highest score ever made in White Wyandottes at the Boston Show.

American White Wyandotte Club ribbons for best Cock, Hen, Cockerel, Pullet and Display. A. P. A. Diploma for best Cockerel. Special for best three Cockerels and three Pullets, and \$100 Challenge Cup for best Female. My exhibit of Regal White Wyandottes was the sensation of the show, and my four Blue Ribbon winners were praised by judges and breeders as models of Wyandotte type. This winning in the leading White Wyandotte show of America places the Regals far in advance of all competitors.

2,000 Cocks, Hens, Cockerels and Pullets for sale of the same breeding as the winners. Send 4 cents in stamps for the Regal White Wyandotte Book, the finest book ever published dealing wholly with the White Wyandotte. Catalogue and mating list free.

Eggs for hatching from prize matings \$5 per 15, \$9 per 30, \$24 per 100. Special matings \$10 per 15, \$25 per 45

**JOHN S. MARTIN :- BOX 51 :- PORT DOVER, CANADA**

cerned, in a very businesslike manner, and, we are informed, without a single complaint and we certainly wish Mr. Campbell every success in the coming campaign.

We are also in receipt of a communication from John A. Murkin, Nashville, Tenn., who informs us that he is a candidate for the office of secretary of the American Poultry Association at the coming election. There is no doubt but that Mr. Murkin can fill this office with entire satisfaction, as he is a man of good business and executive ability.

Mr. W. C. Denny, business manager of the American Poultry World, Buffalo, N. Y., makes the announcement that he is a candidate for membership of the executive committee of the American Poultry Association. Mr. Denny has been a member of the association since 1901 and was a member of the 1910 revision committee and assures us that if elected he will do his utmost to serve the best interests of the association and the poultry breeders in all sections of the country.

Mr. S. J. Hopper, Dallas, Tex., who is at present vice-president of the American Poultry Association, and therefore a member of the executive board, makes the announcement that he desires to be elected a member of the executive board at the coming election.

The American Poultry Journal has a very friendly feeling toward all of the above candidates, but as we do not use our columns for political purposes, we do not recommend any particular candidates, as we believe that it is up to the rank and file of the American Poultry Association to make their own selection in matters of this kind.

#### Retirement of H. V. Crawford

As previously announced, Mr. H. V. Crawford, who has conducted so many successful poultry shows in Madison Square Garden, New York, has laid down the reins, and no more will this "grand old man" be burdened with the great responsibilities of conducting this, the greatest poultry show in America. As a fitting climax to his long and successful management the last show surpassed all others in quality, number of birds and attendance. Upon the retire-

ment of Crawford the New York Poultry, Pigeon and Pet Stock Association elected Mr. Charles D. Cleveland as his successor. Therefore Mr. Cleveland has taken up the reins laid down by Mr. Crawford and next year this great show will be under his management.

The association certainly made a wise selection, as Mr. Cleveland is well qualified to fill an important position of this kind and he takes up his duties with the best wishes of his hundreds of friends in the poultry world.

#### A Grand Achievement

For the past twenty-five years the poultry breeders from all parts of the country have looked forward each year to the coming of the Madison Square Garden Show; have given their time, skill and money in their endeavor to produce birds that would win at this great show. Many have been the disappointments after the awards were placed. During all these years the Barred Plymouth Rocks have led in numbers at this show, and consequently in this variety the competition has been the keenest, as it is here each year such well-known breeders as Hawkins, Thompson, Latham, Bright, Bradley and many other Barred Rock breeders meet in battle royal for the honors.

The class of Barred Plymouth Rocks at the late Madison Square Garden Show was simply superb, and for that reason the winning made by E. B. Thompson, Armenia, N. Y., stands out as a grand achievement. He made a magnificent exhibit of fifty-six birds and won the following prizes: First, second, sixth and eighth on cockerels; first and sixth on pullets; first, second and fifth on exhibition pens; first on cockerel mated pen; second, third, fourth and fifth on cocks; the imperial prize of the show sweepstakes special for champion male; sweepstakes special for champion female; diploma presented by the American Poultry Association for best cockerel; sweepstakes cup for best Plymouth Rock hatch in 1912, male or female, in variety; challenge silver cup for best exhibition pen; special best shaped male; special best shaped female; special best colored male; special best colored female; best cock, cockerel, hen and

pullet; four best cockerels; four best pullets; \$25 special prize presented by the New York Show for finest display. All silver cups and cash specials.

Mr. Thompson is certainly to be congratulated upon this grand winning, but this accomplishment only goes to prove what can be done where a man devotes his time, money and experience in aiming to accomplish a certain end. It has taken a great many years for Mr. Thompson to breed his Barred Plymouth Rocks up to their present high state of perfection, but he always had one object in view and that was the improvement each year over what he had produced the previous year, and as long as he continues along this line he will continue to produce more and better Barred Plymouth Rocks.

#### Not A Candidate

We recently received a communication from Robt. H. Essex, Buffalo, N. Y., in which he requests us to inform those interested, that he is not a candidate for the presidency of the American Poultry Association; that while he fully appreciates the honor of the proposal, the New York branch presidency together with the work of assisting in the preparation of the Market Poultry and Egg Standard take up all the time he can afford to devote to this branch of work, and wishes to thank his many friends who, at New York and Chicago shows, urged him to accept the nomination.

#### A Correction

In our report of the Chicago show in our January issue, the statement was made that Carl D. McCarthy, Kempton, Ind., made his winnings on Single Comb Rhode Islands Whites. Mr. McCarthy breeds only the Rose Comb variety.

We also stated that he won cup for best shaped male. This should have been best shaped Rhode Island White.

Williamsport, Pa., Jan. 14, 1913.

Geo. H. Rudy, R. 15, Mattoon, Ill.

tained in your December issue, would say that while I agree thoroughly with him in the majority of his statements, yet I do not agree with him that it is the egg farmer that is responsible for the present prosperous condition of the poultry business.

The fancier, in my opinion, has brought the business up to its present height, and his enthusiasm and never-ending work in developing birds, and finally bringing them up to the high mark set by "The Standard" is, in my opinion, responsible for the great number of people who have taken up poultry raising in late years. It is the fancier who is the heart and soul of our poultry associations, and who works overtime to put on our shows. While the egg farmer may "grow two blades of grass where one grew before," yet the fanciers in our section, by careful work and attention to their business, are well satisfied with the results of the past year, and are ready to start 1913 with the same idea of securing results and profits by the breeding of standard bred poultry only.

Respectfully submitted,  
Geo. J. Hanks.

#### DR. WOODS' NOTES AND COMMENT.

The big shows now over, it is time to get busy with the breeders and hatch out another bunch of better winners for next season. Incidentally, some A. P. A. politics are hatching. Several folks have a "hen on."

E. B. Thompson, Amenia, N. Y., is a candidate for next president of the American Poultry Association. He has entered the lists after careful consideration and at the earnest solicitation of his many friends in the fancy. Some other very capable men have been mentioned for the office and they are very good friends of ours, but, nevertheless, we would like to see a fancier of Mr. Thompson's standing and ability the next occupant of the presidential chair and we believe that it would not be dif-

ficult to make the election practically unanimous.

Present secretary S. T. Campbell, Mansfield, Ohio, is a candidate for reelection to the position of secretary of the American Poultry Association. Mr. Campbell is a conscientious worker and is very much in earnest in his efforts for progress and a truly representative organization. He has the advantage of being thoroughly familiar with the work and the association should be able to turn his experience to good account if he is kept in his present office.

Samuel J. Hopper, of Dallas, Tex., is putting up a vigorous personal cam-

Type and markings of one of Riverview's Ancona cockerels. Bred and owned by Willard J. Thorniley, Marietta, Ohio.

paign for a place on the executive board of the A. P. A. The editor from the Lone Star state will never be described as bashful or lacking in aggressiveness in asking for or taking what he wants. In Mr. Hopper's announcement of his candidacy he says: "I have been and am now in favor of open meetings of the executive board EXCEPT when, by a majority vote of the board, they deem the nature of the question under discussion prohibits an open meeting." The capitals in the

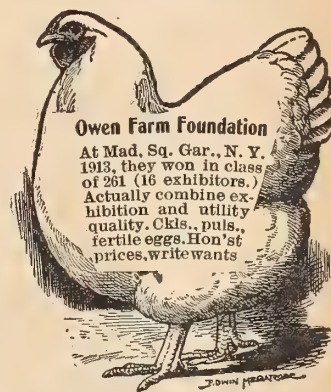

word "except" are ours as the clause which follows makes the statement without any value as any indication of real support of open doors at executive board meetings. Why quibble? Either a man believes in open meetings or he doesn't.

Another candidate for the executive board is Lewis G. Heller, of Bridgeton, N. J. Mr. Heller is a poultry judge.

John A. Murkin, of Nashville, Tenn., urged by his friends, has authorized the use of his name as candidate for the office of secretary-treasurer of the A. P. A. Mr. Murkin has many friends who have promised to support him for office.

There is a lot of criticism of the parcels post. We hope it will all work out so that we will get a truly practical and permanent parcels post that is as good as that operated by the British government. Some magazines are busy telling us that we have been handed a "gold brick" in the present parcels post system, that it is only an "imitation" and that in many cases the zone

## WHITE WYANDOTTES

## KEELER'S WHITE WYANDOTTES

### The Aristocrats of the White Wyandotte World

They combine size, shape, style, head points and, above all, the power of reproduction, having been line and pedigree bred for the last nineteen years. They possess the best blood lines in existence.

### The World's Greatest Strain

Of the world's best breed. This strain has established more successful breeders than any other strain. This strain produces a larger per cent of high class birds than any other. Have produced the winners at America's leading shows for the past nineteen years, i. e., Chicago, Kansas City, Indianapolis, Cleveland, St. Louis World's Fair, New Orleans, Denver, Los Angeles, etc. The strain that you must have to be successful. Better buy them first as last. Start right by starting with Keeler birds.

### EGGS EGGS EGGS EGGS EGGS EGGS ETC.

For the season of 1913 I have made sixteen of the grandest matings that have ever graced Keelersville. They contain most of my prize winners at Topeka, Kansas, December, 1911-12, and the best birds raised the past three years. Sons and daughters of these great birds. They are bred right and mated right to produce the winners at America's largest and best shows next season the same as they have done in the past. My 60-page 1913 art catalogue of America's finest White Wyandottes, describing the sixteen best matings in America, free for the asking (stamps accepted). Eggs, \$5 per 15, \$9 per 30, \$14 per 50, \$25 per 100. Eggs from special matings, \$10, \$15 and \$20 per 15. 500 cocks, hens, cockerels and pullets in selected breeders at from \$15 to \$150 a pen. State your wants clearly and address, mentioning American Poultry Journal.

Keelersville, Chas. V. Keeler Proprietor and Mgr., R. 11, Winamac, Ind.

system makes the cost of using the mails almost prohibitive, and that in some cases it is cheaper to use express. Further comment suggests that it is the intention of politicians to make our parcels post so cumbersome and costly that it will be abandoned and the business again turned back to the private interests controlling the express companies. The matter is worth your careful consideration and investigation. Read up on what is doing in parcels post in other countries. Find out what the parcels post will do for you. One writer claims that Great Britain has a flat contract with one of our express companies to carry all packages delivered here by British post, regardless of weight up to eleven pounds and regardless of distance anywhere in the United States, for the small sum of 24 cents per package. That means that the British parcels post can deliver an eleven-pound package from New York City to San Francisco for the small sum of 24 cents. To send the same weight package the same distance by our own parcels post would cost \$1.32. Look it up and find out the facts for yourself. It might be worth your while to write your representative in Congress and ask him why the citizens of the United States cannot have equally as good a parcels post service as the people of other countries.

Newspapers are informing the public that the parcels post will now permit the farmers to deliver new-laid eggs at his city customer's door at the modest price of 25 cents per dozen. We don't believe that many egg farmers will enthuse over that proposition after they investigate, and we would like to have

our newspaper friends explain how it can be done. An egg package to hold one dozen eggs, such as has been approved by the postal authorities, costs about 6 cents. It weighs empty about 12 ounces. Packed ready for shipment with a dozen eggs it will weigh about 40 ounces. To deliver 40 ounces in the 50-mile zone costs 11 cents, in the 150-mile zone 14 cents, and in the 300-mile zone 17 cents. Suppose you have a customer in the city, 25 or 30 miles away, who orders a dozen eggs and sends you a quarter to pay for the eggs and delivery. The container costs you 6 cents; it won't cost you much less than 3 cents' worth of time and labor to pack the package and deliver it at the post-office, and the postage costs you 11 cents. That makes a total of 20 cents to get the eggs to your customer and you have 5 cents left out of your quarter to pay you for the eggs. Can't you see the grand rush to get into the mail-order egg business on this basis? Would you do it? Will you attempt it? We figure that we can make a flat rate for best quality table eggs the year round delivered by parcels post in the 50-mile zone of 60 cents a dozen in orders for three dozen in same delivery. On any other basis it don't interest us.

Egg prices in eastern markets stiffened a bit for the middle of January on the best near by fresh laid eggs, but did not get back to normal winter prices. The continued mild weather helped to hold the price down. Most feeding grains started to climb in price soon after the first of the year. With the eggs for hatching season coming on and production increasing there is opportunity to make good in spite of mar-

ket conditions. We note that some writers tell us that the break in winter prices did not hurt the producer of best quality fresh-laid eggs and that the crusade against egg prices with consequent unloading of large storage stocks "will have the effect of keeping up the prices on strictly fresh hennery eggs during the balance of the winter." Wonder if they know what they are talking about. There are still some pretty heavy stocks of storage eggs that are being carried over into February in hope of a chance to unload at better prices. It will take a mighty cold wintery February to help prices much in an upward direction. We would like to have some of the "knockers" on egg prices tell us what it costs to produce "strictly fresh hennery eggs." When you put down the figures don't fail to figure operation, labor and upkeep expenses of the egg farm as well as the actual cost of feeding the fowls.

\* \* \*

We acknowledge a number of poultry supplies sent to the Director of American Poultry Journal Experiment Station, Silver Lake, Mass., by parcels post. These will be given careful test and if the tests warrant it will be reported in A. P. J. later on.

any certificate of transfer from the Connecticut State Branch, of which he was formerly a member. Here is a tangle for the Executive Board to straighten out. What becomes of a man's branch membership when he changes his legal residence from one state to another, and what provision is made for transferring members from one branch to another?

\* \* \*

We are just a bit interested ourselves, as we joined the American Poultry Association from Middleton, Mass., August 14, 1907. We have maintained a legal residence in Massachusetts ever since we reached voting age in 1891, but since 1907 we have spent a good deal of time out of the state—in fact, spent about three years in western New York, and part of that time our address in Proceedings of the Association was given as Buffalo, N. Y. Within a few months after our return to Massachusetts from Buffalo the Massachusetts State Branch recognized us as a branch member without question. We were unable to attend the 1913 meeting, and we are wondering whether the Branch considers us a member or not.

#### ATLANTIC CITY WANTS NEXT MEETING OF A. P. A.

The New Jersey branch of the American Poultry Association hopes that every member of the association will vote for Atlantic City. Inasmuch as St. Louis, Denver and Nashville have had the last three conventions, Atlantic City is the logical place to hold the next convention, sentiment laid aside.

Furthermore, it is a well known fact that Atlantic City is the convention

city of the United States. Ample hotel accommodations at reasonable rates can always be obtained. No city offers better railroad rates than Atlantic City during the summer season. This is a well known fact.

The big poultry plants of the East are within an hour to three hours ride—New York city, the metropolis of the East, is but three hours; Philadelphia, one hour, with almost hourly trains.

A reception, clam bake, chair ride on the famous boardwalk, a bath in the ocean, good lectures by the best experts in the country are a few of the things the New Jersey branch has outlined for the entertainment of the members.

The New Jersey branch is making every effort to make this the largest and best convention ever held, which is saying much in view of the past conventions at Denver and Nashville. One thing the members of the American Poultry Association can rest assured of is that they will have cooling sea breezes and a dip in the ocean should a hot spell be on. One can always find comfort on the piers and boardwalk in the hottest weather.

The New Jersey branch welcomes all the members, and if they are not entertained to their satisfaction it will be because Atlantic City has lost its charm and the members their ability.

Vote for Atlantic City, where cool breezes sing, the state of big poultry plants and big things.

J. H. Wolsieffer,  
Chairman Publicity Committee.

A recent census of the agricultural students at the University of Missouri engaged in the short course work shows

the following interesting figures: Out of 180 students enrolled in the General Farm Poultry Course, eight states were represented and fifty-eight counties in the state of Missouri. Less than ten of the boys came from the city and, including these in the census, it was found that the average farm poultry flock is about 180 chickens.

Mr. Charles D. Cleveland, who will succeed to the management, is just the right man for the place—a capable breeder and a man of brilliant qualities and executive ability. He is respected by all who know him and will receive the support of every breeder with honest desires for the success of America's Greatest Show.

Mr. Richard Oke, London, Ont., has been mentioned for member of the A. P. A. executive committee. This suggestion meets our approval to a dot. Mr. Oke deserves well of the members for his is another life devoted to the success of poultry and poultrymen. Sir Richard, we wish you success.

#### "DON'T BE A CLAM."

Some one said of fishing. "A fish on one end of a line and a fool on the other." I have a lingering suspicion that the biggest fool of all was the man who said that. He never gets Darlington's S. C. Wh. Leghorns, which proves my suspicion.

Darlington Egg Farm. Alfred P. Edge, Box B, Darlington, Md.

## BABY CHICKS—U. R. Fishel's White Plymouth Rocks the Best in the World

### Get All My 1913 Improvements in This Great Peerless Incubator

**D**O not think of buying any incubator anywhere until you have learned about the marvelous improvements I have perfected this year. Make no mistake. You want the machine which hatched 2,200 chicks from 2,400 eggs for A. Groshell, of Tacoma. You want the machine which hatched 2,156 Pekin Ducks and 540 Chicks for Wm. Redeker. He says he lost less than 5% of ducks and chicks hatched.

100,000 poultrymen are Peerless enthusiasts—every one a successful poultry raiser, everyone making handsome poultry profits, every one a Peerless booster.

Peerless records everywhere are the sensations of the poultry world. There's no taking chances with a Peerless—no guess work. If there's a chicken in an egg, a Peerless will hatch it.

### Peerless Incubators

Are the Best on Earth

#### My Big Book Tells All

**Saves Money.** It describes in detail my wonderful Acme fixtures. It tells how you can get the best—absolutely and finally the best—incubator in the world and save money in the bargain, by buying Peerless Incubators disassembled, complete with all fixtures, ready for you to put together yourself in a few hours' time. Anyone can do it. This book is the greatest incubator book of the year. It tells too, about

#### Big Money in Custom Hatching

the wonderful, new and profitable way to make money in poultry with my brand new 500-egg unit machines. Each unit complete and self-contained. No outside heating plants, no boilers. The only successful 500-egg machine ever built. Learn about

#### My New Moisture Generator

which can be attached to any incubator, old or new, and assures perfect moisture always. Every incubator on earth should be equipped with this new generator. Send for this book right now—tonight.

**This Is Why:** Peerless Incubators are made with my famous Acme Automatic Fixtures. For over twenty years the most successful men in the poultry business have used Acme Fixtures. The very latest and best that my skill and experience can produce—my 1913 improvements are all yours in a Peerless Incubator.

The Peerless Automatic Vapor Heating System.  
The Peerless Automatic Moisture System.  
The Peerless Automatic Ventilating System.  
The Peerless Acme Automatic Lamp.  
The Perfected Acme Trip Burner.  
The Acme Tandem Double Compound Thermostat Regulator.

These are the exclusive patented fixtures that make the Peerless Incubator the greatest and surest hatcher. There are no other fixtures like them. I guarantee my Automatic Lamp with the trip burner will save half of your oil. I guarantee my Tandem Double Compound damper and flame regulator wipes out large operating expense and trouble. I guarantee my Automatic Vapor heating system, Automatic Moisture system and Automatic Ventilating system are the biggest incubator improvements you ever saw on an incubator.

H. M. SHEER, Dept. 13, Quincy, Illinois

Make Your Old Machine New  
My famous Acme fixtures, lamps, tanks, regulators, etc., etc., can be placed on any incubator. Fix up your old machines with my fixtures and make them modern hatchers. Don't repair an old machine of any make until you talk to me.  
—H. M. SHEER

# QUESTIONS AND ANSWERS

Questions will be answered in this department only when full name and address is signed by the writer.

Conducted by Prince T. Woods, M. D.

## Meat Food.

Q. Which is the best way to feed meat and bone—the commercial meat scraps or green bone procured from the butcher and cut at home in a bone mill?

Will the latter furnish enough meat for the flock or is it necessary to feed meat in addition to the ground bone? I understand that green cut bone contains about 45 per cent water while the commercial scraps contain little or none. In view of this, therefore, how much more by weight should the green bone be fed than the scraps?

Any information about meat feeding will be appreciated. The literature from scrap manufacturers claims that scraps are far superior to bone, while the bone cutter men claim green bone is the best. Therefore I am appealing to you for correct information.

St. Louis, Mo.

F. E. P.

A. The man with goods to sell naturally claims all he can for his goods. We have yet to receive a sample of a really good poultry feeding beef scrap from the St. Louis market, but that does not mean that you cannot get good scraps there. The West is flooded with a good many brands of mighty poor scraps that are only fit to be used as fertilizer. Our experiment station will be pleased to report an opinion on samples of meat scraps at any time.

A good beef scrap should have a rich meaty odor which is intensified when scalding water is added. It should not have a foul odor and if it stinks when scalded it is not fit for feeding. The color should be a rich warm brown, neither too dark nor too light. It should have a granular and slightly oily feel and may contain coarse particles of bone and hard cooked meat. It should not be lumpy and if full of lumps which show white in center on breaking it is not fit to feed. It should not contain bristles or bits of wool. The moisture content in good scrap is a little below 2 per cent.

We sometimes feed beef scraps in a

dry or moist mash, but prefer to feed it plain from a food hopper and keep it before the birds all the time. After the first day they will not overeat. You can't reduce feeding to a matter of exact weights and proportions and get results. We get best results when we let the birds have what they want and all that they want of it.

It is not necessary to feed both green cut bone and beef scraps. If you can get good sweet wholesome beef bones cheap enough and all you want of them cut bone makes a good meat food. It heats or spoils quickly when cut. It varies a good deal in quality. Carelessly fed it causes indigestion and diarrhoea. With us we cannot get the bone at a price we could afford to haul it and cut it. We could not get a regular or dependable supply. It does not keep well and requires more labor for the food value than we care to put into it. Therefore, we use the best beef scraps we can buy. They cost us less than bone, are more easily used and handled and give us good results. Cut green bone can't be hopper fed with good results. It must be hand fed and care taken to avoid a gorge. Frequently it contains undesirable germs and parasites that may start trouble in your flocks.

## Preserving Eggs.

Q. Please give some information about preserving eggs. Give the best method. Cannot infertile eggs be preserved with less trouble than others?

Berea, Ky.

G. H. F.

A. There are a good many methods of preserving eggs but the only one that we have found at all satisfactory is the waterglass method. With a waterglass solution eggs can be kept from six to ten months and be in very good condition for all culinary purposes except boiling. If such preserved eggs are to be boiled the large end of the egg should first be punctured with a needle just before cooking.

Sterile or non-fertile eggs are best for preserving. They should be fresh gathered and should be clean. They can be packed in wooden kegs, galvanized iron tanks, stone crocks or glass jars. A 10 per cent solution of waterglass is usually considered the best for preserving. It is poured over the eggs when cool and allowed to stand a few inches above the top level of the eggs. The container is covered and kept in a cool room, free from foul odors, until the eggs are wanted for use. One bad egg in a container may spoil the whole lot. The eggs when removed from the solution may be rinsed, dried and then used as any other eggs except when boiling.

Waterglass, or soluble glass, is a syrupy silicate of soda having a specific gravity of about 1.12. It can be obtained from druggists and costs from sixty cents to \$1 per gallon depending on where and how you buy it. It should be practically colorless. To make the solution for preserving eggs add to one pint of the waterglass syrup nine parts of boiled water and stir well. The water may be added when warm. Let the solution become cold before it is used to cover the eggs.

## Breeding Questions.

Q. (1) Would it be advisable to breed a cock to his own pullets where no relationship had existed before? He is a very vigorous bird and both he and the pullets have fine size.

A. (1) It all depends on what you are breeding for. If you want to hold family characteristics of the cock that is the way to do it.

Q. (2) Would it be all right to breed a Barred Rock cock of the best blood in the world and a perfect show bird if he had a few yellow feathers in hackle but not brassy?

A. (2) Probably.

Q. (3) Please give your opinion on mustard for poultry as a tonic, the kind and the amount to feed and how often.

A. (3) The only mustard we have tried recently for poultry is French's poultry mustard. We are not yet ready to give an opinion on mustard feeding. It appears to be a good condiment to brace birds up when not in the best of condition. The proportions recommended are one pound of the mustard added to from 200 to 500 pounds of dry mash. It should be thoroughly mixed in. For first trial use one pound to 500 of dry mash food or about that proportion and increase gradually.

Q. (4) Last year my chicks couldn't get out of the shells. They would pip all right on the twenty-first day but they could not get out and did not seem to be ready to hatch as they would bleed to death if helped out.

Sharon, Conn.

S. J.

A. (4) Either the breeding stock was not in good condition or the eggs were kept at too high a temperature while saving for hatching or kept too long, or the incubation was faulty.

## Don't Lay.

Q. I would like to know why my

## DIRK'S RED MITE KILLER

One application kills all mites and prevents their reappearance during the season. Keeps fowls free from body lice. Make scaly legs bright and clean. Keeps lard pastry and sweets free from ants. Bedbugs give no trouble where used. Will ship one trial can to be paid for when satisfactory to user. Price—Quart, 50c; half-gallon, 85c; 1-gallon, \$1.50, or \$1 cash with order pays for one trial gallon. Booklet free.

M. E. DIRK, BOX 102 : NORTH BALTIMORE OHIO  
Marshall & Marshall, Distributors for Canada, Niagara Falls, Ontario

## "OCULUM"

OCULUM that we believe any honest poultry raiser will pay us when he "knows it does the work." At your dealers, or if you prefer, cut out this ad today and mail to us and we will trust you to do right by us.

Hancock Inoculation Company, Box B, Salem, Virginia. Write your name plain. Please send me a \$1.00, 50c bottle of OCULUM. I will test it fifteen days: if satisfied, will pay you; if not, will return what I have not used.

Name..... Address.....

Question:  
Answer:

## HOW TO GET TOP PRICES FOR EGGS

Don't sell your eggs as fast as they are laid. A new way has been discovered to keep eggs positively fresh for years. Preserve your eggs—then hold them till market supply is low and prices are high. Use Sibil Egg Preservative Compound. Write at once for handsomely illustrated circular explaining how to keep eggs fresh and sweet for any length of time, sent FREE. Every poultry owner should have a copy. 75c a pint, \$1.50 a quart or \$5 a gallon. Just address SIBIL EGG COMPOUND CO., 167 W. WASHINGTON ST., CHICAGO, ILL.

chickens don't lay. I have a good poultry house all covered with tar paper and arranged so that they get plenty of fresh air. It is 5½ feet wide, 6 feet high and 9 feet long. I have six pullets and one cockerel in it, White Plymouth Rocks. For morning feed I give one pint of oats in litter. At noon I give a moist, crumbly mash made of bran, chop of corn and oats, meat scraps and a little salt. The night food is a ready mixed scratch grain. This is fed in litter. I keep grit, shell and charcoal before them in hoppers. They have fresh water three times a day. As

green food they have mangels, beets and cabbage. I feed the beets at noon and keep cabbage always hanging where they can get it. I clean the coop every day. They seem happy and contented and are singing all the while. Their combs and wattles are good and red. They work for all their food except the mash and mangels. Am I feeding too much or not enough? I give 1½ pints of mash at noon.

Madison, O.

L. W. L.

A. In all probability your pullets were just about to lay when you wrote us in January. We don't like the idea

of feeding by measure. It is a better plan to give the birds all they will clean up or to keep food before them in feeders. The danger of their getting too much is very remote. We always encourage our layers to eat all the food they will. Possibly you have given your fowls too much attention. Such frequent attendance is liable to discourage egg production. We prefer a variety of wholesome whole grains to feeding so much ready mixed scratch grain. Would also prefer to keep beef scrap before them in a hopper to feeding it in a mash, and we would not feed a

# FRENCH'S POULTRY MUSTARD

Patent Applied For

ABSOLUTELY PURE

**WE** SINCERELY regret being obliged to call your attention to the fact that certain unscrupulous supply houses, taking advantage of the demand that has been created for FRENCH'S POULTRY MUSTARD, have been substituting cheap and inferior Mustard products where the poultry fancier has only asked for "Poultry Mustard" or "Mustard for Chickens."

We have seen samples of some of these articles and they possess practically no value at all. FRENCH'S POULTRY MUSTARD is a scientifically manufactured article, containing the flours of different Mustard seeds, so blended as to produce the greatest strength in the volatile principle that is desired, and that is required to produce the fortunate results arrived at by Mr. Allen.

In asking for Mustard for this purpose, ask for FRENCH'S POULTRY MUSTARD. See that you GET French's Poultry Mustard. The name "FRENCH'S" will protect you and in the future French's Poultry Mustard will only be sold in original packages, under unbroken seal. Shipments in barrels and in 100-lb. packages will be shipped direct from the factory. All other packages will have our name and the seal unbroken. Do not accept Bulk Mustard, and see that our label is unbroken.

Experiments were successfully made in England in 1909, 1910 and 1911 to stimulate egg production, increase vigor and fertility of fowls by the use of mustard. Send us your name and address and we will send you free of charge a copy of a pamphlet as edited by Mr. Ralph Allen, of Herts, England, the conductor of the experiments. The book contains a full account of the experiments extending over the years named, together with a number of testimonials of prominent American users of French's Poultry Mustard. The first issue of 20,000 copies was entirely exhausted within eight weeks of our first advertisement. The second issue is on the press, and contains added testimonials, and will be sent free on application.

French's Poultry Mustard is used and recommended by Edward Corning of the "Corning Egg Farm," Bound Brook, N. J., by "Corning himself," E. B. Thompson "Ringlets," Amenia, N. Y., The Urban Farms, Buffalo, N. Y., Grove Hill Poultry Yards, Waltham, Mass., Haldie Nicholson, Leominster, Mass., and by a great majority of the prominent breeders, and is sure to be used by all. The great egg farms use it regularly, pronouncing it invaluable.

The London Feathered World says: "Poultry Mustard not only increases the egg yield but improves fertility."

One of our best known breeders and a judge writes: "I have used Poultry Mustard regularly during the Winter months, with the result of not only increased yield of eggs, but the stock has been remarkably free from colds and the eggs from my exhibition lots are proving very fertile."

We are adding more dealers daily. If your dealer is not mentioned or does not handle it, send us his name.

French's Poultry Mustard is an actual improvement upon the mustard used in England during these experiments. One teaspoonful of French's Poultry Mustard for every six fowls is the right amount. Mix it with the dry meal first and then add water until in a crumbly consistency. For Dry Mash use 1 pound French's Poultry Mustard to 200 to 500 pounds of feed according to conditions and requirements of your stock. Mix with a small amount first then with the entire lot. French's Poultry Mustard can be obtained of any dealer for 20c per pound in 6 and 10-pound boxes, 25-pound kegs, or a sample package of 1½-pound can be had for 35c. If your dealer does not have it, write the R. T. French Company, mustard makers, Rochester, N. Y.

"MUSTARD'S EFFICACY FOR INCREASED EGG PRODUCTION, FERTILITY AND STAMINA IS INDISPUTABLE"

THE R. T. FRENCH CO., DEPT. A, ROCHESTER, N. Y.

warm wet mash as frequently as you do.

### Frozen Comb—Double Yolked Egg—Roup.

Q. (1) What can I do for a cockrel's frozen comb?

A. (1) If noticed soon after freezing, or before it has a chance to thaw, rub the comb well with snow or cold water until you get the frost out. Then dry and apply camphorated vaseline and rub it in well until comb is thoroughly softened to nearly normal condition. If it is a case of old and neglected frost bite simply rub the parts well with carbolated vaseline and then let nature take care of the rest.

Q. (2) What can I do for a 1½ year old hen that lays a double yolked egg every third day?

A. (2) You can't do anything that will do any permanent good if you mean that you wish to prevent the laying of double yolked eggs. If you put her on a starvation diet for a while you may get her to lay a certain percentage of normal eggs after she has trained down a bit, but when she is well fed for egg production you are liable to get double yolked eggs again.

Q. (3) Give a good remedy for roup. Paterson, N. J. P.

A. (3) For roup mix a tablespoonful of creolin or any good cresol disinfectant with a gallon of soft warm water in a galvanized iron pail. Hold affected bird's mouth open with your finger and plunge its head into the solu-

tion, sousing it well but taking care not to drown the bird. If nostrils are caked or gummed up, remove the crusts and dip the bird again. House in open front quarters and you will usually find that one treatment does the business. In severe cases you may have to use the dip two or three times about three days apart.

### Poultry House Changes.

Q. I want advice on contemplated changes in my poultry house. The inside measurement is 10 x 20 feet. There are two windows 5 feet three inches long by two feet 9 inches wide to the south. I wish to lower these windows and put double canvas in the upper openings. Do you think this would be too cold or too much air for the birds at night. The windows at present are too high to allow much sunshine on the floor.

Richmond, Ind.

D. E. R.

A. Don't use the double canvas screen. If you wish lower the windows and leave the upper openings open, cover with fine wire screen only.

### Building a Poultry House.

Q. I intend to build a new poultry house this spring. Do you think it would be all right to line it with tar paper and put laths and boards over it and then paint the outside and whitewash the inside of the house? I intend it to be an open front house. Would it be all right to put the perches length-

wise or should they be crosswise of the house? Do you think it would be cheaper to build it of piano boxes or to buy lumber and build it?

Milwaukee, Wis.

R. S.

A. Unless you can get the piano boxes very cheaply so that it pays to salvage the lumber and nails in them it will be cheaper to buy lumber of suitable kind and dimensions for building your house. Dimension lumber will yield a better house and save time and labor. We would not line the house. Choose a good plan for open front house. Frame it well and put up with single wall. For roof and sides we like shingles best but a good flint surfaced roofing will serve to cover roof and sides and has good lasting qualities. If you use either shingles or roofing, common covering boards are plenty good enough to make the walls and roof. Put the roosts in rear of house across the rear end.

### Blank Bars on Orpington Feather.

Q. I am sending you a Black Orpington feather and would like to know the cause of the eaten out or blank bars on same. Is the trouble caused by a parasite?

Sonora, Mex.

C. J. B.

A. There is such regularity in the fine cut out sections of the feather that it suggests injury from chafing against sharp edges of wire screen or having been purposely scratched out with some sharp instrument. Lice will eat out parts of feathers in same manner but we have not seen any where so regular a pattern has been cut out. Acting on above suggestion, look over your poultry quarters and let us know what you find.

### Deformed Chicks.

Q. I raise Barred Plymouth Rocks and each year have a trouble that I have never seen mentioned. My chickens grow well and look prosperous until about three or four months old, then about 20 per cent of them show a deformity such as crooked backs or one side lower than the other. Kindly advise me.

Great Bridge, Va.

W. T. F.

A. If you are having the same trouble year after year we would recommend that you stop breeding from the same old stock and try hatching eggs from new stock that you know to be strong, healthy and vigorous breeders. There is something radically wrong with any strain that regularly throws 20 per cent of chicks that show bone deformities of that sort before they are half grown. Get a new foundation stock. You can't hope to build up a satisfactory flock on a poor foundation.

### To Break Up Broody Hens.

Q. Please explain a good way to break up a broody hen.

Meriden, Conn.

A. C. D.

A. Make a slat coop with a slat bottom, slats about two inches apart. Suspend it by a rope from the center so that it will just balance when empty. The dimensions of coop don't matter so long as you make it big enough to hold a few hens. We have one about 3 feet by 3 feet by 18 inches. Put the broody hens in this coop as soon as they are found on the nest at night. Let them stay in coop about three or four days and give water only, no food. Then let them run with the flock. It usually takes three days in the coop to break up the broodiness and in three days more the bird is ready to lay again.

## VIERHELLER'S BUFF ROCKS

Special sale of last year's prize winning cocks and hens. This is your chance to get something good.  
VIERHELLER BROS. : 17 SYLVANIA AVENUE : PITTSBURG, PENNSYLVANIA

## CHAMPION BUFF WYANDOTTES

Again prove their superiority above all others at *the great Chicago Show, December, 1912*. In one of the *largest* and *best classes* of Buff Dottes ever cooped, we won:

**1st, 2d Old Pens**  
**1st Young Pen**  
**2d, 4th Cocks**  
**1st, 3d, 5th Hens**  
**1st, 2d Pullets**

Shape and color specials. Also *championship silver cup* for *best display*. Our handsome illustrated *mating list* mailed free. Please mention A. P. J. when writing.

**Besuden Bros., Box 359B, Cincinnati, Ohio**

# Notes from the Southwest

Conducted by H. H. Stoddard, Riviera, Texas

## NATURAL OR ARTIFICIAL, WHICH?

**T**HERE IS NOT today in the whole country, a thoroughly experienced fancier or commercial poultry raiser who does not know, even if he does not acknowledge that, as a generalization, hen-hatched and hen-brooded chickens are stronger and more thrifty than those hatched and brooded artificially.

An instance is that of a very large poultry farm, catering for both fanciers and for the food market, and having a heavy trade in baby birds. An experienced editor visited this farm and made "a book about it," for the proprietors. After a description of the admirable system by which department after department was run, and of the thorough organization of the artificial incubation work, and the main nursery in particular, and showing how the owners kept tab on everything, and accumulated statistics, it was quietly mentioned that, "in order to give them the best of care the chicks intended for future breeding are hatched and reared by hens!" In another place we read, "In order that there may be no chance for getting them (the breeding stock) mixed, they hatch and raise these by hens."

**Great Guns!** A great and costly establishment carrying on many different lines of trade, and bearing evidence of strict method all through is unable to put its young chicks destined for breeding stock, somewhere on an extensive farm to keep them from getting "mixed" with the ordinary ignoble birds, unless they are hatched and reared under hens. "Tell that to the horse marines, the sailors won't believe it." A part of the farm was set apart for the nature-hatched and reared younglings, and a special and well-conceived system for the sitting hens, and mothers with their broods was carried out. All this because the intellectual force of this establishment, one of the finest and most successful in the world, and one where as much executive ability has been shown, or more, than in the case of any other poultry ranch on the globe, could not have hatched out the choice selected eggs in some of the incubators in the long hatching room without the chicks escaping and climbing into the incubators that contained the common herd! And the brains of the proprietors could not contrive to keep the chicks separate, so that they could "give them the best of care" if they were incubator hatched!

I want to bear testimony that the book mentioned is a fine one, very ably written and exceedingly valuable to every beginner in commercial poultry raising, and that the proprietors have given a big boost to scientific poultry production on a large scale, by publishing it. I only wish that the book had said frankly and squarely, that the natural method produces the best chick-

ens. I digress, in passing, to add that the ability shown in a hundred ways, organizing their immense plant, should have taught its proprietors some way of making young Leghorns feather out naturally, without the necessity of clipping their wings. Something is wrong when this practice is followed.

\* \* \*

## Experiment Stations, Where Are You?

The Oregon Station published a bulletin showing the superiority of natural hatching and rearing, very careful experiments having been carried out concerning the matter, under the supervision of James Dryden, Professor of Poultry Husbandry.

The poultry papers, American Poultry Journal excepted, dare not publish these experiments, though they are among the most valuable ever under-

known that error on their part is liable to be exposed by investigators at stations and laboratories all over Christendom. What unbiased opinion can be expected of a manufacturer or dealer in incubators, and what of the editor of a paper (generally speaking) that has great prominent advertisement of incubators running in its columns? Blessed are they that expect nothing, for they shall not be disappointed. And how can you know when to tie to the opinions of a writer on incubators in the agricultural papers or elsewhere? He may praise or condemn on very insufficient evidence. He may not have studied for over forty years the practical results of incubators as I have, and run them with fairly good success, as artificial incubation goes, and with decidedly bad, too, and manufactured them, though only for my own use in

THE EARLY HATCHED BIRD GETS THE WORM; ALSO THE BLUE RIBBON AT THE FALL SHOWS. A HEALTHY BUNCH OF CRYSTAL WHITE ORPINGTONS ON THE KELLERSTRASS POULTRY FARM, KANSAS CITY, MO.

taken in behalf of the poultry interest.

The Experiment Stations neglect repeating them. Why? Are the professors of poultry husbandry all under the glamour of the alleged labor-saving inventions of the artificial hatcher and artificial brooder? Have they ever read the Bulletin of the Oregon Station? If not, why not? The libraries of their colleges are all supposed to contain this bulletin, and all bulletins, while we poor laymen in seeking knowledge are often chilled with the words, "out of print" or "supply exhausted."

There is a great advantage in having in the State Experiment Station to appeal to, in matters of dispute when the disputants either one or both, are pecuniarily interested. The professors at these institutions are absolutely disinterested. They want the truth. Hunting it down is what they are for. They

experimenting. However, I shall not bespeak for my own egotism any verdict that is not backed by the experiment stations. They are the final authority.

A bulletin of the Oregon Agricultural College Experiment Station is devoted to natural and artificial incubation. Thirteen incubator sets of eggs were hatched in the months of May to July, inclusive, and a large number of hens were used so as to secure trustworthy averages, the purpose of the experiments was to ascertain the comparative efficiency of natural and artificial incubation.

The results were overwhelmingly in favor of the natural method. If the best incubators that can be procured fail to equal hens when the machines are operated by skilled operators, what will the harvest be when Tom, Dick and

Harry and their wives, who are green at the work, undertake to run them? Even when these amateurs have had several years' experience they will not be likely to have acquired the skill of the professor at the station. A large proportion will drop out early after they have played the deadly game with flesh and blood and brought into existence hundreds of weaklings and malformed creatures "born to die."

Quotations from Oregon Station Bulletin No. 100, Aug. 1903, follow:

"Artificial incubation in recent years has assumed large proportions. Large numbers of incubators and brooders are purchased in every community, entailing in the aggregate a large investment of capital. It is admitted that there are great losses in the artificial incubation of eggs and brooding of chicks, and many explanations are given as to the cause. The complaint is that the chicks either fail to hatch, or hatching, they fail to live. Why the embryo should live through the incubation period and die before hatching, is a problem that bothers the incubator operator more probably than any other. It is a keen disappointment to the incubator user to find after the eggs apparently have progressed satisfactorily up to the time of hatching, that 25 per cent of them more or less have failed to hatch. This means a large loss to the poultryman, and if there were no other problem involved in incubation than that of the chicks dying in the shell it would warrant extended investigation.

"The testimony is very conflicting as to the efficiency of incubators. Hatches as high as 90 to 95 per cent of fertile eggs are frequently made, and as low as 25 per cent or less. Some claim that it is in the stock that laid the eggs. This is doubtless true in many cases, for unless the parent stock be healthy and of good vigor the eggs they lay will not hatch well. Some claim that it is easy to hatch the chicks, but hard to raise them. Reports are frequently made where inside of four weeks after being hatched every chick has died. At certain seasons of the year probably 50 per cent of the incubator chicks die. In winter and early spring the mortality is small compared with late spring and summer. The cause of the mortality is usually ascribed to faulty methods of brooding and feeding. The fact that the chick may be hatched with impaired vitality has not been fully recognized, and the evidence of vitality should not be merely that the chick survives the brooding period, but that it comes to maturity with vitality equal to that of the parent stock, and capable of transmitting the same vigor and health to the second generation.

"Eggs for hatching were purchased from farmers near Corvallis, and in starting up a set of incubators and hens

the eggs were divided between them in such a way that one machine would not have an advantage over another, and that the incubators would not have an advantage over the hens nor the reverse. In comparative tests the same kind of eggs, or eggs from the same flock, were put in the incubators and under the hens. In dividing the eggs a basket was carried on the arm and two eggs at a time were put into each lot to be set.

"It is the custom among incubator users in giving the results of a hatch to say that the incubator hatched a certain percentage of the fertile eggs. Frequently large numbers are tested out as infertile, entailing a great loss in eggs, and the hens that laid the eggs get the blame for laying infertile eggs. It is true that feeding, management and other things affect the fertility of the

dying in the shell is confined largely to artificial methods of incubation.

"The eggs that were left in the machine after being tested on the sixth and twelfth days of incubation, were called 'infertile,' though many of those tested out were doubtless fertile, the embryo for some reason failing to develop and show signs of life when tests were made.

"On the basis of fertile eggs hatched, each test shows better results from the hens than the incubators. The first set of five machines hatched 70.3 per cent of the fertile eggs; the hens 97.5 per cent. The second set showed 78 per cent for the incubators and 96.2 for the hens. In the last test the results were 93.7 per cent for the incubators and 96.2 for the hens.

"The variations in weights in hen and incubator hatched chicks are very marked. The chicks from the first set of five incubators averaged 1.159 ounces each. The second lot were Rhode Island Red chicks and averaged from the incubators 1.28 ounces and from the hens 1.34. The third lot Brown Leghorns, averaged from the incubators 1.18 and from the hens 1.256 ounces. The fourth lot, also Brown Leghorns, averaged from the incubators 1.185 ounces and from the hens 1.199.

"What makes the differences in the weights of hen and incubator chicks is a matter yet of speculation, but the difference is undoubtedly an unfavorable condition.

"That the incubator is the cause of mortality in the chicks was demonstrated in two ways: First, when hen-hatched chicks and incubator-hatched chicks were put together in the same broods the former lived well and the latter showed a large death rate; and second, it was demonstrated when hen-hatched chicks and incubator-hatched chicks were put together with the same hen or hens the former lived well and the latter showed the usual mortality or practically so.

"Hen hatched chicks showed a mortality of 10.8 per cent in brooders and 2.2 per cent with hens. On the other hand incubator hatched chicks, in the tests here reported, showed a mortality of 33.5 per cent in brooders and 49.2 per cent with hens.

"Our experiments show that the parent stock is not to blame. This was demonstrated in two ways: First, chicks hatched by hens lived well, whether brooded by the hen or brooder; and, second, chicks hatched in incubators from the same kind of eggs showed high death rate whether brooded in brooders or with hens.

"The results of the different weighings show from rate of growth that the hen hatched chicks have greater vitality than incubator chicks. The result

First prize S. S. Hamburg hen at South Bend, Ind. Owned by H. F. Alberding, North Judson, Ind.

eggs as well as the strength of the embryo, but not to such an extent as is commonly supposed; at any rate, it was proved that a large per cent of the eggs tested out of incubators are not infertile and if placed under hens would have hatched.

"The eggs were tested on the sixth and twelfth days of incubation and none but fertile eggs were left in the machines. Most of the chicks dead in the shell were apparently fully developed; many of them had pipped the shell and died. The total of all these hatches in incubators shows 146 dead in shell from 879 eggs set, or 16.6 per cent. Of 179 eggs set under hens, eight were dead in the shell, or 2.8 per cent. This shows that the problem of chicks

is the same whether the chicks are brooded by hens or brooders.

"Successful incubation does not mean merely the hatching of a large percentage or a certain percentage of the eggs; the serious problem is not how to hatch the greatest percentage of the eggs, but it is rather how to hatch the largest number of chicks of the greatest vitality. The test of the incubator is not that it hatch on the average as large a percentage of the eggs as the sitting hen, but that it hatch as many and as good chicks as a good sitting hen. Until this can be done poultry enterprises will continue to lag where artificial methods of incubation are used.

"On the whole the results show that artificial incubation is responsible for the large percentage of chicks 'dead in the shell' as well as for the large mortality of chicks in the brooder."

In many ways Old Dame Nature shows she understands her business. "There are more things in Heaven and earth than are" mentioned in incubator catalogues. A very curious thing is the glazing of eggs. Jacob Graves, of Boston, and A. M. Halsted, of Rye, N. Y., were the earliest manufacturers of incubators in the United States so far as I know. About 1872 I used to talk often with the last named, and he told me that the glazing baffled him. He was confident that it served some important purpose and that it seemed to indicate oil, but he had tried oil from a bird's "rump gland," also from intestinal fat and from other sources, animal and vegetable, but no glaze would stick worth a cent. About a dozen years later I was button-holed by an enthusiastic incubator maker, a clergyman, who claimed he was the first to build a machine that would glaze the eggs. But he had no incubator at the show, and I lost track of the alleged inventor. As far as I understand the glazing question, it seems that after glazing begins the heat of the hen's body not only dries the nest and the ground, supposing it is on the ground, for a little distance under and around it, but also by raising the temperature, would in a little while render their contents too dry, except for the wonderful provision of nature, consisting in the glazing of the shells.

Some of the secrets of nature are very elusive and intricate. Take a dozen eggs and place them under a sitting hen and another dozen from the same lot and put them in an incubator. After the twelve under the hen have become well glazed, place them in a pail of water with the others from the incubator. The result will be that the last named will absorb water through the shell and sink, while the glazed eggs still float. Bulletin No. 100 of the Oregon Station, above quoted says, "Chemical tests showed the presence of oil on egg shells. There was a small quantity on fresh eggs and on incubator eggs, but a relatively large amount on hen-hatched eggs." Now while nature has provided means of checking evaporation from the eggs, by means of this glazing during the early stages of incubation, yet considerable drying out of the water in the eggs is useful at the late stages, and accordingly the shell gradually dissolves away from the inside, the lime in its composition being used to form the bones of the embryo. Water must now escape quite fast or the chick will have no room to grow or breathe. This dissolving away of lime is for some reason imperfectly

performed when incubators are used. Often the incubator operator after testing the eggs and removing all but the promising ones, and finding everything going well, apparently up to the eighteenth day, finds finally a disheartening per cent dead in the shell. In such cases the embryos are almost fully developed and very large and moist, packing the shell tightly, they having been waterlogged, swelled and literally drowned.

They appear so large and strong that the operator is puzzled to know what has happened to kill such healthy promising chicks. This trouble occurs with all makes of incubators. Naturally the operator tries to head off the trouble by removing the moisture pans about the fifteenth day, or by adopting a "non-moisture" machine. But this does not answer. For the trouble is not that too much moisture is going into the eggs, but at the particular stage we are considering, too little is going out. Nature has a subtle way of managing things and with hens, a swelled, waterlogged chicken, dead in the shell is comparatively unknown, for the shells grow thinner toward the last, letting the superfluous water out, while the absorbed lime makes the chicks both heavier and stronger than incubator chicks.

Why it is that the hen heats the incubator so markedly in the first four days of the twenty-one has puzzled the ablest experimenters. It is apparently not a matter of heat alone, for thermometers of investigators have measured again and again the heat of hens in the early stages of the so-called sitting fever, and incubators have been regulated accordingly. Is it an occult something, as unknown now as the ether was once, which the hen possesses, and that is needed to rush life with "embryonic fierceness" making heart fibres form and pulsate? And why after the stage is reached, is the incubator less objectionable during the remaining seventeen days?

I have just sent for an incubator, supposed to be inferior to none on the market, for the express purpose of determining, by the watch, the exact time taken in running it compared with the time in caring for hens covering the same number of eggs, and managed under the duplicate system, but except for precise mathematical statement no close time-keeping is needed. Common observation proves that the hens need less time by a very large per cent, just exactly as keeping tally by the watch is not necessary to prove that no battery of small detached brooders can compete as regards time, with a lot of hens cooped with their broods.

"But," says somebody, "When great numbers, say thousands on thousands are kept, incubators are necessary." No. Decidedly no. Just here is the common mistake, for a few thousands or many thousands need the natural system more imperatively just in proportion to the very size of the enterprise. Prince T. Woods, M. D., said of the Wozelma Open-Air Incubator, his invention, consisting of a battery of ten sitting hens:

"The actual care required for sitters so handled is very little, a few minutes morning and night, much less than a 150-egg lamp-heated incubator. Of course, it incubates in the natural manner, hen heat, self-regulating, self-ventilating, self-adjusting, and almost self-operating. In the morning the attendant carries feed and water and places it

in the yard in which the natural incubator is located, then he opens the front doors of the nests; at night rounds he closes up the nests again, and the hens do the rest and do it well. Much better hatches are had when hens have outdoor nests of this sort. It will yield better chicks, bigger chicks, and more livable chicks than can be hatched indoors. This spring we have had mostly cold, wet weather, but the outdoor openair incubator gives fine hatches of big, strong, sturdy chicks that live and thrive. Try it and be convinced. It costs little and saves much. Sitting hens handled in this manner give less trouble and require less care than when set in any other way. Ours give no trouble at all."

If we were to name two monumental delusions, on important matters that have kept poultry keepers tangled up for more than thirty years, they would be mixing food for balancing, and using incubators and brooders for time saving, the results being unbalancing and time wasting.

You cannot buy, regardless of price, stock, eggs or baby chicks that will produce the profits that are being produced by Midlothian Strains. Midlothian Farms & Hatchery is today the largest and most profitable poultry plant in this country. We can supply you with:

Pullets from trap-nested stock with records of 144 eggs and up at \$2, \$3, \$4 and \$5.

Hens with individual records of 144 eggs and up at \$6, \$8, \$10 and \$12 each.

Hens from trap-nested stock without individual records at \$3 and \$4 each.

Cockerels from trap-nested stock with records of 144 eggs and up at \$4, \$6, \$8 and \$10 each.

Cocks from trap-nested stock with records of 144 eggs and up at \$5, \$8, \$10, \$12 and \$15 each.

Eggs from stock with records of 200 eggs or better, 30c each.

Eggs from stock with records of 144 to 199 eggs, 20c each. Eggs from stock not trap-nested but of the same blood lines as trap-nested stock, 10c each.

Baby chicks from stock with records of 200 eggs or better, 50c each.

Baby chicks from stock with records of 144 to 199 eggs, 35c each.

Baby chicks from stock not trap-nested but of the same blood lines as trap-nested stock, 20c each.

We are now booking orders for eggs and baby chicks. Booking your order now assures the delivery of eggs and baby chicks when you desire them. You may send us your order, enclosing \$5 as a deposit, and send the balance five days before your order is to be shipped. Book your order now. Write for catalogue. 800 pullets trap-nested annually.

## The Campine Fowl in America

By LOUIS A. STAHLER

HERE is no fowl so difficult to identify as the Campines. They have been bred for hundreds of years in more or less variable color, but the shape is almost identically the same today as that of their original ancestors. Records are in existence which prove that poultry has been kept for over 1500 years before the Christian era and if the art of printing and engraving would have been known at that period, it would have enabled the present day poultry fanciers to look up and establish the origin and history of many of our popular breeds. But inasmuch, as fowls were not bred for any particular purpose and in many cases for luxury only, no records in regard to the shape and color of the breeds in existence at that time are available. Poultry journals and poultry publicity were not thought of then. During the middle ages when rulers and the head of the churches demanded that taxes and other tributes were to be paid with eggs and fowls, the poultry industry received quite a boost and as this demand necessitated a fowl that produced eggs in large numbers, not much attention was paid to any particular breed or color as long as they produced a sufficient number of eggs. In this manner, poultry was raised until the last three or four hundred years. Among the many breeders there were always a few whose sense of beauty and desire to have fowls all of one color, led them to discard all that did not come up to the requirements set for them, but as but very little grain was produced and as this was also used as an exchange medium, the chickens naturally suffered and had to pick up their own living as much as possible and the results were those that could not keep up with the egg production on account of this restrictive feeding method, were killed off and a breed of fowls was gradually evolved, that was, so to say, the survival of the fittest. Climate, environment, altitude and other influences affect the variation of type and color of all breeds of poultry and many new

breeds were created. In no country has better poultry been produced, or have the fanciers shown greater skill in producing new varieties of chickens than in the low lands of Europe. Authentic records are in existence that a penciled variety of fowls have been bred in these sections for over two hundred years or more and which are no doubt the original ancestors of our Campines of today. In Holland, Belgium and in the northwestern part of Germany for over one hundred years have been bred a penciled variety of fowls, with blue legs and dark colored eyes, and many of them as well as sub-breeds of same are in existence today. The Braekel or Campine of the Belgium and Hollander as well as the Moeven or Mohnsperber of the German are practically the same breed of fowls, different only in their markings and they represent the same origin and character in type and shape as our modern Campines. These breeds were used in England in the production of the silver and gold penciled Hamburgs. The modern Campine as introduced in America is hen-feathered, that is the color and plumage of the cock and hen is identically the same. Among the many different breeds of poultry only three or four breeds are in existence in which hen-feathered males occasionally are produced. In some of them it has become a fixed character, as for instance, in the Sea-

bright Bantams and the Hennie Pit games. A strain of hen-feathered silver penciled Hamburgs was very popular at one time. They were first exhibited in May, 1878 at Otley, Yorkshire, England. If there is any of this Hamburg blood in our modern Campine, is a question that is hard to answer for there are great differences in the markings as well as the eye color of the breed, and then I am under the impression that a cross of this kind would not be beneficial to the breed, as the Hamburg lays only a small egg, while the Campine is known as a layer of extra large ones. The breed as it is today, will make a hit with the fanciers of America as no parti-color variety has been produced in this country that could reproduce itself in single mating.

Living specimens of Silver Campines that approach very closely the ideal

ing and engraving would have been known at that period, it would have enabled the present day poultry fanciers to look up and establish the origin and history of many of our popular breeds. But inasmuch, as fowls were not bred for any particular purpose and in many cases for luxury only, no records in regard to the shape and color of the breeds in existence at that time are available. Poultry journals and poultry publicity were not thought of then. During the middle ages when rulers and the head of the churches demanded that taxes and other tributes were to be paid with eggs and fowls, the poultry industry received quite a boost and as this demand necessitated a fowl that produced eggs in large numbers, not much attention was paid to any particular breed or color as long as they produced a sufficient number of eggs. In this manner, poultry was raised until the last three or four hundred years. Among the many breeders there were always a few whose sense of beauty and desire to have fowls all of one color, led them to discard all that did not come up to the requirements set for them, but as but very little grain was produced and as this was also used as an exchange medium, the chickens naturally suffered and had to pick up their own living as much as possible and the results were those that could not keep up with the egg production on account of this restrictive feeding method, were killed off and a breed of fowls was gradually evolved, that was, so to say, the survival of the fittest. Climate, environment, altitude and other influences affect the variation of type and color of all breeds of poultry and many new

bright Bantams and the Hennie Pit games. A strain of hen-feathered silver penciled Hamburgs was very popular at one time. They were first exhibited in May, 1878 at Otley, Yorkshire, England. If there is any of this Hamburg blood in our modern Campine, is a question that is hard to answer for there are great differences in the markings as well as the eye color of the breed, and then I am under the impression that a cross of this kind would not be beneficial to the breed, as the Hamburg lays only a small egg, while the Campine is known as a layer of extra large ones. The breed as it is today, will make a hit with the fanciers of America as no parti-color variety has been produced in this country that could reproduce itself in single mating.

# Ancient and Modern History of the Campine

By J. FRED N. KENNEDY

THE CAMPINE fowl is without doubt a very old and ancient breed. It has its origin in Belgium and derives its name from the sandy LaCampine plains, which is the largest county in Belgium, and includes that part north of Brussels and west of Antwerp. The ancient history of the breed is practically unknown, but it is claimed that the breed was in existence the time that Julius Caesar was making his tour of the then known world and upon his visit to Belgium, in leaving he took a number of the fowl with him which the Roman epicures pronounced to be fit food for gods. This may all be true, but undoubtedly Campines are the G. Turcica, or Turkish fowl of old Aldrovandus, and we also know for certain that they were the noted breed of Belgium of 400 years ago, and have been bred and raised as the "farm chicken" by the Belgian peasantry up to the present time, chiefly with a view to quantity and size of egg, while the cockerels, at from ten to twelve weeks old were used for producing delicious milk chickens, as they are plump as partridges, carrying an extra amount of breast meat, and make remarkably good eating. The result is that today we have in the Campine a breed of fowl that are layers of "large white eggs and lots of them." And it is worthy to note that they are one of the very few varieties

ground in goldens, overlaid by markings of barrings of black which have a rich, beetle green sheen, except the neck hackles, which are a silvery white in Silvers and gold in goldens (I understand that at the last club meeting of the English Campine Club it was decided in future to call the black the ground color and the white or gold the bars). The male birds have a medium sized even comb with about five serrations and the tip slightly following but standing clear off the nape of the neck. It should be fine, even and upright, and wide enough to be well set. The wattles are medium sized and of fine texture. The ear-lobe satin white smooth, and of moderate size. The beak is horn color and the eyes should be dark brown with black pupil. The neck hackle, as previously stated, is a silvery white in Silvers, and gold in Goldens, and should be as full and flowing as possible. The rest of the body is barred. The black bar should be about three times, at least, as wide as the white ground color, the black should be pure black, free from gray and covered with a beautiful green sheen, which in my opinion makes the bird. The idea is that the markings should suggest rings around the body, the regularity being broken by the rounded white bar at the end of the feather. The comb in the females may fall over, but should not be too large. The color of the legs is leaden blue with horn toe-nails.

The question of size has been a great contention with all

FIRST PRIZE COCKEREL  $1\frac{1}{2}$  HEN.  
WINNERS AT MADISON SQUARE GARDEN DEC. 1911, OWNED BY J. FRED N. KENNEDY  
BIRCH CLIFF, ONTARIO, CANADA.

in the poultry kingdom that are not spoiled by the admission of alien blood, although it is said that some few breeders have recently introduced the Hamburg to secure more distinctness in the markings and clearness in the silvery white ground color. In that, let me warn you, lies a great danger.

Rev. Jones in Feathered World, says: "Cross Campines and Hamburgs and you have four things to outbreed: (1) Red eye; (2) size of egg; (3) type; (4) penciling. It requires a man skillful above the average to make that cross successfully, and I should feel proud had I been able to achieve it. Again, a Hamburg has a red eye, but no one will contend that every red-eyed Campine is the product of this cross. Further, in the years Hamburg fanciers have been breeding, they have not had a good wing bar. Campinists have, and it is one of the Campine's special points of beauty. Did this come from the Hamburg cross?

Campines are undoubtedly very pretty and attractive birds and have a character all their own. In appearance and carriage they are smart and alert, very tame and friendly. They will crowd around the attendant and impede his progress; if frightened they certainly can fly, they are hardy, active and precocious growers, quick to mature, always looking clean, tidy and nifty, they are non-sitters, good foragers, but are contented when in confinement.

Their color is a silvery white ground in silver, and a gold

breeders, and I believe was fully answered by the Secretary of the Campine Club of Great Britain, in his notes in the 1912 Year Book, it was as follows: "This trouble is always with us, the wording in the Standard, 'the larger the better,' is worse than useless, for it is misleading. The club should alter it and replace it by the weights which were settled upon at the Annual General Meeting, at the Palace, as being ideal, males  $5\frac{1}{2}$  lbs., females  $3\frac{1}{2}$  lbs. As no notice was given of such a motion, this cannot at present be incorporated in the Standard, but it indicates what members think. Personally, I think these weights quite high enough. I always maintain that all we want to do is to guard against the size being smaller than that of the Belgian Campine; I think any attempt to increase size should be deprecated. The size of the birds at present is the maximum for the greatest prolificacy." I, myself, do not wish for large size, we do not want a Braekel nor a Hamburg, but a Campine. The true test of the table value of any bird is the percentage of meat that it will yield, and not in mere weight. The ideal table bird then, must be small and fine in bone and must be trimly built, with a frame suitable for carrying a lot of breast meat. A pheasant will yield nearly three-quarters as much meat as the ordinary fowl which has double its weight. The excellence of the Campine as a table fowl comes in the fact that it yields as high a percentage as any.

"THE HEN THAT LAYS

IS THE HEN THAT PAYS"

EGGS FOR HATCHING MIDLOTHIAN FARMS AND HATCHERY TRAPNESTED, BRED TO LAY POULTRY TINGLEY PARK, ILL. BABY CHICKS

All birds on Midlothian Farms are trap-nested, and individual records of over 200 eggs per year per hen are common.

The above illustration shows to perfection the wonderful type and quality of N. P. Easlings' White Leghorns.

A trio of high-grade Buff Orpington prize winners at the late Chicago show.

# The Value of the Trapnest to the Poultryman

By JOHN G. POORMAN, Manager Midlothian Farms

THE PRACTICAL poultryman is first, a good business man. He establishes business relations with every individual hen he owns in the same manner as the prosperous merchant or manufacturer does with his employees. If an employee cannot produce a profit over his salary, he is dispensed with.

If a hen cannot produce a profit over cost

maintenance, she is dispensed with. The system brought into use to ascertain what the hens are doing is trap-nesting. Herein lies the success of the practical poultryman. He has absolutely the destiny of his business before him. The poor layer is discarded, thereby stopping a loss in the feed bills. When the breeding season is at hand he knows all of his best layers from the previous year and mates them to produce his youngsters. By breeding from the best from year to year the average egg yield increases and so does the profit. When he sells breeding stock, eggs for hatching, and baby chicks, he is in a position to fill orders accurately. He is not like the fancier who really does not know the actual laying qualities of his stock, but takes it for granted that they are good layers, and the customer takes the chances.

Having good layers to begin with, it only requires common sense, care and management to produce eggs, and especially winter eggs.

We advocate a large building divided into numerous pens that will accommodate from five hundred to one thousand layers. This building should be built especially for winter use with three thicknesses of lumber, two of building paper and one air space. It should be heated by hot water to a temperature of only forty degrees.

The reason for heating the building is to remove all dampness and chill and not to maintain a summer temperature. Fowls will not be in perfect health where frost will accumulate on the ceiling and floor. If birds are not kept in perfect health, eggs should not be expected.

In milder climates we heartily recommend the open front colony houses. We use the open front colony houses for summer quarters.

By maintaining a temperature of forty degrees in the winter quarters we produce a fifty per cent egg yield throughout the season when eggs are at the highest market price. Every year we have had many pullets that have given us a profit of one dollar per month for December, January and February. These eggs have sold at fifty to sixty cents a dozen.

By keeping our breeders in winter quarters we get a high per cent of fertility that enables us to supply our

southern customers with excellent eggs for hatching very early in the season. We hatch out most of our own stock in January, February and March. This we could not do if our breeders were subjected to the climatic conditions of our severe winters.

We give as a morning feed one part cracked corn and two parts wheat. This is thrown in the litter and promotes exercise. A dry mash of equal parts by measure, of bran, wheat middlings, Rocky River oatmeal, and meal alfalfa, and eight per cent of the whole, beef scrap, is kept before them in hoppers. At noon a liberal feed of sprouted oats. At night a mixture of two parts cracked corn and one part wheat. Twice a week they are given fresh green bone. Fresh water is supplied twice a day.

The drop boards are cleaned every morning and the pens once a week. The fowls are examined every night while they are on the roost, it is easier to detect trouble at this time than at any other.

Should any fowl be the least bit out of condition they are taken from the pen until cured. When sickness is found at the start it will immediately respond to ordinary treatment. We have never had one case of roup develop in our winter quarters.

We produce annually from six thousand to ten thousand head of stock. Fifty per cent of this number is culled out and sold either as broilers or roasters. This stock goes to our market department and is crate fattened and disposed of at very profitable prices to private trade in Chicago.

At four to seven months old this stock is again culled for egg production. They must show that they are profitable as well as of good appearance. Their productiveness is determined by the trap-nest. This generally starts November first and continues throughout the year.

The stock that does not show a disposition to lay after reaching the laying age, is turned over to the market department and sold as soft roasters; the same also happens to the stock that does not lay enough to produce a profit.

We find that about eighteen per cent are not profitable and by means of the trap-nest they are detected and disposed of through the market department before they become a loss.

If eighteen per cent prove to be unprofitable, when every care and precaution has been taken in breeding for egg production, imagine the greater per cent that must be unprofitable when no attention whatever is paid to egg production.

Is not this condition in itself, the reason and proof why ninety-five per cent of those who engage in the poultry business make a failure?

Midlothian Farms first prize pen, White Orpingtons, at Chicago, 1911.

First, Columbian Rock cockerel, Club Show, Philadelphia, 1912, shape and color specials.  
First, shape and color specials, Boston, 1913. Bred and owned by F. G. Bean, Collegeville, Pa.

First, Buff Rock cockerel, also color special at Philadelphia, Dec. 10-14, 1912. Bred and owned by E. H. Lichtenwalter, Girard, Pa.

**Progress  
of the  
Breeds  
1913**

First, Columbian Rock pullet, at the Club Show, Philadelphia, Dec. 10-14, 1912. Bred and owned by F. G. Bean, Collegeville, Pa.

First, White Rock cock. Champion cock of the show at Philadelphia, Dec. 10-14, 1912. Bred and owned by Webster Farm, Girard, Pa.

# Biggest Incubator Bargain of the Year

60-Egg Capacity—Made by the  
 Prairie State Incubator Co. Only

**\$8.00**

Think of it! Here is a high grade hatcher, made by one of the oldest and best known incubator manufacturers—in the **LARGEST, NEWEST and BEST EQUIPPED** incubator factory in the world—by a firm who have been "at it 30 years"—for only \$8.

It is built entirely by machinery—every part being perfect—no hand or guess-work about it—thus the highest degree of efficiency is obtained at lowest possible cost.

## No Better Incubator at Any Price

**CASE** is double with cotton batting insulation. Outside is clear Cypress, inside is also wood—not paper, card board or other cheap material as in most low priced machines.

**HEATER** is new design, absolutely gas tight, solderless, all joints double seamed—practically a one piece heater that can never leak smoke into egg chamber. A better heater can not be had in any other machine at any price.

**LAMP** is fool-proof, self-centering with positive clamp. No springs—no adjustment—always fits in place. Can't smoke—always gives clear, bright flame. Easy to keep in order.

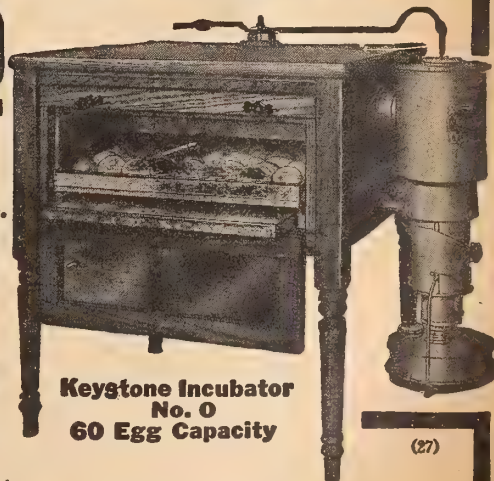

**REGULATOR** is a powerful, accurate steel and zinc thermostat with toggle joint. Nothing better ever invented—nothing cheap and flimsy about it.

**SAND TRAY**—the triumph of incubation—the method of providing humidity that insures "chicks that live." Don't buy an incubator without this important feature and expect to hatch the most "livable" chicks. Covers entire bottom of machine, providing plenty of moisture at all times under all conditions.

**PRAIRIE STATE INCUBATOR CO.**

50 Main St.

HOMER CITY, PA.

Keystone Incubator  
 No. 0  
 60 Egg Capacity

(27)

## You Can't Make a Mistake

in buying this high-grade, low priced machine. It is built on the famous **Sand Tray** Prairie State hatching principle—in fact is a small size Prairie State machine, thus insuring the operator not only the highest per cent hatches, but the **most chicks that live**. Our reputation is ample assurance we would not put out any but the best. Write today for pamphlet fully describing this "Biggest Incubator Bargain of the Year."

# Moisture Means Money

in hatching. Millions of chicks die in the shell because of improper moisture conditions. The moisture present in an incubator is just as important as the temperature, and should be noted and regulated just as carefully.

## The "Tycos" Incubator Hygrometer

is an ABSOLUTELY RELIABLE moisture gauge. It is a necessity for good hatching. It will make bigger hatches for you, Mr. Poultryman, and better chicks. Simple, takes little room, easy to read and is stamped with full directions. EVERY incubator should have a "Tycos" Hygrometer.

## Specify "Tycos" Instruments—ALWAYS

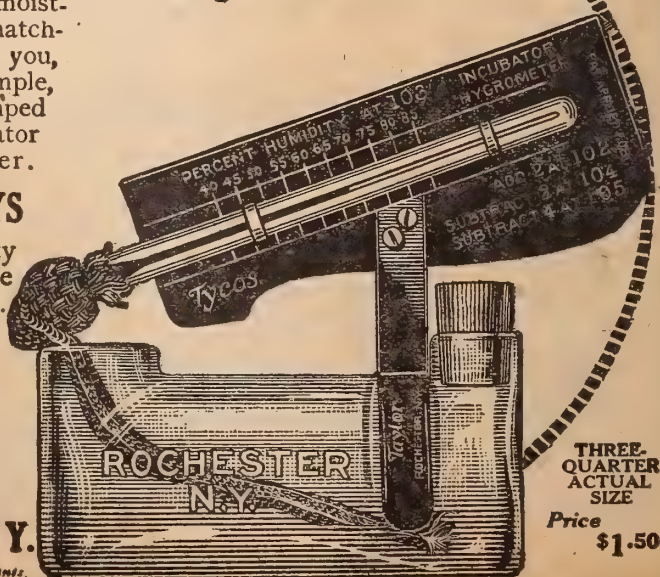

They are made right—from highest quality materials; thoroughly tested before leaving the factory. "Tycos" accuracy is DEPENDABLE.

## More Eggs - Bigger Profits

**YOU** can have both by feeding Darling's Meat Scraps to your hens. Every ounce of Darling's Meat Scraps is absolutely fresh. Trimmings from roasts and steaks sold over the butchers' counter are picked up by our wagons the same day and cooked that night. In short, Darling's Meat Scraps are made from the fresh trimmings from the edible portion of the carcass. This gives uniform quality and sweetness. Besides—

### Darling's High Protein Meat Scraps

**Contain 55% Protein**

They are low in fat, and fine ground as recommended by both the Experiment Stations and practical poultry raisers.

Darling's Meat Scraps cost no more than goods of lower protein content. Insist upon Darling's 55% Protein Meat Scraps at your dealers.

**Every Poultry Man should send for a free copy of our book on poultry feeding.**

This book is replete with timely, helpful and specific suggestions and hints on the care and feeding of poultry that you should know and profit by. It tells how to increase egg production and egg profits. Whether you own 25, 50 or 500 fowls, you will be tremendously benefited by reading and studying this book. Write for your free copy today. ## That the Best Chicks Can Be Reared In Colony Brooders

is universally conceded, but with the little lamp brooders this method involves an unreasonable burden of worry, labor and expense.

Hall Colony Brooder with Hover Down

Hall Colony Brooder with Hover Raised

The Hall Company, who are responsible for the substitution of coal for kerosene in incubation, are working a similar revolution in brooding.

### The Hall Coal Heated Colony Brooder

gives the indoor comfort of ample heat to the colony chick who revels outdoors in a paradise of grassy nooks and juicy bugs, a happy combination that has not been attained by any other brooding system.

Here are a few of the principles of Hall Chick Comfort and Hall Poultry Profits

**AMPLE HEAT** completely surrounded by a cooler area. Chicks if given a chance will move away from too much heat, but if too cold, crowding, pushing, tramping, suffocation and a thousand resultant ills are the inevitable consequence.

**FUEL ECONOMY** is false economy if the chicks are allowed to chill. Sensible fuel economy consists in a substitution of one cents worth of coal for five cents worth of kerosene with an increase, not decrease, of the heat.

**CLEANLINESS.** In the Hall Colony Brooder there is but one floor level—that of the colony house. The hover lifts with counterbalance weights and exposes the entire area to the broom or white wash brush.

**LARGE FLOCKS.** The inefficiency of the lamp brooder is responsible for the false notion that chicks can not be reared in large flocks. Prof. Rice at Cornell found that with ample heat, flocks of 200 were as successful as of 100. In California flocks of 1,000 are not uncommon.

The Hall Colony Brooder is rated for 300 chicks and many customers put in 400. The labor bill, which is the chief expense in raising chicks, is actually less for these three to four hundred Hall chicks than for the fifty to one hundred chicks in a lamp brooder.

As often happens with modern inventions, the quality of the output is improved at the same time the cost of production is lowered. Thus, the Hall Colony Brooder will rear more and better chicks at less cost.

Send at once for our Brooder Booklet and learn of the results of hundreds of our customers who have proven this to be the case.

## The Economy and Simplicity of Mammoth Incubators

are now as fully recognized as is the superiority of the cylinder printing press or the steam shovel over the primitive devices which they superseded.

### THE HALL MAMMOTH INCUBATOR

is the simplest and most efficient of the modern hatching machines because it has been longest on the market and the needless complexities that mark every new device have been most completely eliminated. From

this riper experience the Hall has retained the one surest and simplest method for each and every requisite for successful incubation.

It is this simplicity born of experience that explains why we receive letters like the following:

#### GLEN-DALE POULTRY PLANT AND HATCHING STATION

West Springfield, Mass.

T. A. & A. O. Goessling, Proprietors.

HALL MAMMOTH INCUBATOR CO.,  
 Little Falls, N. Y.

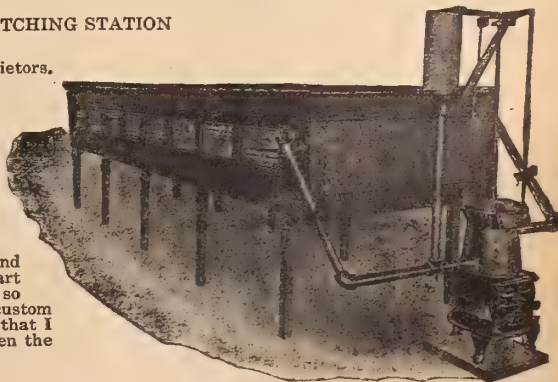

Dec. 7, 1912.

I want to add my word of praise to that from the hundreds of other satisfied users of Hall Equipments. The very first thing that appeals to the scientific man as well as the novice is the simplicity of your system, together with the positive automatic action of the hatching chambers. Any man of ordinary intelligence should get good results in operating the incubator, providing other conditions, such as fertility, etc., be right. The heat control, the ventilation and the moisture are in the right proportion throughout the entire growth of the embryo.

Nothing has been left undone to insure Hall users of A No. 1 hatches, and the chicks from such hatches are the kind that live and grow. In this part of the country Hall hatched chicks are considered the only reliable kind, so that I get more than my share down here of trade in baby chicks and custom hatching. The hardness of Hall hatched chicks is attested by the fact that I shipped day old chicks to all parts of New England last winter, even when the mercury registered twenty below zero, without any appreciable losses.

Very truly yours,

GLEN-DALE POULTRY PLANT AND HATCHING STATION.

Write today for the new Hall Catalogue X and learn in full of the Hall method of meeting the requirements of incubation and of the results which hundreds are securing with Hall equipment.

# SMITH'S SINGLE COMB BUFF LEGHORNS

The largest Buff Breeder in the world and the world's best blue ribbon winners and winter egg layers. I have mated this year over 1,500 fine breeders that are the pick of over 47,000 birds raised in the last 4 years and winners from 13 of the big shows.

Stock for sale at all times, 1 bird or 1,000 birds. Eggs, \$2 per 15, \$10 per 100, \$75 per 1,000, and up. I have incubator capacity for over 10,000 eggs every 3 weeks, and expect to hatch over 40,000 day old chicks this year from good, strong, big, vigorous birds that range in age from 1 to 4 years, and the chicks will live and grow fast. Day old chicks, 25 for \$6, 50 for \$11, \$20 per 100, \$180 per 1,000, and up. Get my guarantee on stock, chicks and eggs before you purchase your stock.

Send 10 cents in stamps for catalogue and find out how to raise 150 pullets to the age of six months for 15 1-3 cents each.

## How a Feed Mixer Will Pay for Itself

**A Feed Mixer is a REAL Economy on Any Poultry Plant, No Matter How Small. It Saves Time, Labor and Feed.**

Suppose you feed only ten quarts of mash a day. Do you know that's nearly 2 tons a year? Yes sir, 2 tons! Now you wouldn't mix 2 tons of feed by hand, if you had to do it in a day. Why, then, should you if you do it in 365 days? Your time is worth as much one day at another.

Let's say you spend an hour a day mixing feed. A mixer will do it better in half an hour. In a year, it will save you at least 200 hours. That's 20 working days. About \$40 worth of time, isn't it?

**NOW YOU SEE HOW A FEED MIXER IS A REAL ECONOMY  
"AFTON FARM" FEED MIXERS  
FOR MIXING DRY FEED, WET MASH, SEEDS, FERTILIZER**

There are other advantages to a feed mixer. Your feeds are fresher and more palatable. They are smoothly and perfectly blended. They are more easily digested. This means that you need less feed, and that your stock is healthier. You can make up balanced rations and special feeds quickly and cheaply. You can mix seeds for sowing. You can make up your own fertilizers. The "Afton Farm" Mixer is used on hundreds of farms. It is always satisfactory. Simple, safe, thorough. Made in 15, 75 and 150-qt. sizes. Hand or power drive. Larger sizes made to order. Write for our free book, "The Secret of Master Feeders."

# CROWTHER WINS AT CHICAGO

**AGAINST THE BIG BREEDERS OF THE EAST, SOUTH AND WEST**

In two of the great Chicago shows we have won second, fourth and two fifths on cocks; two firsts, fourth and fifth on hens; first on cockerel; first and fifth on pullets; first, second, third and fifth breeding pens; best color on male; best shape on male; best color on hen; best shape on female twice. Our 1st prize hen of this year, the greatest S. C. hen in the world. Write for our free mating list, it tells the story. Please mention American Poultry Journal.

**Ira M. Crowther : Box A : Willoughby, Ohio**

# BARRED PLYMOUTH ROCKS

The "Hoosier Strain" is again victorious at the great Chicago show, December 1912, winning second and third cock and fifth pen pullet mating in the largest and best class ever brought together. At the Chicago show, December 1911, we won first prize cock, generally considered to be the best male ever shown in Chicago.

At the last two Indianapolis shows we have won just half of the first prizes offered, or as many as the combined winnings of all competitors, besides numerous Specials. It takes quality to win at Indianapolis, and birds of our breeding has won at this show for ten consecutive years. We have hundreds of birds for sale, all bred from noted winners—the best we have ever offered—and will furnish you guaranteed winners for any show, large or small. Fine breeders to produce winners, mated by an expert. Utility birds bred from heavy layers. All stock sold at reasonable prices and shipped subject to approval. All birds are grown on unlimited range and have great stamina and vigor, found only in the "Hoosier Strain."

**Eggs for Hatching from the Finest Matings, \$10 per 15, \$25 per 50**

**G. EARL HOOVER, ROUTE 24, MATTHEWS, INDIANA**

Pullets—Ross Swartout, 1-4; J. M. Vanderbilt, 2-3; G. A. Clark, 5.

Pens—Ross Swartout, 1; G. A. Clark, 2; T. A. McKittrick, 3-5; Eleanor W. Smith, 4.

#### SUSSEX FOWLS.

Cocks—Dr. W. H. Conrad, 1; Conrad & Bratt, 2-3; Walter E. Smith, 4; W. K. Conrad, 5.

Hens—Walter E. Smith, 1; Conrad & Bratt, 2-4; W. K. Conrad, 3; Dr. H. W. Conrad, 5.

Cockerels—Conrad & Bratt, 1-3-4; Walter E. Smith, 2.

## COLUMBIAN WYANDOTTES

Select exhibition stock. Ready for early shows. My customers are sure to win from our selection. Many have been pleased. To make room I will sell one extra good pen of 8-yearling females and male at \$20. Write for literature in full description of the breed.

C. L. PATTERSON

BARBERTON, OHIO

## S.C. Black Orpingtons

Herrick Poultry Yards have been breeding Blacks for eleven years. My winnings at such shows as Chicago, St. Louis, Cleveland and Detroit are positive evidence that I have quality. Some choice stock for sale. Kindly let me quote prices. Please mention American Poultry Journal when writing.

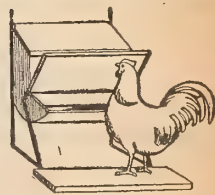

Herrick Poultry Yards : Box 612 : Durand, Michigan

## Are You in the Poultry Business FOR HEALTH, PLEASURE, RESULTS, WORRY OR PROFIT?

Install in your pens one 20th Century Feeder and Exerciser, one 20th Century Dry Mash Feeder, one 20th Century Drinking Fountain. Your health will be restored. Your pleasure will be abundant. Your results will be wonderful. Your worry will be no more. Your profits will increase. Booklet free, it tells the story.

C. S. Barnes Department 3—86 King Avenue Columbus, O.

## BRADY'S WHITE ORPINGTONS

Made show records last year for myself and my customers unapproached by any breeder in the United States. In the PHILADELPHIA SHOW I won FIRST PEN. The pen winning second was of my birds and in the hands of my customer, V. K. Dayhoff of York, Pa. I also won FIRST HEN and REFUSED \$1,000 for her. In the great NASHVILLE (TENN.) SHOW I sold my two best pullets for \$175. My first hen in this show was pronounced the best hen ever shown in the great South. My young pen was beaten only by a pen of old birds direct from England. My customers, also, won in this show, as well as DES MOINES, IOWA; LANSING, MICH.; WHEELING, W. VA.; LEBANON, PA.; BALTIMORE, MD.; CHICAGO ILL.; MADISON SQUARE GARDEN, NEW YORK, etc., etc. This year I have more size and high show quality than I have ever had and can furnish birds for your early shows that will add credit to their new owners. Write for prices, mention A. P. J. Birds shipped on approval.

Eggs, \$5, \$10 and \$15 per 15

J. S. Brady, Parkers Landing, Pa.

Pullets—Conrad & Bratt, 1-2-3; Walter E. Smith, 4.

#### BLUE ANDALUSIANS.

Cocks—Llangollen Farm, 1-4; E. D. Bird, 2; J. E. Bliss, 3; W. Vollmers, 5.  
Hens—Thomas Peer, 1; E. D. Bird, 2; Llangollen Farm, 3-4-5.  
Cockerels—E. D. Bird, 1-4; Llangollen Farm, 2; J. E. Bliss, 3-5.  
Pullets—E. D. Bird, 1-2-5; Llangollen Farm, 3; J. E. Bliss, 4.  
Pens—Llangollen Farms, 1.

#### BLACK SPANISH.

Cocks—R. A. Rowan, 1-2-3.  
Hens—R. A. Rowan, 1-2-3-4-5.  
Cockerels—R. A. Rowan, 1-2-3-4.  
Pullets—R. A. Rowan, 1-2-3-4-5.

#### WHITE CRESTED BLACK POLISH.

Cocks—Mrs. John Mayer, Jr., 1; Carpenter & Carpenter, 2.  
Hens—Mrs. John Mayer, Jr., 1-3; Carpenter & Carpenter, 2.  
Cockerels—Mrs. John Mayer, Jr., 1.

#### BEARDED GOLDEN POLISH.

Cocks—J. Wilks O'Neil, 1.  
Hens—J. Wilks O'Neil, 1.

#### BUFF LACED POLISH.

Cocks—Llangollen Farm, 1.

Hens—Llangollen Farm, 1.  
Cockerel—Llangollen Farm, 1.  
Pullets—Llangollen Farm, 1.  
Pens—Llangollen Farm, 1.

Pens—W. R. Legron, 1; Ralph C. Greene, 2.

# E. B. Thompson's Imperial "Ringlet" Barred Plymouth Rocks

Win the most wonderful record beyond all precedent in Barred Rock history at the imperial and most classic show of all America---Madison Square Garden, New York---this winter of 1913. Winnings as follows:

"Ringlet" First Prize Cock at Madison Square Garden, New York, 1910-1911

First prize, second, sixth and eighth on cockerels.

First prize and sixth on pullets.

First, second and fifth on exhibition pens.

First on cockerel mated pen.

Second, third, fourth and fifth on cocks.

The imperial prize of the show, sweepstakes special for champion male.

Sweepstakes special for champion female.

Diploma presented by the American Poultry Association for best cockerel.

Sweepstakes cup for best Plymouth Rock hatched in 1912, male or female, any variety.

Challenge silver cup for best exhibition pen.

Special best shaped male.

Special best shaped female.

Special best colored male.

Special best colored female.

Best cock, cockerel, hen and pullet. Four best cockerels. Four best pullets. \$25 special prize presented by the New York Show for finest display. All silver cups and cash specials. Four times

as many first prizes as any competitor. More first prizes than all competitors combined. More first, regular and special prizes than won by any exhibitor of any breed.

My exhibit of 56 birds was the best the world has ever seen. No other Barred Rock breeder has ever produced or is producing such matchless quality. Every feather in my exhibit was bred on my farm. My first prize champion cockerel and first prize champion pullet are years ahead of their time—they are the product of the highest skill.

No other Barred Rock breeder has ever accomplished the unprecedented achievement of winning the two greatest prizes in the world—champion male and champion female—at one show in Madison Square Garden.

# E. B. Thompson's Imperial "Ringlet" Barred Plymouth Rocks

This new 1913 championship record on opposite page is the most notable of all the thrilling achievements at Madison Square Garden for which E. B. Thompson's Imperial "Ringlets" are famed. This amazing record transcends all that have gone before it and makes my unequalled record for 25 years at Madison Square Garden all the more remarkable.

Furthermore—The "Ringlets" have won every silver trophy that has ever been offered at Madison Square Garden to be won three times. In short every trophy on Barred Rocks that has ever been offered to be won three times has been finally won by me. Among them are the \$100 challenge trophy and \$100 association cups.

## If You Want to Win and Breed Winners

You must have my Imperial "Ringlets." It will be to your best interests to have my grand birds and eggs as a foundation and to improve your stock. The rich results of my more than thirty years as a Barred Rock breeder may be yours. My long experience has produced thousands of prize winners for myself and customers. I will help you to the best of my ability, rest assured of this.

Elegant breeding and exhibition cocks, cockerels, hens and pullets of the richest first prize New York blood for sale in any number. Show birds fit to win in any competition in any show.

Richly illustrated 70-page catalogue mailed upon request, it is full of original pictures of New York winners from life.

**Eggs** From the finest exhibition matings in the world, \$10.00 per setting; four settings, \$35.00; one hundred eggs, \$60.00.

# E. B. Thompson's Imperial "Ringlet" Barred Plymouth Rocks

The Finest Birds in All America Are Here on My Farm Today  
THOUSANDS IN NUMBER

The reason for my unprecedented winning at the last 1913 Madison Square Garden, New York, Show is very evident on my farm on all sides. See pages 304 and 305 for this wonderful record.

Emerson said:—"If a man can write a better book or make a better mouse trap than his neighbor, though he build his house in the woods the world will make a beaten path to his door." The path to my farm is well trodden by prominent breeders.

I invite you to come and see my Imperial "Ringlets" at home—on their native ground. A visit here will be a revelation in the science of Barred Rock breeding; you will see buildings full of the rarest of exhibition birds, and breeders full of New York First Prize blood, grand in size and shape, great length of backs and bodies, with tails carried right; splendid heads and clear blue color, with narrow, sharp, cleancut vivid barring to the skin. You will see my wonderful matings that will produce the champion first prize winners for next winters shows. I now have on my farm five times as many first prize Madison Square Garden males as any breeder in America.

## I WILL SELL YOU EGGS FROM THE FINEST MATINGS IN ALL THE WORLD

Elegant cocks, cockerels, hens and pullets of the richest New York first prize champion blood for sale and mated to produce prize winners. I will take a warm personal interest in your success.

My "Ringlets" are wonderful layers of fine eggs as well as win the blue.

Richly illustrated 70-page catalogue upon request. It is full of illustrations of New York winners from life.

EGGS from the finest exhibition matings in all the world, \$10 per setting; four settings for \$35. One hundred eggs, \$60.

# The Great Williamsport Show

The Forerunner of the Big Events—Larger and Better Classes Than Ever.

By H. P. Schwab

**W**ILLIAMSPORT has again set the pace and opened the season of big shows in its usual grand style. Larger and better than ever before is the word in truth, and the same that we have had to chronicle for some years past. It is a show of progress, with progress seen every year and with honors eagerly sought after by many of our best breeders. A win at Williamsport is one of the best advertisements we know of, and we note the fortunate ones take due advantage and let the world know their Williamsport record. Here year after year are to be found the breeders of a dozen or more states competing, which assures class in all varieties and quality to win.

The association and management is all that can be asked for. The officers and members are the right kind of fanciers who have held together for years with the object of holding a great and clean show. This they have done and year by year have given a better and greater show and added to their reputation until now their work and their fame is acknowledged to be among the best and greatest successes made by any association in the land.

President James T. Huston, Vice-President J. R. Heim, Secretary George P. Stryker, Treasurer A. A. Swartz, Superintendent E. B. Darrow and all members one and all have grandly done their share to achieve the success made, and we can well add, its well done.

The banquet this year was a feature event relished by all and attended by upwards of a hundred exhibitors. The large dining room of the Henry House was finely decorated and a feed worthy of the fancy was served. There was music and singing by the famous Heim quartet, and speeches by some of the officers, judges and exhibitors present. It was an event that we will long re-

member for its perfect harmony and the general good wishes extended to and by all.

The Armory, where the show is held, is a beautiful building, large and grandly lighted. The show was well arranged, with the paper booths and the displays of poultry foods and appliances around the sides. The attendance was great. We think that every man that has chickens within a hundred miles from there reported, and it goes without saying they all received full value at the show.

## The Exhibitors and Their Birds.

The Barred Rocks were the largest class, with 159 birds shown, by several leading and well-known exhibitors competing. It was a class of the best of quality and highest merit all through. Mr. Henry D. Riley, Strafford, Pa., made his third exhibit here and was rewarded by winning first and seventh cock, first hen, fourth cockerel, third pullet, first cockerel bred pullet and second pen. The winning cock was a beauty, well finished and a rare good one in every way. His first cockerel is a bird of promise, showing grand line barring and the best of color. He was a little young and not at his best here.

Another prominent breeder who has been exhibiting here for some years and has made a grand record here and elsewhere in Barred Rocks is Mr. S. M. Goucher, Moorestown, N. J. Their winnings this year were second and third cocks, fifth cockerel and first pen. This pen also won Silver Cup for best pen at the show, all competing, a distinction seldom won by Barred Plymouth Rocks. It was a beauty pen, wonderfully mated and of the very highest quality; the cockerel a bright snappy bird of exquisite color and form and the four females just alike and shown at their best. We hope to meet this line again. They show marked quality each year, and

we have confidence in that kind of breeding.

Mr. Robert J. Walden, Middleburg, Md., has been doing things for the past two or three years with his line of Barred Rocks at Baltimore, Hagerstown, etc., and we were pleased to see both he and his birds at this show. His winnings were fifth cock, third, fifth and seventh hens, seventh cockerel, first, second and eighth pullets, first, fourth, fifth and sixth pullet-bred cockerels, first and second cockerel-bred hens, second and fourth cockerel-bred pullets and third exhibition pen with several specials included. With 28 birds entered he had 23 placed, a record that looks pretty good in this great class.

Mr. James T. Huston, Williamsport, Pa., received several mentions in the awards and also won first pullet-bred cock on a bird that was also a winner as a cockerel and today is better than ever. His size, with shape and clean line barring are marvelous. His color is very even and very clean, a noble bird in every way. Mr. Huston has been a very successful breeder and this season we have seen several birds he sold win near future.

Mr. Boyd Johnston, Rupert, Pa., entered several birds, but as a rule they were not ready for showing. His fourth pullet is a bird of every promise that no doubt will be heard from later. Mrs. Johnston also exhibited a good line of S. C. Reds that were well placed.

First cockerel was won by C. Leibensberger on a very fine bird well shown, with shape and barring of quality.

Judge C. G. Whitehead, Williamsport, was also a conspicuous winner in Barred Rocks. This was but his second show and we promise he will make good in the next at shows.

The Eastern Ideal Farm, Norristown, Pa., sent in a few birds that also won some ribbons, but their line was divided at two shows and rather young birds were shown here. Their great winnings of this fall at Allentown, Trenton, etc., have been given before.

Second cockerel shown by H. B. Douglas, was a beauty in shade of color

## ONLYA FARM WHITE WYANDOTTES

### DAY OLD CHICKS AND EGGS

Never before have we yarded better matings and never before have we taken such painstaking care in mating them to produce the largest percentage possible of high class exhibition birds. Our matings contain the noted prize winners at Allentown, Hagerstown, Augusta, Palace and Madison Square, and from these matings we want to sell you eggs and chicks. Remember our birds won in competition with America's Best.

### BREEDING AND EXHIBITION STOCK

#### OUR SEAMLESS LEG BANDS

Tell the story. When a bird reaches about a pound in weight a seamless leg band is put on; it cannot be removed; there it remains as the seal of Onlya Farm quality, and every young bird on our farm contains the band. Send for Catalogue and Mating List.

Onlya Farm, Philip Kearny, Owner, Chas. B. Staaff, Mgr., Florham Park, N. J.

and type, but needed a week to finish properly.

White Rocks were a quality show all in themselves. It is seldom we see a class with such superb quality all through; every bird shown was a worthy specimen. In this class the Webster Farms, Girard, Pa., won first and fifth cocks, first hen and first pullet. The winning cock also won special for best cock in the show, while the first hen won special for best hen at the show and cup for best bird of all in the entire exhibit. This line has won for years at prominent shows and two years ago won two firsts and three seconds at Madison Square Garden, New York.

Close up with every honor came the exhibit of Highland Farm, York, Pa., winning third and fourth cocks, second and fifth hens, first and fourth cockerels, fifth pullet and first pen. The winning cockerel was of the sensational kind, a bird in the best of condition and with every quality required in a great bird. A fine head and the best of carriage set him off well. This line also is one of the old and reliable favorite ones that has a record as long as a flag pole and as bright as the banner we are used to seeing way up high.

Mr. E. B. Darrow, Williamsport, also won well in this class with a choice line of birds, particularly his second cock, a bird of merit and when at his best will make all step fast. His third hen and third pullet were choice birds of grand good quality.

In Buff Rocks, and most anyone can admire that color, Mr. Ed H. Lichtenwalter, Girard, Pa., entered four birds and won all four first prizes. The birds were shown at their best and were just right. All deserve special mention, but we wish to just add that the first pullet was about as neat a chick as we have seen.

White Wyandottes were a class of 85 birds and a very even lot all through. Here, like in all the large classes, prizes to eight were given and these honors were distributed over a great field of contenders.

Mr. J. R. Sims, Williamsport, won first pen, first cockerel and fifth pullet, with several specials.

Mr. J. R. Heim, Williamsport, won third and fifth hens, second and third cockerels and specials.

T. F. Shambach, Bloomsburg, won first cock, fourth hen and fifth cockerel.

Mr. W. E. Gage, Williamsport, won first pullet and sixth cockerel. Mr. Gage is one of the reliable old guard of the show, and we are pleased to see him in the winning. Next to winning in Wyandottes his likes are to see Mrs. Gage win with her Buff Leghorns, which she did well here, taking first and fourth hens, first cockerel and third and fifth pullets in a good large class.

Buff Wyandottes was one of the best classes we have seen of this variety, there being about 80 birds shown. L. W. Winner, Williamsport, winning first cock, first, second and third hens, first cockerel, first and second pullets and first pen. But who can help but win with his name?

In Golden Wyandottes most all prizes went to A. B. Kahler, Hughesville, Pa.

One hundred and ten S. C. Reds faced the judge in all their beauty, and here again it was a battle between several large and well-known breeders, including L. W. Maxson, Mrs. Boyd Johnston, B. H. Bastian, A. A. Schwartz, E. E. Seasoltz, Milton Springer, etc. All these had nice entries and won well. The winners were exceptionally fine birds.

The S. C. White Orpingtons were a rich class of quality, with the feature in the first prize pen shown by Mr. John C. Peifer, Danville, Pa. The quality was of the best, very even and in the best condition. Mr. Peifer also won third and fourth cocks, second, third and fourth hens, second, fourth and eighth cockerels.

First cock, first hen and third cockerel was won by Mr. C. A. Phillips, Syracuse, N. Y.

Buff Orpingtons, a large and representative class, with sound color evident and fine head points. The pullet class was extra good.

Black Orpingtons and Rose Comb White and Buff also made a good showing in strong entries and real quality.

Blue Orpingtons were shown for the first time here and cut a very large figure. The birds shown were certainly of the best of quality in color and very handsome. The feature was the beautiful shape of these birds. In form they excel. It seems to be natural for them to have the required shape, and the winning cock won several specials and was

well considered for all general prizes. Blue Orpingtons have come to stay.

S. C. White Leghorns with 155 birds was the second largest class at the show. It was a rich one throughout, with several well-known breeders exhibiting. This has always been a hot Leghorn show, and to win here means to have the highest of quality. The winners here were the Eastern Ideal Farms, Norristown, Pa.; H. C. Wack, E. B. Darrow, H. K. Koons, Sonder Bros., C. P. Newell, etc. The winning cock by Sonder Bros. and winning cockerel by H. C. Wack were the feature males, while the first hen shown by the Eastern Ideal Farms was the gem of the females, shown in beautiful condition and of the best of shape and size; she was the delight of all.

The pens were a whole show by themselves, being unusually good and grandly mated. Judge Burgott surely did a high-class job.

S. C. Buff Leghorns were another large class, with many fine birds seen to advantage. First cockerel a real beauty. Other classes of Leghorns very good in numbers and quality.

The S. C. Black Minorcas were the largest and best class we have seen out this year, with 50 or more birds. They formed a nice collection, rich in color and form.

Silver Campines were a delightful class all through and unusually large for this new variety, with 65 birds in line. The quality was extra good and the interest this exhibit created bids well for the future. Mr. W. M. Patteson, Penn Yan, N. Y., was the leading winner with first pen, second cock, first and second hen, first, second, third and fifth cockerels and first and second pullets. Other winners were M. B. Pretzman, J. L. Pullhamus, P. Denaney and A. H. Bloomfield.

Golden Campines were not so numerous, but there was a real good class again, with Mr. Patteson the leading winner. It will be well to keep an eye on this man. He is bound to succeed.

Anconas have been popular in this section for some years and here again there was a large and select display of this beautiful variety. The winners were exceptionally fine specimens.

Houdans were one of the show's surprises; in fact this variety has been

## EGG PRODUCERS—If you want eggs buy Fishel's White Ply. Rocks

### STANDARD LINE-BRED S. C. WHITE LEGHORNS

EXCLUSIVELY

#### I HAVE THE CHICAGO WINNERS

Which have swept the platter clean the last four years and have won more prizes than all other exhibitors combined. My most recent winnings were at the big Louisville, Ky., Dec. 23-28, 1912. The stronghold of the South, where I won. 1, 3, 4 cock; 1, 2, 3 hen; 1, 2, 3 cockerel; 1, 2, 5 pullet and 1 pen, in class of over 150 birds. The cream of the south. Every bird entered by me was placed.

#### DON'T BE MISLED

And get your start from a bought reputation, but buy from a specialist who can prove conclusively by his winnings that he breeds the birds himself and knows the art of doing it. The Iowa, Oklahoma and Pennsylvania State Departments of Agriculture and United States Department of Agriculture are among my customers. They know where to buy the best grade of stock for demonstration and experimental purposes. No salve goes with them. They want the goods. That's why they come here. I have plenty of cockerels, hens and pullets of the best quality I ever owned or saw. Write me your wants. Inclose 10 cents in stamps or coin for the original book of information on "Parkside Strain" of S. C. White Leghorns.

CHICAGO SENSATION—First Prize Pen Cock, Chicago, 1910. Pronounced by Judges the Finest Male Bird Ever Bred.

THE PARKSIDE POULTRY FARM, N. P. EASLING, PROP., BOX 40, PEKIN, ILL.

●●● LARGEST AND BEST SPECIALTY SINGLE COMB WHITE LEGHORN FARM IN THE WORLD ●●●

coming strong for the past few years. They are coming into their own and we feel certain that those breeding them have no cause to regret. They are great layers, quick to mature and among the best for the table, and they have a most attractive carriage and beauty. The class here numbered 64 birds of the best quality, with several well-known breeders exhibiting. The leading winners were: G. H. Springman, Dr. H. E. Dunne, Ridgway, Pa.; E. J. Baird, J. W. Kennedy, etc. The first cock was a well-known old winner we believe it impossible to beat, and first hen and first pullet, also two beauties shown at their best. A handsome and very valuable class.

In Cornish, Brahmas, Langshans, Cochins, Hamburgs, Polish, etc., the display was complete and in each of these many fine birds were seen.

Bantams were a large class and in ducks and geese the entry was strong and complete. The Runner and Moscovy ducks were extra fine.

The display of pigeons and pet stock and of eggs rounded up the exhibit, and like all others helped to make this a great and very complete show. Nothing was overlooked, the interests of the poultrymen were catered to, and all those who attended were well repaid, for no matter where their special interests lay they found them there and to their advantage.

Williamsport has done well. It has made its mark and won its place in line with our best shows, and as it well deserves its future is rosey indeed. They deserve the best the breeders can give them. H. P. Schwab.

#### BUYING STOCK.

By A. D. Freese, Mohawk Village, Ohio.

THE subject of buying stock for either fancy or utility purposes is, and will be of vital importance to all prospective buyers during the summer and early fall. Not in our experience have we known as unfavorable a season in which to hatch and raise chicks, especially the early ones. Thousands of prospective buyers and beginners were disappointed in their plans for getting out chicks this spring. All over the country we hear of poor hatches and poor business, hens

as a rule have very little inclination for early setting and unfavorable weather conditions have either disappointed or discouraged these would be buyers. As a result of all this the demand for mature stock will necessarily be sufficient if not far more than the supply, for good stock; considering these conditions as they exist and knowing from experience that this unusual demand will come, we wish to give a word of warning to beginners and some advice to all who would get what they pay for.

There are two items of importance to look at in this matter, one on the bright side and the other on the dark. While business with most breeders this spring has been slow and they have not been rushed with orders for eggs, the up-to-date breeder has been hatching and raising all the pure bred, high class stock they could possibly accommodate, thus taking advantage of the season, therefore they are going to be ready for the demand when it comes with some of the very best stock. This is one advantage. On the other hand, the fact that thousands have been disappointed in starting with eggs and chicks, will necessitate their buying mature stock for fall breeders and winter shows, thus creating a demand that will be hard to fill. Many dishonest breeders and "chicken peddlers" realizing this state of affairs will take the chance to "stuff" and "boodle" the orders in a dishonest, misleading advertisement and supply birds of inferior quality. Therefore we sound the warning, having been "stung" myself in the start I have a friendly feeling toward all who are affected by the "hen fever" and to these let me say be quick to take advantage of good offers on standard stock but be slow to place orders with unscrupulous unknown breeders. There are thousands of reliable men in the business who merit your patronage and will treat you right, but there are also many who will take your money though they have nothing to give you in return. Be careful. If you are just starting, go slow; we get our education by reading and writing, and in the poultry world reading is an important factor.

We have known instances where in different breeders (or peddlers as we had best call them) were carrying dis-

play ads in prominent publications advertising high grade stock, filling orders for such to rural purchasers and new beginners at fancy prices when in truth they did not raise a bird they sold, nor could not vouch for their quality. It is too bad we must be hindered by such fellows but such is the case. To be sure these fellows know a bird and in their trade they pick them up at low prices but as to their quality or breeding they know nothing, and as a result the purchasers are usually swindled in the end, and confound the breeders and the industry, but is it right that we who spend our time and money to breed good stock should be sufferers from this cause, when in truth we are doing all we can to conduct the business on honest principles and breed to the highest standard of perfection. Do you want what you buy or do you care to take the chances? If not, "don't be a sucker," heed the warning, and accept the advice of the experienced.

You have read the warning now for the advice.

If you are among the many who were disappointed in getting started early, don't worry. If you are careful use care and act promptly you can buy mature stock now and the earlier you decide to buy the better. Don't wait until the breeders get "culled out" but get in action now, as we said in the start we do not look for the supply to near go round, so the safest way to proceed is to get in correspondence with reliable breeders at once. Another point in your favor is, breeders in many cases will be crowded for room and before putting stock in winter quarters they will be compelled or forced to dispose of hundreds of birds at reasonable prices and the early buyers will get the preference and reap the profit by acting now.

Look well to your advertisers, don't spend time with the hit and miss advertiser, nor the cheap John, watch for the "stay there" advertiser in the reliable poultry journals, where advertisers and buyers are protected, patronize the year round, reliable, honest advertisers whom you believe to be honest and those who have proven their statements.

Choose the breed you are most inter-

# ORPINGTON FOWLS AND DUCKS

Winner at Grand Central Palace

## WINNERS at MADISON SQUARE and GRAND CENTRAL PALACE, N. Y.

My birds are all descendants from prize winners, and my recent "victories" at these two most prominent shows in America should convince you that I have "quality" that will please you.

ON 11 BIRDS SHOWN AT THE PALACE 10 WERE IN THE MONEY  
ON 14 BIRDS SHOWN AT THE GARDEN 7 WERE IN THE MONEY

These prize winners are all in my yards and are mated for the egg trade. Plenty of grand pens to select from. Superb matings, \$5.00 to \$15.00 per 15.

## BUFF ORPINGTON DUCKS

Madison Square winners. I won 1st pen, 2d young drake, 2d young duck. I have as fine a flock of these most wonderful layers and money makers as can be found anywhere. Having a flowing stream insures my duck eggs being fertile. Duck eggs only \$4 per 11. Write for prices on Baby chicks. Catalog and mating list free.

F. B. CRAWFORD

RAHWAY, NEW JERSEY

ested in, then watch the ads in this variety, and get in touch with them and when you are convinced you are safe to proceed lose no time, don't for a minute let cheap prices below good quality deceive you. Don't try to "Jew" a reliable breeder or any other breeder for you can't do it; those who will cut prices cut the quality, and the cheapest is always the dearest in the end.

As to the best breeds to buy I cannot advise you here for I do not know your fancy, your circumstances, nor your conditions. I am always willing, however, to answer any such inquiries from breeders or beginners who write me personally and all such matter will receive a reasonably prompt reply. My experience in the business with several different breeds at different times has taught me a great deal about the best breeds to keep and I am always ready and willing to impart to others what I have learned.

A great deal depends on the fancy of the purchaser as to the success he makes with the breed, while the kind, the condition and the breeding are among the vital points.

In starting, get the best you can, A good start makes a good finish.

As a friend, well wisher and sympathizer for all who have a friendly feeling for "better poultry and more of it," I welcome all inquiries anyone may care to address me, and at any time I may be of service to the poultry world you have but to call on me.

#### SEVEN POINTS OF ADDED POULTRY PROFITS.

By Sam Turner, Trenton, N. J.

**T**HE greatest profit in any business is attained by using every small particle to advantage. They state that at the Chicago Packing houses they consume every part of the hog but the squeal. We know the packers have made big money. It is possible for poultrymen to make big money.

On a little plot 80 feet by 200 feet I have a chicken house containing 100 White Wyandotte hens. The building stands in the middle of the lot, which is surrounded by a six-foot wire fence, and partitioned across the middle. The front half is in grass, and the back half I use for truck patch. In the winter the 100 birds are turned on the truck patch, and their droppings fertilize the ground. In the spring they are turned on the sod, and have excellent pickings, and prove a beautiful sight, and attract trade to my little plant. I plant the truck patch in early vegetables, and sweet corn. By July 1, a nice profit has

been made from my early vegetables, and the sweet corn has reached a height so that the birds cannot disturb it. The grass has been pretty well clipped off on the sod lot, so I turn the birds into the truck patch lot, and let them eat up the vines and other by-products of my early garden. The shade of the sweet corn protects them from the hot sun of July, August and September. They keep down the insects and weeds, and I get an excellent crop of sweet corn, which is a credit to any grower. The birds, however, are not run in the truck patch all the time, but are alternated between the truck, and the sod patch, so that the grass is kept clipped short, and all is worked to the very best possible advantage. I am getting full benefit from all my plant, a beautiful grass covered lawn in the front, and an attractive and profitable well fertilized truck patch in the rear. The birds have good picking, and variety, and give wonderful results, as the change keeps up their interest.

The sweet corn fodder is cured and chopped into short lengths which makes the best of litter for the winter, as it gives the birds more exercise when scratching and corn fodder makes better manure than straw.

The droppings from the roots are mixed with ash siftings, and are carefully stored away in dry quarters, and sold to good advantage to neighboring farmers for compost. It is far superior to any fertilizer, but if the droppings are thrown out in a heap and exposed to the weather the chemical action decreases the value of them greatly, and they are practically worthless. Besides by lying around they create vermin.

Every person keeping poultry should sift their coal ashes, and use fine siftings not only with their droppings, but they are the best dust bath possible for the birds. Get a store box, and put it in the corner of your house, and let the birds wallow in it. It will keep down vermin, and keep their feathers in excellent shape, and prove of great advantage.

Sufficient birds are raised each spring to keep up the flock. These are raised in the rear of the truck patch lot. The males are fattened and sold to market. In killing the blood is saved and mixed with the poultry feed, which we find adds relish to the food. The feathers are carefully spread out and dried and are sold to good advantage.

I have installed an Afton Farm Feed Mixer. These machines mix the feed much more thoroughly and therefore get a double value from it. A great advantage is also derived in the saving of time in mixing, and it is

possible for my sister to mix the feed, and care for the stock in my absence. It would be very hard and dirty work for her to attend to this were it not for my mixing machine.

In a corner of my lot is a small shed in which I keep one hog. I am careful to scrape all feed from the troughs twenty minutes after the birds have been fed, as having feed before chickens makes them lazy, and does not develop the best of results. I feed the scrappings to the hog. He also gets the refuse from our table. My lot, 80 by 200 feet, is paying an excellent profit. I know of no reason why every lover of farm life living in the suburbs should not be able to pick up several hundred dollars each year by conducting a like plant. The neighbors are always keen for buying eggs and dressed poultry from an attractive plant where they know the birds are fed clean feed in sanitary quarters, and the goods they purchase are fresh.

This plant is conducted as a side issue. It does not interfere with my business in the least. Of course, profit could be made without being quite as thorough as I am with my little plant, but I find it is most profitable to work everything to the best possible advantage. If my experience will benefit others, and assist in reducing the high-cost-of-living, I have done well by writing this article.

—O—  
**Open Air Poultry Houses for All Climates.** By Prince T. Woods, M. D., American Poultry Journal Pub. Co., Chicago, Ill.—Right in the line of progress, the same progress that is measured by organizations for prevention of cruelty to animals, gratifying humane sentiment while adding to pecuniary profits; and in line with the advance in sanitation generally, for man and beast, the new movement for fresh air for poultry stands conspicuous. Dr. Woods has been all along the acknowledged leader in this crusade, which has prevented disease in hosts of cases, and produced thrift and happiness for myriads of fowls and pecuniary gain for their owners. There is yet much room for the spread of the movement and this admirable book will vastly promote the splendid mission. It is handsomely bound, printed on elegant paper and forty-five pictures show styles of buildings and details of construction from start to finish, so that the reader can be prepared to construct a modern open air poultry house.

## Value of "Reputation" in Breeding

An Example of How "Reputation" Has Been Made and Kept for Years. *By Louis A. Stahmer*

THE value of "Reputation" as a business asset and the prestige it brings the holder, cannot be overestimated. Intangible though it may be measured by physical standards—nevertheless, it is a factor exerting a direct and potent influence upon the success or failure of any business or occupation, whatever its character or kind. Examples are plentiful where such "reputation" value is the greatest asset of the business.

There is no industry that offers more direct or more abundant returns upon a "reputation" investment than the poultry raising industry. It can easily be made a real, tangible, tremendous business asset. In both the breeding of "fancy" as well as highly productive "utility" stock—there are many factors and conditions involved that cannot be accurately traced to or determined in the product. In other words—aside from the most prominent characteristics—such as color, shape, etc., the only assurance the purchaser of eggs, chicks or mature fowls has of getting from any breeder exactly what he pays for, is the breeder's "reputation" for breeding fowls with valuable, standard characteristics, and then delivering stock that actually possess these distinctive characteristics.

There is open to every poultry breeder unlimited opportunities for deviation from the highest standards and most dependable breeding methods

—both in foundation stock as well as in breeding, mating, feeding, etc. When so disposed, a breeder can unquestionably so manipulate his operations as to make his product—in some one or more important features—actually inferior to what the purchaser understands he is securing. It is not to be at all understood by this that actual misrepresentation is practiced to any extent by breeders generally—either regarding their stock or breeding methods—although there is abundant reason to believe such misrepresentation is not altogether infrequent with many.

It is to be understood, however, that a breeder of poultry always has and always will have abundant chances to deliver his customers without detection, eggs or fowls that will not altogether come up to his direct representation. They may not be directly misrepresented but for all that they can in many ways be made inferior to the standards that the purchaser has a right to expect in the breed he is securing.

A breeder whose entire breeding methods and practices do not adhere in every particular to the highest and most approved standards, can not really deliver the highest "quality" the breed is capable of—no matter how great his sincerity, integrity or business morality may be. Breeding tells in poultry as in everything else.

The security of the poultry buyer, therefore, as to the quality of the stock he gets rests almost altogether upon the poultry breeder's "reputation" for delivering exactly what he represents. Unquestionably, a great majority of the poultry breeders throughout the country conduct their entire breeding operations upon a high plane of business honesty and morality. A notable example of such a breeder is Mr. F. A. Tecktonius, Route 7, Racine, Wisconsin, proprietor of the famous "Tecktonius Strain" of Single and Rose Comb Buff Leghorns.

Mr. Tecktonius' career as a poultry breeder has extended over a period of but nine years. Short as it is, compared to the career of others in the business, it has been extraordinarily fruitful in results that are without a parallel in the history of the poultry breeding industry. At the very commencement of his operations and almost at a bound, Mr. Tecktonius leaped into prominence as breeder through the unique, and original campaign he carried on for the purpose of satisfying himself definitely and conclusively what breed of fowls have the qualities that would make them meet the ideas and requirements of the greatest number of poultry raisers.

Instead of being influenced by the partisan claims of breeders of this or that fowl, or allowing his own fancy or prejudice to govern his choice, Mr. Tecktonius set right out "to be shown" and proceeded further to do his own demonstrating. Probably no more thorough, comprehensive series of experiments were ever undertaken along these lines by any breeder than those conducted by Mr. Tecktonius.

It is unquestionably true that no sim-

## Norwich Automatic Exercisers and Feeders

Installed in all of your breeding pens this Winter, will keep your breeders hustling from morning till night, and will compel them to lay more eggs, and stronger eggs, eggs that will hatch more livable chicks than ever before. They will cut your feed bills at least 25 per cent, and reduce your labor bills to merely filling the hoppers once a week. "The chickens will do the rest." They are all sold on thirty days' free trial, by responsible dealers everywhere, or shipped direct from Toledo, Ohio. Write today for free booklet describing them, and the name of your nearest dealer. **Notice to Poultry Supply Dealers**—We still have some choice territory open, and would like to hear from wide-awake dealers. Exclusive sale given to the right parties. Address

**River Home Poultry Yards : 820 Monroe Street : Toledo, Ohio**  
BREEDERS OF EXHIBITION QUALITY "LIGHT BRAHMAS" EXCLUSIVELY

ilar investigation into, or experiments with, different breeds of poultry have ever been carried on in a more fair, unprejudiced and impartial spirit than those undertaken by Mr. Tecktonius. As these investigations and experiments were simply and solely to satisfy himself—alone—on this important point, he certainly cannot be accused of showing favoritism towards any one breed. To do so, would have defeated the very purpose for which they were undertaken. The evidence secured through these systematic investigations

and extended detailed experiments, pointed overwhelmingly to the "Buff Leghorns" as possessing the qualities that make them the most valuable "general purpose fowl" to breed and promote.

Having in the most convincing manner possible solved the perplexing question of the best fowl to base his operations upon, Mr. Tecktonius proceeded with characteristic energy and ability to prove to the poultry world that "Buff Leghorns" could and would live up to their trial "reputa-

tion" as winners both in show-room competition and in the market. The success that has crowned his efforts in making the "Tecktonius Strain" of Leghorns supreme as a combined fancy and utility fowl—as well as the honors that have been heaped upon him in the various governing poultry associations—demonstrates conclusively that Mr. Tecktonius' judgment is sound and unerring—his breeding methods scientific and correct, and his business representations honest and reliable.

The high "reputation" Mr. Tecktonius has established for the "Tecktonius Strain" of Buff Leghorns—the many hundreds of breeders who have adopted his successful methods and stock, and achieved corresponding success—could not have been secured—let alone maintained—on any other basis than demonstrating in his business transactions that he gave full represented value and that his "word was as good as his bond."

Mr. Tecktonius has found by actual and extended experience that his breeding stock and methods insure progeny that maintain the "Buff Leghorn" standard characteristics, reproducing themselves equally as well or better than the parent stock. He knows, just as certainly, that his breeding stock and methods produces hatching eggs running almost perfect in fertility, averaging over 97 per cent; that they also insure hatching chicks that possess the vigor and stamina to carry them over the critical brooding period with a surprisingly small percentage of loss—averaging less than 2 per cent year in and year out. It is generally understood that the average hatching and brooding losses with all breeds and breeders are vastly larger than this low average of Mr. Tecktonius. This exceptional "vitality" record of the "Tecktonious Strain" testifies to the tremendous vigor of his breeding methods.

Mr. Tecktonius is not alone satisfied to know that he supplies his customers with eggs and stock that fulfill his every representation, but backs them up in every case with a clean-cut, broad guarantee. This guarantee positively makes good any unfertile eggs received from him, as well as a refund of the purchase price of any stock proving in any way unsatisfactory to the buyer.

Mr. Tecktonius—knowing that his strain of "Buff Leghorns" will live up to their reputation as world beaters in the poultry shows and as egg producers—does not hesitate to go the limit towards securing and holding the confidence of the poultry buying public, by honest representation of his stock and delivering what he represents.

The commanding position and high "reputation" Mr. Tecktonius has attained in the poultry breeding industry verifies the contention we make herein that a "reputation" for breeding merit, business, integrity and honesty, can be made an asset of definite value in the poultry business—one that carries with it increasing honors, as well as returns directly reducible to a money basis.

If Mr. Tecktonius' successful career is a criterion—and we certainly believe it is—it surely pays to have a "reputation" in breeding poultry. We would, therefore, advise poultrymen aspiring to the highest achievements to his chosen business to first investigate Mr. Tecktonius' breeding and business methods and then proceed to get a similar "reputation" for himself.

## BARRED PLYMOUTH ROCKS

Bred for business and show-room requirements. If you are interested in a heavy laying strain with exhibition quality write me for show record and prices on such as you need. Get my 1912 mating sheet if you need eggs for hatching.

O. L. KING, : ROCKFORD, ILLINOIS

## BABY CHICKS--CRYSTAL WHITE STRAIN

The better bred chicks. Strong, healthy stock bred for heavy egg production. Breeding stock averaging over 215 eggs each. Prize cock S. C. Leghorns, \$15 to \$20 per 100 chicks. Safe arrival and satisfaction guaranteed. Place order now.

Crystal Hatchery, Box A. Frenchtown, New Jersey

## MUNTZ'S S. C. W. LEGHORNS

Winners this year at Chicago, Springfield and Elgin. Choice breeding cockerels sired my second prize cock bird Chicago; also have a few fine exhibition cockerels to spare. Pullets and yearling hens from utility to the best show specimens. I make a specialty of breeding pens mated for best results in breeding. My mating list will be ready about March 1st, write for one. I guarantee satisfaction and my prices are right.

HARRY A. MUNTZ - 565 SPRING STREET - ELGIN, ILLINOIS

## HOLTZAPPLE'S S. C. REDS

BABY CHICKS 100 PULLETS FOR SALE

Have won at Cleveland, Columbus, Toledo and Fort Wayne for years. Latest winnings at Toledo—1st, 2d and 3d hen; 2d cock; 4th and 5th pen. Seven splendid pens mated, all containing prize winners. Eggs from pens, \$3 and \$5 per 15, chicks, 50c and 75c each. Utility eggs, \$6 per 100, chicks, 15c each. Send for catalog

OSCAR HOLTZAPPLE -- BOX 48 -- ELIDA, OHIO

## S. C. WHITE ORPINGTONS

Winners at Erie, Butler, Meadville and Pittsburg, Pa. A few trios and pens to spare. Eggs after March 1st from matings that will produce stock fit to win in any competition, \$4 per 15. Chicks from same matings, \$6 per 12. Eggs from good laying stock, \$1.50 per 15. Chicks from same matings, \$2.25 per 12. Place your order now to insure prompt delivery. Mention American Poultry Journal when writing.

L. A. Glessman : Box A : Conneautville, Pennsylvania

## Cleveland's Buff Orpingtons

Win at the great Chicago Coliseum Show in one of the largest and strongest classes ever shown—third cockerel, third and fourth pullets and fourth young pen. Send for mating list, describing pens mated and giving prices of stock and eggs. Mention A. P. J. when writing.

Frank C. Cleveland :: Morgan Park, Illinois  
THIRTEEN MILES FROM CHICAGO ON R. I. SUBURBAN

You can enjoy the great pleasure of having large white eggs during the entire year and winning gold and silver specials if you breed

### Pape's Champion Strain Single Comb Black Minorcas

Am offering utility and fancy exhibition stock in yearling and 1912 hatched birds at attractive prices. Get one of our utility cockerels to improve your flock. Our 1912 catalogue is free. It contains list of winnings and describes our matings. One customer reports having raised two \$50 and six \$25 value birds from one setting of our eggs for hatching last season. All stock sold on approval. Note our New Orleans winnings published on another page. State what you have in mind. When writing mention A. P. J.

Charles G. Pape, Box B74, Fort Wayne, Indiana

## PALMER'S WHITE ROCKS

Win silver cup for the best male bird in the entire show, Rochester, 1912-13; also best display; winning first cock, first, third and fifth cockerel, first and second hen, third, fourth and fifth pullet and fourth pen. Years of selection has made them layers as well as winners. Cockerels, hens and pullets for sale. Mention A. P. J. when writing.

"The Glen" Poultry Farm, Box A, Fairport, New York

# The "Ontario" Poultry Show

Canada's Greatest Show Held December 9 to '14, 1912.

By H. P. Schwab

**A**NOTHER great show has passed into history and Canada and the Canadian breeders can well feel proud of their efforts and success, with over 5,000 birds on display drawn from every section of the Dominion, with great classes of wonderful quality the honors were fiercely contested and were all well won as our limited time would permit us to see.

Canada's best breeders were there; it is an annual round up of the upper class in poultrydom, and with the great hall filled as never before we must say it was a great success. The breeders there are at it the year round and when this show comes they are prepared for it and ready to make the try of their lives for the records which mean so much to them. Beside the show there are special meetings and lectures daily which all tend to make this a week valuable to all breeders large and small alike.

The display of dressed poultry is also a feature here and receives much special attention.

In Barred Rocks, the largest and by far the best class we have ever seen in Canada faced us, there were no fillers and the feature of the class was the even and high grade quality all through. The cocks were a great lot, well shown and as a rule very strong birds. First a corking good one, well built and of the best of style, it took close picking to select the winners. Hens, while more rare ones were not in the best of feather, there were enough good ones to satisfy any desire for quality. The cockerel class was a hummer with sixty-seven quality birds in line. First a rich and rare beauty, grandly shown and of a beautiful shade of color and the best of barring. Second great in color, but not quite filled out, will make a beauty. Pullets, a very rich line from first to last. The first pullet is the best female we have seen in Canada, her quality was simply wonderful with excellent shape; second, another of the best with grand barring; others up close.

Mr. John Pringle, London, Ont., First cock. First hen. Second, cockerel and first pullet with several other mentions. Charles Hall, Trafalgar, Ont., owned the winning cockerel, in fact had five cockerels placed in the ten awards. We wish we had the names of other winners for we would like to give several credit, but as they have no catalogues there, we must omit them.

White Rocks as usual were very strong there in all classes; it took the very best to win and several of the best awards went to J. L. Brown, Seaford, Ont., and F. A. Andrewes, London, Ont.

Buff Rocks are another favorite there and we were told that Mr. John Bawden, Ridgerton, Ont., was the leading winner. Mr. Bawden has made records there for years.

Partridge Rocks numbered about 50 birds and many fine ones were handled in these classes.

White Wyandottes were the large class of the show with about 200 birds, there were 95 cockerels and in these Mr. Joseph Russell of Toronto came out

best, with Mr. Pringle and others showing strong.

The Rhode Island Reds were great classes and in the Single combs the running was great. Mr. Pringle winning first cockerel on a beauty in form and sound color.

The class of Rose Comb Black Minorcas was the best we have seen to date, very rich in color and of grand type and nice heads. In these Mr. Ross Swartout, Newport, Ont., won second and third cocks. Hens—first, second and third. Cockerels—first, second and third. Pullets—first, second and third. This is a win to think over.

The Single Combs were also a rich lot that was good to see and we regret not having the winners, for our stay there was for but two days with a lot of work to do.

There we met our old friend, Mr. T. A. Faulds, London, Ont., the well known breeder of S. C. Black Minorcas. He was not showing this year, having sold birds all over the world for exhibition,

but we expect to again find him at some of our big shows over here as he is a regular patron. When we last saw him in this country, it was at the Philadelphia show and club meeting where he won a load of cups and all the money he could carry away with him.

The Orpingtons were all beauty classes and J. W. Clark as usual carried his smile and won well in the Buffs.

The Leghorns in White and Browns were very strong and many birds of great merit were seen. The class of Blacks was the best we have ever seen at any show.

Dorkings, Hamburgs and Polish are favorites here and always are among the strongest classes.

The usual good management prevailed with Mr. Jack Saunders in charge. He is one of the good old timers and has made his success here for many years. Wm. McNeil, the sage of London, and the man that all fanciers there look to, was there as usual with a smile and pleasant word for all. Billy looks better than for years, and besides did a lot of judging. Prof. W. R. Graham found his main interest in the display of dressed poultry, and we regretted not having more time to give to him, for we value his opinions highly. H. P. Schwab.

## BAWDEN'S BUFF ROCKS

The most consistent prize winners and the best producing strain in the world. No more stock for sale this season. After February 1st, eggs, a limited number, \$10.00 per fifteen.

John Bawden --: Box 20 --: Ridgerton, Ontario, Canada

Birds Like This Produce

# Newtown

## White Leghorn Chicks

### And Eggs For Hatching

The Newtown Strain of White Leghorns is of the prize-winning kind—high class, line bred and famed for its egg-laying qualities.

Baby chicks hatched from eggs of such birds must be heavy, livable and profitable. The blood does tell.

Hundreds of buyers come back every year for more Newtown Chicks, because they please and prove profitable to them.

Newtown Chicks are safely shipped 2000 miles in large, roomy wooden boxes and arrive lively and healthy. That's sufficient proof of their inherent strength and vitality.

If you want select chicks or fertile eggs from a stock of assured quality, order Newtown Chicks or Newtown Eggs.

Send now for price list and Poultry Catalog Q.

**NEWTOWN PRODUCING CO., Newtown, Pa.**

# Grand Central Palace N. Y. Show

Held December 3-7, 1912—A Magnificent Display  
of All Leading Varieties.

By H. P. Schwab

**W**ITH MANY expectations we headed for old New York to attend the Palace New York Show. We had heard of their great entry and of the prominent exhibition and we well knew the caliber of the Palace officers to make good. They have given feature shows before and with the experience gained we were sure of a whole-souled poultryman's feast. Rest assured there were no disappointments, the entire display was up to expectations. It was quality in every coop, with arrangements perfect and all that came evidently happy over personal and general results.

The attendance was very good, we believe nearly double that over last year, and the breeders as well as the display people reported a very satisfactory business. Buyers for winning poultry were rather thick on two days and many birds changed hands at good prices.

Pigeons, while not as large an entry as last year, were a complete display with the select on display and showing to advantage. Supt. Harcombe is a past master with doves of all kinds, and had all in excellent exhibition order and devoted all his time to his charges.

President Robt. Seaman had his desk set in the hall, where he personally gave attention to all details and wants of the exhibition and public. This arrangement proved a feature well worth the notice of all others. Secretary L. D. Howell, the easy-going, quiet man, is

an ideal officer who has the general run in hand and to whom every possible credit is due. He is full of consideration for all and in his year of service has made a record in which his friends justly glory.

As to the birds exhibited, the classes were uniformly well filled with some of record breaking entries. The general quality was very good, and in each class was found some phenomenal birds. All considered it was a great show, a real beauty whose value to the industry is far greater than we are able to appreciate. The poultrymen owe much to the Empire Poultry Association for their efforts to us all.

The banquet was the particular social feature of the week and was enjoyed by about fifty lady exhibitors and a hundred of the sterner sex. President R. V. Hicks, of the A. P. A., was toastmaster, with Mr. John Robinson, Link Orr, Secretary Campbell, Professor Rich, L. D. Howell, and many others as speakers. Here also was mentioned for next president of the A. P. A. Mr. E. B. Thompson, Amenia, N. Y. Mr. Thompson's name was received with general approval by all. The feeling runs strong for a real breeder for president, and in Mr. Thompson we have a leader in this line as well as a man capable and that would prove a credit to the grand old association of which he has been a member for over 25 years.

Barred Rocks brought out 100 birds,

an even good lot all through that were well shown. Top Notch Farm, Water Mill, N. Y., with Mr. Henry Cundall in charge, won first and second cocks, third and fifth hens, third cockerel and first and fourths pens. The first cock was a strong bird of superior color and barring with nice head and beautiful type. The winning pen grandly mated, very even and of the best of quality. In the male of their fourth pen they have a youngster of striking appearance and the best of quality. He was not just ready at this show. This farm has been showing well for some years and comes back each year with improved birds and always properly shown.

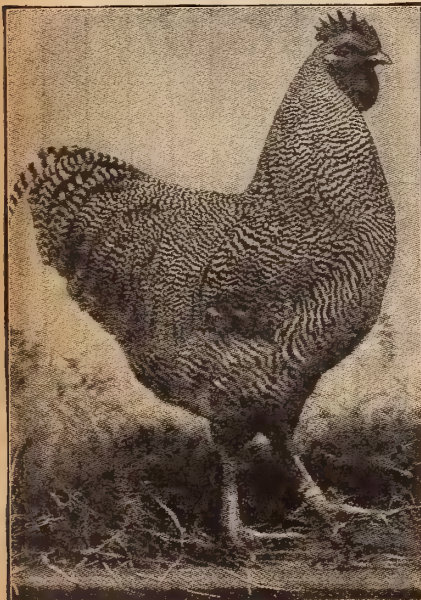

Brooklandwood Farm won first hen with a rare beauty, in good feather and of splendid shape, they also won first cockerel and fifth pen.

First pullet, and with it color special female went to a pullet shown by Mr. John D. G. Gennerich, Mt. Vernon, N. Y.; she was the gem of the class, of wonderful color and the best of barring, under extra and of grand style and condition. We thought her as good as we had ever seen so early in the season. Mr. Gennerich also won second pen.

Both Jonas Hayner and Frank D. Ham, of Livingston, N. Y., were exhibiting here and both won a share of the honors, as usual. These two old stand-bys have been winning since the year one, and no show at New York would be complete without them. They have good reliable stock and are always there when the bell rings.

Fifth pullet, shown by A. J. Clark, New Haven, Conn., is a bird of promise, with the best of color and grand barring. We thought she should have been placed higher up with her shape and markings.

## Pittsfield Barred Rocks Win Again —Order Day-old Chicks and Eggs Now

SECOND PRIZE COCKEREL, BOSTON 1911

Pittsfield Strain Barred Rocks again scored over all competition at Boston, the biggest show in the east. We took 6 regular and 11 specials—more prizes than any other exhibitor. We won Best Color Male—the third time in three years that we have won this greatest prize for male birds—Best four Cockerels, Best Cockerel and four Pullets, Best Cock and four Hens. These are the prizes that count when you want to keep your poultry up to standard. What Pittsfield Strain does for us, it has a record of doing for those who buy it. Now is the time to book your order for Pittsfield Day-old Chicks and Hatching Eggs. Orders booked free. Send no money until just before shipment. We ship anywhere—any distance—and guarantee safe delivery. 3000 miles successful shipments of chicks. Eggs clear across the continent. So there is no real reason for not having Pittsfield Strain. Pittsfield Hatching Eggs are laid the same day they are shipped. Give better hatches, stronger chicks. You can learn more about this stock by sending for

## Money Making Poultry

Get this great, free, helpful poultry book. New edition, new illustrations, new facts along with the old truths. Explains our feeding system and tells you how to adapt our simple methods to your own profit. If you want the latest word in poultry handling, you want this book.

## \$225 in Prizes to be Given Away

Our great "First Eggs" contest has begun. Costs nothing to enter. See how early Pittsfield Pullets will lay for you. Five classes for early laying pullets raised from (1) Breeding Pen, (2) Day-old Chicks, (3) Hatching Eggs, (4) 8-week-old Chicks, and (5) from pullet bred to cock or cockerel purchased of us. In case of tie the prizes will be divided equally among the winners. Contest closes Dec. 1, 1913. Let us supply you with stock so you can get Pittsfield blood in your own line of poultry. Our stock is actually finer than ever before. Remember this—we always give better values than you expect. Write us about your needs—Day-old chicks, Hatching Eggs, 8-week-old Chicks. Utility and Exhibition stock. Quality always high. Prices low. Don't wait till the last moment, but find out about our new plan of grading our birds so you can virtually select in advance the stock you want.

**PITTSFIELD POULTRY FARM CO.**  
102 Main St., Pittsfield, Maine

White Rocks were represented by 115 birds and formed one of the show's best classes in quality and condition. Here, Mr. L. C. Bonfoey, Vernon, Conn., made a hit by winning first and fifth cocks, first, second and fourth cockerels, first and second pullets and first pen. The winning cockerel was a hummer, shown at his best and with typical shape, nice head, etc. First pullet, one of the very best, and shown in grand condition. The winning pen, a wonder in mating with four excellent females and a coking strong male. A grand line exhibit.

Peapack Farm, Peapack, N. J., won second cock, first hen and third pullet. This line was not just ready, excepting the hen; she, at her best, is one hard to beat in any show.

In this class good and strong birds were shown by the Twyacana Farm, S. P. Green, H. L. Freeman and others.

The Monmouth Park Stock Farm, Oceanport, N. J., won well in Buff and Partridge Rocks, with a ribbon in every bird shown and first pen in both varieties. These were nice classes and birds of extra quality.

White Wyandottes proved to be one of the largest classes, with 106 birds in line, shown by several well known exhibitors, the quality was very fine and condition of the best. The feature in this great class to our mind were the pens shown by Onlya Farm, Florham Park, N. J.; they won first and third pens, both of the very best in type and condition and in mating. These males were in a class by themselves and stand out in form, just what the best in Wyandotte form should be.

Black Wyandottes were out in force, and several grand birds were found. They are improving well in quality and popularity.

Columbia and S. P. Wyandottes were numerous and as a rule birds of merit; the S. P. particularly strong.

Columbian Plymouth Rocks were one of the best classes we have seen of this variety, there was exceptional quality shown and high average all through.

That the Rhode Island Reds are improving in general quality was very evident here, also that they are gaining in popular favor and it is plain to see that they are a variety with a future. The breeders have shown the way, shown what is possible in them, and this showing is enough to assure all of their worth as a standard bred money making variety. In the Single Combs, 122 birds were shown here that for general quality and evenness was good to see. Judge R. V. Hicks proved the master of all and placed the awards properly and received much praise, all of which he richly deserved; it was a splendid job. All five of the winning cocks were rich birds, with type and sound color. The cockerels placed were an exceptionally fine lot as were also the females. The judge had plenty to pick from. First cock and first cockerel went to Dearborn and Sharp, Blairstown, N. J.; they were also winners at Allentown. Second cock, first hen and first pen to Philip and Hermance, Hudson, N. Y. Maplecroft Farms, Pawling, N. Y., won first pullet, fifth cock, second hen, third and fifth cockerels, and second pens. Females shown by Ellis S. Shelly, Williamsburg, Pa., were a little young, but birds of great promise.

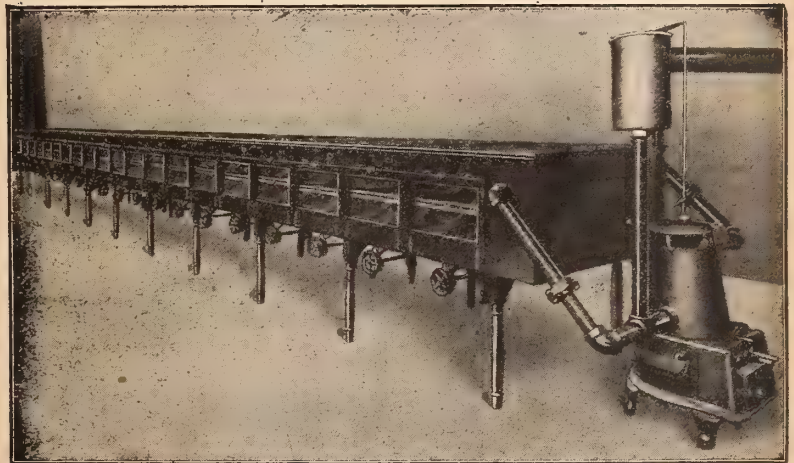

In the Rose Comb Reds, 142 birds were seen, with J. A. Scott, S. B. Heaton, Jenkins & Park, G. W. Little, F. L.

Poultry Farm, A. L. Bailey, Annesley M. Anderson, E. M. Dutton and others as winners. The F. L. Poultry Farm, Verona, Pa., won with other prizes, first hen, that for even quality and the best of color is a wonder. Mr. Ober has every reason to feel proud of that hen and others of his line. First pen and first pullet went to E. M. Dutton, Newfane, N. Y., who for some years now has made grand winnings at several shows.

In the Orpington classes it was a battle royal with honors enough for all. In Buffs, the Sunswick Farms, South Plainfield, N. J., won second and third

hens, second cockerel and fourth and fifth pullets. This line has been in the winning all season and made the best of records at Allentown, Atlanta, etc., and at this time were preparing three strings for other great shows.

Dunrobin Farm, Red Bank, N. J., did well in winning third cock, first cockerel, third pullet and fifth pen in buff. Their winning cockerel was a wonder in type and of the best of color. In White Orpingtons they won third and fourth cocks, first and fourth hens, first cockerel and first, second and third pullets. These farms also make a specialty of the Buff Orpington ducks, and here won

## Like Giant Hens

The Newtown "Giant" Incubators and Brooding Systems are like giant hens, because they supply hatching and brooding conditions as near like the mother hen as is possible.

The Newtown "Giant" Incubator has a special inlet for pure, vitality-building air and an outlet for impure air.

The Newtown preserves the liquid or life element of the egg by preventing the escape of the heavy moisture in the air—its bottom is tightly closed.

## The Newtown "Giant" Incubators and Brooding Systems

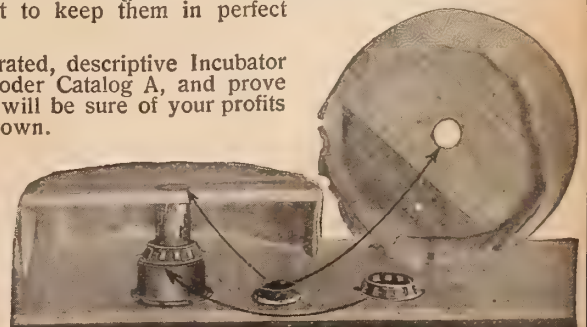

insure the birth of heavy, healthy chicks, preserve that health and make rapid chick development certain.

The Newtown Hover may be raised and lowered to suit the size and age of chicks in each hover. The cast-iron ring on the radiator regulates the temperature in each hover and gives the chicks of various ages just the right degree of heat to keep them in perfect condition.

Write now for illustrated, descriptive Incubator Catalog 1 and Brooder Catalog A, and prove for yourself that you will be sure of your profits if you install a Newtown.

**NEWTOWN  
PRODUCING  
COMPANY**

Newtown, Pa.  
U. S. A.

Newtown Adjustable Hover

all four first prizes from quality classes. This farm from the first has been a leader and has won its share at our best shows.

The Joe-Pye Orpington Farm, South Norwalk, Conn., specialists in Buff Orpingtons, made close to a sweep, winning the best display and other specials. Their regular winnings are, first, second and fourth cocks, first hen, third cockerel and first pen; they also won shape special and cup for best Orpington shown. In their first pen was the famous old champion male that has won several firsts at the Garden N. Y. show, Boston, etc.; an undefeated fellow of true type and of the best of sound color. This line has done well in the past, but with the quality shown this year we can well predict more for the future.

Miss Henrietta E. Hooker, South Hadley, Mass., won special for best headed male bird. Miss Hooker has been a consistent winner in the past and her line will again be heard from.

The Ingleside Poultry Yards, Flushing, L. I., New York, also won well, being placed in all but one class; these birds were not at their best in feather here, but when in condition will have to be considered.

The Dune Alpine farms, East Hampton, N. Y., made a record with their White Orpingtons and S. C. White Leghorns that will stand long to their credit. It takes quality to win in these classes at the Palace, for they are among the largest and best there. Their winnings in White Orpingtons were first and second cocks, second and third hens, fourth cockerel, fourth and fifth pullets and first pen. In the S. C. White Leghorns, in a class of 115 birds, they

virtually made a clean up by winning first, second, third, fourth, sixth and seventh cocks; first, second, third, fourth, fifth and sixth hens; first, second, third, fourth and fifth cockerels; first, second, third, fifth and sixth pullets; second, third and fourth pens and all specials, including several silver cups, medals, etc., with shape and color specials included. A better record has never been made at this show, and they had the goods and well deserved all they won. We congratulate Mr. McAlpine and Manager Geo. Kerr.

A grand class of quality Black Langshans was seen. The Top Notch Farm, Water Mill, N. Y., winning first and fourth cockerels and fourth pullet, the winning cockerel a beauty in style and finish.

A new exhibitor from the South, Mr. W. F. Presgrave, Salisbury, Md., sent in a sample of his Black Langshans and won second and third cockerels, and third pullet. Mr. Presgrave has been winning this season at Hagerstown and other shows and we hope next time will come with his full strength and make this one of the leading classes of the show.

Rose Comb Brown Leghorns were a good class, shown well and of fine head points. The Gale Poultry Place, Hamden, Conn., winning all firsts and several other places.

S. C. Buff Leghorns showed unusual quality, and Judge Punderford had some very close picking here. Fine work is his hobby and the tinkling of bells has no terror for him; he did well and we like to comment such work. W. E. Lindorff, Flushing, L. I., N. Y., won second cock, second and third hens,

first and third cockerels, first and third pullets and first pen.

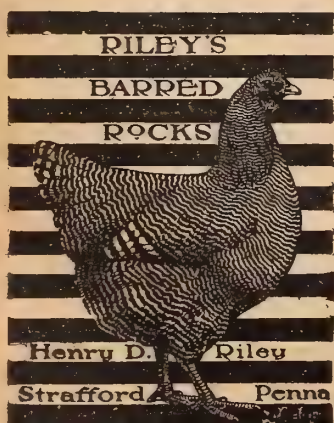

The Royal Farms, Little Silver, N. J., came up close with first and fourth cocks, first hen, fifth cockerel and fourth pullet.

Silver Campines were out in force with over fifty birds in line, they are coming good, showing particularly strong in size and type and in improved color and markings. The Manhattan Farms, Brighton, N. Y., have been cleaning up at about all the shows from early fall on, and this was no exception to their rule to win. Mr. Parkman, the manager, has got the habit and promises to hang on, for they surely have the goods. We hope soon to visit these farms and to tell our readers all of the wonderful line with their winnings made. Here they won first and third cocks, third and fifth hens, first and second cockerels, first, second and fifth pullets and second pen. In Golden Campines they won all prizes competed for.

The Elm Poultry Yards, Hartford, Conn., made entry of their several varieties and won well in Brahmas, Cochins, Langshans, Leghorns, etc. In the S. C. White Leghorns they won first pen and the male also won several specials, including medal for best bird in the entire show. This pen was a beauty in mating and evenness of highest quality, and the male, one of the best ever seen. For several years these yards, with Mr. Groesbeck as owner and manager, have been winning at our great shows, including M. S. Garden, N. Y., Boston, Chicago, Pittsburgh, Philadelphia, Baltimore, and other exhibits of worth. If you have wants of

## RILEY'S BARRED PLYMOUTH ROCKS

### ANOTHER GRAND TRIUMPH AT AMERICA'S GREATEST SHOW

Whenever you see the "Bars" think of Riley's Rocks—Barred of course

## MADISON SQUARE GARDEN

For three years in succession Riley's Barred Rocks have made history at this great show and have proved by their winnings to be America's most consistent winning strain. My winnings this year were 6th cockerel, 5th hen, 3d cockerel and 4th and 5th pullet.

My greatest triumphs have been in the winnings of my customers. From one end of the country to the other it has been a succession of "Riley Strain" victories. There is a reason for this. I sell you the very best that I have got, and Riley's "Best" means the best in the world. My pens this year will be the finest that I have ever mated up,

and will be headed by a wonderful collection of males who have proved their worth as sires. Send for my mating list and see how I have helped my customers to win. Ready to mail about February 15th. I have a grand lot of Cockerels, either mating, for sale at rock bottom prices. Write me.

## HENRY D. RILEY --

BOX B, STRAFFORD  
CHESTER CO., PA.

any kind in the poultry line, Mr. Groesbeck can help you get it.

In Houdans, Polish and Hamburgs, the entry was good and many fine birds seen. Exhibition Games were a very large class, full of quality.

Ducks numbered just 100 entries, with the Indian Runners the largest class shown, followed by the Pekins. A nice lot of Turkeys and Geese completed the exhibit.

Bantams numbered nearly 400 entries and were a rich lot. The Game varieties showing well and the Cochins, Seabright, and others showing in strong classes.

Pigeons numbered close to one thousand birds and formed one of the best quality displays we have ever seen, the classes were well filled and the quality was there to satisfy all.

The Cats also had their days at the Palace show, and if we remember right, the entry was over double that of last year and with many noted cats in line.

The exhibit drew birds from far and

near and there also, we met many of our best known breeders and fanciers, most of them as exhibitors and some as visitors who came to see. Among these Mr. Frank J. Eppele, E. B. Thompson, E. L. Miles, Wm. Ellery Bright, Chas. H. Welles, John W. Poley, Fred Huyler, F. G. Bean, H. D. Riley, Wm. H. Moore, Lee Springs, etc.

We believe it was the general opinion that the judges gave satisfaction. There was but very little to find fault with and the exhibition seemed to feel that all had done their best. Mr. W. B. Atherton surely handled the Wyandottes in a masterful manner, as did R. V. Hicks the Reds and J. Harry Wolsiefer his classes. J. Courtney Punderford has worked there before and all know of his ability.

All that can be said of credit to the management we would wish to say right here. They have made a wonderful success of the Palace show, and they well deserve all the fancy can give them.

of the exhibitors were well known breeders with national records made. They come here year after year for benefits derived, for they know the value of a win at this show, and that here is always an opportunity to do business. A hundred or more good sales were reported at the show, and one party writes us he has received over 30 inquiries to date (December 27) from his exhibit at the Philadelphia show.

Club meetings and visiting breeders were a feature. The "Big Fellows" were gladly met and received. Lester Tompkins, D. Lincoln Orr, Dr. Beckett and others were well received. Annual meetings were held by the following clubs: National Columbian Wyandotte Club, American Columbian Plymouth Rock Club, American Light Brahma Club, the Hamburg Fanciers Club and the S. C. Brown Leghorn Club. The Wyandotte Club held a session lasting over seven hours, with the special subject being a new standard for the breed. They need it.

The show management was all one could desire, for experience has been a good teacher here. All arrangements were perfect and from beginning to end not a whisper or word of discontent was heard. To President Henry D. Riley, Vice-President F. E. Gilbert, Treasurer C. C. Kempton, Secretary W. H. Moore, Superintendent Ed S. Hickman and to the executive committee every consideration is due, for their gallant efforts have made possible this great exhibition. If proper we would also wish to compliment the judges for their work, for Mr. Riley told us that not a word of protest or an objection of any kind had been registered against a single award made. Harmony was the word, with good feeling among all.

On Friday night Dec. 13, 1912, the National Association of the "Flea" was organized at a special banquet. We hope in an early issue to give all details regarding this association, suffice now to say its object is "charity," and with Mr. Henry D. Riley elected treasurer. The initiation fee is \$1 and all poultrymen will be asked to join this most worthy object. It was founded on "Fun," and good times are assured at all meetings, which will be held at all prominent shows, but the aim is high, "To aid a brother and his family when in need." Everybody wants to be it—a Flea.

#### The Breeders and Their Birds.

In Barred Rock alley there was a lively tussle for honors with the birds from

## Philadelphia's Great Poultry Show

Seventh Annual Exhibition|Held December 10 to 14—Better Than Ever. *By H. P. Schwab.*

THE Philadelphia Poultry, Pigeon and Uet Stock Association has held its seventh annual exhibition, and judging from a fancier's viewpoint as well as from a practical point, it was without question the best and most successful exhibition ever held in Philadelphia, and of as great value to the industry as any ever held at any place we know of.

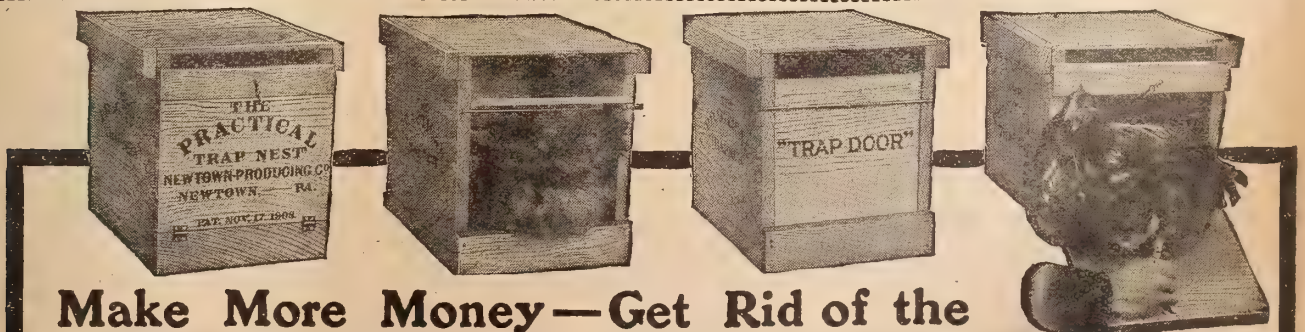

The First Regiment Armory is a grand large building with good light and very centrally located, which assured a surprising attendance. People in regular droves found their way down Broad street, but three blocks from the City Hall, whose tower with William Penn on top reaches something like 500 feet towards the sky, to the Armory, where the crowing and cackling was music to the ear. Poultry show week is a yearly event in Philadelphia, for it is just about the center of the greatest poultry section on earth, and I dare say that within a circle of 100 miles of the city there are more than five times the number of chickens and ten times the amount of money invested in poultry than in any other similar space in the whole world.

We have referred to this show's value

from a fancier's and practical viewpoint, for here the fancier feasted his eyes on a complete display, classes of all standard varieties, and in each quality of the best. It is rarely we see such uniformly high grade quality throughout the entire show. Every class was teeming with birds of the very best sort, and those attending could see and enjoy the best products of our very best breeders and lines.

The commercial poultryman also found much to his special interest here in the very large display in eggs as well as in the special displays of practical poultry shown, but if he would conserve his every interest the sooner he gets right into quality breeding the better for him. Breed to standard, breed for a purpose, and with high grade standard breeding the commercial end will be best served in all-around superior grade and quality with uniformity, and the highest prices assured for eggs and dressed poultry.

There were just about 3,000 specimens shown, all included. The classes were well balanced and uniform. Competition was of the best in all, and the value of a win at Philadelphia is a guarantee of absolute quality every time. Over half

\$1 Each

several well-known breeders' yards. It was a very strong class and with but few birds not at their best condition, the female classes and pens being extra good. Mr. S. M. Goucher, Moorestown, N. J., won first exhibition pen, seventh cock and cockerel and fourth pullet with specials. The pen was a beauty in quality and matting and headed by the best Barred Rock cockerel at the show, a very bright clean fellow with the best of type and barring.

Mr. C. N. Myers, Hanover, Pa., whose specialty is the female line and who has prominently won for some years, made another record here that is to his credit, winning first, second and eighth hens, third, fifth, sixth and eighth pullets, first, third and fourth pullet bred males and specials, including special for best hen in the show with his first prize hen. This was the best hen we have seen out this season. She has wonderful shape and the best possible style of barring.

First pullet went to Mr. Robert J. Walden, Middleburg, Md. He also made

a specialty of the female line and this year has been a large winner at Williamsport, Hagerstown, etc. Besides pullet he won mention in every class shown. The pullet is a dandy, with grand color and the best of barring, being very clean under. She is of his own breeding and we feel like congratulating men that can breed that kind.

The Eastern Ideal Farm, Norristown, Pa., entered but a few Rocks and we believe again split their string, showing rather young birds here. In cockerels they won fifth, sixth and eighth on young birds that give every promise of future greatness, but they must be matured and finished to stand well here.

Other winners were Minch Bros., first cockerel; Yale Bartholomew, second cockerel and first cockerel mating pen. There were 112 Barred Rocks shown all told.

White Rocks numbered 90 birds and was a class full of exceptional merit. Condition was very evident here in about every bird. Mr. C. F. Webster, Girard, Pa., made his second big win of the sea-

son here by taking first and fifth cocks, first hen, fifth cockerel and third pen. The first cock won the general special for best cock bird at the show, a sweepstake prize of greatest merit.

The Koons Farm, Trichlers, Pa., another of our best known breeders of White Rocks, won second and fifth cocks, second and fifth hens, first cockerel and first pullet. This pullet also won the sweepstake special for best pullet at the show. This line showed very strong in type and color, and it is evident Mr. Koons has a line of highest merit and value. He was not rooting for the Giants here, but as usual was full of good will for all. He is a man well met at all times.

Mr. A. L. Russell, Washington, N. J., won second pen on a very rich and well-mated pen of high quality.

In Buff Rocks Mr. Ed H. Lichtenwalter, Girard, Pa., won four of a possible five first prizes. Nuff said. He has the habit and does these things just about as often as he likes.

In Columbian Rocks and in a class of fifth birds Mr. Frank G. Bean, Collegeville, Pa., again cleaned up by winning first, second and fourth cocks; first, second, third and fourth pullets; second, third and fourth cockerels; first, third and fourth pullets, and first and second pens, with all excepting one special prize. Mr. Bean is out to beat his record of last year, when he won 85 of a possible 88 first prizes. He has better birds than ever, and it is a satisfaction to note the progress he has made with this variety.

Col. Louis Paul Graham, Collingswood, N. J., was a competitor here and won second pullet and special for best wing. We hope the colonel will keep it and to have the pleasure of handling more of his birds in the future. He has made a good beginning.

Silver Wyandottes numbered close to 60 birds, with many very beautiful specimens shown, first cockerel going to M. H. Leidy on a very valuable bird, well shown.

White Wyandottes were not quite as strong as usual, but were of the best possible grade, the 90 birds shown being of high quality, and at their best made competition very strong. The winners were: Carr Brothers, Spring Valley Poultry Yards, H. A. O'Riley, A. J. Savacool, J. J. Farrell, Mrs. E. R. A. Litzau, H. Wege and Thos. Randall. The first cockerel in form, color and condition was a hummer. He carried a beauty head and to our notion is one of the best we have seen.

Buff and Partridge Wyandottes were rather small, but good classes.

Columbian Wyandottes with 201 birds shown were the largest class at the exhibition. The club had its annual meeting here and the class this brought out is to the credit of the breeders and the variety. Type here was the feature. The true Wyandotte form was very evident in a great majority of the birds shown, followed closely by fine head points. In pens alone sixteen entries were found, and the judge had his work all cut out for him in this class. Let it be known that Mr. Cleveland did a very nice and satisfactory job.

Mr. D. Lincoln Orr won first and sixth cocks, seventh and eighth cockerels, second pullet and third pen. His winning cock is a grand specimen of the highest Wyandotte type.

Mr. Harry G. Miller won second pen and was well placed in all single classes. Mr. F. C. Herrington won first pullet and first pen. Other winners were F. H.

## Uncle Sam Poultry Book and SURE HATCH INCUBATOR

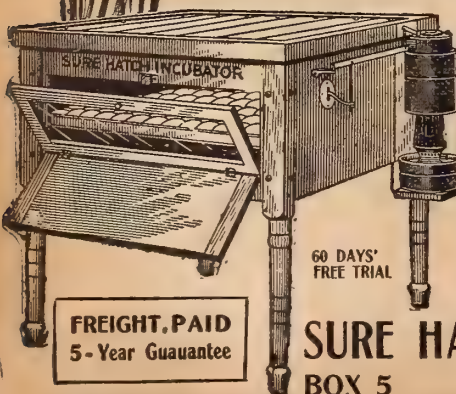

will start you out just right in the chicken business. Lots of people would go into the business if they knew how to handle it. Government operators have investigated all departments of poultry culture and sent out the results. We have combined and condensed these reports into the best book ever published on the subject and are selling it at 20 cents, and by our plan you can get 50 cents back. Send us two dimes or ten two-cent stamps. This book tells you all about how to handle the business successfully and gives you inside information that you can't get elsewhere. It also tells you that you should use an incubator for hatching and how a good one should be made. The

### SURE HATCH INCUBATOR

Is made just as Uncle Sam says a good one ought to be made and that should be of interest to you when buying a machine. The chicks hatched from eggs other machines spoil will soon pay for your machine. With our sixteen years' experience in building and improving the Sure Hatch, and right up to date with the latest and best in the incubator construction you cannot possibly go wrong in getting a Sure Hatch. No thin iron, paste board or knotty lumber used in the Sure Hatch. No. 1 clear California redwood goes into all our machines. Best lumber in the world for incubators. The pure lake copper

### HOT WATER HEATING SYSTEM

is the best that can be devised. Expert heating engineers tell us that hot water heat is superior to any other. Then we have a first class regulator on the side of the machine—not on the top where it is in the way and liable to get damaged. Regulator has perfect control of the heat. Large egg chamber, roomy nursery with tray for removing chicks. Box has three walls and double air space. Extra heavy insulation in top. Double doors, one of them glass. Can't tell everything here but you can learn all about this machine by sending for our big free book. Send today and get your machine to going as soon as possible and get your products into the early high priced markets. Freight paid and a five-year guarantee.

Stevens, J. S. Rittenhouse, E. F. Benson, A. W. Close, J. E. Perkins, etc. Mr. G. E. Nichols winning first cockerel.

The Single Comb Reds were a show all in themselves in size and in general quality, with the best possible condition noted in most all the birds. Judge R. V. Hicks again did a noble job and won renewed fame for his masterly work. We hope to see him at more eastern shows on this class of birds.

I believe the happiest man at this show was Mr. F. C. Rankin, owner of the Schenley Heights Poultry Yards, Pittsburgh, Pa. He made some of a record last year with his Reds, but here he just swept the deck with his quality and well deserved all he won, for his birds merited all. His winnings were first hen, first cockerel, second and third pullets and first pen. With these regular winnings he also carried off a long line of great specials, including the Sweepstake special for best bird at the show with his winning cockerel. This bird won special for best bird in the American class and with special for best display and several others he was well prepared to journey back home, and to meet his friends with a collection of five or more cups and all honors that could well be won by any man with any line.

First cock went to J. H. Crosslet & Sons on a beauty of typical form and sound color with nice wing. Third to Ellis S. Shelly, Williamsburg, Pa., who also won fifth hen and fourth pullet with birds very high in general quality and of the best of color. Second cockerel was won by E. E. Seasoltz with a strong bird of quality. First pullet went to F. H. Wintersteen, Port Carbon, Pa. She was an exceptional bird of merit, well shown and for richness and evenness one of the best.

In Rose Comb Reds the class was much smaller, with nearly 50 birds shown. The quality was there, even if the numbers were limited. Here Mr. Annesley M. Anderson, Morton, Pa., won second cock, first hen, second cockerel and first pen. The pen was a model for mating and evenness. Other winners here were Rock Creek Poultry Farm with first cock; Buehler & Mann, O. J. Aregood, Ishala; P. Y. C. E. Morrison, etc.

In Buff Orpingtons a great class of fine birds was seen with shape and sound color the feature. Here a great record was made by Mr. R. S. Roberts, West Chester, Pa., who won first, second, third and fourth in cockerels with four birds shown. They also won in every class. The winning cockerel was a model in form, with excellent head and carried well. His color was even, sound and of just the proper shade, a great bird and good winner. His other cockerels were right up close, winning in rotation, and all alike showing the best of breeding quality. Mrs. Roberts devotes about all her time to their birds and has won her way from a small beginning to this splendid record that we are proud to chronicle, for it is honor well won and most deserving.

First cock shown by W. J. Stokes, first hen H. G. Doak and first pullet by George P. Rigby.

Black Orpingtons were a strong quality class, the first cockerel showing the best of type and wonderful color, with the best of finish. All other winners were good.

White Orpingtons numbered 60 birds, well shown as a rule and the winners up to the best grade. All the winners very good birds, W. J. Stokes winning first

## THIRD SHOWING OF YAMA BLACK MINORCAS AND FIRST SHOWING OF YAMA BARRED ROCKS IN NEW YORK

**YAMA FARMS** made 41 entries at Madison Square Garden Show 1912-13 and had 21 birds placed.

In S. C. BLACK MINORCAS we won FOUR 1sts OUT OF THE POSSIBLE FIVE. Our display pen, exempt from competition, was a typical representation of our whole flock—it showed the YAMA FARMS type.

Our 3rd Minorca exhibit in New York won—

1st, 3d and 5th—Cocks  
1st, 4th and 5th—Cockerels  
1st, 4th and 5th—Pullets  
3d—Hen  
1st and 4th—Pens

Eggs for hatching just as fine birds as we show, \$10 a setting. Utility eggs, with the best Minorca blood behind them—\$3 a setting; \$15 a hundred.

## YAMA BARRED ROCKS THE COMING STRAIN

The results of our first year's breeding of Barred Rocks and our FIRST showing of Barred Rocks in New York have been very gratifying to us.

We have arrived in Barred Rock females—the birds exhibited in Madison Square Garden testified to this and were among the most admired by veteran breeders and judges.

The competition was the closest, in the keenest class, in the biggest show ever held in the country, and YAMA FARMS had 3 hens placed among the 8 awards.

### YAMA FARMS HAD MORE FEMALES PLACED THAN ANY OTHER BREEDER

In every class we scored, winning—

2d, 6th and 7th—Hens  
3d and 8th—Pullets  
5th—Cockerel  
7th—Cock  
3d and 6th—Pens

Eggs for hatching from our choicest birds—the coming strain—\$10 a setting. Utility eggs from same blood, \$3 a setting.

Send for our new book. It tells you something new perhaps.

**YAMA FARMS**  
NAPANOCH, ULSTER CO., NEW YORK

Newton Cosh, Mgr. of Poultry Dept.

cock, first and second hens and first pullet.

First pen was won by Miss Carey, of England. This with a display of birds for exhibition was her only entry and created much interest here, as well as at the Palace, New York show, where birds of her breeding were shown.

Light Brahmas were a class of 55 birds and a royal good class it was. Here Messrs. Balch and Brown, Manchester, Conn., again made a great win, taking third and fourth cocks, third hen, first cockerel, first and third pullets and first pen. This pen also won the sweep-stake special for best pen at the show. Mr. A. E. Wohlert, Narbeth, Pa., had an entry and won well in most all classes. In Anconas he made an extra nice winning in all classes and in pens won first, second and third prizes.

Other prominent winners in Brahmas were I. R. Hichman, Willowbrook Poultry Farm, Minch Brothers, etc.

Cochins in Buff and Partridge were classes well worth seeing, for many fine specimens of these old-time favorites were there.

Black Langshans were a beauty class and one we shall long remember, for there were birds of merit properly shown. Mrs. F. Littlefield, Middleburg, Md., here winning first cock, first and second hens, second, third and fifth cockerels, third and fourth pullets and first pen. This follows up her winnings at earlier shows well, and it is safe to say this line will be heard from later. Mrs. Littlefield is a most interesting fancier and breeder bound to succeed.

Mr. W. F. Presgrave, Salisbury, Md.,

another breeder of note in this line, who also has won well before, here took first and fourth cockerels and second and fifth pullets with but five birds shown.

The best class of S. C. Brown Leghorns we have seen here in years and one of the best quality classes ever shown was on display here, the great winner being Mr. Frank Schellang, R. F. D. No. 8, Erie, Pa. He won first, third and fifth cocks, first hen, fifth pullet and first pen, with several specials of note and value. The first cock is to our mind one of the best males ever shown; his color and markings are of the best, good head and very nice shape and size. First hen also a grand winner of merit. This line we have often seen at its best and know it to be one of substantial quality.

Other winners here were E. E. Endsley, E. R. Terry, C. O. Miers and A. A. LeFevre.

The class of Single Comb White Leghorns numbered 152 birds, as strong and fine a class as one could wish to see. Here again we wish to specially compliment the judge, Mr. W. C. Bowman. His task was a hard one, but he mastered it and did well, very well.

In this great class, with a dozen prominent breeders showing, it can well be imagined that class and quality was there of the best sort. The general condition was a strong feature, with fine shaped heads and combs close up. All the winners were choice birds, and many good ones had to be left out, as the ribbons failed to reach round.

The prominent winners in this class were the Newton Producing Co., the International P. S. Co., E. E. Brubaker, H. C. Wack, Elm Poultry Yards, Hart-

ford, Conn.; Crystal Poultry Farm, F. E. Wilkinson, Caw-Law Poultry Farm, etc.

Campines seem to have the call, and here again a very large and strong class of Silvers were seen. They have been one of the prominent features of all the shows held this season, as well as last year, and their steady growth to popular favor is to their credit. They have the general all purpose quality demanded in an up-to-date breed, and we feel assured the future has much in store for them.

The Manhattan Farms, Brighton, N. Y., here again made a general clean-up of honors and awards. They did this same thing at Allentown, Hagerstown, Trenton, the New York Palace and here at Philadelphia. It is a habit with them, and a good one, if, like them, you have the goods. Their winnings here are first and second cocks, first and second hens, first, fourth and fifth cockerels, second, third and fourth pullets and first pen, with all specials. We hope to visit this farm soon and to tell our readers all about it. In Golden Campines they won all five first prizes, as well as all seconds and thirds competed for.

Houdans were a good class of quality. There are a lot of good breeders of this variety and a lot of fine birds, and being a good staple breed deserves better from its breeders, who seem to fear to advertise and push them as they should.

Hamburgs, Lakenfelders, Cornish, White Indian and Pit Games were good classes, complete and a very choice display.

Bantams numbered 160 birds, with the Black Cochins the largest class and the Buffs next. Black Tail Japanese were also way up in numbers and of very good quality.

Ducks were a very large entry, with the Pekins and Indian Runners leading in fine displays. Geese and turkeys finished this display in real good shape.

Pigeons numbered about 800 birds, including displays of all varieties. Philadelphia is always strong on pigeons, and this year the exhibit was no exception. The judges told us it was a case of merit all through, and we with others admired their beauty.

The display of incubators was most complete, several working and hatching chicks daily. The large incubators were a feature, the Newton Giant, the Hall Mammoth and the Candee being shown. Mr. Watson, of the Newtown Producing Co., told us that they had just received an order from India for one of their Giant machines through their ad in the A. P. J.

The display of eggs attracted unusual attention this season with over 50 entries. The collection was one of beauty and value.

To sum up we can just add "Grand." Every feature of interest to the poultry industry was conserved. The cooping in charge of Maj. Bill Bailey and the arrangement in charge of Superintendent Hickman was of the best. The displays were complete and instructive, and throughout the mammoth building there was a feeling of contentment and general good will, with evident pleasure. The exhibitors were glad they came. The officers and members worked in harmony and with well-deserved pride at their success, and the attending public fully enjoyed all that was shown them. The show was a great success. Let us have more like it. We look to you, members of the Philadelphia Association, with every confidence and with all hope for your future efforts.

## BUFF PLY. ROCKS, "GIANT" BRONZE TURKEYS AND INDIAN RUNNER DUCKS

Quality of our birds is backed by years of careful breeding. They have won in our own and customers hands at Chicago, Louisville, Ky., St. Louis, Boston, Atlanta, Seattle, Wash., and many other national shows. Birds in either variety of the very best quality. Toms with great massive frame and bone with fancy plumage, good enough for any show or breeding pen. Buff Rocks and Indian Runner ducks of same high quality.

**J. C. Clipp : Box A : Saltillo, Indiana**

## Billings' Rhode Island Reds { BOTH COMBS

have that brilliant, rich, even surface color, with strong, deep red undercolor, with fine head-gear, long bodies and black markings that appeals to the most careful breeder. Have won at Cleveland and many of our largest shows. 1000 head choice breeders and exhibition birds to sell. Write your wants.

**B. M. BILLINGS, : Box A, Oberlin, Ohio**

## Cretaceous White Wyandottes

At the late Wellington Show, won 1st and 3d cock; 1st, 3d and 4th cockerel; 1st and 2d hen; 1st, 2d, 3d and 4th pullet; best pair; best display of Wyandottes, all varieties competing, and best display pen in American class; also 1st and 2d pen. A large number of cockerels, pullets, cocks and hens for sale at greatly reduced prices. All farm raised. Write your wants. Mention American Poultry Journal.

**W. R. SHEPARD : BOX A : WELLINGTON, OHIO**

## Champion R. C. Black Minorcas

Win for us again this year at Madison Square Garden, New York. New York 1911 cock 1st on one entry; 1912-1913—cock 4th, hen 1-2, cockerel 2d, pullet 1-4, pen 1st, best display ten exhibitors, 71 birds on exhibition. At the International, London, October, 1912, won cock 1-2, hen 1-2-3, cockerel 1-2-3-4, pullet 1-2-3-4, all specials, silver cup for best exhibit of Minorcas. Ontario, Guelph, December, 1912—Cock 2-3, hen 1-2-3, cockerel 1-2-3, pullet 1-2-3, best display. These winnings together with previous years at Scranton, Pa., and all leading Canadian shows places our champions in the front ranks. Come to headquarters and secure the best. Remember your success is our success. Eggs and stock for sale, prices right. Muscovy Ducks. Mention American Poultry Journal when writing.

## Oxygen Vitalizers

### Read --- Sworn Proof

F. J. RUSSELL,  
Breeder of High Class Poultry.  
Summerdale, N. Y., July 12, 1912.  
Reliable Poultry Specialty Co.

Gentlemen: It affords me much pleasure to furnish you with a report of my work with your AJAX IMPROVED OXYGEN VITALIZER for 1912. From my first hatch, I secured a big, strong chick from every egg but two. On the second hatch a chick from every egg but six, and on my third hatch of the season 307 chicks from 307 fertile eggs. I cannot speak too highly of the great worth of this truly wonderful device, and I heartily recommend it to all poultrymen and poultrywomen throughout the world.

With best wishes, I am,  
Very sincerely yours,

MRS. F. J. RUSSELL.

Under Seal Sworn to before me this 12th day of July, 1912.

C. R. CRIPPERLY,  
Notary Public.

## BULLETIN

N. Y. State College of Agriculture

"OXYGEN is essential to normal development, the amount required increasing with the growth of the embryo. The eggs give off carbon dioxide and this increases as the embryo grows."

The Ajax Improved Oxygen Vitalizer delivers just the right amount of oxygen, 99 3/10 per cent. pure, to the egg chamber just when the chicks need it most. **RESULTS! A Big, Strong Chick from Every Egg.**

See Mrs. Russell's Letter Above.

Berwyn, Pa., Nov. 1, 1912.

Reliable Poultry Specialty Co.  
Alexander, N. Y.

Gentlemen: So that you may fully realize what your AJAX IMPROVED OXYGEN VITALIZER did for me in 1912, I respectfully submit the following:

One Vitalizer costing \$3.50 saved me \$126.80 the very first season.

In my experimental work I fully proved to my entire satisfaction that the AJAX IMPROVED OXYGEN VITALIZER is a positive preventive of chicks dying in the shell and of White Diarrhoea.

You may use this letter as fully as you choose because the Poultry World ought to know the real value of this wonderful scientific device.

I wish you much success for 1913.

Yours very truly,

MARY D. NEWCOMB.

**S**O overwhelming has been the proof which we have received from those who used the Vitalizer last season, that we make and pack with every Vitalizer that leaves our factory, a printed and officially signed "Money Back" guarantee. We guarantee that the Ajax Improved Oxygen Vitalizer will produce a big, strong, vigorous chick from every hatchable egg placed in your incubator. We guarantee that it will prevent chicks dying in the shell and White Diarrhoea; and we furnish you with sworn proof of these facts printed on this page. If you have any doubt as to the strength of our guarantee, write one for yourself. Make it just as strong as you want to. All we ask is that you will carefully follow our instructions, and in all respects give the Vitalizer fair play. It will do the rest. We will cheerfully sign your guarantee, and return it to you with the Vitalizer. **Oxygen is Life.** Without Oxygen in the air that we breathe, we would die. The New York College of Agriculture tells you that Oxygen is essential to the normal development of your chicks. They also tell you that "the eggs give off quantities of Carbon Dioxide." Carbon Dioxide is simply another name for Carbonic Acid Gas. Carbonic Acid Gas, in the quantities that are found in the egg chamber of your incubators, is poisonous. "Dead in the shell" chicks are the direct result of this poisoning. Oxygen, as a powerful germ destroyer, purifies the air, overcomes the effects of the poison, and the chicks hatch, live and are free from White Diarrhoea. The Vitalizer costs \$3.50, complete, ready for use, delivered to you anywhere in the United States. It can be attached to any incubator in two minutes, and is so simple that anyone can operate it. One Vitalizer, bought by Miss Mary Newcomb, saved her \$126.80 the very first season. Her report is printed on this page for your information. If you have any doubts as to the truthfulness of it, write her, but kindly send stamp for reply. The best feature of the whole thing is that you don't have to take any chances in order to see for yourself the truthfulness of every statement that we make. The first thing to do is to send us your order. Do it to-day. Send along your own guarantee if you want to, but please get ready for that first hatch. We publish a valuable booklet on oxygen that we will gladly send you free, upon application.

**Reliable Poultry Specialty Co.**  
Main Street :: Alexander, New York

## \$50.00 in Gold Will be Given Away

To make sure that the VITALIZER is given FAIR PLAY, and to secure the interest of our patrons in the realms of scientific experimental work, we have set aside the sum named above to be divided at the close of the hatching season, among those making the best reports of their season's work, \$25.00 to the first, \$15.00 to the second and \$10.00 to the third. This contest is open to every user of our Vitalizer. No conditions except that all reports shall be received at the office of the Company properly verified, on or before August 1, 1913. Each report to be placed in a separate envelope, and marked "Vitalizer Contest." Reports will be passed upon by a disinterested committee, and awards made on or before Sept. 1st, 1913.

FEBRUARY TO MID-MARCH.

Incubators should be kept busy from now on. Get out a good bunch of early chicks but do not try to grow more than you can care for properly.

Many a poultryman "falls down" because he tries to raise "just a few" more than he is equipped to handle. Don't try to grow faster than your capacity for doing good work.

Give the broody hen a chance. If you have early pullets that have been shelling out an abundance of fall and winter eggs, you ought to have some now that are broody and that will make good sitters. Set them in groups of four to ten. It is just as easy to care for ten sitters set at the same time as it is to care for one, if you go about it right.

Gather the eggs frequently in cold weather to avoid chilling but do not keep them in a warm place; 40 to 50 degrees is about the right temperature.

Good, clean, dry sawdust or planer shavings are about the best nesting material than can be used in the nests for layers. For nests with wire bottoms we like excelsior very well as it lasts longer and keeps cleaner than hay. Keep the nests clean for clean eggs.

It is time to get hatches started for market ducks. A good many enterprising growers had their machines busy in January.

At this season poultry houses of many different types are often reported damp from moisture which condenses and freezes on the walls and ceiling. It is an old problem and there are many causes of the unwelcome dampness. Too

many birds in the house is a common cause. Too little fresh air is another. In some locations deep litter may attract and hold dampness. Houses with open fronts and built of boards and shingles are seldom damp. A house of the same pattern covered with a soft-finish felted roofing will seldom give any trouble. Metal roofs or roofs covered with hard, smooth finished roofing are very liable to "sweating" or condensation of moisture and are in some locations very damp. To get rid of moisture don't overcrowd the house, avoid roofings that condense moisture too readily if you are in a location where damp and foggy weather is common, get more fresh air into the house for the entire twenty-four hours of the day, and provide for all the sunlight you can when the weather is favorable.

There are a good many arguments for and against artificial hatching and brooding and there is a whole lot to be said on both sides of the question. J. H. Curtiss, veteran soft roaster grower and one of the biggest dealers in high class chicken meat in New England, says that he wants "market chickens that are incubator hatched and brooder grown." He certainly knows good chickens and he buys many tons of them each season at from 20 to 35 cents per pound alive. It depends a lot on who hatches and grows the chicks and how they do it.

Only a small proportion of our chicks were hen hatched and hen reared last season and we grew some 4,500 to marketable maturity. We will have to admit that, except where leg bands or toe marks tell the story, we can't tell our artificially grown chicks from those grown with hens. We had some chicks from other incubator operators that were just as good as ours, and

some from other operators that were not worth the oil it took to brood them. It takes skill to get good chicks by the machine method, and, by the same token, it takes some experience to get good chicks by the natural method.

Just now some folks are hesitating about whether to order day-old chicks or eggs for hatching. We have had good luck both ways and bad luck both ways. If we had confidence in a man's ability to skilfully operate incubators and in his breeding stock we wouldn't hesitate about buying day-old chicks. If we had any doubts about the hatching but felt sure of the breeding stock we'd buy eggs and hatch them at home under good hens unless we had confidence in our ability as an incubator operator. If you do buy day-old chicks don't fail to be ready for them when they arrive and either have a good brooder heated up and waiting or plan to put them under broody hens that are waiting for them in dark nests. Make-shift brooding devices may serve if you have the "know how" and take pains with them, but as a rule a good many chicks are lost that way.

Frosted combs should be first rubbed with snow or cold water until the frost is out. Then anoint with camphorated vaseline and massage thoroughly until parts are normal in appearance.

Torn backed females are commonly found at this season. Look for the cause: heavy or clumsy cock birds with long toenails or nails with sharp edges. Remove the cause by blunting the nails. Put the injured bird in a pen by herself, cleanse the wound, freshen up the raw edges and draw edges of wound together with strip of surgeon's sterilized zinc oxide adhesive tape.

FIRELESS BROODING OF CHICKS

We want every one who reads this ad to write for our new book, "The Fireless Brooding of Chicks," which will show you how to RAISE 90 PER CENT OF THE CHICKS without the danger of fire, of overheating, sweating or smothering. It gives our years of experiments, with all kinds of brooders, showing how we have made and maintained the above record. Worth many dollars to you. No smoke, no smell, no fire, no bother, no expense. Guaranteed to raise the chicks. Sent free. Write for your copy today.

Harvey Bros., 259 Cooper Ave., Johnstown, Pa.

Covert's Barred Rocks Win

Again at Pittsburgh Great Exposition show, Jan. 1913, 4th cock, 2d pullet, 1 pen pullet mated, 2d pen cockerel mated

CHICAGO, 1912 In the largest and best class of Barred Rocks ever brought together either east or west, 393 birds in all. First cock (29 in class), first and fifth hen (79 in class), second cockerel bred hen. The first and fifth hens are the same birds that won last year as pullets. I have also won at Buffalo, Cleveland and many other large shows during the past five years, demonstrating I have been and am producing exhibition quality for I raise all the birds I exhibit. My matings this year will be superior and I can supply your wants in either stock or eggs. Ten grand pens cockerel and pullet matings. Send for mating list. I guarantee to please you in your dealings with me. Write today, mention A. F. J.

Covert Barred Rock Farm : Willoughby, Ohio

# The Leghorns

## Standard and Non-Standard Varieties

The Most Complete Text Book on the Popular Leghorn Fowl Ever Issued

HIS new edition consists of 144 large pages and cover, and tells how to select and mate birds for the breeding pen; how to judge Leghorns in the show room, and how to feed for very heavy egg yield and fast growth. Some of the great commercial Leghorn egg farms described and illustrated.

### FULLY ILLUSTRATED

Three Color Plates by Franklane L. Sewell and A. O. Schilling

Text and Illustrations are Brought Down to Date to Conform to the 1912-1915 American Standard of Perfection.

Contributors to this book include the Foremost Poultrymen and Leading Authorities in America and Europe. It is one of the most comprehensive in text and most profusely illustrated publications of its kind ever printed. The illustrations are works of art by America's greatest poultry artists.

### THIS NEW BOOK CONTAINS THE FOLLOWING VALUABLE ARTICLES

**CHAPTER I. THE LEGHORN FOWL:** History of the Origin and Development of the Leghorn Breed; The Brown Leghorns; The First White Leghorns; Origin of Buff Leghorns; First Black Leghorns; Silver Duckwing Leghorns; First Exhibited in England; Origin of Rose Comb Brown, White and Buff Leghorns; Origin of Pyle, Dominique, Birchen, Blue, Golden Duckwing, and Rose Comb Black Leghorns.

**CHAPTER II. LEGHORN TYPE:** Evolution of Leghorn Type. Standard Shape of Leghorns.

**CHAPTER III. BROWN LEGHORNS:** Single Comb Brown Leghorns; Color Breeding in Brown Leghorns; Thirty Years Among Brown Leghorns; Brown Leghorns Past and Present; Rose Comb Brown Leghorns; Symposium by Fifteen Foremost Breeders on Progress Made in Color and Shape; Virtue and Faults of the Variety Today; How the Revised Standard will Benefit Brown Leghorns in the Future.

**CHAPTER IV. WHITE LEGHORNS:** Improvement in Shape; Line Breeding for Improvement in Type and Comb and Systematic Feeding in Obtaining Pure White Plumage; Breeding to Standard Requirements; Rose Comb White Leghorns; Breeding Rose Comb White Leghorns; White Leghorn Symposium on Changes in Exhibition Type, the Laying Type; Flock and Individual Egg Record; White Leghorns for Market; White Leghorn Bodies, Tails and Legs; Heads, Combs, Wattles and Earlobes.

**CHAPTER V. BUFF LEGHORNS:** Buff Leghorns of the Past; Mating for Shape and Color; Modern Buff Leghorns; Buff Color Breeding Problem; Buff Leghorns for Show and Table.

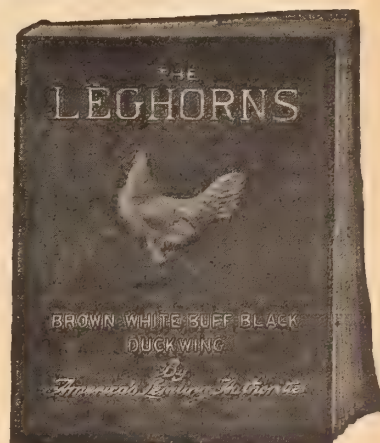

**CHAPTER VI. BLACK LEGHORNS:** Silver Duckwing Leghorns; Red Pyle Leghorns. Standard for Red Pyle Leghorns.

**CHAPTER VII. LEGHORNS IN FOREIGN LANDS:** Leghorns in England; English Buff Leghorns. White Leghorns in South Africa.

**CHAPTER VIII. JUDGING LEGHORNS.**

**CHAPTER IX. COMMERCIAL LEGHORN FARMS:** White Leghorn Farms of Vineland, New Jersey; Egg Farming in California; Egg Farming in Greater New York; Building up a 200 Egg Strain; Leghorn Broilers for the Hotel Trade; How to Make White Leghorns Pay; Typical California Leghorn Farm; Feeding and Housing Leghorns for Profit, a Symposium Contributed to by Twenty Breeders Operating Successful Plants North, South, East and West.

**CHAPTER X. FEEDING FOR BEST RESULTS,** by Grant M. Curtis.

"THE PLYMOUTH ROCKS", or "THE WYANDOTTES"—breed books similar in make-up and size to the one on Leghorns, and containing color plates of these breeds—may be secured at the same price. Either of these books may be substituted for "The Leghorns" if desired.

# Current News of the Poultry World

by J. F. Shureman

Wm. Watson, proprietor of the Sanitary Poultry Farm at East Manatee, Fla., has a Plymouth Rock hen that lays three eggs every two days regularly; that is, she lays one egg one day and two eggs the next, and has kept it up for several weeks. The hen is kept penned up and Mr. Watson is ready to make sworn affidavit that these are facts. Next!

There was money in these ducks, sure enough. R. W. Meredith, a farmer near Woodland, Alta, Canada, dressed a bunch of ducks for market the middle of January and found the gizzards of the birds filled with flake gold, seven of the pieces measuring from a sixteenth to an eighth of an inch in diameter. The find has created considerable excitement and prospectors are already at work on Mr. Meredith's property.

A prize-winning Barred Plymouth Rock cock, owned by S. H. Page, of Waverly, Iowa, and valued at \$150, died while on exhibition at the Sioux City poultry show.

Mrs. Emma Flower Taylor has purchased the entire stock of show birds owned by T. E. Dorchester, of Adams Center, N. Y., and will use them as foundation stock at the Greystone Stock Farm at Burrville, which she has acquired. The collection includes Wyandottes of every variety and Muscovy ducks.

Jesse Morris, of Roseburg, Ore., has a Barred Rock hen that he claims has laid 266 eggs in 10 months and 19 days. He claims the championship of Oregon.

Members of the Southwestern Michigan Poultry Association have started the circulation of petitions asking the state to appropriate \$5,000 for the benefit of the poultry industry of that state.

At the annual meeting of the Missouri State Poultry Association at Springfield it was decided to urge the State Legislature to appropriate \$60,000 for the use of the State Poultry Board during the next biennial period. If the appropriation is secured a poultry expert will be employed to do institute work among the farmers of the state and prizes of \$25 for the best exhibits of poultry at the county fairs will be offered.

An attraction at the Bloomington (Ill.) poultry show in January was a "female rooster." The bird has every appearance of being a male bird, but her owner

stated positively that he or she or it was a hen, and to make his (the owner's) word good the freak bird laid several eggs during the show.

Poultry shipments from Morristown and adjacent territory in Tennessee during October, November and December reached the enormous total value of \$400,000.

A flock of 1,250 turkeys was driven into Sedalia, Mo., on December 16 and sold at 16½ cents a pound. The turkeys were driven 26 miles and traveled at the rate of two miles an hour. The birds averaged over 16 pounds and brought their owner \$3,200.

A. E. Martz, the well-known poultryman of Arcadia, Ind., refused an offer of \$500 for a Buff Orpington cockerel at the recent Chicago show.

At a recent meeting of the New York State Fair Grounds Commission a decision was reached to have a new poultry building erected on the State Fair grounds at a cost of \$100,000, and to be completed before the opening of the 1913 fair.

A cock-bird with a horn growing from its comb, resembling the spur of a fighting cock, was exhibited at the Rockford (Ill.) poultry show in January. The freak bird is owned by Randall Brothers, of Durand, Ill.

A poultry farm to be stocked with White Wyandottes and White Leghorns from the Hartman Stock Farm at Columbus, Ohio, is to be established eight miles north of San Antonio, Tex., by S. J. Martin. The farm will comprise 122 acres, devoted entirely to poultry, and it will be the largest venture of the kind ever undertaken in Texas. E. T. Jacobs, formerly of the Hartman farm, will be in charge of the enterprise.

Clarence F. Payne, of South Bethlehem, Pa., counted his chickens before they were hatched and got into trouble with the postal authorities. He bought several incubators and 600 eggs and advertised that he had 3,000 baby chicks for sale, supposing, as he says, that he would get at least that number of chicks from 600 eggs. Orders by the score came in, but when the hatch came off Payne could count only 127 chicks and he was so disappointed that he forgot to return the money he had received on the orders. The attention of the postal au-

thorities was called to the matter and Payne was arrested. It was his first experience in the poultry business.

A proposition is under way to eliminate the middleman in the marketing of eggs in San Francisco and establish a commission house in that city through which the eggs of practically every producer in the state will be handled.

A Yankee down in Connecticut claims to have discovered a method for making hens lay eggs with shells of special strength that will simplify the problem of successfully sending them by parcels post.

A Black Orpington cock, owned by R. J. Knisley, proprietor of the Pine Rose Poultry Yard at Reading, Pa., claimed to be the champion bird of its class in the United States and valued at \$2,000, died in January. Mr. Knisley says he refused an offer of \$1,000 for the bird a year ago.

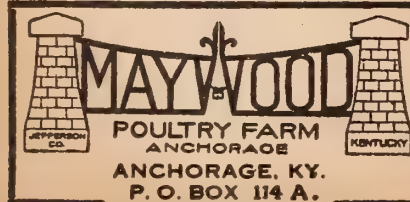

A Silver Wyandotte cockerel sold for \$50.50 at auction at the Jackson (Mich.) poultry show in January.

Prospect Hill Farm, near Girard, Pa., has been sold by William M. Orr to Ruben Brewer for \$13,000. The farm consists of 238 acres, on which are numerous good poultry buildings, as it was once an extensive poultry farm. The new owner will again use it for that purpose and also for stock raising.

A Boys' Poultry Club has been inaugurated by the Y. M. C. A. of Louisville, Ky. Lectures will be given at stated periods and the boys instructed in poultry raising. An incubator will be installed and the hatching of the chicks fully demonstrated. Later the chicks will be divided among the boys.

The Belle Hill Poultry Farm, a mile north of Elkton, Md., which was established about eight years ago by the late George Johnson, and purchased about two years ago by E. R. Rail, of New York, for \$18,000, has been sold to Bishop Ortynski, of Philadelphia, who will convert the farm into an orphanage for boys.

Among the distinguished exhibitors at the recent Watertown (N. Y.) poultry show was Mrs. Kurt Eisfeldt, better known to the play going public as May Irwin. She exhibited Black Orpingtons. Miss Irwin's poultry farm is on Irwin Isle in the St. Lawrence river.

## THE TRUE TEST OF POULTRY.

By H. Cecil Sheppard, Berea, O.

**W**ISE, young Mr. Rooster had the marriage bee. Being a proud, critical sort of fellow he was, of course, hard to suit. He had associated with every chicken in the pens. Most of them he "knew by their first names," knew their habits, their values and faults.

But still he was looking. He had not found a mate, though he had a choice from every breed of chicken he knew about. "Surely somewhere," he growled with a touch of discouragement, "there should be a different kind. These hens may be all right for some—but my mate must be above the ordinary."

Could the fancier who owned the wise young bird have heard his musings he probably would have been beheaded, and used to grace the family dinner table; for the said fancier was proud of his hens.

But the death of our hero would spoil the story—so it must be taken for granted that the fancier was out of hearing distance.

Perched on the edge of a coop, Mr. Rooster continued thoughtfully: "My wife must be handsome—a shapely bird, with pretty feathers. She must be active and hardy. In this day of the high cost of living she must consume little food and prosper just the same. She must be thrifty."

Most important of all, the pullet Mr.

Rooster chose must be first in the life work of a chicken. She must be a good layer. The eggs must be large and must hatch a high percentage.

His musings were cut short at this juncture by a wild commotion in the chicken yards. Flying from his perch to learn the cause of the excitement, he saw the fancier approaching with a crate of new chickens.

"These are the Anconas I have been expecting," he heard the owner tell his helper. "They are the best layers known, and the eggs hatch, after shipping, over 90 per cent. Often, without the long trips, the eggs hatch out a full 100 per cent. They are money makers because they lay the year around and require but little food."

Mr. Rooster showed high interest. Here was just the kind of a wife for him, provided he was satisfied with her appearance and habits. He shook out his feathers, shined his beak in the dust and proudly waited.

As the fancier opened the door and freed the new arrivals, Mr. Rooster was astonished. Never before had he seen this kind of bird. They were beautiful—slightly larger than a Leghorn, but with the same graceful lines. The feathers were of that jet black which throws off a greenish cast, and the white tips combined to make a coat of delightful contrast.

But, being a wise, critical bird, our hero was not too hasty. He must see for himself that all his owner said was true, and study the habits of his future mate.

As the days passed, he found the beautiful creatures were all they had been proclaimed and more. They were more active than the Brahmas, but who would want a sleepy, dopey wife? They could be kept easily in a pen five feet high, so there was no danger of her leaving him.

He learned further that their meat is sweet and juicy, that they do well in confinement and that they are great foragers, capable of picking up a good portion of their living when given a free range. What was there left to be desired in the way of a useful, beautiful chicken, he reasoned.

At last satisfied, Mr. Rooster was married in the ceremony of poultrydom, and suffice it to say he never regretted his choice.

He lived long, this wise, Rooster, but he was kind and dutiful always to Miss Ancona. He never gambled, never touched intoxicants, and it can be truthfully said that he never—never stayed up late at night.

And what better recommendation, pray, could the Ancona wife have?

Now my dear reader, be as prudent as this wise rooster and select Anconas for your breed. You will find that they will be as loyal in pleasing you and keeping your egg basket full, especially in winter when the price of eggs is high.

## POULTRY CUTS

Our new catalog now ready; latest and best designs; all varieties; ask for it today  
Chas. L. Stiles, Columbus, Ohio

## THE MOST POPULAR FOWL today is U. R. Fishel's White Ply. Rocks

## GUARANTEED BREEDERS

I will personally mate you a pair, trio or pen of either variety of Reds, and guarantee them to be as well bred as any in America.

100 good Red males, \$5 each. 100 grand Red males, \$10 each.

Describe what you need to improve your flock and I will select it.

## MATING LIST

Illustrated circular describing 50 breeding pens of the highest grade flock of Reds on earth, sent free for postal.

My prices vary according to quality of pens listed from \$3 for 15 guaranteed fertile eggs to \$15 for 15 eggs from best stock money or brains can produce. My pedigreed eggs at \$1 and \$2 each are in a class by themselves, as mating list will prove.

Eggs delivered by express or parcel post in any quantity desired.

I want your address. You need my circulars, so get busy.

## Breeders may come and breeders may go, but "DE GRAFF'S REDS" go on forever—There is a reason!

For the information of my past, present and future customers I will give the following facts, for your consideration, and I defy any editor to deny them.

I have the best flock of Reds on earth and my farm is the heart of the Rhode Island Red industry of the world.

I have issued for five years the highest grade of poultry catalogues containing the only true life pictures of Reds ever printed, ever published and sold for 25c on approval without a single kick.

I have made the largest exhibit of American fowls ever made by one exhibitor, and won every 1st, 2d, 3d, 4th and 5th prize offered (101 birds).

I am the only American contributor to the poultry encyclopedia of England, and my color plate is highest grade picture in their wonderful books.

I was selected as authority on Reds to conduct the first school of judges and they said I made good, so I know what a Red should be.

I have received more free complimentary reading articles than any other Red breeder, and there are more coming.

I have been used for the A. P. A. "Reform Goat" for 4 years, and still my business is better today than ever before, proving my customers are satisfied.

I am in a position to give my customers better value in stock or eggs of either breed of Reds for less money than any of my competitors, as my method of doing business is entirely different. Your money's worth or your money back.

Fraternally yours,

DeGraff Poultry Farm, Box 200, Amsterdam, N. Y.

S. C. and R. C. R. I. Reds — Leading Red Specialist of America

## GUARANTEED WINNERS

I will guarantee to furnish you winners for any show in America, or make the transaction satisfactory.

Write for prices and terms.

I have furnished winners for the largest shows of the country for years back, so I can help you, as I do not exhibit any in my own name.

## BOOK ON REDS

My 1913 book on Reds will outclass all poultry catalogues ever printed, so far that there will be no comparison, and every breeder of poultry should have one for the original practical information it contains, while no Red breeder can afford to be without the three colored pictures of both breeds of Reds which are now framed in the homes of every breeder that ever received one. 25c postage. Less than actual cost to me.

## GOOD TO KNOW

by C.W. Zimmer

The writer was much pleased to again have the pleasure of spending a day with P. A. Cook in going over his poultry farm and noting the many improvements which Mr. Cook is continuing to make about the plant. The signs of progress and continually increasing business are apparent everywhere. Mr. Cook informed us that he had recently added 90 acres to the plant and that he now has over 200 acres devoted to poultry.

We found in the course of construction a large new incubator cellar and show house, 20 x 70 feet, the lower story being a basement which will be used exclusively for incubating purposes, and the upper story will be arranged for one tier of coops containing specimens which are for sale.

Mr. Cook had just returned from a trip through the South where he had made exhibits at several shows and where he is also judging a large number of shows this season. In all, Mr.

Cook has shown at twenty-four shows, including Madison Square Garden, Atlanta and Columbus, Ga.; Louisville, Ky., twice; Birmingham, Ala.; Grand Central Palace; St. Louis, Mo.; Savannah, Ga.; Shreveport, Pa.; Macon, Ga.; Allentown, Pa., and many others. At each one of these shows practically an entirely new string of birds was shown, and as usual Mr. Cook carried off a very large number of prizes, in every case winning the prize offered for best display. This is certainly a remarkable record and is further proof of the quality of Orpingtons bred by Mr. Cook.

Mr. Cook informs us that the reason for showing an entirely new string of birds at each show is that he has found that eggs are infertile from pens where the male bird has made several shows; therefore, he only shows a male bird at one show and he is immediately mated up upon his return to the farm.

Mr. Cook already has a very large number of pens mated up for the egg

trade, including his many prize winners and other specimens of equal quality, being close up to standard requirements. Exceptionally fine specimens should be produced from these matings, as being the originator of all the Orpingtons and having had so many years' experience with them Mr. Cook naturally knows how they should be mated.

Anyone interested in Orpingtons will do well to send for their handsome illustrated catalogue, which contains the original history of the Orpingtons and much other valuable information, to anyone. This book on Orpingtons is sent for the small sum of ten cents. Address: Wm. Cook & Sons, Scotch Plains, N. J.

\* \* \*

I. Brooks Clarke, Newark, N. J. (formerly Hempstead, L. I., N. Y.), makes a specialty of Buff Orpingtons and has made a record for winning prizes, by taking about everything in sight at the recent Minneola and Hempstead, L. I., shows.

Some of his winnings were three silver cups, A. P. A. silver medal, best display, club specials, color special, A. P. A. diploma, and many others.

His Buff Orpingtons are veritable egg machines and he has ten grand pens mated for the egg trade.

Circular giving full information is free for the asking. Address I. Brooks Clarke, Newark, N. J.

\* \* \*

F. B. Crawford, Rahway, N. J., breeder of Buff, Black and White Orpingtons and Buff Orpington Ducks, reports that on eleven birds shown at the recent Palace show ten were in the money and on fourteen birds at the Garden seven were in the money. These winnings speak well for the quality of stock bred by Mr. Crawford. All these winners are to be found on the plant properly mated for the egg trade.

His Buff Orpington ducks are exceptionally fine specimens and won one first and two seconds at the Garden. His catalogue gives full information and is free for the asking. Address F. B. Crawford, Rahway, N. J.

### LOST BIRDS.

Should any exhibitors at the late Chicago show have in their possession any bird or birds shipped them through error from this exhibition, you will confer a great favor on the management if you will write at once to Theo. Hewes, Indianapolis, Ind., giving breed and band number.

Eleven birds have failed to reach their rightful owners and it is important that they be located at once.

On January 1 a single poultry dealer in Corsicana, Tex., had shipped 10,330 turkeys since the season began. The aggregate weight of these birds was 122,793 pounds.

Judge S. B. Lane, veteran poultry judge, died suddenly at his home in Spiceland, Ind., the latter part of December.

A five-months-old Rhode Island Red pullet owned by Mrs. M. Viereck, of Portland, Ore., made a record in January by laying two eggs each 6 3/4 inches in length and weighing 3 1/2 and 3 1/4 ounces. She refused an offer of \$1 each for the eggs.

## SILVER WYANDOTTES

I have for sale a choice lot of cockerels and pullets bred from my Chicago, St. Louis, Springfield and Kansas City winners. Also some one-year stock. Eggs from pens headed by these noted winners, \$3 per 15, \$5 per 30, \$7 per 45, \$12 per 100. Mention American Poultry Journal.

August W. Schroeder, Route 1, St. Peter, Illinois

## Gold Coin Buff Wyandottes

Win again in the largest class ever shown at Chicago. A few cockerels for sale at \$3 and up. Pullets, \$2 and up. Eggs in season. For show birds, write

F. E. Short      --      --      Elgin, Illinois

## 50,000 Baby Chicks

PURE STRAIN, HEAVY LAYING WHITE LEGHORN STOCK

Bred from selected, trap-nested layers. Every one of our breeders must have a record of 175 eggs—most are 200-egg birds.

Hatched in hot water mammoth machines, in perfectly equipped, fan-ventilated cellar. Careful attention and sure methods assure uniform hatching conditions.

Shipped in absolutely safe carriers. Carefully inspected and packed before leaving. Full count; no weaklings.

You can buy baby chicks cheaper than you can hatch them, and you get stronger chicks, purer strain, better results all round if you buy Peerless Farms baby chicks. Place your order today.

Our methods, equipment, stock and prices are fully described in our illustrated folder. Send for copy today. It is free.

The Peerless Farms : A. I. Rosbrook, Proprietor : R. F. D., Northport, Long Island, N. Y.

## BABY CHICKS

SCIENTIFICALLY HATCHED, LARGE, STRONG, HEALTHY

Birds that win. Birds that lay. Capacity this season, 250,000 eggs. Prompt replies. Prompt deliveries. S. C. White Leghorns and R. I. Reds (both combs) our specialties. Also Barred and White Rocks, S. C. Brown and White Leghorns, S. C. Black Minorcas, Buff, White and Black Orpingtons and Indian Runner Ducks.

# NOTES FROM ENGLAND

CONDUCTED BY

MISS CAREY, TOYNTON RECTORY, SPILSBY, ENGLAND

## POPULAR NEW VARIETIES.

**A**MONG THE MOST POPULAR varieties of the moment in England rank the White Faverolle and the Campine. We have heard a good deal of the White Orpington boom and the money that was made in the variety by leading American breeders but the prospects of the Faverolle and the Campine at present look even brighter.

The White Faverolle was originated some six years ago. For some time I had been looking for a breed that might possibly fill the requirements of the public to the same extent as the Orpington in the event of the country being at any time overstocked with this breed and losing in consequence some of its value. I felt that the Faverolle was the only breed that could answer such a purpose but its color was strongly against it and the fact that double matings were necessary to secure show specimens, few breeders would consider breeding the bird, and following this, the idea came why not produce some new varieties and immediately set to work. I found in a back yard in the North of England a few partially white birds with which to make a start and by persistent breeding, backed up and supported by many leading Faverolle breeders we succeeded at last in perfecting a pure white variety, and so immensely has it caught on to the popular fancy that the year through, there is hardly stock in the country to supply the demand.

I am now at work on a Buff variety and already the pullets come as perfect in color as the best Buff Orpingtons and true to the Faverolle type but the males up to this year have proven an obstacle to all possibility of offering stock for sale, it being almost impossible to eradicate the black plumage of the "Salmon" from the flights and tails of the buff males that carry the Faverolle type to any perfection. This

season we have secured a few and are more hopeful for the future.

The essential points, in the White Faverolles to breed for, are purity of color, good muffs, five toes and if the English Standard is to be held to, a slight feathering down the outside of each leg. I am, however, strongly in favor of adopting any new standard whereby such leg feathering is abolished or minimized to the utmost and shall be pleased to correspond with any Faverolle breeders interested, and give them my experience in breeding and mating these birds.

Another breed fast booming in England is the Campine especially the Silver variety. It is now well known by most to be a breed of Belgium origin, although as with the White Faverolle, these new varieties are purely English, carry an English Standard quite apart from the original standard from which they were in course of time evolved and are now distinct English breeds formed to meet the demand of modern times and conditions and above all to abolish that system of double mating that has ruined the popularity of almost every breed that has suffered from its curse.

The Belgium male differs chiefly in plumage, the pure white of the neck and hackle being carried down the back on to the saddle and forming what is known as the white saddle or shawl. This feature gives the bird a weak or pale appearance and in consequence lost to the breed a good deal of popularity that was won for it by the pullets with their bright, clear, sharply defined barring throughout.

Some years ago a few leading English breeders realizing the promise the

breed held decided to break away from the Belgium breed, dispense with double mating, and produce a variety that permitted the male to carry the same clear, sharply defined barring throughout the body as in the female. The process, of course, has taken some time to fix, for unless the utmost care was resorted to in mating, the shawl of the Belgium would crop out in the English male, but the new variety has now been brought to a state bordering on the entire conquest of these old traits and their appearance met with success that surpassed all anticipations.

Of course the remnant of the Belgium parentage has not been entirely eradicated and probably never will be. Every breed has its culls that throw back to some previous age. Buff and Black Orpington breeders know it to their cost in the males that throw white in flight. White Orpington breeders know it to their cost when after breeding from the purest white specimens, some of the progeny revert to the "brassy" ancestry, and so with the Campine males, breeders must look for the culls that revert to a Belgium ancestry of only a few years back, and knowing where the difficulties in breeding lie, by careful breeding and mating, it will in time be chiefly eliminated and a perfected English and American Standard be established.

A few days ago I received a copy of the proposed American Standard to be adopted at Madison Square Garden and was more than pleased to see that in every respect it bore out all the features we aim for and that in consequence the English and American birds will run side by side and be judged along almost identical lines. The benefit of international standards cannot be too much regarded in the formation and perfecting of any new variety for when one nation is pulling one way, and another another way, what chance has the breed for going ahead? Let us all then warmly support the English-American Standard and aim to see it carried to perfection as the years roll on.

At the annual meeting of the board of directors of the State Poultry Experiment Station at Mountain Grove, Mo., held recently, it was decided to ask for an appropriation of \$50,000 from the next legislature to carry on the work of the station. T. E. Quisenberry was elected station director for another year.

## "DON'T BE A CLAM."

One of my neighbors missed her turkey eggs. A few days after she saw a torpid black snake lying near the nest. On killing and opening there was her china nest egg. This could not have happened with our eggs. Moral: Use S. C. Wh. Leghorn eggs from Darlington and be safe.

Darlington Egg Farm. Alfred P. Edge, Box B, Darlington, Md.

## 60 S. C. RED COCKERELS

For sale at low prices. Eggs for hatching from prize winning pens. Satisfaction or money back. Write today  
T. MENDENHALL - - - - - RIDGEFARM, ILLINOIS.

## BUFF AND BLUE ORPINGTONS

Miss Hooker, for twelve years a Blue Ribbon Buff Orpington breeder, is successfully breeding Blue Orpingtons of which she was the pioneer importer. Very little stock for sale. Illustrated catalog. Mating list on application. Eggs from Buffs, \$3-\$20 for 15; from Blues, \$15, \$20, \$25 for 15. Both strains heavy layers.

Henrietta E. Hooker, South Hadley, Massachusetts

## S. C. Black Orpingtons

SPRING OF 1913—\$10 Eggs for \$4 for 13—Why are they \$10 eggs? Because they are the equal of any \$10 eggs in the United States, and all are from our celebrated Duke of Kent strain—the greatest prize winning strain of Black Orpingtons in America. Send for egg circular and beautiful \$x12 chromo. Very high grade young stock for sale. Mention Am Poultry Journal when writing.

FOSTER & JOHNSTON, R. R. 7, FORT WAYNE, INDIANA  
Honorary State Vice-President American Orpington Club

# Associations and Shows

*Secretaries are Requested to Send in News Items of Interest About Their Shows for This Department*

## THE RIDGWAY POULTRY SHOWS.

One of the best early shows we have ever seen was held at Ridgeway, Pa., November 19 to 22, 1912. The entry was very large and the quality of the best all through. Early shows are advisable, they have their peculiar features that are to their advantage. They are the trying out shows for those to follow and many times we have met the young exhibitors at these early shows with their birds uncertain of their quality that learned their lessons and later in the same year were winners at our great shows. It is these shows that prove the birds value and give the breeder confidence, and have been the making of some of our best breeders.

The early shows are a necessity, we want more of them for the show season at best is entirely too short as it now is.

At Ridgeway we found several surprises particularly in the classes of Houdans, S. C. White and Brown Leghorns, Orpingtons, Wyandottes, Rocks, etc. We believe the Houdan class was the largest at the show with a hundred or more birds in line and with Doctor H. E. Dunne the leading winner. His winnings pen and first cock bird were of superior merit.

The class of S. C. Brown Leghorns was a wonder. We have in some way missed the name of the particular winner. We would like to give him full credit for his splendid line. His first pen was a masterpiece, the cockerel a rich rare bird of extra shape and wonderful color and markings. His pen females and single class winners were of rare even quality—just the right shade with fine markings and strong breasts.

White Wyandottes a strong class. First cockerel a beauty and the winning females very choice and well shown.

The S. C. White Leghorns afforded much work in placing the awards. There were seven grand cocks shown and the first three as good as we can expect to find at any show. First cock fully finished and a beauty in form. First cockerel, shown by J. F. Leyer, a rare hot one of extra shape, fine head and the best of condition. First hen and first pullet were both of the class to win in type and condition. The average quality in this class was very high and bids well for the Leghorns in that section.

White Rocks brought out many choice birds in both males and females, a few of these in young unfinished.

Orpingtons in whites were great. First cock a beauty and the first three cockerels extra strong birds. Females among the best, and many of them. Head points very good.

Buff Orpington are real quality here. First pen well shown and of good color, very clean.

In Black Orpingtons two of the best cockerels we have seen; both had combs

cut, the owner thinking they would be disqualified if they had more than five spikes, so cut out one on each. He will know better next time. Other classes well filled, making a large and evenly balanced show. The hall is large and light excellent. Cooping of the best and, with perfect management, it was a clean and ideal exhibit for which all members and officers deserve great credit. Mr. J. F. Leyer, the secretary, is a hustler, besides a true fancier. We were pleased to meet him and all, for our visits there were well enjoyed.—H. P. Schwab.

## THE BAY CITY, MICH., POULTRY EXHIBIT.

Alive with enthusiasm, we found a regular hotbed of chicken fanciers at Bay City show, held December 17 to 21, 1912. They are there forty strong and with a line of birds in all varieties that show the real interest of these breeders.

They had a good show, plenty large and with quality to spare in most every coop. This year they were handicapped in getting a proper show hall. But in future expect to secure the armory. Then with good light and proper room they will surely hold as choice and select a show as one could wish to see.

The White Wyandottes were one of the largest classes in numbers and one of the very best in general quality. The winners here were all worthy, with

grand type a feature. Good head points were also in evidence. The first cock was a grand old winner with every quality to commend him; first hen one of the best in type we have ever seen, a beauty well shown, nice head and rich red eyes. That hen can win any show. First and second cockerels rare birds, as were also the winning pullets. The hen is owned by Mr. Robert L. King, treasurer of the association.

The Barred Plymouth Rocks filled half the coops down one row, and while several were shown in a careless manner, with black feathers, there were still enough well shown to make a fine class. The first, second and third pullets showing rare color and barring. First cock a very strong and good bird. Secretary A. J. Copeland is a Barred Rock fancier of merit that will bear watching in future.

White Leghorns were a selected class all through, birds of quality with exceptional condition were here. First cockerel, shown by Mr. R. Gillespie, is a bird of promise with size and the best of type. Tail carried properly; first pullet one of the best in quality at the show. She won special for best bird shown, competing in a close race with first hen and first White Wyandotte hen. A pullet shown by David Rabideau won well. She has a beautiful head with most excellent comb.

White Rocks, S. C. Brown Leghorns, S. C. Buff Leghorns, Houdans, etc., were also seen to advantage. Several ex-

## SINGLE COMB WHITE LEGHORN'S "THE MONEY-MAKERS"

Trap-Nested "Standard" Bred  
Pedigreed Line Bred

They also won eight firsts out of possible nine in three shows; five firsts and four seconds in another, and many choice winnings at Illinois State Fair, 1912, and Illinois State Show, 1913. Catalogue free. Mention A. P. J. when writing;

LATHAM, ILLINOIS

## Pagel's Non-Freezing Drinking Fountains

The only non-freezing fountain on the market without the use of lamps or valves. Simply fill with warm water once every 24 hours. So constructed, the water will remain warm.

### Pagel's Non-Clog Economy Dry Feed Hopper

Saves the Feed : Increases Egg Production

Two of the simplest, handiest and most useful poultry appliances made. Warm water in winter. Feed when nature demands. Use our poultry and house powder for best results. Inquire at your dealer, or write to us for prices and descriptive literature. We guarantee every article in our line to be absolutely as represented.

Pagel Poultry Supply Co., Manufacturers  
Lock Box 211 :: :: Rockford, Illinois

ceptionally fine birds were seen in all these.

Rhode Island Reds were also one of the large classes with plenty of quality seen in the many coops.

S. C. Black Minorcas were another good sized class that were well shown with color and type seen to great advantage.

Orpingtons are popular in this section and the Whites, Buffs and Blacks were seen in good numbers, sound color the feature.

Bantams of all leading varieties were shown here. Supt. Roland Schafer was in his glory for his Black Cochins pullet won a special for best bird and with it several articles of use.

Pigeons also are popular here and several pairs of leading varieties were shown, some being of most beautiful quality.

We look to the future for a great show at Bay City. They have the breeders and birds there and with comparison judging are sure to draw the best in the state and from other sections as well. The officers of the association are President, R. Gillespie, Essexville, Mich.; vice-president, Frederick G. Eddy; treasurer, Robert L. King; secretary, A. J. Copeland; superintendent, Roland Schafer, all of Bay City. They have a large membership and put out a long list of specials bound to attract.

## \$1.00 SECURES 100 CHICKS OR EGGS

Have your order booked early and avoid disappointment. We only ask \$1 deposit per 100. Wyckoff-Blanchard Finest White Leghorns—Line bred twenty years for fancy points and heavy laying. 57 acre-farm. 900 breeders. 5,000 chicks a month. We guarantee safe arrival of eggs and chicks and 90 per cent fertility. Catalog free. Eggs, 15 for \$1.50, 100 for \$5. Chicks, 50 for \$5.50, 100 for \$10. Chks. \$3 to \$10.

Missouri White Leghorn Farm, Box A, Valley Park, St. Louis Co., Missouri

## My Columbian Wyandottes

At the great Chicago show, won first cock, first hen, first and second cockerel; first, third and fourth pullet; first pen and first display. At the Minneapolis show, first, second and third cockerel; first, second and third pullet; first and third hen, fourth and fifth cock, first pen and first display. Mention A. P. J. when writing.

Geo. A. Kersten : Washburn Park, Minneapolis, Minnesota

## ANDREWS' WHITE WYANDOTTES

Boston Winners Again. 1913—In strongest competition ever known, first pen, second, fourth and fifth cock, second and third hen, second cockerel. Remember I hold the world's record of winning at Boston every year for the past sixteen years. Six first pens in the last seven years. Three first cockerels in the last four years. Four second cockerels in the last 4 years. A few grand breeding males left that will do you good. Send for mating list showing winners. Eggs from finest matings ever bred, \$10 per fifteen, \$18 per thirty, \$25 per forty-five. Book early

J. W. ANDREWS  
BOX A -- DIGHTON, MASS.

We found all to be good winners and grand losers and to our mind are ideal fanciers worthy of every support. We thank them all for many favors shown.—H. P. Schwab.

### THE DALLASTOWN, PA., SHOW.

This was our first trip to the Dallastown, Pa., show, held November 25 to 30, 1912. We know this section to be filled with fanciers and breeders and that during the year poultry shows are held at every crossroads in this part of the state, for it is alive with poultry and there also will be found breeders who have won their way and have made for themselves a national reputation in Barred Rocks, Silver Wyandottes, etc.

The show was a large one, completely filling the large building in double rows, which also was a good show room with fine light.

Several of the classes were extra large and teeming with quality. This was the case in the Barred, White and Buff Rocks, Silver and White Wyandottes, White Leghorns, White Orpingtons, etc.

In Barred Rocks the going was very strong and the winners very strong birds. First cockerel a very promising bird. First and second cocks very good. The winning hen a beauty of the best quality and first pullet also one of the

best, the shade of color with style of barring just the kind we desire. Shape very nice. The winning hen and pullet were shown by Mr. J. W. Smith, Dallastown, Pa., and are of his best line that made such a great record at Baltimore last winter. His specialty is the female line, of which he has made a great success.

The Silver Laced Wyandottes were surprising in numbers with close to one hundred birds shown. Type was very good and color and markings far above the average. First hen a wonder in color and first cock and cockerel extra in shape and color. Good heads were the rule.

White Orpingtons a choice collection, well shown. Condition was a feature in these. The birds were in the best of shape, well washed and of a most pleasing quality. The male birds were of extra shape and finely finished.

Buff Rocks are strong favorites here and it is seldom we see a better quality class than was shown here. The winners were of pure sound buff color, even, and grand undermarking, a very select collection all through.

White Rocks were not so large a class, but the winners were all very good clean birds.

White Wyandottes featured in males, which were above the average found and with nice heads. Females were not ready in most cases. Still there were many nice birds there.

In S. C. White Leghorns the entry was great and the quality greater. It was a delightful class to handle, with conditions a feature.

In most all other varieties there were good entries, making the exhibit one of class and complete in detail. The officers have every reason to feel proud of their show and we hope it received the support due.—H. P. Schwab.

### THE LOUISVILLE SHOW.

The first annual exhibition of the South Central Poultry Association was held in the Armory at Louisville, Ky., Dec. 23-28, 1912, and notwithstanding the fact that the holiday festivities affected the attendance to a certain extent, it was a great show and a grand success. The exhibit was large and the birds of superior quality. A stock company was formed which consists of practically the same membership as composes the Mid-west Poultry Association.

The Armory is one of the finest buildings to be found in which to hold a poultry show, the lights being the very best, which, of course, make the bird show off to the very best advantage. Louisville is certainly a great place to win, as the hospitable southerners are there with their cash and good sales are made. The southern field is rapidly opening up as a market for high-class birds. At the Louisville show there were six special classes added in the Barred Rock classes and many costly and beautiful cups and specials were given for most all varieties.

Every breeder of really high-class birds should count on Louisville for next season.

Among our advertisers who were successful in winning the lion's share are: Blue Ribbon Poultry Farm, Columbus, Ind.; H. B. Seranton, Rising Sun, Ind.; Longfield Poultry Farm, Bluffton, Ind.; Guy Daily, Jeffersonville, Ind.; Mrs. Reginald Stonestreet, Nashville, Tenn.; A. E. Martz, Arcadia, Ind., and N. P. Easling, Pekin, Ill.—H. H. Coburn.

# CHICK CHATS

by H. P. Schwab

1912-1913—the greatest of all show seasons.

\* \* \*

Records have gone to smash all along the line.

\* \* \*

Greater entries, greater attendance and larger sales.

\* \* \*

With a quality crop the harvest promises the best ever.

\* \* \*

Now look to and plan for the future—the best is yet to come.

\* \* \*

The dates for the next Boston show are January 13 to 17, 1914. Put that in your book and don't forget it is American Beauty Show.

\* \* \*

For president of the A. P. A., Mr. E. B. Thompson, Amenia, N. Y., sounds well to us. We are for a sound and substantial breeder for that office, and in Mr. Thompson we surely have a capable breeder.

\* \* \*

Mr. H. V. Crawford has retired from the Madison Square Garden (New York) Show—at least as its secretary and manager. While we regret this, we must admit that he has served his time and has well won the everlasting gratitude of the breeders for the great work

he has done for Standard-bred poultry. The New York Show in all its greatness will ever live in memory as the greatest monument to a great man.

\* \* \*

If we have mild, rather summer-like weather all these winter months, what will we get when springtime comes again?

\* \* \*

Before marriage a fellow promises he will never deceive his wife; after marriage he finds he can't.

\* \* \*

Phenomenal records at the great shows this year are the rule. Mr. E. B. Thompson with his "Ringlet" Barred Rocks set a new mark for the M. S. Garden Show. It was a complete victory, won in the most brilliant class ever shown. During our nine years' service at this show we have never seen such uniformly high quality in all the classes as was had this year.

\* \* \*

In White Wyandottes the "Little Napoleon," A. J. Fell, won four of the five first prizes just as natural as could be and without turning a hair. He had the goods with him, is what they all said.

\* \* \*

In Black Minorcas the "Yama Farms" are pulling down ribbons yet,

and they also were well placed on their Barred Rocks.

\* \* \*

In White Leghorns, D. W. Young exhibited his wonderful Leghorns, making a beautiful record. That line can't be beaten.

\* \* \*

John W. Poley, of Buff Rock fame, did his usual stunt, which is quite natural for him; while he breeds the yellow-colored birds, he has an unusual desire for blue in ribbons.

\* \* \*

Foxhurst Farms Black Orpingtons made a clean-up, winning all first prizes and then some. As Richard would say, can you realize it?

\* \* \*

Haldie Nicholson won four firsts with his Blue Orpingtons in a great class, but this did not satisfy him, for he reached over in the Barred Rock class and stole the first cock prize also.

\* \* \*

Other records were made, and we will try and give all fully in our report of the show.

\* \* \*

Politics in the A. P. A. are booming, which reminds us of—

**The Glad Hand.**

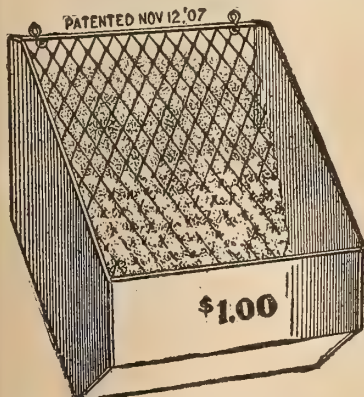

"Now when he shakes you by the hand, with compliments real stunning, The thought on which you quickly land He is for office running."

\* \* \*

The "Flea" banquet was held on Wednesday evening, with Grand Flea-Bite-H.-K.-G. Col. Lewis Paul Graham as toastmaster. The colonel is in the select class of fleas and promises to soon place them on every breeder. Listen—we are going to make this an

## Don't Throw Money Away!!

You Do Just That When You Allow Fowls to Scatter and Waste Their Food by Day and Allow Rats to Carry Off the Grain in Large Quantities at Night.

### The Boston Hopper — The Rat-Proof Hopper

**T**HIS HOPPER is the ingenious, money-saving, *Automatic* food receptacle that has made the *Dry Feeding Method* a country-wide success. This line of Hoppers was placed on the market in the fall of 1907 and has met with a phenomenal sale throughout the United States and Canada. *It is Waste-Proof in daytime and Rat-Proof at night.* The saving in feed will pay for the Hopper in one to four weeks' time, depending on the number of fowls that use it.

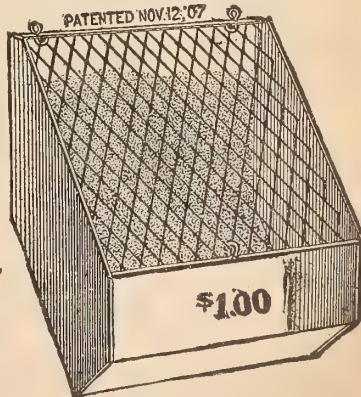

**BOSTON FOOD HOPPERS** are made in four sizes—two sizes for adult fowls and two for chicks. Illustrations herewith show popular size for adult fowls. For pictures

Hopper Ready For Use. Holds One-half Bushel. Made of GALVANIZED IRON with Swinging Grid (Mesh).

of other sizes, see page 159 of our Complete Catalogue and Poultryman's Guide for 1913, "Profitable Poultry and Egg Production"—244 large pages, 500 instructive illustrations—mailed *Free* to any address, or send a postal card request for our 54-page booklet, "Poultry Foods and Feeding," the most valuable condensed treatise on this subject ever published—both books *Free* for the asking.

**THE BOSTON FOOD HOPPER** hooks against the wall or can be placed on the floor or ground. The *Swinging Grid* or metal guard prevents the fowls from wasting the food. The Hopper can readily be "locked" at night (or in the daytime) by simply hooking the grid to the front section at the lower end, thus making the device rat-proof.

Buy a sample Boston Hopper from the dealer of whom you get your poultry supplies or order one from our nearest place of business—see addresses below. Price of half-bushel size, \$1.00. Will last a lifetime. Write today for 54-page *FREE* booklet. Tells about Dry-Feeding Method. Satisfaction guaranteed or your money back.

This Hopper is Locked For the Night, by Hook in Lower End, Making it **ABSOLUTELY** Rat-Proof.

Selling Agents

association of at least 10,000 members by another year. Hamburg Bill is in—so are all good fellows.

\* \* \*

At the American Barred Rock Club meeting held at Charlotte, N. C., January 11, 1913, Mr. Henry D. Riley, Stratford, Pa., was re-elected secretary and treasurer, and I am proud to say the meeting honored me with the office of president. I thank all for the honor conferred.

\* \* \*

Mr. Riley has done splendid work the past year. The club is in most excellent financial condition, and we will now hope that every breeder and lover of the "World's Favorite Variety" will join us and aid in our efforts for greater prosperity. A full account of the meeting will be given elsewhere. A new club catalogue will be issued, and we want all in this. Write to Mr. Riley for blanks and particulars.

\* \* \*

The Boston banquet was again a feature, with close to 200 breeders present. Toastmaster Atherton was at his best, and a most enjoyable time was had. The orators were heard to advantage.

\* \* \*

Secretary S. T. Campbell has proven himself to our mind the best officer the A. P. A. has ever had, and we earnestly hope he will again be re-elected, for he deserves the best the members can give him. He is at all times prompt and efficient, and his personal work and

efforts have done more for the association than that of any other man or set of men.

\* \* \*

The members are awake to their best interests and well know who is under the cloak of opposition, and they will elect Mr. Campbell by a four-to-one majority.

\* \* \*

Mr. Lawrence Jackson, Haysville, Pa., exhibited his R. C. White Orpingtons at the New York Show with great success. We were surprised to see the wonderful type he has bred in his line; they have the same ideal shape seen in the best single combs to date.

\* \* \*

A well-known line of Barred Rocks is offered for sale, the owner being obliged to sell on account of other business interests. This line has a grand winning record, and if interested write for further particulars.

\* \* \*

The Knockers' Club was out in full force at New York.

\* \* \*

The mayor of Charlotte, N. C., welcomed the visiting breeders at the show, and Mr. H. D. Riley responded in an eloquent manner to his honor's address, after which a reception was held. Affairs of this kind go a long way in creating interest in "better poultry."

\* \* \*

A pleasing feature of the New York Show was the number of visiting breed-

ers from every section of this country and abroad. There was enough to be seen there to interest all, for the select of poultrydom was on display.

\* \* \*

Mr. F. J. Eppele and wife, Stockton, N. J., were hosts at dinner to Mr. and Mrs. D. W. Young and some friends, which included noble blood in Baron Von Ginck, Monsieur de Frankus Platt, etc. Mr. Eppele had just come from the Baltimore Show, where his S. C. White Leghorns had won first pullet and fifth pen.

\* \* \*

Depend upon this: The man who has never made a mistake has never made anything else worth a darn. The successful business man does not count his mistakes. He takes note of his successes.

\* \* \*

The great Pittsburg Show, February 17 to 22, will close the most prosperous season ever had. It is the closing event of the season and for sixteen past years. This year it will be an event of special interest. Write Mr. Geo. C. Sutch, secretary, for all particulars. Pundy, Bean, Poley and your's truly will be there.

\* \* \*

On our way to Boston we spent a day with C. H. Welles of "Fluffy-Ruffles" fame. His Barred Rocks are the best we have ever seen in the female line, of which he makes a specialty, and on account of his judging at New York this season he could not show. If you have wants in this line, write him, for he has over a hundred select pullet-breeding males to sell, and they are of the most desirable breeding quality.

\* \* \*

Mr. Newton Cosh should be a happy man with the record he has made for the "Yama Farms" Barred Rocks and S. C. Black Minorcas this season at New York and Buffalo, also at the State Fair. At Buffalo this week they won four first prizes in both varieties.

\* \* \*

Mr. L. O. Kettering and Mr. J. P. Hildorfer, both of Pittsburg, were welcome visitors at New York. Mr. Kettering's Orpingtons were in the winning there, while Mr. Hildorfer grabbed the honors at Baltimore with his Jumbo line of S. C. Black Minorcas.

\* \* \*

Some people never take a fellow seriously until he tries to tell a joke.

\* \* \*

"French's Poultry Mustard" is the original and reliable poultry mustard. Insist on this brand. We are using it daily with both our dry and wet mash. Results show it helps fertility, and that is just what we all want. If you will try it you will be satisfied.

\* \* \*

First Barred Rock hen at New York was won by Mr. C. N. Myers, Hanover, Pa. He has shown there before, but this was his first win. Keep trying.

\* \* \*

Cockerel and pullet mating pens of Barred Rocks attract a great deal of attention at all shows where exhibited. They are of particular advantage to the breeders, and we hope all associations will consider this for their next shows and make proper classes for such matings.

\* \* \*

That proper, clean and consistent underbarring is of value and positively essential to the best of surface color in Barred Rocks has been amply proven at the shows again this season.

## Payne Bros.' Rose Comb Reds

Win at Madison Square Garden, the "Quality" Show of America—1st cock, shape and color special, 1st pullet, color special, 5th hen, 3d pen. At the big Boston show, 1912—1st cockerel, 1st pen, 2d hen and six other ribbons on nine entries. If you want the best in stock and eggs, write us. Mating list free Feb'y 1st. Satisfaction guaranteed.

PAYNE BROS. -- BOX J -- PORTLAND, CONNECTICUT

## PRESCOTT'S ORPINGTONS

BUFF, BLACK, WHITE AND DIAMOND JUBILEE

Located in their new home. We are only 23 miles from Boston, on the main line of the B. & M. R. R., which gives us the best of train and express service. We have a grand lot of Orpingtons and are prepared to furnish both old and young stock. If you need anything good in Orpingtons let us hear from you. Eggs for hatching in all 4 varieties.

H. B. Prescott, 75 Salem St., Andover, Mass.

## SILVER AND GOLDEN CAMPINES AND S. C. WHITE LEGHORNS

Baby chicks of quality from these celebrated strains of heavy layers of large white eggs. I make no extravagant and unsubstantiated egg record claims; each year our chicks are bred from birds whose performance is measured by their egg yield, having thus earned a reputation in heavy egg production. At Cleveland, January, 1913, our Silver Campines have shown by their winnings (two firsts, one second, one fourth, one fifth, on an entry of six) that utility and show values can rest in the same birds. Now is the time to book your order for either baby chicks or eggs for early delivery. Our prices are right and we guarantee to please. Catalogue free.

# American Poultry Journal Experimental Station

*Dr. Prince T. Woods, Director*

**I**N THIS DEPARTMENT are reported things which have been tried and found good on American Poultry Journal's experimental farms. Just because anything is reported herein as good does not mean that there are not other similar things that are just as good. It simply means that we have tested the article and found it good after a sufficiently long trial to form an opinion of its merits. Please do not ask us to name the best in anything. We cannot name any one article as the best of several of the same kind. It would not be just or fair to many good things, and with varying conditions anything which seemed best under some conditions might not prove best under other conditions. Don't ask us to endorse anything as best. We can only approve of it as good if it is good, and it will have to prove good on one of the A. P. J. experimental farms before we will report it as good. This department began in January, 1913, American Poultry Journal. Unless there is special reason for doing so we do not intend to report on the same article more than once, therefore keep your lists for

reference. No favors are asked and none will be granted. Any poultry equipment, supplies, foods or remedies may be tested when opportunity offers. We do not promise published reports except when the articles are found sufficiently good to warrant recommendation in these columns, or when sufficiently bad to warn poultrymen against them. We do not solicit articles for test or trial. Donated goods if sent freight or express prepaid to the Director of American Poultry Journal Experiment Station, Plympton, Mass., or by mail to Silver Lake, Mass., will receive the same careful consideration as goods purchased for test. That is all we promise and no concessions will be made to anyone on account of any favors.

## Things Tested and Found Good. Incubators.

Standard Cyphers Incubators, 360-egg capacity, second-hand 1905 pattern, hot air type, made by Cyphers Incubator Company, Buffalo, N. Y. Period of test, one year. Two machines tested. Hatches excellent. Chicks large, strong and vigorous and lived well.

## Foods.

Buffalo Gluten Feed, Corn Products Refining Company, New York. Quantity tested, ten tons. Period of test, one year. Varies a good deal in color and quality. Manufacturers claim dark-colored feed equal to the lighter-colored golden brown feed. We have found the dark feed rather acid and less desirable. The golden brown gluten feed has given us best results with chickens, fowls and cows. Gluten feed makes a desirable addition to both dry and moist mash as a protein feed. For poultry we used about 14 per cent of the total dry mash mixture. For cows about 25 per cent of dry grain mixture fed. We believe that gluten feed helps to make better eggs, better meat and better milk.

Dried Beet Pulp, Larowe Milling Company, Detroit, Mich. Quantity tested, one ton. Period of test, nine months. Beet pulp fed either wet or dry is relished by chickens above six weeks old and by fowls of all ages if not fed too heavily. No ill effects were noted from feeding unless the pulp soured before eaten. Wet pulp sours quickly in warm

## YOUNG'S STRAIN S. C. W. LEGHORN

(I HAVE NO OTHER BREEDS)

My strain won every prize and special offered at the world's greatest show, Madison Square Garden, New York, January, 1913. My individual winnings were:

**Cocks, 1-3-4-5-6; hens, 2-4-5-6-7; cockerels, 1-2-3-6-7; pullets, 1-3-5; pens, 3-5.**

In fact, for the past ten years, my strain has won in every show of any note in the United States and Canada. They are the standard for all the Leghorns of America, and the greatest layers of all varieties of domestic fowl. I have hundreds of cockerels for sale that can win anywhere, and after winning will improve your stock for eggs and exhibition points. (Remember you cannot win without my strain). Matting list free. Address

**D. W. Young, Monroe, N. Y.**

WINNER OF FIRST & SPECIAL PRIZES, DEC. 1923, 1911  
MADISON SQUARE GARDEN, NEW YORK.  
BRED & OWNED BY D. W. YOUNG, MONROE, N. Y.

weather. For best results the pulp should be soaked before feeding. One pound of dried beet pulp requires about  $4\frac{1}{2}$  pounds of water to put it in best feeding condition. It is best fed plain, allowing the fowls to consume what appetite demands. If fed in a moist mash use about 15 per cent (bulk) of wet pulp. It is difficult to place the actual value of this food in the poultry ration. We have not noted any special benefits which accrue from feeding it. It is not a substitute for fresh greens or for cut

clover or cut alfalfa. As a bulky vegetable food, where fresh greens or fresh raw vegetables are difficult to obtain, beet pulp proves a good, efficient, cheap vegetable food for poultry. It is clean, easy to keep, easy to handle and easy to use. Cattle like it and it helps out the milk yield and lessens the food cost. The poultry keeper who finds it difficult to supply fresh greens and raw vegetables will find beet pulp a good cheap bulky vegetable food. It cannot take the place of sprouted oats, raw

green food or raw vegetables. It is preferable to rotted or frosted vegetables.

Red Star Brand Fish Scraps. International Glue Company, Boston, Mass. Quality tested, 1,000 pounds. Period of test, four months. Claimed to be made from fresh sound fish heads direct from the Boston fish wharves. Contains about 55 per cent protein, 30 to 35 per cent bone and 2 per cent fat, according to analysis supplied by manufacturer. A good food for use in mashes for growing chicks and for breeders and layers in the proportion of about 5 to 10 pounds added to 100 pounds of dry grain mixture.

Fresh Fish. Fresh caught waste fish and fresh, sound, clean fish waste from both salt and fresh water fish, scalded with boiling water, allowed to cool, and fed freely bones and all to growing chicks proves a wonderful help to rapid, strong growth. For laying fowls must be used sparingly or will give a fishy flavor to the eggs. Used for several seasons with good results. Not fed to fowls kept for production of table eggs. Believed to help hatchability when fed to breeding stock.

#### Equipment.

Common Bushel Box to be had for 25 cents from any box factory makes a very satisfactory food hopper for dry mash, scrap, or whole grain. In use the entire season. Sits on floor of house and is very seldom fouled with droppings.

Galvanized Separable Drinking Fountains and Chick Servers, made by Cyphers Incubator Co., Buffalo, N. Y. Four dozen in use through season. Convenient, easy to clean and sanitary. Used for brood chicks in brooders and with hens.

Galvanized Iron Pails. Three sizes, 8, 12, and 14 quart. Used for growing chicks and adult fowls for daily water supply. Convenient, sanitary and satisfactory. Low cost. Can be had of any hardware store. In use throughout the season. Four quart galvanized pans used for water for growing chicks too small to use pails.

#### Disinfectant and Remedy.

Pyrocarbol, Eastern Drug Company, Boston, Mass. A good cresol disinfectant. Amount tested one gallon. Period of test six months. Tablespoonful in gallon of water useful as a head dip for fowls with catarrhal colds. One gill in two gallons of water effective disinfectant for use in cleansing brooders and spraying coops.

Fresh Ground Persian Insect Powder, (imported pyrethrum), Eastern Drug Company, Boston, Mass. Thoroughly tested several seasons. Very effective dusting powder to rid chicks and fowls of lice.

Napereol, Cyphers Incubator Co., Buffalo, N. Y. Quantity tested, two gallons. In use several seasons. A good cresol disinfectant. One tablespoonful in gallon of water makes a good head dip for treatment of fowls with catarrhal colds. One gill in two gallons of water makes a good disinfectant for cleansing and disinfecting incubators, brooders and coops.

Lice Paint. Home made. Dissolve in kerosene all it will take up of crude fine naphthalene flakes. In use 18 years. Useful and effective for painting roosts and spraying about coops and droppings boards. Effective when applied to legs in case of scaly leg. Caution: do not get on the soft parts, as kerosene will blister the skin of fowls.

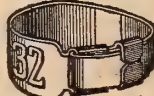

### The Favorite.—LEG BANDS.—The Capital

Six sizes

Our bands are strong, durable and made from aluminum; have smooth edges and lock with double clinches, numbered with large RAISED FIGURES. Prices: 12 for 15c; 25 for 25c; 50 for 40c; 100 for 65c. Always state which kind are wanted and what variety they are for.

CHAS. L. STILES, 233 N. Third St. COLUMBUS, OHIO

## SEARS' BARRED PLYM. ROCKS

Are winners wherever shown. Cockerel bred. Bradley's female line "Fluffy Ruffles." Some choice breeding and exhibition birds for sale at prices that will move them quick. Write for what you want. Please mention American Poultry Journal when writing.

H. O. Sears : Garden Prairie, Illinois

### EGGS FOR HATCHING ——— EGGS FOR HATCHING AND CLOVERNOOK'S

## WHITE HOLLAND TURKEYS

White African Guineas, White Japanese Silksis and Wissahickon White Wyandottes—Great birds, great layers, great hatchers. Great bargains in non-related stock. Choice Pekin Ducks. Write for prices. Also fine Strawberry plants, "The Clovernook Beauty." Mention American Poultry Journal.

Miss Frances E. Wheeler : : Chazy, New York

### WHEN YOU WANT SOMETHING EXTRA GOOD IN WHITE ROCKS

Eggs, stock or day-old chicks. Our famous "Crystal Strain" Eastern Champions will win and lay to please the most exacting. Our Camden and Ambler winnings in 1-2-3 order, again demonstrates their superiority. Only vigorous, farm reared, trap-nested, individual pedigreed stock of exceptional shape and quality bred or offered. Let us book your order now for future delivery and avoid disappointment. Red stamp brings our interesting catalogue. Mention American Poultry Journal.

The Model Farm, C. G. Mueller, Prop., Box 542, Lansdale, Pa.

## BLACK LANGSHANS & INDIAN RUNNER DUCKS

Brookfield Farm birds are Maryland's beauty and quality strain. They have been winning regularly at Baltimore, Allentown, Hanover, Hagerstown, etc., and have proven their worth as well for practical purposes.

Black Langshans—Have won first cockerel at Hagerstown two years. My 1912 champion was pronounced one of the best ever shown. Shape, size and sound color are features. For all purposes there is no better bird bred. They are hardy and great layers.

Indian Runner Ducks—Have made a sweeping record with these in the best of classes. My drake "Edward" has an unbeaten record at six great shows. Let me know your wants in either of above for exhibition or choice breeding quality. Pairs, trios and pens properly mated. Selected breeding cockerels a specialty. Satisfaction assured. Prices right. Mention American Poultry Journal when writing. Address

# Home and the Table

## Good Things for Everybody

Allen T. Woods  
Editor

SOMEONE HAS SAID that the age of invalidism is past, since all right-minded people are aiming to be healthy. We are more and more realizing that the blessing of health, at least to a great extent, lies with ourselves. The woman who wants to undertake any line of work or who aims to accomplish anything worth while must see to it that she keeps herself fit. It is no longer fashionable to be pale and anemic or to appear weak and frail. We are learning to eat three square meals a day, taking time to masticate them properly; to get out of doors all we can; to sleep with our windows wide open; and to see the cheery side of things generally. Because we smile frequently or indulge in righteous laughter easily, we are no longer considered light-minded or even foolish, as in generations past. How much of this is due to our better methods of living would be hard to determine, but certainly a great part of it is directly the result of a better knowledge of the importance of fresh air.

In every home where there are children the mother knows how difficult it

We are builders, and each one  
Should cut and carve as best he can.  
Every life is but a stone,  
Every one shall hew his own.  
Make or mar shall every man.

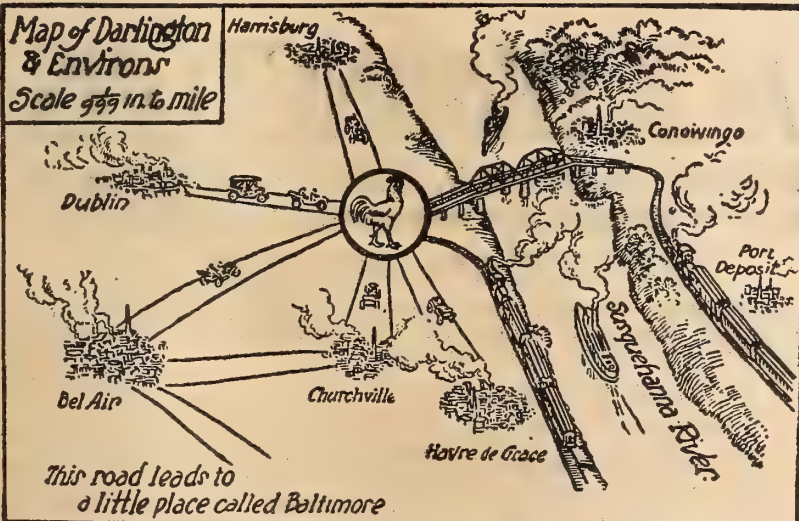

—Anon.

is to keep them free from colds and similar ailments during the winter months. This is particularly true where they are confined the greater part of the day in a poorly ventilated school room with many other children. In such cases the best thing the mother can do is to keep the child in such condition physically that he will not easily take on a cold or other ailment. The food given children should be simple and well cooked and sufficient variety given the menu that the child will not tire of its sameness. The length of time given to eating should be encouraged and the child made to understand that only by thorough mastication may he hope to get the greatest good from the food consumed. He should be allowed to play out of doors in all seasons and clothed according to the weather. During cold weather should the child get his clothing wet

it should be changed at once, and in the case of wet feet shoes and stockings should be at once removed and the feet placed in as hot water as can be borne for a short time, when dry clothing may be again put on with no fear of resulting cold. The year round a window of the sleeping room should be open during the time the child is asleep therein. There is no better way of preventing colds than this. Have the child warmly clad at night, first removing all clothing worn by him during the day, to then don a warm sleeping garment with feet, if necessary, but always one that will cover him well and that is comfortable next to the body. The bedding should be light and warm and sufficient of it should be used to keep the child entirely comfortable. The coldest air will then not harm him if his bed is not directly in a draft. With very young children a hot-water bottle should be placed at the child's feet. Dressing, undressing and bathing should be done in a warm room.

If a child shows a slight cold in the head, see to it that his nostrils are thoroughly cleared before going to

Map of Darlington  
& Environs  
Scale 3/4 in. to mile

## DON'T BE A CLAM

### Map of Darlington and Environs

Chief Products Pretty Girls  
and S. C. White Leghorns

I RECEIVE LETTERS every day and the burden of their cry is "Where is DARLINGTON?" At great expense I publish this map. You will notice we are close to the most beautiful river in the East. There are many stories told about this river, some amusing, some sad. I have only the time and space to relate one. It is said that George Washington once stood on the DARLINGTON shore and threw a silver dollar onto the Cecil bank. (distance one mile.) I can't show the dollar as I have just paid for this adv. put I can show you the probable spot where George stood and where the dollar lit. This should be proof enough for anyone, if not I would say a dollar went much farther in those days than it does now.

You will notice all roads seem to lead to DARLINGTON. This is not the artist's fault. I asked him to show all leading into but none out, he said he could not do this. I discharged him on the spot, this will account for map not looking better. The spot is marked on the map. Anyone wanting to get out of DARLINGTON should be suppressed. You will notice a shad going up river—by request—don't scare him, he is only taking a pair of scales up to weigh one of our eggs and report. If you don't believe it listen for the report, it will be heard much farther than Chicago.

The professional ad. writer is getting much worried about my ads and wants me to stop putting humor in them, as it is sure to offend. If you knew me personally you could not be offended; like Mark Twain, "I would not kill the smallest child." I do not think if you took all the humor in my ads and put it together you could bring a smile on the face of an Egyptian Mummy. Speaking of Mummies; a person brought me an ad already written out and said: "Use that, that will not offend," and it won't. Look here, I remarked, I haven't time today to attend even my own funeral but that ad would just suit Noah but Noah is dead, buried to be exact, for quite a while, but I suppose you had not heard it. He was offended.

Now, if any of you do not like this ad, the next order you send just say so and I will quit. Speaking of quitting, that reminds me:—When you get on one of these roads, if you are not arrested for speeding, you will arrive at DARLINGTON and see the most complete S. C. White Leghorn Farm in the state, it is not only up-to-date but a little ahead.

**Darlington Egg Farm, Alfred P. Edge, Box B, Darlington, Md.**

sleep; place a little vaseline in the nostrils and rub over the bridge of the nose with warm vaseline; place his feet in water as hot as can be borne, roll them in a blanket and put him to sleep in a room with the window open. If the bowels have been sluggish give him before retiring the juice of an orange.

A child's life is made up of habits and it lies within the power of the parents to see that the habits are good ones. A child that is early taught the use of the tooth brush and the value of good teeth will continue to give them good care. It requires constant vigilance on the part of the parent, however, to correct the little errors in standing or in wrong sitting postures, or in mouth breathing or whatever the case may be. At first it may be an easy matter to correct, but once the habit is formed, it is most difficult to overcome.

Good manners and correct speaking should also be taken into account by the parent who would encourage right living. Too frequently these faults are first those of the parent. Children are almost parrot-like in matters of manners and speech. They act and say what they see and hear. Thus training the child in these things lies directly upon the extent of our own training.

The encouragement of traits of industry and thrift in children is one of the most important duties of parenthood, as where such traits are lacking in after life it is to a great extent the fault of the parent. The health and happiness of many individuals is traceable directly to their interest in some useful employment, since happiness is largely a state of one's mind, and health is easily affected by the state of the

mind, it is not difficult to determine what effect a chronic state of idleness will bring about. In connection with this should be considered the ill effect that a constant complaining of aches and pains which one frequently hears on trains and in public places. The long accounts of sufferings in the hospital, the retailed accounts of every ache and pain known to man, which is told in tragic tones and which is of no interest to anyone save one's physician, is most trying to hear. The habit of pleasant conversation should be cultivated in every family, it should be cultivated among friends and acquaintances, while the vice of recalling and recounting all one's worries, troubles and ailments should not be tolerated among friends or allowed to become a habit in one's family. There is no effort so unproductive of good, or no conversation so inane as that which dwells on personal trials and tribulations. The present age demands the health in mind and body of its women. They cannot afford to be weaklings. As the mothers of the race they must overcome a tendency to despondency, the habit of worrying over mere trifles, and cultivating a hopeless outlook for the future. Look for the brightness in life and you will find it. Expect good things, work for them, and you will get them. Keep mind and body in as fit condition to perform the work you plan to do as is possible and have confidence in your own ability to accomplish what you aim for, even though it is necessary to make many and repeated attempts. Most difficulties can be sooner or later overcome by firmly resolving to get the best of them since a firm resolve in any direction means a concentrated ef-

fort, before which any obstacle will in time crumble.

#### Chicken Pot Pie.

By J. M.

Select a large chicken or fowl, cut into pieces at the joints and place in cold water for an hour. Remove this water and cover with fresh cold water and allow it to come gently to a boil and continue to cook until tender. Season with salt and pepper and thicken the gravy with two tablespoons flour and the same of butter, well mixed together, and then added to the hot chicken gravy. Have some light biscuit dough dumplings ready and add to the hot gravy and continue boiling for about ten minutes. Add also one cup of rich milk or cream and serve at once.

#### Cream of Cheese Soup.

By J. M.

Grate a quarter of a pound of cheese and add it to a quart of sweet milk which has been heated to the scalding point in a double boiler. Add salt and pepper to taste. Rub together one tablespoonful of butter with one tablespoonful of flour and add to the cheese and milk mixture, stirring until smooth and slightly thickened. Beat the yolks of two eggs until light and creamy, add a little of the soup mixture, and put into the soup, stir briskly for a moment and serve immediately with croutons.

#### Tomato Bisque.

By J. M.

Place the contents of one quart can of tomatoes with a tablespoon of sugar, one small onion, six cloves, a few pieces

## FOXHURST CHAMPION BLACK ORPINGTONS

WIN FIVE FIRSTS AT MADISON SQUARE GARDEN, N. Y., WORLD'S-GREATEST SHOW

### A CLEAN SWEEP

Thirty birds entered and twenty-two wore ribbons. This is the first time in the history of Black Orpington classes at the New York show that all the firsts have been won by one breeder. Our complete winnings are:

**First and third Cocks**

**First and fifth Hens**

**First, third, fourth and fifth Cockerels**

**First, second, third and fifth Pullets**

**First and fourth Pens. \$25.00 for best display**

Every Champion bird in our exhibit was bred and raised on our farm, to which fact we will make affidavit. The competition was the keenest ever seen in the Garden. The Crystal Palace (London, England) winners were in competition, as well as America's and Canada's best. Birds that were personally selected in England and Canada to win this show were defeated by our American bred, Foxhurst Champion Strain Orpingtons who, in addition to our 1913 record win, have been the largest winners at New York for the past five years. This unprecedented win indelibly stamps our birds as the undisputed Champions of the World.

For eggs from our Champions write to headquarters for 1913 mating list; eggs, remember, from the same matings that we use ourselves. Exhibition stock at reasonable prices on hand at all times. Breeders with same blood as our Champions at from \$5.00 to \$10.00. Satisfaction and safe delivery guaranteed. Write, mentioning American Poultry Journal.

**FOXHURST FARM**

**LIME ROCK, CONN.**

of parsley, one cup stale bread crumbs, one teaspoon salt, pepper as desired and boil altogether for a few moments. Remove from the stove and strain through a sieve. Reheat and add one-fourth teaspoon soda, a small lump of butter and four cups rich milk. Serve very hot with crisp crackers.

#### Sour Cream Corn Cake.

By G. M. T.

Sift together one cup cornmeal, one-half cup flour, two tablespoons sugar, one level teaspoon salt and one level teaspoon soda. Beat two eggs until light, add one and one-half cups sour cream and stir this mixture into the dry ingredients, mixing thoroughly. Pour into a well buttered baking pan and bake about half an hour in a hot oven.

#### Rich Chocolate Cake.

By G. M. T.

Cream one-half cup butter adding to it gradually one cup of granulated sugar. Beat also the yolks of four eggs until light colored and thick and add to them one cup of granulated sugar, then add the yolks and sugar to the butter and sugar mixture and beat until very light. Sift into a bowl two cups and one-third of flour with four level teaspoons baking powder and add this to the cake mixture, alternately with one cup of rich milk. Fold in the stiffly beaten whites of two eggs, and add one teaspoon vanilla and one-half a cup of grated chocolate (melted over hot water), beat until well mixed.

#### Plain White Frosting.

Boil one cup granulated sugar, a pinch of cream of tartar, and one-third

cup of water until it spins a thread when dropped from the spoon, then pour in a fine stream into the stiffly beaten white of an egg, beating as you pour. Continue beating until stiff enough to stand alone; flavor as desired and spread quickly on the cake. Chopped candied fruit or nut meats may be added if desired.

#### Mocha Frosting.

1 cup powdered sugar  
 ¼ cup butter.  
 2 teaspoons dry cocoa.  
 1 teaspoon vanilla.  
 2 tablespoons hot, strong coffee.  
 Cream the butter and sugar, add the other ingredients and beat until stiff.

#### BROWN LEGHORN COLOR.

Is the Color to Be Red, as the Standard Says, or Brown—By W. W. Kulp, Pottstown, Pa.

THE writer is a great lover of the Brown Leghorn, male and female. They are bold, beautiful in outline and beautiful in color. The male color is red, black and green sheen. The female red, golden brown and salmon. The standard for the male is brilliant red for neck, wing bay and saddle.

What I would like to know is, what is brilliant red? We always say a strong healthy bird's comb is red. A bright red, too, and I would say a brilliant red is even brighter than a comb, but the winning browns in some classes in Philadelphia, Pottstown and Madison Square Garden are brown of neck, wings and saddle. The same color, only more so, was on the winning Partridge Rocks and

Wyandottes. The standard for these two breeds is bright red.

When a woman has a dress about the color that is bred and winning they call it maroon or wine color or brown. I know not all judges like so dark a bird. Mr. Wittman and Mr. Burgott I think prefer the light color. How many more I do not know. But why was the standard made red and the understood color a dark brown? Has the Rhode Island Red color done part of it? For there is but little red about them. The female is brown and most of the males a dark deep brown. If we use a red bird the females will come too light. A rich cherry or brilliant red will surely contrast far better with the black sheen centers of the hackle and saddle feathers than the brown color so many of them have.

I did not see the winning single and rose, but was told by several breeders who saw them that they were all the dark brown type. Of course head and shape were good. In females I have no criticism, the standards seems to be followed, but in males I am sure most of the winners in large class are dark if they are there at all.

At one show I looked over there was a very good class in numbers and shape of Partridge Cochins, Partridge Wyandottes. The males are colored just alike. These males were far darker than the standard and far darker than Geo. Mitchell used to show in Madison Square, and he was the crack color breeder of the world.

I know this, a brilliant red can as easily be bred as a dark much less showy and much less beautiful brown, and be as clean of purple and as clear cut as dark color, for I have so bred them. My

## DO YOU REALIZE

That this season Maple Farm of Midlothian is going to give its customers the "squarest square deal" in eggs from their

### White Plymouth Rocks

that has ever been known to poultrydom?

### JUST THINK

what it means to pick out a number of pens of birds good enough for exhibition matings and then to weed those down until the final result is one-third the pens that were started with. Isn't that a wonderful chance for both the exhibition and utility poultry raiser?

You want to know more about Maple Farm of Midlothian? Drop us a line asking for our new catalog. Our mating list will come too. Get the address right!

**Maple Farm of Midlothian**  
 Box 105, Tinley Park, Illinois

Chas. D. Ettinger, Prop. R. R. Sta., Midlothian, Ill. Walter A. Cook, Mgr.

First Cockerel, Illinois State Fair, 1912

old Wm. Penn S. C. Brown cock that won first in a class of twelve in Madison Square Garden was pronounced by different judges to be one of the best colored browns shown. He was a red and broad of feathers. The standard today calls for as red a color on neck and saddle as it did then, if not more so, yet the leading birds are much darker in the red sections. What has brought the change?

I can breed brown birds as well as red birds, but it hurts me to do it. It hurts to have a clean cut red color put lower than a dull color not as clean and comb much poorer, and ask why. The answer is, "Your bird is too red," when I know he is standard color.

### "FORWARD! FOR CORNISH."

By John M. Ward, Jr.

TO QUOTE the words of a well known western breeder of Dark Cornish, I am "cock-sure" that the present boom that the Cornish fowl is enjoying is no sudden burst of enthusiasm but "a substantial, gradual growth in popular favor of one of the best breeds in existence."

I would like to, if space in this valuable journal would permit, go back and relate, point out, tell you what I know of the "uncovering" of the Cornish several years ago, of an awakening by some gentlemen throughout the East and West to the fact that here we had a breed, a breed in a true sense of the word, a variety of our feathered

friends that would stand pushing because, in plain language, there was something to push. However, space will not permit, and I must briefly tell you of a fowl, first, that deserves prominence; second, of a club that is growing, not monthly, but daily, whose members are putting the variety on the map, and lastly, of the way Cornish have come "out" in the last year at three of the country's most prominent shows, namely, Allentown, Pa., a genuine fanciers' show; Hagerstown, Md., where the masses gather, and Baltimore, of the same state, where they have an exhibition hall second to none in the country, in which every year a show is held of which the same thing can be written: second to none. And I might add, the growth of a class at a big show is as sure a sign of the rise in popularity of a variety as there can be.

I said the fowl deserved prominence. That we were pushing a breed that was not an air bubble but a reality. Only last Tuesday night, November 12, 1912, Mr. McGrew, of Scranton, Pa., a gentleman known by poultrymen the world over, said in a lecture at Trenton, N. J., before a crowded hall, that the "Cornish and the Dorking were the idols in the poultry world of England." Going further, this gentleman said that not only were Cornish shown in large numbers in the exhibition halls but were bred for utility as well as the best table fowl that could be purchased, and at the same time a fowl that would lay a reasonable amount or number of eggs. "Feathered Life," an English

poultry journal, commenting on the Cornish class at the recent dairy show, said: "But the most interesting class were the Indians, which provided an object lesson in the business—shall we call it art?—of growing heavy boned chickens. Some of these clever Indian game breeders might be able to give a few useful hints to raisers of quick growing table kinds." Judge Geo. Faulkner, of England, in a comment in the "Feathered World" year book of 1910, writes: "The Indian game fowl still holds its own as one of—if not the most beautiful variety grown, combined with table quality not excelled by any other." These few quotations are the words of men on the other side, men who, living in the country in which Cornish originated, are certainly qualified to pass judgment upon and tell us something of the breed.

However, all of the above remarks touch either on the exhibition or meat value of the fowl. I turn to home records to show you of their egg laying qualities. In the first "North American" egg laying contest at Stores Point, Conn., a contest that was completed less than a month ago, there was a pen of Dark Cornish in competition composed of five hens, four of which were one year and a half old, the other one being two years and a half old when the contest opened. The pen hung up a score of 560 eggs for the year, an average of 112 eggs per hen, and one week leading the 99 other pens with a score of 30 eggs out of a possible 35 for the 7 days. True, this score is a long way from some of the records that were made for the 52 weeks, and as a Cornish fancier I do not claim that Cornish would be a paying proposition for eggs alone, but as a "has-been" on the diamond where a close decision was given the "benefit of the doubt," so we must consider that these birds were all over two years old when the contest was at its height. Again I claim, and am not alone, that while on a commercial egg farm eggs they must have, that a hen that lays from 100 to 130 or so eggs a year stimulated simply by good foods; not by drugs, etc., is in a far more healthy condition to lay eggs that will hatch strong, "hatched to live" chicks than a hen that has been forced for a record. Then the Cornish are valuable for meat and for eggs. They are worthy of all that is being done for them.

Secondly, we have in the American Cornish Club a club that is really what the name implies—a loyal bunch of fanciers that, having a breed to champion that is worthy, are putting that breed to the front. Organized at the New York show in 1890, twenty-two years ago, the club has flourished in a true sense of the word. A year ago a catalogue was published of which any specialty club might be proud. This year, even a better one was sent from the press, and over 100 new names appeared on the list of members in good standing, thanks to our hustling secretary, Mr. A. C. Hayes, of Eureka, Ill. One hundred members a year is a fair stride to strike. The breed is backed by a wide awake club.

Lastly, I will simply give you a few figures to show how Cornish, all varieties, have "come out" in the last year at Allentown, Hagerstown and Baltimore, respectively. At Allentown in 1911 there were fourteen birds in the open classes, and two pens, a total of twenty-four birds. In 1912 at Allen-

## WELLESLEA BAR'D ROCKS

### THE WORLD'S CHAMPION "FLUFFY RUFFLES" STRAIN

Continues to win wherever shown—"Fluffy Ruffles" the \$1,000 hen and her kin have won for me a grand total of 22 prizes at Madison Square Garden in five years. This record does not include specials or winnings of my customers. No other pullet line has ever equalled this continuous win. "Fluffy Ruffles," strain is winning now for my customers, for me, and will win for you. I am in a position to furnish from this world's champion female line, choice selections of stock to all those wishing the best. My line of males for this season is headed by the first cock at Madison Square Garden, 1911, this winning stamps him as the finest specimen of this variety in the world. For prices of the above—phenomenal—write

Welleslea Farm Poul. Yards, C. H. Welles, Prop., Stratford, Conn.

## American Silver Campine Farm

### PRODUCE THE LEADING SILVER CAMPINES OF THE WORLD

Bred from special matings and raised right. Barred from head to feet. Grand shape and good size. Acknowledged leaders of all layers of large white eggs the year round; non-sitters. All-round money-makers and ideal fanciers' fowl. Get in on the ground floor with American Silver Campine Farm Strain and be a big one.

AMERICAN SILVER CAMPINE FARM  
MT. CLEMENS : : MICHIGAN

town there were forty-seven in the open classes and four pens, a total of sixty-seven birds, and a net gain of forty-three birds. At Hagerstown in 1911 there were fifty-two single birds and five pens, a total of seventy-seven birds. In 1912 at Hagerstown there were seventy-five birds in the open classes and four pens, a total of ninety-five Cornish, and a net gain over 1911 of eighteen birds. Lastly, at Baltimore in

1911 there were twenty Cornish. In 1912 at Baltimore there were 197 Cornish at our club meet, a gain of 157 birds, and every bird a good one. I have given you figures that are before the eyes of the world. You cannot doubt these.

Forward! For Cornish! a fowl that is a fowl, that is backed by men that are men, and that is getting in the center aisle in every showroom.

## National Egg Laying Contest

Record for December—S. C. White Leghorns  
From England Are in the Lead—Feeding Test

**T**HE second national egg laying contest at Mountain Grove, Mo., is proving much more satisfactory, in every particular, than the first contest. While many birds are not yet mature, yet every pen had laid some eggs before the close of the first month. The total for the first six weeks is 5,954 eggs. The English pen of S. C. White Leghorns, No. 2, leads with 263 eggs. Silver Wyandottes, pen No. 23, is second with 217 eggs. White Wyandottes, pen No. 28, is third with 185 eggs. The yield for the first few weeks was not equal to that of last year because the birds are practically all pullets this year, and large numbers of them are not mature, but last year large numbers of them were hens and laid early in the contest and fell off later. The yield has increased rapidly each week and we are now getting a 33½ per cent egg yield from the entire flock, and still gradually increasing.

The ten leading pens for December rank as follows:

No.	Variety.	Eggs.
2	S. C. White Leghorns.....	222
43	S. C. Reds.....	162
23	Silver Wyandottes.....	157
28	White Wyandottes.....	151
60	White Orpingtons.....	136
33	Barred Plymouth Rocks.....	135
20	White Wyandottes.....	133
59	Black Orpingtons.....	133
53	Black Langshans.....	131
24	White Wyandottes.....	129

The English pen of S. C. White Leghorns won the silver cup for December with a record of 222 eggs. This pen is getting quite a good lead over the other pens. They continue to be more active than any pen in the contest, and are consuming quite a good deal more dry mash than the other Mediterranean varieties. These birds differ from the American Leghorns in the fact that they have larger combs, tails are not well spread and rather high, and eyes are not bay in color. They are an interesting lot of birds, however, and seem to have the ability to lay. Their eggs are not of an uniform dead white color, like many of our American strains of Leghorns.

### Our Feeding Test.

In connection with our egg laying contest we are trying out ten different methods of feeding. The birds used in this test are one-half Buff Orpingtons and one-half White Leghorns. The Orpingtons are all of the same breeding, all pullets, and as near the same age and weight as we could get them. The White Leghorns are composed of four pullets and one hen in each pen, of the same breeding, same age and practically same weight. The exact method of feeding one of these pens will be announced each month. You can make note of the for-

mula used and watch the results. You can be your own judge as to the practicability of each method. We expect to also be able to determine the most economical method for use in this section.

### Connecticut Methods—Pen. No. 61. Scratch Grain Mixture.

60 lbs. cracked corn.  
60 lbs. wheat.  
40 lbs. heavy white oats.  
20 lbs. barley.  
10 lbs. kaffir corn.  
10 lbs. buckwheat.  
10 lbs. coarse beef scrap.

### Dry Mash Mixture.

200 lbs. coarse wheat bran.  
100 lbs. cornmeal.  
100 lbs. gluten meal.  
100 lbs. ground oats.  
75 lbs. standard middlings.  
50 lbs. fish scrap.  
50 lbs. beef scrap.  
35 lbs. low grade flour.

A Norwich Automatic Feeder is used for the grain and the birds are allowed to feed themselves, except during the long summer days. It may be necessary to close the grain feeder a part of the time. The dry mash is kept in a hopper or receptacle for that purpose. The mash, as well as grit, shell and charcoal, are kept continually before the birds. Succulent food, consisting of apples, mangel wurtzels, green cut corn or dried beet pulp may be used. The dry beet pulp is used principally, and is soaked in water (and usually warm) for about an hour before being fed. It consists when dry of about 8 per cent of the dry mash by weight.

In the feeding test, in pen 68, where feed of twenty-eight different kinds is kept before the birds at all times, these pullets made a rapid gain on the other pens toward the last of this month. Our prediction is that they have been or are being stimulated to high production and may keep it up for a time, but will finally become over fat, drop off in egg production and break down in health. It is going to be interesting to see just what they will eat, the greatest quantities of what they like best, and what the final results will be as to their general health and the number of eggs laid under this method of treatment. More pullets are now laying in this pen than any other. We also keep buttermilk and water before them at all times and record the amount of each consumed.

We are feeding ground meat and ground mustard to one pen, No. 66, but so far it has not made much of a record.

The farmer's method of feeding, where the hens get a very simple ration, the yield thus far indicates that it might pay the average farmer to buy a little beef

scrap, alfalfa meal, and a few other ingredients to add to his rations.

These one hundred pullets used in this feeding test are laying many more eggs daily than two hundred of their full sisters on the outside which are not being fed as heavily as these in the tests. This is but another proof that if you want eggs in winter your hens must be fed liberally.

### Hatch Some Early Chicks.

If you want a few pullets to lay in the fall when the old hens are moulting; if you want a few birds to win prizes for you at the early fall fairs and shows; if you want a few pullets to enter the next egg laying contest and have them ready to lay from the very beginning, we would advise hatching at least a few early chicks. We think this is one mistake which most of the western breeders make: they do most of their hatching in May and some even much later than this. The eggs are usually a little larger earlier in the season; the hens have not been laying long and they fill the egg full of meat and vitality; the chicks hatched from them are stronger and grow more rapidly. In this section of the country we always have less trouble in raising the earlier chicks. One of our largest and most successful farms never hatches anything after April 15. The result is they have a lot of mature pullets which lay in the fall and winter when eggs are high. The poultry farmer should endeavor to have his pullets blossom just at the right time (when eggs are high), just as the florist has his flowers blossom and ready to supply the demand at Easter time. He doesn't have them blossom a month before nor a week after, but they are ready just at that season. You can't do this, neither can you win at the fall fairs, nor can you win in egg laying contests unless you hatch some chicks in time to mature by fall. One of the biggest and most successful breeders in this country said to me: "I make more out of my early hatched stock than from any other. I hatch them early, then I have them for sale when the other fellow hasn't got them. They are not so particular about the quality of the early show birds, for as a rule at the fall fairs and shows the big bird will win over the smaller one of better quality." If you started out on a five-mile run you would start out fresh, you would be quick and active, and it would be no effort for you to run, but the further you go the weaker you would become and at the end of the five miles you would be "all in." Just so with the hen. In the early part of her laying period she is fresh and vigorous and stores all the vitality in the egg and germ that her constitution permits, but later on she is weakened, she hasn't the vitality she had earlier in the season, and her weakened condition does not permit her to store the vitality into the germ and the egg that she once did. Much of the trouble which we have with sick, weakly, runty chicks is due to this very thing. The destiny of the chick is largely determined by the vitality of its parents. Hatch at least a few early chicks.

### R. C. WHITE LEGHORNS

The 200-year-old egg machines. Egg for hatching. We are making a great sacrifice sale of some of our best breeding stock. Better write today. Rocky River Poultry Co., 68 The Oaks, Deerfield, Illinois.

### MONEY MAKERS

35 varieties. Chickens, Ducks, Geese, Turkeys, O. I. C. Hogs. Fine stock and eggs at low prices. Big illustrated circular and beautiful picture, 16c. 20c. in colors, only 10c. Don't miss it.

JOHN E. HEATWOLE, HARRISONBURG, VA.

# Ferris Improved Trapnested Layers

Twelve years ago we became dissatisfied with the best White Leghorns we could find anywhere in the country at that time. They lacked stamina, strength, vigor. No successful effort had ever been made to breed them to quality.

Our first thought after securing the best stock we could buy was to increase the size and vigor of the birds to give a foundation that would permit greatly increased egg production. Our aim from the beginning has been to build a strain that would lay more eggs than the very best of any other breed or strain and yet win anywhere in strongest competition.

It has taken us years of patient effort to get these good qualities as well developed as we have them today. During that time not a poor layer has been allowed in our breeding pens and every year as our experience increased we were able to select our best layers with more certainty and mate them with greater skill. Every year has seen an increase in our average egg yield, until now it is easy to get an average yield of more than 175 eggs a year from a flock of Ferris Leghorns.

## Ferris Selling Plan

We go farther than it has ever been considered possible to go in satisfying customers, not only in quality of stock we furnish in the first place, but in the responsibility we assume of seeing that the birds you buy remain in good condition until they become accustomed to change of climate and to different methods of feeding and caring for them. You can't buy birds elsewhere and exchange them any time within 30 days if they become sick or don't breed properly, or are unsatisfactory for any reason whatever. No one else will replace without question every bird that dies within thirty days.

## Winners For Any Show

We have been winning for years at the largest shows—Louisville, St. Louis, Toledo, Detroit, Pittsburgh, Grand Rapids, and the Michigan, Indiana, Iowa and Tennessee State Fairs—and can furnish winners for any show no matter how strong the competition.

We take great pains to fill every order with exactly as great care as if our customer was right here to pick out the birds himself. If you explain the good points you are most particular about and the bad points you wish to avoid, it makes no difference how many hundred miles are between us, we can select stock that will exactly suit your requirements, provided you do not expect a better bird than it is possible to furnish for the price you pay. The quality of every grade of stock described in the catalog is the best that can possibly be furnished for the price named. We endeavor to give every customer an absolutely square deal, and if you have had experience with White Leghorns so that you know the value of a bird, you will appreciate the fact that the birds we send are from 50 to 100 per cent better than most other breeders send for the same prices.

## Eggs and Day-Old Chicks

We are now booking orders for eggs and day-old chicks for spring delivery. We have never been in better shape to fill orders of any size. Thousands of fine hens in our utility matings and our 25 exhibition matings of remarkable quality will make it possible for us to ship promptly and quote prices that are very reasonable. All infertile eggs replaced free; safe arrival of chicks guaranteed.

## Our Guarantee on Eggs

Our guarantee on eggs is as fair as our guarantee on stock. We endeavor to protect our customers and want you to be perfectly satisfied. When you do not get satisfactory results tell us and we will do everything possible to make it right.

*We Replace all Infertile Eggs Free of Charge.* It is well to be careful that you do not get eggs from late hatched stock that is not mature, for eggs from immature Leghorns are as worthless as eggs from any other breed. If you want eggs from yearling hens we can furnish them, for over half the birds in our breeding pens are yearling hens.

## Can Ship Anywhere

We can ship eggs safely anywhere in the United States, Canada or Mexico, and will guarantee fertility. We ship no eggs more than three or four days old, and nearly all eggs are shipped the next day after they are laid, for during the regular hatching season we usually have orders booked a week or more ahead and we make shipments every day.

## Eggs for Hatching

There is a great difference in eggs for hatching and if you want good results you must be particular to get eggs from stock that has been handled properly. It is very easy for a careless breeder to so handle his stock that the eggs will not hatch well nor even produce strong chicks when they do hatch. Lack of exercise, improper feed, overcrowding and neglect of any of several other important details will decidedly affect the results that can be secured from the eggs.

## Large Even Shaped Eggs

Eggs from all our pens, utility and exhibition, are carefully selected. They are large, smooth, even shaped—the kind that are nearly always fertile and sure to hatch strong chicks. Small eggs—those weighing less than 25 ounces to the dozen—are never sold or used for hatching, and the average will be from 26 to 28 ounces. Eggs with rough or uneven shells do not look well and seldom hatch well, so we discard them. We do not sell eggs that are poor in color. A Leghorn egg should have a white shell, and we do not breed from hens that lay any other kind.

## Day Old Chicks

It is usually better and cheaper to start with chicks than with eggs, because chicks cost only twice as much as eggs and the average hatch from eggs is only about 60%, except in the hands of poultrymen who have had considerable experience and know just how to get the best results. The saving in express charges is also worth considering, as the charges on 100 chicks will be only one-third as much as on the number of eggs required to hatch that many chicks. We can generally ship chicks as promptly as eggs, so there is a difference of three weeks in favor of the chicks—three weeks difference in the time the pullets will begin to lay.

## Distance We Can Ship

Chicks can be shipped 1000 miles with safety, and in some instances where there is fast train service, as high as 1,500 miles. We guarantee safe arrival at any express office within 1,000 miles from Grand Rapids—a radius that includes two-thirds of the United States and Canada.

Our loss in shipping has averaged less than 2% during the past four years, and our customers have had good success raising the chicks, which proves that the stock is hardy and vigorous and that the chicks have not been injured in the least by shipping. In fact, it is much safer to order chicks than eggs because chicks are nearly always handled more carefully than eggs.

**GEORGE B. FERRIS** The Ferris Leghorn Farm 905 Union Av., Grand Rapids, Mich.

# White Leghorns

## That Win Everywhere

There is only one sure way to tell which hens are the best layers, and that is by the use of the trap nests. All other so-called systems of telling good layers from poor layers are failures. Shape of body or distance between the pelvic bones—the basis of all advertised “systems”—are not reliable guides.

Ferris Leghorns have been bred to lay by the use of trap nests. We trap nest both our exhibition matings and our special bred-to-lay matings. We have spent a great many years investigating the laying qualities of our hens and breeding them up to their present high average records, and the minimum egg yield permitted in our bred to lay matings is 185 eggs per year. We have quite a number of hens with records of 225 to 249 eggs during their first year of laying, but we do not attach so much importance to these exceptionally high records as do some breeders.

High record hens are of value only so far as they can transmit their laying qualities and enable a breeder to obtain a whole flock of good layers, and hens with records of much more than 200 eggs a year do not make as good breeders as hens with slightly lower records. It is our experience that hens with records of 185 to 200 make the best breeders of laying stock and are more likely to produce hens that themselves lay over 200. The catalog explains why.

### Bred-to-lay Utility Matings

All our twelve years' efforts to increase egg production are in the breeding of these birds, and although they do not score high enough to make breeders of exhibition stock, they will give you stock that can not be surpassed for laying purposes by any other that can be bought excepting our bred-to-lay exhibition matings and our trapnested laying pens.

The difference in egg production between these utility matings and the other matings is very slight; the only difference is that although these birds are bred from the trapnested pens, they are not themselves trapnested.

However, we allow no birds in these pens that are not good breeders. The eggs are big, selected for even shape and color and will produce strong hardy chicks.

We can furnish eggs and chicks in any quantity and the price of eggs will be \$14.00 per 100 during February, \$12.00 during March and \$10 during April. Settings of 15 eggs, February \$2.55, March \$2.25 and April \$1.95.

Day old chicks, March \$28.00 per 100, April \$25.00, May \$20.00. In lots of 25, March \$8.00, April \$7.00, May \$6.00.

For other prices and complete description of these matings

### Trapnested Laying Pens

All of these birds score 92½ or more, for this is the minimum score that we permit in these pens; and most of them score more. The average score is around 93½ and scores of 94 to 95 are not at all uncommon. They are mated to males from the best pens, none scoring less than 93 and they will produce a uniformly good looking flock of heavy layers.

Every bird in these pens is a good winter layer for we discard all that do not reach an average of 14 eggs per month during the winter months when eggs are scarce and high. Ferris Leghorns have a reputation of being the best winter layers of any fowl and we are bound to maintain that record.

If you want trapnested bred-to-lay stock that also is bred reasonably close to standard, you will make no mistake to take this grade.

For the average county fair and small winter shows, these birds will be pretty sure to be among the winners and they are the best layers that have ever been produced.

The prices of eggs and chicks from these pens are just double the price of the utility matings—\$25.00 per 100 for eggs in March and \$56.00 for chicks. For complete information regarding these pens

### Exhibition Matings.

These exhibition matings are in advance of the standard so far as some points of shape are concerned; and they are the only exhibition strain in the U. S. that have been bred to lay with the same care that they have been bred to win.

What it means to set a high standard of laying below which no hen may go, and at the same time build up a strain that is capable of winning in any competition, only they who have tried to breed winners without regard to laying qualities will understand.

To build up exhibition qualities to a point where it is possible to furnish winners for hundreds of shows every year, and some of these shows the largest and most important in the country, requires the most careful selection of the breeding stock for a long period of years. Not only this, but every point which may affect the perfect development of the stock from the time the eggs are placed in the incubators until the mature fowls are placed in the breeding pens, must be looked after.

You can hatch winners for any show in the world from these matings. The birds shown at the top of this ad will give you a good idea of the quality. For description of each pen in detail and prices of eggs and chicks

**S. M. GOUCHER, MOORESTOWN, N. J.**

We are pleased to chronicle Mr. Goucher's Barred Plymouth Rock winnings at the great Camden, N. J., show held December 17th to 21st, 1912, as follows: First cock, fourth hen, third and fourth cockerels, first and third pullets and first and third pens with several specials. Mr. Goucher has made several winnings of credit this year and at the best shows held to date, including Philadelphia and Williamsport, where the largest and best classes of the year have been brought out.

At Williamsport his first pen was awarded the general special for best pen in the entire show, a win seldom made, same by a pen of Barred Rocks when competing with all varieties. That pen was a wonder in all quality, mated with skill and shown at their best. This line has made a fine reputation for some years; they breed their best and have for sale a nice line of cockerels and pullets that will prove of value to any line. Look up his ad and write your wants.—H. P. Schwab.

The California Redwood is constantly gaining in popularity in the manufacture of incubators and brooders, and indeed no lumber is more suitable for the purpose. This popularity is due to the fact that it is susceptible of very fine finish and its adaptation to all changes and conditions of climate. The Petaluma Incubator Co. was the first to see the advantages of the use of California Redwood, as in fact, many years ago, they were the first to begin the manufacture of incubators. The "Petaluma" is the pioneer hatching machine. Its incubator antedates that of any other on the market, and to them, therefore, and to the energy, persistence and patience of their Mr. L. C. Byce, is due the credit, to a very large extent, of the development of incubators and brooders to the extent which exists at this time. They have a very interesting booklet "How It All Came About," giving some facts of the industry, a copy of which they will very gladly send upon receipt of your request. Address them at either of their offices, Box 362, Indianapolis, Indiana, or Box 305, Petaluma, California.

Mr. W. D. Holterman, fancier, Fort Wayne, Ind., takes pleasure in dividing the honors with his customers—consequently he did not exhibit at Chicago—but The Aristocrats made good in the hands of a purchaser in the "fiercest battle of giants" ever shown there, winning the blues. We recognized the narrowing barring alright. The Aristocrats are winning from coast to coast, winning at such shows as Hagerstown, Boston, Madison Square, Springfield, Kansas City, Los Angeles and many other September chicks just feathering out showed

ers. When we visited Mr. Holterman in that perfect narrow barring. Mr. Holterman & Son keep tab on their birds so closely that they know them as far as they can see them and can glibly tell the breeding on both sides. The Aristocrats have set an awful pace for narrow, even barring and grand type.—H. H. Coburn.

**JOHN S. MARTIN, PORT DOVER, ONT.**

The right kind of quality is always in demand. Strains and line breeding have added their value and created a demand unknown of before. This applies to the breeding pen as well as to the exhibition pen, for line breeding means the best of quality for both purposes. We just have word that Mr. John S. Martin has sold two hundred and twenty-five of his "Regal" White Wyandotte females and twenty-five males to Mr. Geo. Peabody, Williamstown, Mass. Such sales are rare in past history but rather common now, with the demand ever increasing for stock of the better kind. Mr. Martin is ever up and doing and has also lately made a large shipment of his Wyandottes to H. R. Bourne, Pretoria, South Africa. This with his late shipments to India and other countries has placed his famous "Regals" under every flag that floats.

The distinction this line has won at home is well known by all, for Mr. Martin has long been one of our leading breeders and exhibitors and has well won the fame his line is entitled to.—H. P. Schwab.

G. B. Smith, North Baltimore, Ohio, breeds and exhibits some exceptionally fine Single Comb Black Minorcas. Mr. Smith mates his birds in town and farms out his young stock. He is a persistent trap nester and has built up a very heavy laying strain of Minorcas that lay the largest egg we ever saw. No egg prettier than Minorca eggs. The fact that the breed is very hardy and active makes them run strong in fertility. The Minorca is a hard breed to beat as an all purpose fowl, and set the pace for high prices some years since when that famous shipment went to Germany—\$1,000 being paid for a male. They are nonsitters, which is heavenly, and good eating; always in good condition, and begin laying early. Mr. Smith has a fine lot for sale. One special hen lays eggs that resemble a goose egg in size; when she can lay fast enough she lays one perfect egg inside of another. Mr. Smith mates up 20 pens for the egg trade and guarantees 75 per cent hatches. All lovers of the beautiful Single Comb Black Minorcas should purchase some of his stock or settings of eggs. Mr. Smith is most reliable and treats his customers right. Look up

his ad in this issue and correspond with him.—H. H. Coburn.

Roseland Single Comb Buff Orpingtons won at Cleveland January 6 to 12, 1913, 2d and 4th cock, 2d and 3d hen, 1st cockerel, 1st and 2d pullet and 3d pen. Mr. Charles W. Switzer, South Euclid, Ohio, who is the genial proprietor of Roseland, certainly knows how to mate Buff Orpingtons to produce beautiful golden buff and grand Orpington type. He always keeps on hand classy show birds really fitted, during the show season. It is a pleasure to go through his conditioning building in show season. You can't miss it by introducing the Roseland Single Comb Buff Orpington blood into your flock.—H. H. Coburn.

**A NEW ONE FROM AN OLD MASTER.**

The Prairie State Incubator Company, of Homer City, Pa., one of the oldest manufacturers of incubators and brooders, colony houses and poultry supplies, have an interesting announcement to poultry raisers on page — of this issue. It concerns a new, low-priced incubator, which, considering the standing and reputation of this 30-year-old reliable company, we predict will find a phenomenal sale. Though low in price, its high-grade construction and hatching efficiency is backed by the same experience and well-known Prairie State reputation, which is sufficient guarantee of its exceptional merit.

This new machine is a product of the new Prairie State factory, the largest and best-equipped incubator factory in the world. It has been built to supply the demand for a medium-sized machine at a modest price. Just turn to their announcement and see for yourself the unusual value offered. Also drop them a line for their Keystone folder and be sure to address them as follows: Prairie State Incubator Company, 50 Main St., Homer City, Pa.

Elmer V. Shultz, Prop., Rosemont Farm, Webster Groves, Mo., reports some of his winning for this season, which are as follows: At Missouri State Fair won 1st, 2d hen, 2d cockerel and 1st pullet on five entries. St. Louis, 1st, 2d hen, 2d, 3d cockerel and 2d and 3d pullet, 6 entries; 1st pullet and 1st pullet mating pen hatched from eggs sold by us. Springfield (Mo. state), 1st, 4th hen, 2d cockerel, 3d, 4th pullet on 6 entries. Springfield (Illinois State) 4th, 5th hen, 4th pullet and special for best colored female. Pens now mated for the egg trade and can please the most exacting.

OCULUM increases egg yield 20 per cent; a free trial; ad page 280.

# Money-Making Results—YES!

## The Test Hen

"Profitable Poultry and Egg Production" tells how 1,500 and 2,000 pounds of good-quality table poultry can be produced from one hen in one year. Book of 244 large pages FREE to any address—simply for the asking. Worth many dollars to poultry men and women who "mean business."

Knowledge—if you really make a business of keeping up-to-date on every fact and discovery that means greater Egg—

## And Poultry Meat Production

This great, Free, Money-Making Book, backed up by Cyphers Free Bulletin and Personal Letter Service, and the immensely valuable free booklet of 1912-13 \$1,000 PRIZE CONTEST REPORTS—makes it possible for you to keep in touch with every step—to personally apply every discovery made at the Cyphers Company's Farm, also to profit by the actual, money-making experiences of poultry raisers all over the country, many of whom have had problems similar to your own. To avoid mistakes you absolutely need this wealth of practical information. You cannot afford to go by guess. You

## Must Use Right Methods

What these methods are this great Free Book will tell you. It is the most complete, the most valuable

## Sold for \$800

"Lady Show You." the White Plymouth Rock Hen that laid 281 normal-size, normal-weight eggs in 365 consecutive days and won first prize in the National Egg-Laying Contest conducted by the Missouri State Poultry Board at Mountain Grove, Mo., November 1, 1911-October 31, 1912, was hatched in a Cyphers Incubator. So states J. A. Bickerdike, Millersville, Ill., owner of "Lady Show You," who raised her from the shell and who sold her after her great laying record for \$800. See Mr. Bickerdike's letter (also daily newspaper dispatch) on page 234 of our FREE Catalogue and guide for 1913, "Profitable Poultry and Egg Production."

Let's get at the real facts—the solid truth about Profitable Poultry and Egg Production, doing so without exaggeration, without painting fancy pictures. Let us go by actual records of production—by the part the domestic hen now plays in contributing to the Nation's wealth. Let's consider what a hen can do—what actually has been done by those who have gone into poultry-raising intelligently—who have followed advanced methods! These facts will show, will prove, what the poultry industry today offers to earnest men and women.

The three hens illustrated in this advertisement are living examples of the money-making, present-day possibilities in Poultry raising. These hens, "born" in Cyphers Incubators, raised in Cyphers Brooders—well-bred, well-fed, comfortably housed, have attained a productive power that is almost unbelievable.

Think of a little three-pound Leghorn hen reproducing her own bodily weight ten times in eggs in one year—thirty pounds of eggs in three hundred and sixty-five days! Investigate also the work of a single hen in the 1,500-2,000 lbs. meat production test—a truly wonderful opportunity for profit earning. Then consider that these records were made in flocks expertly handled to reduce the cost per egg and per fowl. Remember also the present attractive market prices for egg and poultry meats—and what the Parcels Post now offers in quick sales, higher prices and economical delivery. It's easy to figure the

## Proof of the Profits

that await keen and alive poultry-raisers in 1913 who use correct methods and have the proper guidance. Write us now—today—for our 244-page free Book, "Profitable Poultry and Egg Production." It's crowded full of just the facts you need. Gives in detail the remarkable results we attain on the Cyphers Company's \$75,000.00 Experiment and Demonstration Poultry Farm. Gives the reasons why of

## The Remarkable Egg Yields

We secure from our fowls more than double the ordinary production. And what we do, you can do, wherever you are located, if you have the right equipment and the right

Substantial  
Fireproof  
Dependable

free poultry book ever published. For example, it gives you on page 7 the Three Foundation Factors in Profitable Poultry and Egg Production. Three basic facts you need to know before you really begin to make money. On page 8 it points out Six Avenues of Waste. Guides you clear of common pitfalls. Tells you how to make your flock all-productive. The information on these two pages alone is worth many, many dollars to you.

Our Free Book also contains eight special chapters that go into the very heart of the practical questions that come up every day. They tell in simplest language the things to do—the things to avoid. They point the way to greatest returns. The titles of the chapters are: Chapter I—What is Possible in Poultry Meat Production. Chapter II—What Can Be Done in the Way of Egg Production. Chapter III—Deep-Litter Feeding Experiments of 1912. Chapter IV—Quick Maturity in General-Purpose Fowls. Chapter V—Ages and Weights of Chickens for Table Use. Chapter VI—How to Establish Prolific Egg-Yield Flocks. Chapter VII—Today's best chance in the Poultry Business. Chapter VIII—Small-Scale Poultry Keeping on a Practical Basis.

When you have learned the practical things this book teaches, you must have the proper means of applying them.

## That Means Right Tools

The toy incubator, the make-shift, the experiment, the cheap-at-any-price contraption has no part in really Profitable Poultry and Egg Production. If you sincerely mean to win success you must have a real incubator. That means the Standard Cyphers. It has stood for years at the very head—the recognized hatching machine of proved merit. Used and endorsed by more Government Experiment Stations, by more State Agricultural Colleges, by more practical, large-scale poultry raisers and by more well-known, successful poultrymen than all other makes combined.

With Cyphers Equipment and the valuable personal advice and help we give, you are practically insured against disappointment and failure.

Our Big, Free Book fully illustrates and describes over one hundred Standard Poultry Appliances and Specialties, all of which have been tried out and demonstrated on our \$75,000.00 Poultry Farm. The book contains hundreds of letters from poultry raisers, large and small, in every section of the country who have established beyond question the superiority of Cyphers Incubators and Brooders.

## Proof By Actual Cyphers Users

Albert G. Keven, Battle Creek, Mich.: "The two Cyphers Incubators have given excellent satisfaction. I have kept a careful record of all eggs put in the machine and the number of chicks hatched, with results as follows: First Hatch, 236 chicks from 244 fertile eggs. Second Hatch, 204 chicks from 204 fertile eggs. Third Hatch, 199 chicks from

205 fertile eggs. Fourth Hatch, 232 chicks from 244 fertile eggs. Fifth Hatch, 178 chicks from 178 fertile eggs. Sixth Hatch, 217 chicks from 220 fertile eggs. The Cyphers is the best machine made for hatching strong, healthy chicks and lots of them." March 11, 1912. See complete report page 31, "Profitable Poultry and Egg Production."

# Cyphers Incubators and Brooders—

**T**HEY are Self-Regulating, Self-Ventilating, Fireproof—also proof against heat and moisture troubles. Their records for *continuous big hatches* have never been equalled. We print here short extracts from half a dozen letters to give you just an *idea* of the *genuine satisfaction* Cyphers Machines are giving all over the country. Full reports, and hosts of others in the big 1913 Book Free.

J. L. Haney, Prop. Blue Ridge Poultry Farm, Saylorsburg, Pa.: "On March 6, 1899 (thirteen years ago), and on February 16, 1901 (eleven years ago), I bought two Cyphers Incubators from you. To this day these two machines operate like clock-work. I will give you herewith a record of this season's hatches, to indicate what Cyphers Incubators will do after being eleven and thirteen years in use: No. 1, Incubator, 120-egg capacity (bought thirteen years ago)—from 120 eggs set, got 98 chicks; 120 eggs, 111 chicks; 121 eggs, 107 chicks; 122 eggs, 112 chicks. No. 2 Incubator (bought eleven years ago) 240-egg capacity—from 240 eggs set, got 184 chicks; 241 eggs, 210 chicks; 240 eggs, 200 chicks; 242 eggs, 218 chicks."—Sept. 17, 1912. See complete report, Page 29, "Profitable Poultry and Egg Production."

Mrs. Victor Varley, 3038 North Christiana Ave., Chicago, Ill.: "I purchased two Cyphers Incubators last March, one

244-egg capacity and one 70-egg capacity, also a Style A Outdoor Brooder. I had fine hatches from the incubators. Out of 234 fertile eggs I hatched 231 chicks and from the smaller incubator I got 63 chicks out of 65 fertile eggs. They were all brooded in your Style A Brooder. I have also hatched ducks and goslings in my Cyphers machines with equal success."—July 24, 1911. See complete report Page 39, "Profitable Poultry and Egg Production."

Mrs. Geo. C. Van Buren, Dryden, N. Y.: "I have a Standard Cyphers Incubator. This spring I made three hatches—all good. First hatch, from 230 fertile eggs I got 197 strong, lively chicks. Second hatch, from 215 fertile eggs, I got 205 very strong chicks. Third hatch, from 220 fertile eggs I got 209 chicks, which grew like weeds." July 24, 1912. See complete report page 39, "Profitable Poultry and Egg Production."

## Continuous High Percentage Hatches

Complete as the Cyphers 1913 Year Book is, we do not stop there. It is supplemented from time to time by Free Bulletins, which place before our Customers the very latest, *livest* information—the newest discoveries and tests. They are written by poultry experts of reputation and standing, employed by the Cyphers Company to look after the *Genuine Success* of Cyphers owners.

## An Egg Machine

The Cyphers Company S. C. White Leghorn Hen, during the 365 days of her largest yield, produced eggs that weighed **TEN TIMES** more than her own bodily weight. Full particulars in "Profitable Poultry and Egg Production", which will be mailed free to any address, domestic or foreign.

## Cyphers Co.'s Service Personal Letters

In addition to this they render, *free of charge*, a Personal Letter Service, the scope of which is unlimited. No matter how many questions you desire to ask, or how many problems you wish light upon, you have only to write to this Department and your letters will be answered fully, clearly and *personally*.

FURTHERMORE, we have just published, in convenient book form, the *splendid results* of our 1912-13 \$1,000 Prize Contest.

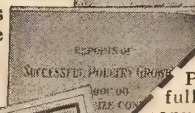

These "Reports of Successful Poultry Growers" are full to overflowing with valuable, timely, *helpful* information and advice about poultry growing conditions and the methods adopted to meet *local obstacles*—as told by *successful poultry raisers* in every part of the country. Some are large poultry raisers—many more are operating on a small scale. But all give the story of their personal experiences, the lessons they have learned, the successful methods they have pursued. This

## \$1000 Prize Experience Book

costs us annually \$1000 in Cash Prizes to secure the *most valuable and helpful reports*. No such collection of practical work-a-day experiences and pointers is obtainable from any other source. It's just another sample of the length to which we go to set, *and keep*, our customers *on the right track*.

## THE BABY CHICK INDUSTRY.

In the heart of the poultry industry in Ohio there was once a little hatchery which, by reason of it's up-to-dateness, has become a large plant. Not satisfied with the results of the ordinary so-called mammoth machines of the market, the owners of this hatchery have been making experiments and tests of their own for two years, with a view to obtaining better and larger chicks and more of them.

Going on the principle that the closed bottom with warm nursery and plenty of air and moisture would produce larger and stronger chicks than any other method, they have constructed a machine which has surpassed their expectations. The Tiffin Chick Hatchery of Tiffin, Ohio, believe that they have a machine which hatches the finest chicks that it is possible to bring out of the shell.

All old machines have been removed and are replaced by these new and better ones. These incubators are heated from a central plant, gas being used under the boilers. The machines have three controls, so that it is possible to maintain almost perfect temperature. The capacity is three times as great as last year, making it possible to hatch 250,000 eggs this season, besides the duck eggs.

The facilities for handling large numbers of eggs at this plant are unusual. All eggs as they come from the farms are placed on trays ready to run into the machines at the proper hour, for things move rapidly here.

Mr. and Mrs. Hopple, the proprietors, maintain an information bureau for the benefit of their customers and stand ever ready to assist and give advice in the rearing of chicks purchased from them.

Mr. Hopple is one of the prominent manufacturers of the community, but he was raised on a farm and has always retained his love of fine poultry. The same methods which have made him a successful manufacturer have been employed in building up the hatchery—courtesy, promptness and liberty treatment, always giving customers the best possible value for their money.

They have both show and utility stock in Barred and White Rocks, S. C. White, Buff and Brown Leghorns, S. C. Black Minorcas, S. C. and R. C. R. I. Reds, Buff, White and Black Orpingtons and Fawn I. R. ducks.

Mr. Herman Grannis, of Grannis Bros., La Grangeville, N. Y., the well-known Orpington breeder, spent a few days at the late Madison Square Garden show, admiring the large class of Orpingtons on exhibit there. He reports a lot of birds on hand, in vigorous condition for producing fertile eggs for their egg trade season. He also informed us that they have started their mammoth incubator and will soon be shipping baby chicks.

This farm certainly has come to the front rapidly in the production of high-class Orpingtons.

## BEST METHODS OF BROODING.

Of every 100 chicks that die between the ages of one day and one month old, it is estimated that fifty die on account of incorrect brooding, thirty because of improper feeding and the remaining twenty from all other causes.

It has been with a view to help stop a large proportion of this heavy mortality in chick life that the Cyphers Incubator Company, Buffalo, N. Y., has published a new free booklet entitled "Best Methods of Brooding," a copy of which will be mailed

sectional brooders, electric brooders, hot-water brooding systems, etc.

Write today for your copy of this new free booklet and thus get the benefit of it in time for successful spring brooding. Address Cyphers Incubator Company, home offices, Buffalo, N. Y., or this Company's nearest branch store and warehouse, as follows:—23 Barclay St., New York, N. Y.; 12-14 Canal St., Boston, Mass.; 329-331 Plymouth Court, Chicago, Ill.; 317-319 Southwest Blvd., Kansas City, Mo.; 2127-2131 Broadway, Oakland, Cal., and 121-123 Finsbury Pavement, London, England.

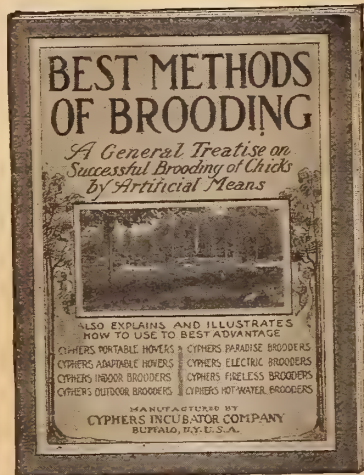

## THIRTY YEARS AMONG THE LEGHORNS.

The above is the title of a 12-page and cover booklet issued by George H. Burgott, Lawton, N. Y. This booklet contains some mighty interesting reading and gives a short history of Mr. Burgott's work in the poultry field. Mr. Burgott has been breeding S. C. Brown Leghorns for the past 30 years and has probably produced more prize winners than any other Brown Leghorn breeder in the country. His strain is known as the Empire Strain and specimens of this strain for the past ten years have won more prizes at Madison Square Garden than any other strain in the country. Mr. Burgott is not a large advertiser, but is a very consistent one and by his square dealing has established a reputation as a Brown Leghorn breeder that is second to none. He is also recognized as one of the best judges of poultry and has been called upon to judge at the leading shows from Maine to California. It would be well for anyone interested in this grand old variety of fowl to write to Mr. Burgott and secure a copy of the booklet referred to above. In writing him, please mention the American Poultry Journal.

## A CORRECTION.

In the list of awards of the Chicago show in our January issue we gave credit to Edward J. Brundage of having won first cockerel in the Lakenfelder class. This was an error, as Frank Myers, Freeport, Ill., won both first and second on Lakenfelder cockerels.

J. Q. Carter, Freeport, Me., made a fine exhibit of his American Dominiques at the late Boston Show and made almost a clean sweep, winning 1st, 2d and third cocks; 1st, 2d and 3d hens; 2d, 3d, 4th and 5th cockerels; 1st, 2d and 3d pullets and 1st pen. Mr. Drevendstedt, who judged this class, said Mr. Carter's birds were the best genuine Dominiques he had seen in a great many years.

Copy of this Latest Cyphers Company Booklet will be Mailed Free on Request to any Reader of this Journal.

to any reader of this paper on request, provided you will mention the name of this journal when writing for the free booklet.

"Best Methods of Brooding" opens with an extensive treatise on "Correct Brooding of Chicks by Artificial Means" and then explains in detail how best to use the different types of brooding apparatus, including portable hovers, adaptable hovers, indoor and outdoor separate brooders, indoor

Send 2c for my valuable illustrated descriptive poultry book for 1913. Address,

Henry Pfile, Box 600, Freeport, Ill.

## ROSE'S ORPINGTONS WIN EVERYWHERE.

Following up their great record of wins at Madison Square Garden, 1911, of 1st cock, 1st and 3d hen, 2d, 3d and 6th cockerel, 1st pullet, 2nd pen and \$25.00 gold special for best display of Black Orpingtons, Canadian National Exhibition, Toronto, New York State Fair, Syracuse, Allentown, Pa., and Hagerstown, Md., with a sensational performance of winning 18 out of 21 possible first prizes at the four last named great shows this autumn, the famous Black Orpingtons of Major Hugh A. Rose, Fonthill, Ontario, Canada, have set up another mark of their excellence of quality.

With the Madison Square Garden and Baltimore shows coming on the same dates, Major Rose split his string of Blacks, sending one team to Baltimore, winning 1st cock, 3d and 5th hen, 1st and 2d cockerel, 1st and 3d pullet, 2d pen, special best display, gold special two best males and four females, and grand special best bird in English classes, while the other team at Madison Square Garden won 2d cock, 4th hen, 2d cockerel, 4th pullet, 2d pen. At the Garden show, many notable sales were made by Major Rose, including the sale of his second prize cockerel for \$200.00.

The next week with his two teams of Blacks coming together at the great Boston show, he succeeded in landing 1st, 2d cock, 1st, 2d hen, 1st, 5th, 6th cockerel, 1st, 2d, 3d pullet, 1st, 2d pen, special best display, special best three cockerels and three pullets, special best two pens. At the Madison Square Garden show in Bufts he won 2d hen, 3d cockerel, 1st pullet, 4th pen, and at Boston 3d cock, 1st hen, 5th cockerel, 6th pen.

Business has never been so brisk as at the present time at his Orpington Farm, and he still has many high-class specimens to dispose of at moderate prices. Egg orders are now being booked, and will be filled in strict rotation. His catalogue describing the matings for the coming season, and his method of doing business, is free for the asking. Be sure to write for one of these attractive catalogues.

Major Rose desires us to state that he pays the duty on all birds sold by him to customers in the United States, and also that there is no duty on eggs shipped from Canada to this country.

Mr. H. T. Alberding, North Judson, Ind., has successfully bred Silver Spangled Hamburgs for some years, and is acknowledged authority on mating and producing high-class winners for show all over the country. His quarters are limited and he has no room for anything but the best. As layers they make good and produce the eggs on the smallest possible amount of feed. Mr. Alberding has some very choice Buff Orpingtons, too, and has a few fine soft buff cockerels for sale at most reasonable prices. His latest winnings are on Silver Spangled Hamburgs at North Judson—1st and 2d cockerel, 1st, 2d and 3d pullet, 1st and 2d trio, and silver cup Buff Orpingtons, 1st and 2d trio and special for best Orpingtons in show, all varieties competing. South Bend, Ind., Dec. 3 to 7. S. S. Hamburgs, 1st and 2d cockerel, 1st and 2d pullet, 1st and 2d hen, 1st and 2d pen. Get one of his cockerels to improve your strain. Mr. Alberding has the goods and he will treat you right.—H. H. Coburn.

The H. W. Johns-Manville Co. have recently opened a new southern warehouse at No. 31 1/2 South Broad street, Atlanta, Ga. The entire building, embracing three floors and a basement, with a total floor area of about 10,000 square feet, will be utilized exclusively as a warehouse for a stock of such J-M products as roofing, boiler and pipe coverings, cements, packings, fire extinguishers, electrical, railway and automobile supplies. A feature of particular advantage in this new site will be found in the location of the Atlanta office of the H. W. Johns-Manville Co. in the same building with the local warehouse, which will materially help to minimize the chance of delay in deliveries.

Sandy Lick Poultry Farm, Pittsburg, Pa., reports the following winnings at the Pittsburg show last month. On Black Orpingtons: 1st pen, 2d and 5th cock, 3d and 5th hen, 4th and 5th cockerel, 5th pullet. On Buff Orpingtons: 2d cock, 3d hen, 4th pullet. On White Orpingtons: 2d cock, 7th pen. This winning was made in competition with the best birds in all varieties and is evidence that this farm has as good as can be produced. For further information address Sandy Lick Poultry Farm, 966 Liberty avenue, Pittsburg, Pa.

## MARTIN'S ALARM SYSTEM SAVES WORK, WORRY AND MONEY. INSURES MORE AND BETTER CHICKS.

(Patented)

The original and only practical alarm system for incubators—adapted to all makes, shapes and sizes—can be installed in a few minutes by any one and will last a lifetime. The "contact-arms" may be instantly adjusted to ring the bell at any degree desired: they are usually set at 100 and 105. One common dry battery will operate the bell a season for any number of machines.

Martin's Alarm System will enable that incubator to call when it needs attention. Think what this service means to you and your chicks—consider the effect it must have on your poultry profits. It is used and recommended by prominent poultrymen and Government Experimental Stations.

## Here is a Sample Letter:

Keystone Hatchery, Altoona, Pa., Feb. 5, 1912.  
Martin Mfg. Co., Broadway, Va.

The electric alarms secured from you some months ago are sure working fine. Have one on each of my mammoth machines and while our house is over 200 feet from the cellar the bell rings nicely in the house as soon as the temperature goes a degree either hot or cold. Am also using one for a safety device in my building and have it arranged that should the building for any reason get afire it would not burn long until we would know it. I consider your alarm a wonderful invention and have them guarding over 23,000 eggs for me at one time.

J. W. PARKS

Proprietor of hatchery and well known Barred Rock specialist.

## Why Not Let It Guard Your Eggs—Insure Your Hatches?

Progressive poultrymen everywhere are doing it. Why? Because it was the one thing needed to make artificial incubation pleasant and profitable. The cost is trifling and it is sold on approval. See trial offer below.

## PRICES AND TRIAL OFFER.

An "Alarm Outfit For One Incubator," complete, with "Alarm Attachment," Special Switch, Bell and "Instruction Sheet," price, \$2.75. Additional "Alarm Attachments," complete, with Connector, \$1.75. Batteries and the insulated wire can be secured at any hardware store. However, when desired, we can furnish wire at 30c. per 100 feet. Tear out this ad, fill out the attached Order Blank and mail to us to-day, and we will send your Alarm Outfit by return mail Postpaid. Use it through two hatches, and if you are not satisfied, return it and we will refund every cent of your money. Don't chill or cook another chick, but order NOW—you run no risk. Address,

Martin Mfg. Co., Broadway, Va.

## AN ELABORATE EXHIBITION.

One of the principal features of the great Armory Show held at Louisville from December 23 to 28 by the South Central Poultry Association was the spacious exhibit made by the Maywood Poultry Farm, Anchorage, Ky.

Just inside the main entrance of the hall a special booth, or in reality a miniature show room, occupied a space of 20x25 feet, arranged with coops along the three walls in a U shape. In these coops were displayed White Leghorns, White Wyandottes and White Orpingtons. An interesting feature of the birds was that they had not been conditioned nor had they been washed. Even this way they made a better appearance than many of the conditioned and washed birds. Above the coops there was a rack on which were displayed two rows of large pictures, about 100 in number, showing many interesting views and scenes of the farm. Among them were framed ribbons of various winnings, membership certificates of the American Poultry Association and specialty clubs. The center of the booth was a unique feature of the show room—a resting place with a number of chairs and a table in the center

December, 1912, on White Orpingtons he won 1st and 2d cock, 2d and 3d cockerel, 1st and 2d pullet, 1st pen, special for best pen, sweepstakes for best cock, cockerel, hen, pullet and pen, sweepstake for best pen in show. He reports some very tempting offers for some of these birds, but did not accept them for the reason that he wishes to retain all of the winners for his own pens this year. For further information address C. A. Keefer, Muskegon, Mich., and mention American Poultry Journal.

Chas. G. Pape, Fort Wayne, Ind., the famous S. C. Black Minorca breeder, made the following grand winning at the late New Orleans show, the "Madison Square Garden Show" of the South: First and 2d cock bird; 1st, 2d, 3d and 4th hen; 1st, 2d and 4th cockerel; 1st, 2d, 3d, 4th and 5th pullet; 1st, 2d and 4th pen; championship cock bird of the show; president's cup for best cock, hen, cockerel and pullet; "trophy cup" for best 2 cocks, 2 hens, 2 cockerels and 2 pullets; silver cup for best pen of Minorcas; silver medal for best cock bird in the show; gold leg band for best cockerel and pullet in the medium class; gold leg band for the best cock bird in the show; A. P. A. medal and diploma for best S. C. Black Minorca cockerel; cash

They have sold all the birds they have to spare except a very few choice ones. They have won their share of ribbons this season wherever shown. Write them your wants and they will take good care of you and make you a life-long customer, as their motto is to satisfy.

The Ohio Poultry Plant, W. R. Shepard, manager, Wellington, Ohio, entered 13 of their White Wyandottes at the late Wellington show and won 1st and 3d cock; 1st, 3d and 4th cockerel; 1st and 2d hen; 1st, 2d, 3d and 4th pullet; 1st and 2d pen; best pair; best display of Wyandottes, all varieties competing, and best pen in American class. He is offering stock at greatly reduced prices for this month. Write and mention American Poultry Journal.

Mr. Barnett, manager of the Brookside Farms, Great Barrington, Mass., was a visitor at the late Madison Square Garden show, where he met a number of old friends and made many new ones. The Brookside Farms is probably one of the best equipped poultry farms in the East and under the management of Mr. Barnett has come to the front very rapidly during the past year. This farm makes a specialty of White Leghorns, Barred Rocks and White Orpingtons. This last season they raised 7,000 birds

on which were souvenir post cards, souvenir egg records and souvenir incubator records for the visitors. Mr. Straus, proprietor of the Maywood Poultry Farm, received many compliments on the display and on the birds he exhibited.

He also had a number of birds in competition and in spite of an unfortunate mishap, his entire string of birds being soiled before judging, and in the hottest competition ever known in the locality, the entire string of Chicago winners being entered, the Maywood birds carried off third and fourth pens, third pullet, fifth cockerel and fifth cock.

The officials of this show and visiting officials from other shows could not speak highly enough of the special display, and are trying to influence Mr. Straus to take the same exhibit to Chicago and to some of the other big shows next year, which will probably be done.

At the Grand Rapids, Mich., show in a class of 185 White Orpingtons the exhibits of C. A. Keefer, of Muskegon, Mich., was one of the main attractions. He reports the following winnings: On White Orpingtons, 2d, 3d and 4th cock; 1st cockerel; 1st pullet; 4th hen; 1st pen; special for best pen; special for best exhibit in English class. On Buffs, 1st cock; 1st cockerel; 1st and 2d hen; 2d pen; special for best exhibit. At Kalamazoo, Mich.,

special for best shaped male and female Minorca; 1st and 2d prize for white eggs; 1st and sweepstake prize best egg display. His catalog will be mailed to anyone interested in good Minorcas. It contains list of our winnings, matings and special offer to beginners.

Alfred P. Edge, of the Darlington Egg Farm, Darlington, Md., has favored us with a copy of his 20-page booklet on handling baby chicks. This booklet is chock-full of valuable information on raising of chicks and as it costs only 4 cents in stamps, no doubt all our readers will send for a copy and mention American Poultry Journal.

C. L. Cunningham & Son, Caruthersville, Mo., have been exerting all their efforts this year to have as good stock as any breeder in their pens. They have mated up nine pens for the season's trade and the birds in these nine pens are as good as can be found anywhere, as they are large hens, and pullets that were early hatched; they are pure white and the best type of the true White Orpingtons. The males that head these pens are all ribbon winners and it would be hard to find a whiter lot of male birds anywhere and very few as white. They are now booking orders for eggs to be shipped at once. If you are in the market for some choice birds, better write them for a full description of their pens.

from these. They have selected 1,300 of the finest yearlings for the production of day-old chicks and eggs for hatching. Their prices for both day-old chicks and eggs are very reasonable and especially so when the quality of their stock is taken into consideration. They are now booking orders for both eggs and chicks and their catalogue will be sent on application by addressing Brookside Farms, Box C, Great Barrington, Mass., and mentioning American Poultry Journal.

The majority of poultry raisers believe that ground food or soft food should form a part of the daily ration and that it is desirable to feed soft food in the morning as it will be digested and assimilated quicker than will whole grain. And all of them admit that pure water at all times should be provided. Not only as the first prevention of sickness among the birds but also because it adds to their productive value. Mr. A. B. Moe, Otis Building, Chicago, has solved the pure water problem with his top-fill continuous supply drinking fountain and has also invented a rat destroyer that insures the safety of your fowls while poisoning the rats in your poultry yard and buildings and everybody knows that rats cause the farmers and the poultry raisers of the United States millions of dollars every year.

## Barred Rocks—S. C. Brown Leghorns

Winners at M. S. Garden, N. Y.; Buffalo, Detroit, Boston, Rochester, etc. They have won the leading prizes at our best shows for years. They breed true with satisfactory results assured in type, color and laying qualities. Our latest win at the Great Buffalo International Show, January, 1913, is the keynote to success. Our Leghorns set a new high-grade mark and show record by winning more points than all others. Cock, 1; Hen, 1-4; Cockerel, 5; Pullet, 1-2; Pen, 1. Silver Shield for Best Display and all Specials. At the late M. S. Garden, N. Y. Show, 1913, Pen, 2; Hen, 5. At Rochester, 1913, Hen, 1-3; Cock, 3; Cockerel, 2; Pullet, 1-2. Special Mating Cockerels, 1-2; Pullets, 1-3, and Specials. Our Barred Rocks have done equally well, winning at Buffalo Cockerel 2nd and Shape Special; Pullet 4th and Shape Special; Pen 2nd; Cock 3rd. A grand lot of choice birds in both varieties for sale. Write your wants. Eggs for hatching. Circular free.

L. B. RESSEGUIE

BOX 404

MILLERS, NEW YORK

## WINNERS OF CHAMPIONSHIPS.

JIM ROHAN'S Belle City Incubator is now a five time Champion. The fifth championship was won by Mr. F. E. Bennett of Ohio, who won his prize in the 1912 Successful Farming Contest. Mr. Bennett's prize was the third won by the Belle City Incubator in as many consecutive years in this very same yearly contest.

In the accompanying panel, Mrs. Laura J. Clark's photograph appears at the top. Mrs. Clark won the great Missouri Valley Farmer and Nebraska Farm Journal contest in 1911, with a record of 140 chicks from 140 eggs. Below Mrs. Clark's photo is a picture of Mr. W. J. Black, who was a winner in the Successful Farming Contest of 1911, with a record of two 100% hatches. The third photograph from the top shows Mrs. M. J. Clifton, winner of the 1910 Successful Farming Contest, with a record of 140 chicks from 140 eggs. Just above Mr. Bennett's photo at the bottom is a picture of Mrs. F. H. Osmen, who won the beautiful gold lined, silver "Tyco" loving cup offered by the manufacturers of Tyco's Thermometers for the best hatch.

Jim Rohan is indeed fortunate to be the manufacturer of the incubators that won these great contests. It begins to look as if he had the correct principle of construction and that he uses the right kind

of material to make a successful hatcher.

Mr. Rohan says: "I am proud to have been the manufacturer of so many championship winning incubators. When the same make of machine wins so consistently it proves that 'luck' didn't have anything to do with it, but instead, the incubator must have been simple, accurate, safe, and sure—and the people who operated them are undoubtedly the kind of men and women who deserved to win these great contests."

The Belle City Incubator looks like other machines but it is different in construction. It has a simple, perfect self-regulator, a fine hot-water heating system, copper tank and boiler, safety lamp; double walls and double door, with dead air space all over, with roomy nursery and strong egg tray. Equipped with "Tyco's" thermometer, egg tester, burner, funnel, and everything you need, including valuable instruction book on operation, hatching and care of chicks.

The Belle City holds 140 eggs. Jim Rohan's price is \$7.55. The Belle City Brooder, 140 chick size, costs \$4.85. Mr. Rohan has been making an attractive combination offer of \$11.50 for both machines, freight prepaid, anywhere east of the Rockies, and allows that far to people who live beyond.

Mr. Rohan has invited our readers to write him a postal card for his new book of Hatching Facts. It's a good idea to do that if you are planning to purchase an incubator or brooder. Rohan's address is Box 27, Racine, Wis.

The English Indian Runner Club of America was recently organized with the following officers: O. F. Sampson, president, Youngs, N. Y.; W. J. Patton, secretary and treasurer; J. C. Knapp, vice-president, 1911 East 47th street, Chicago, Ill. Board of directors: Charles Fraser, Marlton, New Jersey; J. G. Enraght Moony, Unclut, B. C., Canada; Mrs. D. O. Teasley, Anderson, Ind.; Mrs. L. B. Anderson, Bainbridge, N. Y.; Mrs. M. E. Plaw, Fruitvale, Cal.; W. W. Bussey, Birmingham, Ala.; T. W. Taylor, Leesburg, Fla.; E. E. Bohis, Taylor, Tex.; C. E. Peck, Itabo, Cuba. Official club judges: Charles Fraser, J. C. Knapp and J. G. Enraght Moony.

# OWEN FARMS

## THIS YEAR'S WINNINGS

Owens Farms has just completed the greatest winning season it has ever experienced in its history. It has shown a large string of birds in all its varieties at Augusta, Atlanta (Georgia), Nashville, Memphis, Chicago and New York. We have won between FOUR and FIVE HUNDRED RIBBONS at these shows in the hottest classes and the strongest competition ever met by any one. These winnings have been made by practically different birds in each and every show, so that today never did Owen Farms, or any farm, for that matter, possess so many winning birds at one time as we have here now. The result is we have a large number of proven birds for sale. We also have brothers and sisters of these winning birds in large numbers for sale to improve the stock of any breeder in the country. For foundation stock I am positive that we can start you right and give you success from the very beginning.

Our prices on stock are always low when quality of birds is considered, and you can, if you wish, get from Owen Farms a little better quality for a little less money than you can from any other farm in the United States. One act on your part more than another that will help you in starting right is to give us an accurate idea of what you wish. So often we receive a letter asking us what we have in a certain variety, and the prices. Every one knows that the prices on thoroughbred poultry and foundation stock vary according to quality. If you would give us an idea of what quality you want and the price you want to pay, we can then describe and give you accurate statements and a proposition concerning just what you are wanting that we are sure you would approve. Nothing allows us to get so thoroughly in sympathy and touch with you as a buyer as a frank statement on your part of what you want.

## Eggs for Hatching

We have said in our January advertising that this is going to be a great year for Owen Farms' customers. This is particularly true of all of its customers buying eggs for hatching. We have more winners in our pens, far better quality in the individual birds and better mated than in any previous season and that we shall in every case give astonishing results and winning birds as the result of our eggs this year we are far more confident than ever before.

Our mating list contains 75 pages. It is a book well worth having in your possession. Our catalogue and mating list of the previous year has 131 pages. Both of these are yours for the asking.

**SEND FOR OUR CATALOGUE 131 PAGES AND OUR 1913 MATING LIST 75 PAGES. A POSTAL BRINGS THEM.**

## Egg Prices

Our prices this year are somewhat different than last. We have eggs at \$5.00 per sitting, \$30.00 per 100, from grand birds mated to produce excellent results. We have wonderful mated pens at \$1.00 per egg. Some special pens from which you can secure a whole sitting at \$1.50 per egg, and some pens, these being very limited in number and also limited in number of eggs to be sold from them, at \$3.00 per egg. Our mating list tells all about it.

## Foundation Stock

We have said many times during the year that we have raised more and better birds than ever before, and this time finds us with a magnificent large lot of the very best birds we ever bred and raised. We can do wonderful things for you in improving your stock or in founding a new flock. You owe it to yourself to write and inquire about it, telling us your needs and wishes and letting us make you a proposition concerning it. We confidently say that we are THE AUTHORITY on the breeds we offer for sale. We have done larger and better winning in them than any one else. We have judges of these varieties that cannot be excelled in the United States, and when we tell you anything about a particular variety you can rely upon its being as good information and as honest in statement as anybody in the world can make.

Again we repeat, we are THE AUTHORITY on

**White Orpingtons    Buff Orpingtons**  
**Black Orpingtons    White Plymouth Rocks**  
**White Wyandottes    Single Comb Rhode Island Reds**

## Barred Rocks

We would respectfully inform our many friends and customers, and the public generally that we have sold our entire Barred Rock flock, all of our birds without reserve, together with our good will, to W. W. Henderson, Bridgeton, Missouri. We heartily recommend all of our friends to inquire directly of him for Barred Rocks.

## Rose Comb Rhode Island Reds

We would respectfully inform our many friends and customers and the public generally that we have sold our entire flock of Rose Comb Reds, all of our birds without reserve, together with our good will, to the Buschmann-Pierce Red Farms, Carmel, Indiana, and we heartily recommend all of our friends to inquire directly of them for Rose Comb Reds.

# Most Popular Poultry Book

## EVER PUBLISHED

Over half-a-million Philo System Books have been printed in the past five years. More than of any other poultry book ever published. Thousands of followers of this System are proving it a success in all parts of the World. To show our confidence in believing that this book will show you new possibilities for developing a successful poultry business, we will send the book

### ON FREE APPROVAL

The Philo System is unlike all other ways of keeping poultry, and in many respects is just the reverse, accomplishing things in poultry work that have always been considered impossible, and getting unheard of results that are hard to believe without seeing.

The new System covers all branches of the work necessary for success from selecting the breeders, to marketing the product. It tells how to get eggs that will hatch, how to hatch nearly every egg and how to raise nearly all the chicks hatched. It gives complete plans in detail how to make every thing necessary to run the business, and at less than half the cost required to handle the poultry business in any other manner.

**Two pound broilers in eight weeks** are raised in a space of less than a foot to the broiler and the broilers are of the very best quality, bringing here three cents a pound above the highest market price.

**Our six months old pullets** are laying at the rate of twenty-four eggs each per month in a space of two square feet for each bird. No green cut bone of any description is fed, and the food used is inexpensive as compared with the food others are using.

**Don't let the chicks die in the shell.** One of the secrets of success is to save all the chickens that are fully developed at hatching time, whether they can crack the shell or not. It is a simple trick and believed to be the secret of the ancient Egyptians and Chinese which enabled them to sell the chicks at ten cents a dozen.

**Chicken Feed at 15 Cents a Bushel.** Our book tells how to make the best green food with but little trouble, and have a good supply any day in the year, Winter or Summer. It is just as impossible to get a large egg yield without green food as it is to keep a cow without hay or fodder.

**Our new brooder saves two cents on each chicken.** No lamp required. No danger of chilling, over-heating, or burning up the chickens as with brooders using lamps or any kind of fire. They also keep all

the lice off the chickens automatically, or kill any that may be on them when placed in the brooder. Our book gives full plans and the right to make and use them. One can easily be made in an hour at a cost of twenty-five to fifty cents.

Our book, "The Philo System of Progressive Poultry Keeping," gives full particulars regarding these wonderful discoveries with simple, easy-to-understand directions that are right to the point. Instructions are given for building the colony coops and other appliances of the System. For some of these we have U. S. Letters Patent, and patents are pending for others, but purchasers of the book are given the right to make and use these appliances. This System is especially adapted to the beginner, requiring a very small initial outlay, and admitting of increase as rapidly as the poultry keeper learns the work. It is the small unit plan that expands as readily as the "Sectional bookcase." Each season since 1907 thousands of Philo System Poultry plants have been established and are wonderfully successful. Whether you intend to make poultry keeping a business, a recreation, or to provide an addition to the present income, this System will solve your problems. In less than six years, eighteen editions have been printed, nearly half-a-million copies.

This System will be demonstrated to you or to anyone, at the Elmira plant of the Philo National Poultry Institute, where over 5,000 chickens are raised on less than a half acre of land.

The Poultry Review, monthly. A progressive poultry magazine edited by E. W. Philo, with able assistants. Devoted to the most practical and economical methods of keeping poultry for profit, especially in small flocks or units on city or town lots. The Review is printed on a poultry farm where the editors have every opportunity to keep in close touch with actual poultry work under all conditions. It is edited for the practical poultryman; no theoretical articles are published, but many theories are carefully tried out in our own yards and results published in the Review.

### FIVE NEW PHILO SYSTEM BULLETINS

No. 1. The New Philo Utility Coop. Reduces labor to the minimum, and has advantages for the poultryman who wishes to keep 50 hens or more. Working drawings and specifications are included.

No. 2. Care and Feeding to Produce Market

Eggs at Lowest Cost. Detailed instructions for preparation of food. Exact quantities to use, when and how to feed, showing how eggs were produced at 7c a dozen.

No. 3. The Shortest Road to a Successful Poultry Business. Tells the best way to make a

start in the poultry business; how to buy stock that will increase in value; the most common mistake and how to avoid it; how many fowls to keep; the profits to be expected from the Utility Poultry business.

No. 4. The Philo System Breeding Chart. This

plan is the outgrowth of years of investigation and practice by E. W. Philo.

No. 5. The Greatest Profit From Farm Poultry. A new plan of farm poultry keeping that reduces the expense of installing and operating from 25% to 50%.

### A SPECIAL OFFER

You run no risk in finding out for yourself what this book will do for you. Send no money. Simply write a postal saying "I accept your approval offer" and we will send the book and one copy of the Poultry Review on approval. After reading the book, you can send us \$1.00 and we will enter your subscription to Poultry Review one full year—twelve issues—and give the book as a premium, or you can return the book in ten days and no charge will be made.

If you prefer to save us book-keeping expenses—send \$1.00 for the book and Review one year, and we will include the set of five Philo System Bulletins. Satisfaction guaranteed or your money back. Send your order now.

**E. R. Philo, Publisher, 315 North Ave., Elmira, New York**

**G. F. STEWART, COSHOCTON, OHIO.**

Mr. G. F. Stewart has bred high class Silver Laced Wyandottes for many years, and openly declares he will raise them many years more, no preventing Providence. In his hands Silver Laced Wyandottes have proven themselves all a true fancier could hope for, and are unsurpassed as a utility breed. It is not how many, but how good, with him, so he has no room for anything but the best. We visited him in October and I never saw finer Laced Wyandottes. And not only were they indiscribably grand in lacing, but were large and grand in shape—tails well spread and head points excellent. Mr. Stewart raises all of his young stock on range and gives his breeders such excellent care the eggs seem remarkably strong in fertility. Mr. Stewart breeds from five to six pens and sells eggs from same pens as he sets himself. He has nothing on the side—thus applying the golden rule. The Stewart Silver Laced Wyandottes won in Cleveland (1910) on 3 entries, first pen, second cock and third pullet. Coshocton (1910), all firsts, seconds and specials. East Liverpool, President's cup for best pen in entire show; also all specials on Silvers. Newark, best display and all specials. Columbus (1911), 2 cocks, 3 hens, 3 pullet, 2 pen in class of 65. Cleveland (1911), 1 cock, 1 hen, 5 cockerels, 3 pullets, on four entries. Coshocton (1911), cup for best display of Wyandottes, all varieties competing, and all specials on Silver. Coshocton (1912), special for best display in entire show, and all specials on Silvers. Mr. Stewart puts out a fine catalog, which shows pictures of his famous winners and plainly states his method of doing business and prices. It is a wonderfully neat little book. Look up ad and write for catalog. Address G. F. Stewart, Coshocton, Ohio.—H. H. Coburn.

**WEJA FARM, NORTHFIELD, OHIO.**

One of the most beautiful, progressive and up-to-date poultry farms in our broad land is Weja Farm, picturesquely located, 16 miles south of Cleveland, on the A. B. C. electric line, stop 45, where classy Single Comb White Leghorns are raised and bred, by the thousand, for the fancy and utility end of the business. Mr. W. W. Darley, one of the most affable and entertaining young men, as well as a thorough fancier and man of great resources and keen intellect, is the owner and proprietor of this great specialty farm, where things are done on the wholesale plan. When starting into the fancy poultry business Mr. Darley bought out two of the best Single Comb White Leghorn experts in the business, Messrs. D. D. Whitaker, whose strain of Single Comb White Leghorns were known as the Edelweis strain, and Harmon Bradshaw, of Lebanon, Ind., and then with his business foresight, engaged both Messrs. Whitaker and Bradshaw for his superintendents, thus combining two great authorities and making a great team. Weja Farm consists of 130 acres of as fine a soil as there is in Ohio. Its fine drainage and abundant shade especially adapt it for the raising of the best and whitest Single Comb White Leghorns produceable. All the buildings are painted cream color, and the neat appearance of every thing in general, together with the fine grounds and beautiful trees, make the view most prepossessing. Under Mr. Darley's watchful eye and the thoroughness of Messrs. Whitaker's and Bradshaw's methods one can imagine the "sanitariness" of the conditions. The buildings are many and built with a view of the most possible convenience, and pleasing to the eye, and in harmony with the fine dwelling and grounds; and as follows: one laying house, 16x176 feet; 1 breeding house, 20x94 feet; 1 breeding house, 14x64 feet; another breeding house, 20x30 feet; 24 portable colony houses and incubator cellar, with a capacity of 9,000 eggs. Brooder house capacity 6,000 chicks. When the plant is completed it will house 10,000 layers, beside hundreds of males reserved for the fancy trade and own use. Weja Farm is planning to build up a large fancy market egg trade, using sealed cartons, and guaranteeing every egg to be perfectly fresh and from healthy stock, fed on the most wholesome foods. They are now in shape to handle a large baby chick business and ship chicks in special boxes, and assuming a safe arrival regardless of distance, season or weather. They also ship thousands of eggs in 1, 2, 3 and 500 lots, as well as hundreds of settings. It goes without saying, inasmuch as this farm caters to the fancy market trade, that anything running short of 200 eggs per

**PARKS' STRAIN OF BRED-TO-LAY****Barred Plymouth Rocks**

Have laid their way into popularity. They represent over twenty years of careful selection, and trapnesting for eggs, in addition to being bred close to the standard requirements, as our recent winnings show. Have no more cocks or pullets to spare, but a very nice selection of hens together with a nice lot of big, husky, healthy, well marked, hen-raised cockerels. Cockerel circular free. Am booking and filling orders for eggs. Selected eggs, \$5-15, \$8-30; \$11-50, \$20-100. Incubator eggs, \$2-15, \$6-50, \$10-100. Day-old chicks after March 1. **10,000 Roup Remedy Samples FREE**

We want to send to every reader of this paper a **Free Sample of B-K (Bacili-Kil)** the new non-poisonous, powerful, scientific compound which leading poultrymen say "knocks roup and kindred diseases quick." We want to prove it to you **before you buy**, therefore send for **Free Sample** today.

10 times as powerful as carbolic acid, but **Non-Poisonous**

**Odorless, Colorless, Germ Destroyer and Disinfectant**

For Cholera, Roup, Gapes, White Diarrhoea, etc. Will not cause fowls to drink less nor hens to slack up laying. Solves the poultry disease problem. Cost is trifling. One drop of B-K in 5 tablespoonfuls of water kills the roup germ.

Read this: "Received the 2 gal. B-K and like it very much. Our hens and chicks were dying with Roup and Cholera. We put B-K in the drinking water and sprayed the coops and houses and it did the trick all right. Our hens were coughing and we gave them B-K and they were soon well and healthy."—HENRY A. TAYLOR, Elkhorn, Wis.

Send for sample—prove it on your own fowls and farm animals. You'll be amazed at the results. Don't wait. Now is the time to test it—not after you have suffered heavy loss. **GENERAL PURIFICATION CO., 625 Pioneer Bldg., Madison, Wis.**

**Get a Yesterlaid Hatch!**

the Strain that lays heavy when egg prices are highest!

Below is a case of Yesterlaid Eggs. These eggs brought 63c a doz., wholesale, for table use, because they were laid when egg prices were highest and because their large, uniform size and dead white color command a premium of 5c to 20c in any

market! Hens that lay premium bringing eggs when the price of any eggs are 'way up, mean profits!

**Yesterlaid Range Raised Laying Leghorns**

have been specially bred for generations to be heavy winter layers of such eggs. A Yesterlaid hatch will give you a foundation of heavy winter layers of these premium price bringing eggs.

**95% fertility reported!**

A majority of reports on Yesterlaid hatches show 95% fertility. Yesterlaid methods of mating and feeding are such that high fertility is certain. Eggs from Yesterlaid breeders are large, dead white and uniform in size. Chicks hatch from these eggs like popping corn and inherit the vigor and strength of their famous progenitors—Lusty Tom and Lady Laymany—quickly developing into plump broilers or heavy winter layers of premium eggs.

Twelve experiment stations have ordered Yesterlaid stock because of super-superiority!

Here's what one says: "I am delighted to find your claim of 95% fertility substantiated. Of 100 eggs sent, we found only 3 infertile and one dead germ." Prof. W. A. Lippincott, Kansas Agricultural College: Some others make these reports: "The eggs I bought of you hatched 28 chicks from 30 eggs." G. Kennedy, Wright City, Mo. "Last Spring I bought eggs from you. The first pullet to lay started at 4 months and 11 days." B. Smith, Englewood, N. J. "Yesterlaid chicks developed into prize winners. One won first and sweepstakes as best cockerel in the show. Also won first and sweepstakes as best trio." K. K. Bowman, Bonne Terre, Mo.

**SPECIAL OFFER—to Mar. 1st**

For \$5 we will ship you, express prepaid (east of Rockies) two settings (30 eggs) of specially selected eggs from our first grade Standard matings—regular price \$6, f.o.b. Pacific. In addition we will send you "Poultrology" free—a complete practical text book on the methods of feeding, marketing, breeding, etc., which have made Yesterlaid Egg Farms so successful—written by the manager himself, Mr. R. C. Lawry. This book alone brings \$1 net. 144 pages—67 pictures. This offer is good only to Mar. 1st—and is made solely to get new customers, for we know that any body who gets Yesterlaid stock will order again. Order now—pin a five dollar bill to coupon, fill it out and mail TODAY.

S. C. White Leghorns only, in pens or for breeders. Also choice cockerels for sale. Get our prices on eggs for hatching, custom hatching, or day-old chicks. Write for our catalogue.  
**H. L. Davis, Manager - R. D. 3, Saratoga Springs, N. Y.**

## SUNNY SLOPE ANCONA FARMS

THE ACME OF PERFECTION

First at the leading shows in the world—London, England, Cleveland, Toledo, Allentown. We have some of the greatest birds in America in our yards this season, and will have thirty breeding pens mated up with nothing but tested yearling females, acknowledged the very highest type for ideal stock to be raised from. Booking orders for baby chicks and hatching eggs. Illustrated catalog free.

**J. O. SOMERS - R. F. D. 2 - BEDFORD, OHIO**

## ROSE'S ORPINGTONS WIN EVERYWHERE

### BLACKS AND BUFFS

LAST MADISON SQUARE GARDEN, BALTIMORE (same week)  
and BOSTON SHOWS

**Blacks won.** Baltimore, 1 cock; 3 and 5 hen; 1 and 2 cockerels; 1 and 3 pullets; 2 pen; Special best display; Special best bird in English classes. On the same dates we split our string, and with another team of Blacks won at MADISON SQUARE GARDEN, 2 cock, 4 hen, 2 cockerel, 4 pullet, 2 pen, proving beyond question their undoubted supremacy.

**Hugh A. Rose, Frank F. Conway, Mgr., Fonthill, Ontario, Canada**

## If I Buy Baby Chicks Will They Mature Into Pullets Like These?

Will they grow into birds that I can feel proud of and that will lay Winter eggs in quantities, or win the blue ribbons for me, or will they be just scrubs that's the question before everyone who buys day-old chicks. It is not the first price that counts, but will they be right at maturity?

### Caldwell's White Plymouth Rock (Fishel Strain) "Baby Chicks of Quality"

#### From Utility Matings

Will mature into long backed, well made birds pure white in color, that will be the secret of "Winter eggs." Every utility breeder is descended from known good layers that have been bred that way.

#### From Exhibition Matings

Will mature into blue ribbon winners. Every exhibition pen is made up of birds with good combs, of good type and chalk white in color, possessing the rich blood lines of generations of Fishel blue ribbon winners. Our birds were among the principal winners at the Indiana Fanciers' Show, Indianapolis, 1912.

#### Our Flocks Are Vigorous

All Fall our flocks have roamed meadows and woods accumulating health and vigor. They are now in Winter quarters so full of life and vitality that their chicks will be strong and sturdy.

#### Here Is the Caldwell Selling Plan

We are now booking orders for "Baby Chicks of Quality" for Spring delivery. We never have been in such fine shape to handle orders of any size. Our fine plant is fully stocked with the finest birds we ever owned of both utility and exhibition quality. An early placed order enables us to so arrange our hatchings that we save money. By your faith you are entitled to that saving so we will allow you discounts for early placed orders, the earlier the greater the discount. Safe arrival of chicks is guaranteed.

#### A New Catalog Is Now Ready

One of the finest ever issued by any breeder. It tells just how "Baby Chicks of Quality" are produced and describes every grade of stock that we have to sell with prices. A copy is ready for you.

**R. C. Caldwell : Box 1021 : Lyndon, Ross County, Ohio**

year is marketed. Leghorn eggs as a whole running very strong in fertility, and averaging about half cockerels—which are microscopically culled—makes a large broiler business possible, as they are always as healthy and plump as part-ridge. The Weja Single White Leghorns have made good in the show room at such great shows as Chicago, Boston, Cleveland, Pittsburgh, Indianapolis, Youngstown, Ohio, and West Virginia State fairs and many others. Winning at Cleveland, 1912, first and fourth cock, second cockerel, fourth pullet and fourth pen. Three silver cups and silver set club special. Also Cleveland, January 6 to 12, 1913, cock, first, second and third; hen, first, second and third; cockerel, third; pullet, first; pen, first and second. Silver cup for best display. Visitors are always welcome at Weja Farm. Look up ad in this issue, which is appearing for the first time. Cuts of view and birds will be seen later. Write for catalog.—H. H. Coburn.

### PORTABLE POULTRY HOUSES NOW WIDELY USED.

A few years ago if one wanted a new poultry house he sat down with pencil and paper and fretted and worried over the plans, figured out how much lumber, nails, etc., he needed, usually bought too much or too little, hired a carpenter at good wages and gave him his board and lodging free while he was on the job. When the house was completed it was not always what was expected, and when all the bills were paid the job had cost much more than the builder had counted on. But times have changed.

The American people are specialists, and if another fellow can do a thing better and cheaper than we can, we usually hire him to do his work while we spend our time more profitably at the thing we can do best. So it happened that T. F. Potter & Co., Downer's Grove, Ill., have built a large business in ready-made poultry houses and modern poultry equipment. This company will ship you almost any kind of a poultry house you want or any modern equipment you need, and when you receive it you can quickly and without the aid of a carpenter erect it on your place.

The house comes to you in sections ready to put up, all painted, trimmed, tightly fitted at the joints and durably constructed of the best materials. Each house also has the most up-to-date equipment and you are relieved of all the details. Strange to say, these houses can be bought ready made for probably less money than you can buy and build at home. The manufacturer buys his lumber and other materials in carloads at the mills, and cuts, fits and dresses the lumber by automatic machinery so that the saving in the cost of building enables him to quote you very low prices and still make his fair profit.

Another reason why portable houses have become so popular is that they can easily and quickly be taken apart for thorough cleaning or for moving to other locations. Every good poultryman knows that this last feature is a great advantage and a benefit to the health of his fowls.

T. F. Potter & Co. publish a very interesting book called "Modern Poultry Houses and Model Equipment," which shows their full line of portable houses and up-to-date equipment such as feed hoppers, fountains, coops, brooders, and the famous Potter henery outfits with vermin exterminator roosts, sliding nest boxes and vermin-proof drop boards. This book quotes prices that will no doubt save you money if you are in need of anything in this line. The company offers to send this book to any reader of our paper upon receipt of two red stamps to pay postage. In writing for their book we would be glad to have you mention American Poultry Journal.

#### WIN AGAIN AT CHICAGO.

Ira M. Crowther, Willoughby, Ohio, the well known breeder of Single Comb Rhode Island Reds, was again victorious at the great Chicago Show. The first prize hen being the greatest Single Comb Rhode Island Red in the world. It was Reds to the right of you, Reds to the left of you at the great Chicago Show, and the competition was exceptionally strong. Mr. Crowther won 1st and 5th here, and 5th cock against the big breeders of the East, South and West. In two great Chicago shows Mr. Crowther's Single Comb Reds have won 4th and two 5ths on cocks, two 1sts, 4th and 5th on hens, 1st on cockerel and 1st and 5th on pullets, 1st, 2d, 3d and 5th breeding pens

—best color on males, best shape on males, best color on hen, best shape on female lines. This is certainly going some.—H. H. Coburn.

#### F. A. POERTNER, BERE A, OHIO.

Mr. F. A. Poertner's Buff Poultry Farm lies about one mile west of Berea, Ohio, and about thirteen miles southwest of Cleveland, and contains fifty acres of very fertile and productive land, with excellent drainage and abundant shade and fruit trees. The buildings are built in, and on edge of very large orchard, so the conditions are right to grow 'em golden buff. The buildings are almost exclusively colony houses. Mr. Poertner is a most enthusiastic and thorough fancier and a stickler for sanitary conditions. The birds have unlimited range and consequently are very vigorous and healthy. At this writing Mr. Poertner has about 400 winning Golden Buff and buff to the skin, with practically not a suggestion of bronze, black, white or foreign color. The strain of Buff Orpingtons and Buff Wyandottes is known as the Wingold strain, and the famous winners are bred and raised at home. Mr. Poertner is an adept at mating birds to produce buff and never has to import his winners. Mr. Poertner very conscientiously mates up his breeding pens and will mate six pens of Buff Orpingtons and four pens of Buff Wyandottes for coming season. At the Cleveland Show, January 6 to 12, 1913, he won on Buff Orpingtons, second cock, fifth pullet and second pen. Other winners at same show being purchased from him or hatched from eggs purchased from him: Buff Wyandottes, first and second cock, first and second hen, third cockerel, first, second, third and fourth pullet; silver cup for best display. St. Louis, Mo., 1911, on 7 entries; won on Buff Wyandottes, first and second cock; first, second, third and fourth hen; 1 pen Buff Orpingtons, second and third cock; 1 hen, first pen, best display. Indianapolis, 11 entries, Buff Wyandottes, first and second cock; first, second and third hen; first and second cockerel; second and third pullet; first pen, best display and special trophy cup, all varieties competing. Buff Orpingtons, third and fifth cock; second hen; fifth cockerel; fifth pullet; fifth pen. Club meeting Wingolds, the only strain winning in every class and competing with Madison Square and Chicago winners. Winning club cup on best shape female in class of 51. Cleveland, in class of 151, Buff Orpingtons won highest honored prize, first pen, 13 pens competing; also first hen; third and fourth pullet; fourth cockerel. Buff Wyandottes, second and fourth cock second and fifth hen; fourth pullet; third pen and specials. Wingolds surely stood the test in three great shows last year. St. Louis, Cleveland and Indianapolis—75 competitors and 500 birds—won their supremacy, winning 29 firsts, 10 seconds, 12 thirds, 5 fourths and 9 fifths. Look up ad and write for catalog.—H. H. Coburn.

#### KELLER'S GREAT POULTRY FARM, PROSPECT, OHIO.

Everybody knows Keller, one of the oldest breeders of Wyandottes living, exhibiting since the early eighties. We had the pleasure of dining with him January 5 on the way to the Cleveland Show from Columbus. This great Wyandotte farm is in a class by itself. It consists of eighty-five acres and has buildings enough to house over 25,000 birds. When there Mr. Keller had about 2,000 birds on the farm. He has a complete miniature mill on place—most complete and up to date—bins on second floor, which hold 3,000 bushels of grain. Elevators for elevating grain to bins, gasoline engine grinds and mixes all grains—grinds and cracks corn; runs corn sheller, cuts alfalfa; in fact, does everything but get Mr. Keller up in the morning and gather the eggs. He has a feed cooker, too, in mill—a complete outfit.

Cockerel house is 16x70; pullet house, 14x75 feet; 20 colony houses, holding from 50 to 100 birds each. Mr. Keller gets neighboring farmers to raise birds for him. It is always a question of how many with him, as he runs short every year. He has the best Laced Wyandottes of any and his Golden Seabright Bantams are the most perfectly marked birds that ever grew. He ships to every state in the union, as well as exporting a goodly number. The Keller White, Golden and Silver Laced Wyandottes and Seabright Bantams winning wherever exhibited. He had a string at New York when I was there. Has shown at

## CONCENTRATION OF PURPOSE

The concentration of purpose of the Mount Pleasant Farm for the last ten years has produced the greatest known layers.

### THE MOUNT PLEASANT FARM SINGLE COMB WHITE LEGHORNS

DAY-OLD CHICKS  
EGGS FOR HATCHING

500 select cockerels, \$2 each.

Our methods of feeding, selecting and breeding are fully described in our new booklet, free. Write today.

Mount Pleasant Farm : Mount Pocono, Penna.

## Whiting's ROUPENE

Is a REAL cure for ROUP and CANKER that has been tested time after time on the worst cases, and never fails to make a complete cure even when the birds seemed too far gone to live.

With ROUPENE you do not have to shut your sick birds away from the rest of the flock. ROUPENE PREVENTS CONTAGION, and cures not only ROUP and CANKER, but also SOREHEAD, DIPHTHERIA, THRUSH, COLDS, GAGES and all diseases of the breathing organs of poultry.

With a bottle of ROUPENE handy you need not worry about your flock this Winter. Unlike other so-called remedies for Roup, birds cured by ROUPENE are as strong layers and breeders as those that have never had a touch of it. ROUPENE never weakens the birds. 50c and \$1 a bottle.

### Whiting's WHITE DIARRHOEA REMEDY

If your baby chicks are given Whiting's White Diarrhoea Remedy with their first feed they WILL NOT have Diarrhoea; if they already have it Whiting's White Diarrhoea Remedy will cure them. 50c a bottle.

### SEND FOR FREE PRINTED MATTER

And testimonials. We have two most wonderful cures for the worst disease, scourges of poultry raising.

Both guaranteed or money back. Sold by poultry supply dealers or mailed direct on receipt of price.

Galvanized Iron, Three Compartment

## FEED HOPPER

Saves feed, saves the worry and trouble of frequent feeding. It has one large division holding about four quarts, and two smaller compartments holding two quarts each. Rat and mice proof. Write for our new booklet B20 which gives complete details of these and other new poultry yard supplies.

Price, \$1.00

Oakes Manufacturing Co. : Tipton, Indiana

## O. K. Model ... Drinking Fountains

The latest and most improved sanitary drinking fountain on the market. It is so constructed as to leave an air space between the water pan and the outside shell which keeps the water cool in Summer and prevents freezing in the Winter. Easy to operate, nothing to break, made in three sizes as follows:

No. 1—6 inches diameter, 9 inches high, capacity one gallon.....\$1.25

No. 2—8 in. diameter, 12 in. high, capacity one gallon.....\$1.75

No. 3—10 in. diameter, 15 inches high, capacity one gallon...\$2.25

New York since 1891 and has won over 300 prizes there, not counting the many specials. Mr. Keller has shown at the Ohio State Show since 1886 and won every first on White Wyandottes repeatedly. One time at Chicago his birds won 39 prizes on 42 entries. At 10 shows in Chicago he won five firsts on White Wyandottes.

Mr. Keller mates 800 birds for the egg trade, and then has to return money. His pullet bred Laced cockerels are simply wonders and have reached a point of perfection that was not dreamed of a few years ago. Write for circular. Address Ira C. Keller, Prospect, Ohio.—H. H. Coburn.

#### MRS. McLANE'S S. C. REDS.

Mrs. Anna McLane, Huron, Ohio, is another woman who is making a success in a small way of the fancy poultry business. Mrs. McLane is an enthusiastic fancier and an excellent judge of good Reds. She raises good ones—and has a few fine cockerels to spare. She is mating up some fine pens for the coming egg trade and hopes to raise Reds of quality by the hundred for her own fancy business, as well as for a fancy egg trade. Her Reds won at Canton, Ohio, first cockerel and third pen—shape and color; special male, silver cup for best cockerel. Cleveland, 6 to 12 (1913), in the hottest kind of competition she won 5th cockerel and third pen on 3 entries, and that is going some for a woman fancier. Write for circular.—H. H. Coburn.

#### DIRK'S RED MITE KILLER.

At last M. E. Dirk, North Baltimore, Ohio, has solved the red mite proposition, and his name ought to get in the hall of fame. A great thing in the favor of Dirk's Red Mite Killer is it is non-poisonous, non-corrosive and non-fume producing, and is perfectly harmless and pleasant to use. Mr. Dirk will ship it on

approval, and if used according to directions and is unsatisfactory, you need not pay for it. This looks like a great risk, but so sure does it do the work that there is no risk taken. It is put up in one-quarter, one-half and one gallon cans. It has been used and recommended by such reliable fanciers as Judge Chas. V. Keeler, Winamac, Ind.; Gerald Williams, Wellington, Ohio; Chas. E. Crane, Carey, Ohio; W. R. Shank, Deshler, Ohio, and many others whose testimonials appear in Mr. Dirk's circular. Send for circular, and don't try to raise poultry without it. It will add dollars to your credit and give the birds a show for their lives. Pity the poor hen and little chicks. Address M. E. Dirk, Box 102, North Baltimore, Ohio.

#### THE E. W. GROVE LEGHORN FARM.

The Single Comb White Leghorn Farm, owned and superintended by E. W. Grove, Jr., Clayton, Mo., is one of the largest, if not the very largest specialty farms in the United States. At all events, it is the most popular. Mr. Grove has invested thousands of dollars in buildings and large sums to get the E. W. Grove Single Comb White Leghorns started with royal ancestry. Mr. Grove is a young man who maintains that what is worth doing at all is worth doing well, and he leaves no stone unturned to practice what he believes and preaches. He has been "brought up and raised" where he is used to seeing things done on the wholesale plan, being the son of E. W. Grove, the great Bromo-Quinine man, who sells over 7,000,000 boxes of Bromo-Quinine annually. He is a graduate of the Washington University, where he specialized in chemistry preparatory to engaging in business with his father, but the laboratory had no charms for young E. W., who had visions of broad acres and thousands of Single Comb White Leghorns, this breed being his favorite since early boyhood. As he grew older he recognized the great financial possi-

bilities in Single Comb White Leghorns, both as an ideal fancier fowl as well as the acknowledged money maker of all money makers on the utility side of the business. Mr. Grove has already distinguished himself and his Single Comb White Leghorns by making the largest sale to any one person ever made in Chicago. This stunt was performed at the Great Chicago Show, December, 1911, where Mr. E. W. made a \$6,000 sale; "secondly," he has the honor of having issued the finest and most costly catalog ever issued by a fancier, at the cost of thousands of dollars; he also issued them in the largest number. To say the book is a work of art is but putting it mildly. To say the famous artist, Mr. Louis Stahmer, did the work will give poultry critics a more definite conception. Dear Reader, do not be misled into thinking the beautiful book is all art; far from it. It is as weighty and full of valuable information as a Single Comb White Leghorn egg is full of meat and strong germs that produce hardy chicks. It is a book that should grace every library table or desk of every breeder or lover of the Single Comb White Leghorn. This valuable information cost Mr. Grove a great deal of study and personal hard work, even to the burning of midnight oil. It tells how to successfully raise and handle Single Comb White Leghorns in both small and large numbers, also how to feed and raise healthy chicks and how to build up a 200-egg per hen per year strain on the least possible cost—in fact, it touches and treats every branch of the business.

This wonderful farm is located on the interurban line, about thirteen miles out of St. Louis, at Clayton, Mo. The location is all that could be desired naturally and commercially, and it contains 120 acres of very fertile and consequently productive land that has fine drainage and hundreds of beautiful shade and fruit trees. The buildings are very fine

OCULUM increases egg yield 20 per cent; a free trial; ad page 280.

### PERKINS' PARTRIDGE PLYMOUTH ROCKS

EGGS FOR HATCHING—20 PENS MATED FOR THE TRADE. 2 pens, \$40; 3 pens, \$50; 4 pens, \$60; 5 pens, \$70; 6 pens, \$80; range flock, \$9 per setting. Beautiful mating list containing colored insert of pair of fowls free.

F. N. PERKINS

22 HARLEM ROAD

FREEMONT, ILLINOIS

BE SURE OF WINNERS, EGG PROFITS AND SATISFACTION BY BREEDING HUNTINGTON'S PEERLESS STRAIN

# S. C. W. LEGHORNS

PEERLESS BELLE

They are the acknowledged leaders of all Leghorns and are unmistakably the greatest money-earning fowl in the world today. In deciding where to place your order have you ever stopped even for a single instant to consider the importance of "keeping away" from injudiciously line-bred or in-bred weak, comparatively unproductive stock and giving preference to birds that you have every reason to believe are correct in the most vital of all things to be considered—health? I have spent fifteen years in carefully and correctly mating White Leghorns for best results and am absolutely certain that you can safely depend on my matings this season to furnish the most productive and showiest White Leghorns that it is possible to produce. I have invested a small fortune in stock to use in the crosses to breed out white-in-the-face, high tails and short station and if you are onto the art of conditioning show birds you can take chicks hatched from eggs from my yards one to four, and have a splendid chance of winning with them at any show in this country. If you are on a city lot or operating an egg farm be sure to read up on our combined utility and exhibition matings. The first cost may be a little more but this quality is the finest available and the price is very economical in the long run. Anyone can make money with birds that lay in Winter like these do. In fact I can see no way to fail. I claim to have matings that will produce winners for any show and you will agree with me when you read my free mating list which I will gladly mail on request. You will be interested in the reports from my customers. They are winning and making money everywhere. Please remember my business is furnishing winners rather than showing them myself, but I did make an exhibit at the Iowa State Show in December, 1912, and won, in the largest uniformly cooped show west of Chicago in recent years: 1-3-5 cocks, 2 hen, 1-2-5 cockerels, 1-2 pullets, 1-2-3 pens, besides three championship cups. I purposely forfeited entry fees at Chicago and my birds were received too late to compete at the St. Louis Show. Whether you are a beginner or experienced breeder or fancier by all means get my free mating list which will put you right and probably mean a big saving in cash. Do it today.

LEON C. HUNTINGTON

: BOX 12B

:

OMAHA, NEBRASKA

and built after Mr. Grove's unique and original plans, and are kept freshly painted. One of the main breeding houses is 15x120 feet and is divided into twelve pens from which are yards 12x80 feet. There is an alley running the entire length of the building for the convenience of the caretakers and for visitors, which come in large numbers. The building is built up on high walls, high enough to admit runways and scratch floors under the main floors. All the other long buildings are built after this plan. The south fronts have muslin-covered frames, which can be fastened up on warm and pleasant days and closed on cold and stormy ones and yet admit an abundance of pure fresh air. Another grand idea is the use of a cage in each pen for an extra male, to be alternated at will and to doubly insure strong fertility. A three-story feed-house and incubator cellar are connected with a brood house 12x168 feet. The grain is elevated to the top floor and from thence it passes through shutes connected with small feed boxes below. In the basement is the incubator cellar, equipped with 24 Cyphers company's incubators, having a capacity of 1,000 eggs, and other large machines, making the capacity about 12,000 eggs. The brood house is double walled; the intervening space is packed with straw, and is equipped with a hot-water pipe system, which is known as the Cyphers company's cradle back hoovers, which come in direct contact with the backs of the chicks. The pipes supply a continual uniform temperature, the heat being regulated by an automatic regulator. Mr. Grove says so perfectly does it work that the temperature does not vary a half of a degree. The house is divided into thirty-two pens with a capacity of 1,600 chicks. When chicks are old enough they are moved to another house, 12x120 feet. When cockerels become troublesome they are rigidly culled, some going the broiler route and the good ones in bachelor apartments. As soon as the pullets show signs of development and laying they are removed to a special laying house, 15x200 feet and which comfortably holds 1,500 birds. There are several other laying houses and many small houses used for molting and conditioning individual exhibition birds. The catalog will tell you more about the buildings. Last year Mr. Grove donated to the Single Comb White Leghorn Club the most beautiful trophy cup ever given. It was designed by him and made by an expert jeweler in St. Louis and cost \$800. Mr. Grove's Single Comb White Leghorns won at the great Mid-West Show in Chicago, December 13, in a class of 63 cockerels 1st cockerel, and in a class of 38 cocks won 1st cock, and in a class of 15 pens won 1st pen, which goes to prove that all Leghorns are not alike. At Chicago in 1911 the Grove Leghorns won in the hottest of competition, and that, too, without special preparation, 1st pullet, 2d cock and 4th cockerel. At the St. Louis Show last year, 1st and 2d cock, 2d cockerel and 1st pen. Mr. Grove guarantees 85 to 100 per cent fertility, and not an egg leaves his farm without the fac simile of his signature stamped upon it—none genuine without the signature. The Grove Single Comb White Leghorn book is the recognized authority on the breed. Your money returned if the book fails your expectations. Price, 50 cents. Mating list sent upon request. Do not procrastinate—get a book.—H. H. Coburn.

#### BEATTY'S R. AND S. C. REDS.
